**Learning Node.js** Marc Wandschneider,2013 Learning Node.js LiveLessons provides developers with a practical introduction to Node.js, an exciting new platform for developing web and network applications. This video starts by introducing Node.js, installing and running it, and then gives a quick refresher course on the JavaScript language and its new features. It then moves into writing JSON servers, web applications, client-side templates, and continues by covering database access to both SQL and NoSQL database servers. After watching this video, developers will begin to understand why Node.js inspires so much passion, and should be able to write fast, compact and reliable applications and web servers.--Resource description page.

**Phantasms of the Living - Volume I.** Edmund Gurney,Frederic W. H. Myers,Frank Podmore,2020-08-06 This book contains the first of two volumes of “Phantasms of the Living”, an 1886 work on the subject of spiritualism by leading members of the Society for Psychical Research Edmund Gurney (1847 – 1888), Frederic W. H. Myers (1843 – 1901), and Frank Podmore (1856 – 1910). Within it, the authors have documented more than 700 cases of ghost sightings which they believe are in fact evidence of psychic ability. This volume contains an introduction by Myers as well as an outline of their analytical methods, while the rest is dedicated to telepathy, hallucinations, dreams, etc. “Phantasms of the Living” constitutes a pioneering study that provides a vivid insight into the Victorian fascination with the occult and the supernatural not to be missed by those with an interest in the subject. Contents include: “Preliminary Remarks: Grounds of Caution”, “The Experimental Basis: Thought-Transference”, “The Transition From Experimental to Spontaneous Telepathy”, “General Criticism of the Evidence for Spontaneous Telepathy”, “Note on Witchcraft”, etc. Many vintage books such as this are becoming

increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with the original text and artwork.

**Recent Trends in Algebraic Development Techniques** Jose L. Fiadeiro, 1999-07-28 The European conference situation in the general area of software science has long been considered unsatisfactory. A fairly large number of small and medium-sized conferences and workshops take place on an irregular basis, competing for high-quality contributions and for enough attendees to make them financially viable. Discussions aiming at a consolidation have been underway since at least 1992, with concrete planning beginning in summer 1994 and culminating in a public meeting at TAPSOFT'95 in Aarhus. On the basis of a broad consensus, it was decided to establish a single annual federated spring conference in the slot that was then occupied by TAPSOFT and CAAP/ESOP/CC, comprising a number of existing and new conferences and covering a spectrum from theory to practice. ETAPS'98, the first instance of the European Joint Conferences on Theory and Practice of Software, is taking place this year in Lisbon. It comprises five conferences (FoSSaCS, FASE, ESOP, CC, TACAS), four workshops (ACoS, VISUAL, WADT, CMCS), seven invited lectures, and nine tutorials.

**VLSI Specification, Verification and Synthesis** Graham Birtwistle, P.A. Subrahmanyam, 2012-12-06 VLSI Specification, Verification and Synthesis Proceedings of a workshop held in Calgary from 12-16 January 1987. The collection of papers in this book represents some of the discussions and presentations at a workshop on hardware verification held in Calgary, January 12-16 1987. The thrust of the workshop was to give the floor to a few leading researchers involved in the use of formal approaches to VLSI design, and provide them ample time to develop not only their latest ideas but also the evolution of these ideas. In contrast to simulation, where the objective is to assist in detecting errors in system behavior in the case of some selected inputs, the intent of hardware verification is to formally prove that a chip design meets a specification of its intended behavior (for all acceptable inputs). There are several important applications where formal verification of designs may be argued to be cost-effective. Examples include hardware components used in safety critical applications such as flight control, industrial plants, and medical life-support systems (such as pacemakers). The problems are of such magnitude in certain defense applications that the UK Ministry of Defense feels it cannot rely on commercial chips and has embarked on a program of producing formally verified chips to its own specification. Hospital, civil aviation, and transport boards in the UK will also use these chips. A second application domain for verification is afforded by industry where specific chips may be used in high volume or be remotely placed.

**Computer Science and its Applications** Sang-Soo Yeo, Yi Pan, Yang Sun Lee, Hang Bae Chang, 2012-10-19 The 4th FTRA International Conference on Computer Science and its Applications (CSA-12) will be held in Jeju, Korea on November 22~25, 2012. CSA-12 will be the most comprehensive conference focused on the various aspects of advances in computer science and its applications. CSA-12 will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in the area of CSA. In addition, the conference will publish high quality papers which are closely related to the various theories and practical applications in CSA. Furthermore, we expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject. CSA-12 is the next event in a series of highly successful International Conference on Computer Science and its Applications, previously held as CSA-11 (3rd Edition: Jeju, December, 2011), CSA-09 (2nd Edition: Jeju, December, 2009), and CSA-08 (1st Edition: Australia, October, 2008).

**Recent Trends in Algebraic Development Techniques** José Luiz Fiadeiro, 2005-03-23 This book constitutes the thoroughly refereed postproceedings of the 17th International Workshop on Algebraic Development Techniques, WADT 2004, held in Barcelona, Spain in March 2004. The 14 revised full papers

presented together with an invited paper were carefully selected during two rounds of reviewing and improvement. Among the topics addressed are formal methods for system development; specification languages and methods; systems and techniques for reasoning about specifications; specification development systems; methods and techniques for concurrent, distributed, and mobile systems; and algebraic and co-algebraic foundations.

Formal Methods in Programming and Their Applications Dines Bjorner, Manfred Broy, Igor V. Pottosin, 1993-10-05 This volume comprises the papers selected for presentation at the international conference on Formal Methods in Programming and Their Applications, held in Academgorodok, Novosibirsk, Russia, June-July 1993. The conference was organized by the Institute of Informatics Systems of the Siberian Division of the Russian Academy of Sciences and was the first forum organized by the Institute which was entirely dedicated to formal methods. The main scientific tracks of the conference were centered around formal methods of program development and program construction. The papers in the book are grouped into the following parts: - formal semantics methods - algebraic specification methods - semantic program analysis and abstract interpretation - semantics of parallelism - logic of programs - software specification and verification - transformational development and program synthesis.
