**Heidi E. Thompson, Marcy Morin**

**The Upcycle** William McDonough, Michael Braungart, 2013-04-16 Tackles resource scarcity and sustainability and describes how everyday objects from chairs to cars and factories are being redesigned to sustain and promote life.

**Upcycle This Book** Gavin Wade, 2017-02-17 Upcycle this book. Rewrite it as a manifesto. Steal and take and copy and change this book. Upcycle these twenty-three texts just as I have upcycled so many other texts and responded to many sets of existing conditions. Or unlike I have. Treat these words as existing conditions. Some of them are artworks. Some of them upcycle artworks by others. Some are barely texts at all. . . . Often the words are a script to be performed. Its useful to read words out loud in public. Gavin Wade is pragmatic utopian, an artist, artist-curator, artist-writer and one of the founding directors of Eastside Projects in Birmingham, UK. He has curated numerous exhibitions as well as written and published a number of books such as *Has Man a Function in Universe?* (Book Works, 2008). *Upcycle This Book* was co-published by Book Works and Stroom den Haag in an edition of 1,000.

**The Upcycle** William McDonough, Michael Braungart, 2013-04-16 From the authors of *Cradle to Cradle*, we learn what's next: *The Upcycle* is the eagerly awaited follow-up to *Cradle to Cradle*, one of the most consequential ecological manifestoes of our time. Now, drawing on the green living lessons gained from 10 years of putting the *Cradle to Cradle* concept into practice with businesses, governments, and ordinary people, William McDonough and Michael Braungart envision the next step in the solution to our ecological crisis: We don't just use or reuse and recycle resources with greater effectiveness, we actually improve the natural world as we live, create, and build. For McDonough and Braungart, the questions of resource scarcity and sustainability are questions of

design. They are practical-minded visionaries: They envision beneficial designs of products, buildings, and business practices—and they show us these ideas being put to use around the world as everyday objects like chairs, cars, and factories are being reimagined not just to sustain life on the planet but to grow it. It is an eye-opening, inspiring tour of our green future as it unfolds in front of us. The Upcycle is as ambitious as such classics as Rachel Carson's *Silent Spring*—but its mission is very different. McDonough and Braungart want to turn on its head our very understanding of the human role on earth: Instead of protecting the planet from human impact, why not redesign our activity to improve the environment? We can have a beneficial, sustainable footprint. Abundance for all. The goal is within our reach.

**Cradle to Cradle** William McDonough, Michael Braungart, 2010-03-01 A manifesto for a radically different philosophy and practice of manufacture and environmentalism. Reduce, reuse, recycle urge environmentalists; in other words, do more with less in order to minimize damage. But as this provocative, visionary book argues, this approach perpetuates a one-way, cradle to grave manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste, much of it toxic. Why not challenge the notion that human industry must inevitably damage the natural world? In fact, why not take nature itself as our model? A tree produces thousands of blossoms in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful, and highly effective; hence, waste equals food is the first principle the book sets forth. Products might be designed so that, after their useful life, they provide nourishment for something new—either as biological nutrients that safely re-enter the environment or as technical nutrients that circulate within closed-loop industrial cycles, without being downcycled into low-grade uses (as most recyclables now are). Elaborating their principles from experience (re)designing everything from carpeting to corporate

campuses, William McDonough and Michael Braungart make an exciting and viable case for change.

**Upcycling Sheltered Workshops** Susan Dlouhy, Patty Mitchell, 2015-03-01 At a time when the traditional sheltered workshop model has fallen under rightful criticism, and a new paradigm for disability programming is not yet in place, Upcycling Sheltered Workshops offers a revolutionary alternative. As many push to dismantle sheltered workshops, Susan Dlouhy and Patty Mitchell present the Creative Abundance Model, a proven method that redirects sheltered workshops from routine to creativity, putting participants in the driver's seat. The Creative Abundance Model does away with the repetitive tasks that characterize traditional workshops. Instead, it is a structured but more open program that incorporates art, music, and other creative pursuits, freeing participants to discover their individual skills and talents. The authors both advocate for the model and provide instructions for implementing it, outlining such steps as obtaining funding, gaining the support and participation of the surrounding community, and preparing studios. Case studies from around the nation and inspiring photographs illustrate Dlouhy and Mitchell's methods and document the many ways in which participants in Creative Abundance thrive.
