Urban Play Fabio Duarte,Ricardo Alvarez,2021-08-03 Why technology is most transformative when it is playful, and innovative spatial design happens only when designers are both tinkerers and dreamers. In *Urban Play*, Fábio Duarte and Ricardo Álvarez argue that the merely functional aspects of technology may undermine its transformative power. Technology is powerful not when it becomes optimally functional, but while it is still playful and open to experimentation. It is through play--in the sense of acting for one's own enjoyment rather than to achieve a goal--that we explore new territories, create new devices and languages, and transform ourselves. Only then can innovative spatial design create resonant spaces that go beyond functionalism to evoke an emotional response in those who use them. The authors show how creativity emerges in moments of instability, when a new technology overthrows an established one, or when internal factors change a technology until it becomes a different technology. Exploring the role of fantasy in design, they examine Disney World and its outsize influence on design and on forms of social interaction beyond the entertainment world. They also consider Las Vegas and Dubai, desert cities that combine technology with fantasies of pleasure and wealth. Video games and interactive media, they show, infuse the design process with interactivity and participatory dynamics, leaving spaces open to variations depending on the users' behavior. Throughout, they pinpoint the critical moments when technology plays a key role in reshaping how we design and experience spaces.

Urban Informatics Wenzhong Shi,Michael F. Goodchild,Michael Batty,Mei-Po Kwan,Anshu Zhang,2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently - to become 'smart' and 'sustainable'. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of 'big' data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

Formerly Urban Julia Czerniak, 2013-01-02 *Formerly Urban* is a collection of essays grounded in the belief that design, in all its manifestations, must play a central role in the revitalization of shrinking cities in America. The essays—by notable architects, landscape architects, and urban planners—argue that designers need to seize the opportunity to be the link between universities, local government, and private foundations. Only by participating from an urban project's inception can designers help shape design policy and the design of public works. *Formerly Urban* is for practitioners, urban thinkers, and anyone participating in the renewal and revitalization of our formerly urban centers.

Hound Dog True Linda Urban, 2011 The author of the acclaimed *A Crooked Kind of Perfect* comes the story of a fifth-grade girl who begins to see how one small, brave act can lead to a friend who is hound dog true.

ending. "Welcome to dinner, and again, congratulations on being selected. Now you must do the selecting." What do the queen bee, star athlete, valedictorian, stoner, loner, and music geek all have in common? They were all invited to a scholarship dinner, only to discover it's a trap. Someone has locked them into a room with a bomb, a syringe filled with poison, and a note saying they have an hour to pick someone to kill...or else everyone dies. Amber Prescott is determined to get her classmates and herself out of the room alive, but that might be easier said than done. No one knows how they're all connected or who would want them dead. As they retrace the events over the past year that might have triggered their captor's ultimatum, it becomes clear that everyone is hiding something. And with the clock ticking down, confusion turns into fear, and fear morphs into panic as they race to answer the biggest question: Who will they choose to die?

Urban Voices Susan Lobo, 2002-12-01 California has always been America's promised land—for American Indians as much as anyone. In the 1950s, Native people from all over the United States moved to the San Francisco Bay Area as part of the Bureau of Indian Affairs Relocation Program. Oakland was a major destination of this program, and once there, Indian people arriving from rural and reservation areas had to adjust to urban living. They did it by creating a cooperative, multi-tribal community—not a geographic community, but rather a network of people linked by shared experiences and understandings. The Intertribal Friendship House in Oakland became a sanctuary during times of upheaval in people's lives and the heart of a vibrant American Indian community. As one long-time resident observes, The Wednesday Night Dinner at the Friendship House was a must if you wanted to know what was happening among Native people. One of the oldest urban Indian organizations in the country, it continues to serve as a gathering place for newcomers as well as for the descendants of families who arrived half a century ago. This album of essays, photographs, stories, and art chronicles some of the people and events that have played—and continue to play—a role in the lives of Native families in the Bay Area Indian community over the past seventy years. Based on years of work by more than ninety individuals who have participated in the Bay Area Indian community and assembled by the Community History Project at the Intertribal Friendship House, it traces the community's changes from before and during the relocation period through the building of community institutions. It then offers insight into American Indian activism of the 1960s and '70s—including the occupation of Alcatraz—and shows how the Indian community continues to be created and re-created for future generations. Together, these perspectives weave a richly textured portrait that offers an extraordinary inside view of American Indian urban life. Through oral histories, written pieces prepared especially for this book, graphic images, and even news clippings, *Urban Voices* collects a bundle of memories that hold deep and rich meaning for those who are a part of the Bay Area Indian community—accounts that will be familiar to Indian people living in cities throughout the United States. And through this collection, non-Indians can gain a better understanding of Indian people in America today. If anything this book is expressive of, it is the insistence that Native people will be who they are as Indians living in urban communities, Natives thriving as cultural people strong in Indian ethnicity, and Natives helping each other socially, spiritually, economically, and politically no matter what. I lived in the Bay Area in 1975-79 and 1986-87, and I was always struck by the Native (many people do say 'American Indian' emphatically!) community and its cultural identity that has always insisted on being second to none. Yes, indeed this book is a dynamic, living document and tribute to the Oakland Indian community as well as to the Bay Area Indian community as a whole. —Simon J. Ortiz When my family arrived in San Francisco in 1957, the people at the original San Francisco Indian Center helped us adjust to urban living. Many years later, I moved to Oakland and the Intertribal Friendship House became my sanctuary during a tumultuous time in my life. The Intertribal

Friendship House was more than an organization. It was the heart of a vibrant tribal community. When we returned to our Oklahoma homelands twenty years later, we took incredible memories of the many people in the Bay Area who helped shape our values and beliefs, some of whom are included in this book. –Wilma Mankiller, former Principal Chief, Cherokee Nation

The Matt Urban Story Matt Urban, Charles Conrad, 1989 A unique narration by Lt. Colonel Matt Urban (Medal of Honor Recipient) emotionally involves readers in World War II battles on three continents & his final battle ending with a bullet through Urban's neck. Urban's book is different: Larger easy-reader print for old soldiers. Story action is on the right pages; photos & facts on the left do not interrupt reader progress. Also, a veteran can create a personal war diary on special lined pages. Readers hit the beach as thousands of sevicemen invade Africa. They share experiences with Do or Die orders, Kill or Be Killed actions, meet & defeat German Field Marshall Erwin Rommel, the Desert Fox. We join the 9th Division Invasion of Sicily & Urban's miraculous Silent March to outflank German forces. Urban goes AWOL from an English hospital. He hobbles to the Normandy front & leads his troops on the break-out at St. Lo. This earned Urban's Medal of Honor recommendation. Thousands of soldiers had individual battles to win, & their collective effort brought victory according to Urban. He also believes the collapse of Communism is the result of victories of World War II, Korea, Vietnam & current military preparedness.

Urban Informality Ananya Roy, Nezar AlSayyad, 2004 The turn of the century has been a moment of rapid urbanization. Much of this urban growth is taking place in the cities of the developing world and much of it in informal settlements. This book presents cutting-edge research from various world regions to demonstrate these trends. The contributions reveal that informal housing is no longer the domain of the urban poor; rather it is a significant zone of transactions for the middle-class and even transnational elites. Indeed, the book presents a rich view of urban informality as a system of regulations and norms that governs the use of space and makes possible new forms of social and political power. The book is organized as a transnational endeavor. It brings together three regional domains of research--the Middle East, Latin America, and South Asia--that are rarely in conversation with one another. It also unsettles the hierarchy of development and underdevelopment by looking at some First World processes of informality through a Third World research lens.

Urban Operating Systems Andres Luque-Ayala, Simon Marvin, 2020-12-15 A new wave of enthusiasm for smart cities, urban data, and the Internet of Things has created the impression that computation can solve almost any urban problem. Subjecting this claim to critical scrutiny, in this book, Andrés Luque-Ayala and Simon Marvin examine the cultural, historical, and contemporary contexts in which urban computational logics have emerged. They consider the rationalities and techniques that constitute emerging computational forms of urbanization, including work on digital urbanism, smart cities, and, more recently, platform urbanism. They explore the modest potentials and serious contradictions of reconfiguring urban life, city services, and urban-networked infrastructure through computational operating systems—an urban OS. Luque-Ayala and Marvin argue that in order to understand how digital technologies transform and shape the city, it is necessary to analyze the underlying computational logics themselves. Drawing on fieldwork that stretches across eleven cities in American, European, and Asian contexts, they investigate how digital products, services, and ecosystems are reshaping the ways in which the city is imagined, known, and governed. They discuss the reconstitution of the contemporary city through digital technologies, practices, and techniques, including data-driven governance, predictive analytics, digital mapping, urban sensing, digitally enabled control rooms, civic hacking, and open data narratives. Focusing on the relationship between the emerging operating systems of the city and their traditional infrastructures, they shed

light on the political implications of using computer technologies to understand and generate new urban spaces and flows.

Grounding Urban Natures Henrik Ernstson, Sverker Sörlin, 2019-09-03 Case studies from cities on five continents demonstrate the advantages of thinking comparatively about urban environments. The global discourse around urban ecology tends to homogenize and universalize, relying on such terms as “smart cities,” “eco-cities,” and “resilience,” and proposing a “science of cities” based largely on information from the Global North. Grounding Urban Natures makes the case for the importance of place and time in understanding urban environments. Rather than imposing a unified framework on the ecology of cities, the contributors use a variety of approaches across a range of locales and timespans to examine how urban natures are part of—and are shaped by—cities and urbanization. Grounding Urban Natures offers case studies from cities on five continents that demonstrate the advantages of thinking comparatively about urban environments. The contributors consider the diversity of urban natures, analyzing urban ecologies that range from the coastal delta of New Orleans to real estate practices of the urban poor in Lagos. They examine the effect of popular movements on the meanings of urban nature in cities including San Francisco, Delhi, and Berlin. Finally, they explore abstract urban planning models and their global mobility, examining real-world applications in such cities as Cape Town, Baltimore, and the Chinese “eco-city” Yixing. Contributors Martín Ávila, Amita Baviskar, Jia-Ching Chen, Henrik Ernstson, James Evans, Lisa M. Hoffman, Jens Lachmund, Joshua Lewis, Lindsay Sawyer, Sverker Sörlin, Anne Whiston Spirn, Lance van Sittert, Richard A. Walker

Urban America David R. Goldfield, Blaine A. Brownell, 1990 The second edition of Urban America, like the first edition, is distinguished by its emphasis on the spatial relationships within and between cities. This emphasis a study of the geographical patterns of residential, commercial, political, and cultural development, allows a balanced, flexible examination of the varied aspects of urban life. It permits a comprehensive look at the social, economic, political, and cultural history of the city. At the same time, this edition minimizes its review of spatial theory; many students and instructors told us the theoretical material tended to encumber rather than enlighten. -- Preface.

Introduction to Urban Science Luis M. A. Bettencourt, 2021-08-17 A novel, integrative approach to cities as complex adaptive systems, applicable to issues ranging from innovation to economic prosperity to settlement patterns. Human beings around the world increasingly live in urban environments. In *Introduction to Urban Science*, Luis Bettencourt takes a novel, integrative approach to understanding cities as complex adaptive systems, claiming that they require us to frame the field of urban science in a way that goes beyond existing theory in such traditional disciplines as sociology, geography, and economics. He explores the processes facilitated by and, in many cases, unleashed for the first time by urban life through the lenses of social heterogeneity, complex networks, scaling, circular causality, and information. Though the idea that cities are complex adaptive systems has become mainstream, until now those who study cities have lacked a comprehensive theoretical framework for understanding cities and urbanization, for generating useful and falsifiable predictions, and for constructing a solid body of empirical evidence so that the discipline of urban science can continue to develop. Bettencourt applies his framework to such issues as innovation and development across scales, human reasoning and strategic decision-making, patterns of settlement and mobility and their influence on socioeconomic life and resource use, inequality and inequity, biodiversity, and the challenges of sustainable development in both high- and low-income nations. It is crucial, says Bettencourt, to realize that cities are not zero-sum games and that knowledge, human cooperation, and collective action can build a better future.

The New Arab Urban Harvey Molotch, Davide Ponzini, 2019-02-05 Cities of the Arabian Peninsula reveal contradictions of contemporary urbanization The fast-growing cities of the Persian Gulf are, whatever else they may be, indisputably sensational. The world's tallest building is in Dubai; the 2022 World Cup in soccer will be played in fantastic Qatar facilities; Saudi Arabia is building five new cities from scratch; the Louvre, the Guggenheim and the Sorbonne, as well as many American and European universities, all have handsome outposts and

campuses in the region. Such initiatives bespeak strategies to diversify economies and pursue grand ambitions across the Earth. Shining special light on Dubai, Abu Dhabi, and Doha—where the dynamics of extreme urbanization are so strongly evident—the authors of *The New Arab Urban* trace what happens when money is plentiful, regulation weak, and labor conditions severe. Just how do authorities in such settings reconcile goals of oft-claimed civic betterment with hyper-segregation and radical inequality? How do they align cosmopolitan sensibilities with authoritarian rule? How do these elite custodians arrange tactical alliances to protect particular forms of social stratification and political control? What sense can be made of their massive investment for environmental breakthrough in the midst of world-class ecological mayhem? To address such questions, this book's contributors place the new Arab urban in wider contexts of trade, technology, and design. Drawn from across disciplines and diverse home countries, they investigate how these cities import projects, plans and structures from the outside, but also how, increasingly, Gulf-originated initiatives disseminate to cities far afield. Brought together by noted scholars, sociologist Harvey Molotch and urban analyst Davide Ponzini, this timely volume adds to our understanding of the modern Arab metropolis—as well as of cities more generally. Gulf cities display development patterns that, however unanticipated in the standard paradigms of urban scholarship, now impact the world.
