What Stands in a Storm Kim Cross,2015-03-10 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America’s biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

A Storm Too Soon Michael J. Tougias,2013-01-15 FROM MASTERFUL STORYTELLER MICHAEL J. TOUGIAS COMES A NEW, HEART-STOPPING TRUE-LIFE TALE OF MARITIME DISASTER, SURVIVAL, AND DARING RESCUE, HIS MOST THRILLING AND AMAZING STORY YET. Seventy-foot waves batter a torn life raft 250 miles out to sea in one of the world’s most dangerous places, the Gulf Stream. Hanging on to the raft are three men, a Canadian, a Brit, and their captain, JP de Lutz, a dual citizen of America and France. Their capsized forty-seven-foot sailboat has filled with water and disappeared below the tempestuous sea. The giant waves repeatedly toss the men out of their tiny vessel, and JP, with nine broken ribs, is hypothermic and on the verge of death. The captain, however, is a remarkably tough character, having survived a brutal boyhood, and now he must rely on the same inner strength to outlast the storm. Trying to reach these survivors before it’s too late are four brave Coast Guardsmen battling hurricane-force winds in their Jayhawk helicopter. They know the waves will be extreme, but when they arrive they are astounded to find that the monstrous seas have waves reaching eighty feet. Lowering the wind-whipped helicopter to drop a rescue swimmer into such chaos will be extremely dangerous. The pilots wonder if they have a realistic chance of saving the sailors clinging to the broken life raft, and if they will be able to even retrieve their own rescue swimmer from the towering seas. Once they commit to the rescue, they find themselves in almost as much trouble as the survivors, facing one life-and-death moment after the next. Also caught in the storm are three other boats, each one in a Mayday situation. Of the ten people on these boats, only six will ever see land again. Spellbinding, harrowing, and meticulously researched, A Storm Too Soon is a vivid account about the powerful collision between the forces of nature and the human will to survive. Author Michael J. Tougias, known for his fast-paced writing style and character-driven stories, tells this true saga in the present tense to give the reader a thrilling, edge-of-your-seat immediacy. A Storm Too Soon is Tougias at his masterful best and a heart-pounding narrative of survival, the power of the human spirit, and one of the most incredible rescues ever attempted.

Chasing the Storm Ron Miller,2014-03-01 Huge, towering clouds build up in the sky?it's a super cell. The Doppler radar indicates that the system is rotating. But is there a funnel? Is it touching the ground? Only a storm chaser can confirm when a tornado is present?and help meteorologists warn nearby towns. Whenever severe weather threatens, storm chasers hit the road to hunt for tornadoes, hurricanes, or violent storms. Some drive thousands of miles in just a few days as they follow a storm system from Iowa to Texas. Others serve their cities and towns by taking photos from their backyards and phoning in storm details to local weather stations. Specially trained Hurricane Hunters hop into aircraft packed with scientific

instruments to fly deep into powerful hurricanes, hoping to reach the eye of the storm. Are storm chasers a bunch of foolish daredevils? Not at all. Many are scientists while others are professional photographers and videographers. Storm chasers arm themselves with training about severe weather, use sophisticated instruments, and follow safety guidelines. In *Chasing the Storm*, you'll meet real storm chasers and meteorologists, hear their stories, and discover how they do their work. You'll learn tornado basics, get a great window into the science of meteorology, and learn how to pursue a career in the field. You might even decide to become a storm chaser yourself!

Extreme Weather Robert K. Doe, 2016-01-12 This book is about weather extremes in the United Kingdom. It presents fascinating and detailed insights into tornadoes (supercell and non-supercell tornadoes, historical and contemporary case studies, frequency and spatial distributions, and unique data on extreme events); thunderstorms (epic event analysis and observing); hailstorms (intensity, distributions and frequency of high magnitude events); lightning (lightning as a hazard, impacts and injuries); ball lightning (definitions, impacts and case studies); flooding (historical and contemporary analysis, extreme rainfall and flash flooding); snowfalls (heavy snowfall days and events). It also looks at researching weather extremes, provides guidance on performing post-storm site investigations and details what is involved in severe weather forecasting. It is written by members, directors and past and present Heads of the research group the Tornado and Storm Research Organisation (TORRO). With fifteen chapters thematically arranged, and data appendix including a new tornado map of the U.K., this book presents a wealth of information on meteorological extremes. This volume is aimed primarily at researchers in the field of meteorology and climatology, but will also be of interest to advanced

undergraduate students taking relevant courses in this area.

Tornado Hunter Stefan Bechtel, Tim Samaras, 2009 METEOROLOGY. With climate change and global warming creating more frequent and more violent storms, there is a huge readership for weather disasters such as hurricanes and tornadoes. This book will appeal to the audience for the bestseller *Perfect Storm*. This page-turning story of tornado chaser and National Geographic grantee Tim Samaras opens with a chilling, play-by-play description of the F5 tornado that wiped off the map the town of Manchester, North Dakota, on June 24, 2003. Stefan Bechtel, author of the acclaimed *Roar of the Heavens* teams with Samaras to reveal the heart and people of the town, the terror of the descending funnel, Samaras' fearless chase to the tornado's core, and the ingenious equipment he masterminded to record the inner workings of a tornado - to aid in future detection, avoidance, and destruction.

Category 5 Ernest Zebrowski, Judith A. Howard, 2007-05-08 The epic story of the real victims of a perfect storm—overwhelmingly the poor—left behind in the aftermath of a deadly hurricane “A riveting new book.” —Tallahassee Democrat “Not simply an historical account of a storm thirty-seven years ago but a living, breathing entity brimming with the modern-day reality that, yes, it can happen again.” —American Meteorological Society Bulletin Fascinating, easy-to-read, yet informative.” —Richmond Times-Dispatch “Almost like sitting in front of the television watching the events unfold. A page-turner from the very first page.” —Ruston Morning Paper “There is much we can all learn from this relevant and highly engaging chronicle.” —Biloxi Sun Herald “A must-read for anyone who wants to take an emotional stroll through the rubble of these Gulf Coast fishing communities and learn what happened.” —Apalachicola Times “Should be required reading for anyone living in the path of these terrible storms.” —Moondance.org As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights, three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille. Camille's nearly 200 mile per hour winds and 28-foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi. Twenty-four oceangoing ships sank or were beached; six offshore drilling platforms collapsed; 198 people drowned. Two days later, Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County, Virginia—nearly three feet of rain in 24 hours. Mountainsides were washed away; quiet brooks became raging torrents; homes and whole communities were simply washed off the face of the earth. In this gripping account, Ernest Zebrowski and Judith Howard tell the heroic story of America's forgotten rural underclass coping with immense adversity and inconceivable tragedy. Category 5 shows, through the riveting stories of Camille's victims and survivors, the disproportionate impact of natural disasters on the nation's poorest communities. It is, ultimately, a story of the lessons learned—and, in some cases, tragically unlearned—from that storm: hard lessons that were driven home once again in the awful wake of Hurricane Katrina. Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University, a historically black university in Baton Rouge, Louisiana, and Professor of Physics at Pennsylvania State University's Pennsylvania College of Technology. His previous books include *Perils of a Restless Planet: Scientific Perspectives on Natural Disasters*. Judith Howard earned her Ph.D. in clinical social work from UCLA, and writes a regular political column for the Ruston, Louisiana, Morning Paper.

Death's Daughter: Phoenix Rising L.M. Feldt, 2020-04-29 What if your father was Death? As in the *Death*? What if he went missing? After three weeks her father's absence is having serious consequences. Without a Death to cut mortal tethers, sightings of shades and ghosts are starting to crop

up. The Black Council is no help and Alex is left to find her father on her own. Dodging child protective services, Alex travels to another world, accidentally dragging along her arch nemeses from school. To complicate matters she discovers she has powers of her own, one of fire and one of death. To survive in a world of vampires and sorcery she must learn to use her powers - but one causes unbearable pain and the other is slowly turning her into a an undead.

Hydrology Martin P. Wanielista,Robert Kersten,Ron Eaglin,1996-09-28 This edition of its popular predecessor has been significantly revised to increase flexibility in the presentation and maintain greater continuity of the material. Combining both theory and practical applications of empirical equations the text contains expanded treatment of water quantity and quality control, a detailed presentation of basic principles and use in analysis and design, hydrograph topics including synthetic and convolution techniques, practical and realistic case studies relating to design problems, and additional end-of-chapter problems. It provides new computer programs to explain complex concepts and solve large data-based problems. An additional appendix offers suggestions for classroom or lab problems.
