Hard Charger! James A Treadway, 2005-07 *Hard Charger* is the story of a Cold War cruiser, the USS Biddle (DLG-34), the last Navy cruiser powered by conventional steam, the last of the single-ended guided missile frigates, the last ship of her class, but the first on the front lines. Biddle's story is traced from when her combat systems were conceived soon after the end of World War II and then designed and built during the 50's and 60's, to her construction, commission, shakedown, combat assignments in Vietnam, her battle at PIRAZ, overhauls, upgrades, training exercises and cruises to the North Atlantic and Mediterranean, and finally her decommissioning. The story is told by the officers and men who served aboard her - captains and deckhands, technicians and engineering officers, chiefs petty officers, plankowners and her decommissioning crew. Though Biddle is gone, her remarkable story remains, as does the freedom she helped protect. Historians, those currently involved with Navy combat systems, and those who served aboard a similar ship or during the Cold War will find Biddle's story interesting and thought provoking. *Hard Charger* is the only book written about Biddle or any Belknap class cruiser.

The USS Arizona Joy Waldron Jasper, James P. Delgado, Jim Adams, 2003-11-17 This vivid account of the events of December 7, 1941, details what occurred on the ship that suffered the loss of 1,177 men and how it was transformed into a potent symbol of American grit and resolve. photos. The USS Flier Michael Sturma, 2008-02-15 The fate of the USS Flier is one of the most astonishing stories of the Second World War. On August 13, 1944, the submarine struck a mine and sank to the bottom of the Sulu Sea in less than one minute, leaving only fourteen of its crew of eighty-six hands alive. After enduring eighteen hours in the water, eight remaining survivors swam to a remote island controlled by the Japanese. Deep behind enemy lines and without food or drinking water, the crewmen realized that their struggle for survival had just begun. On its first war patrol, the unlucky Flier made it from Pearl Harbor to Midway where it ran aground on a reef. After extensive repairs and a formal military inquiry, the Flier set out once again, this time completing a distinguished patrol from Pearl Harbor to Fremantle, Western Australia. Though the Flier's next mission would be its final one, that mission is important for several reasons: the story of the Flier's sinking illuminates the nature of World War II underwater warfare and naval protocol and demonstrates the high degree of cooperation that existed among submariners, coast watchers, and guerrillas in the Philippines. The eight sailors who survived the disaster became the first Americans of the Pacific war to escape from a sunken submarine and return safely to the United States. Their story of persistence and survival has all the elements of a classic World War II tale: sudden disaster, physical deprivation, a ruthless enemy, and a dramatic escape from behind enemy lines. In *The USS Flier: Death and Survival on a World War II Submarine*, noted historian Michael Sturma vividly recounts a harrowing story of brave men who lived to return to the service of their country.

U.S.S. Cod (SS-224) J. T. McDaniel, 2005 Today tied up on the Cleveland, Ohio waterfront, U.S.S. Cod is the lowest numbered surviving World War II American fleet submarine. During the war, Cod made a total of seven war patrols, operating from Australia, Hawaii and Guam. This book contains the complete text of the war patrol reports submitted by her three wartime commanding officers, Commander James C. Dempsey, Commander James A. Adkins, and Lieutenant Commander Edwin M. Westbrook, Jr. Also included is an Introduction and notes by popular submarine novelist and historian J.T. McDaniel.

The USS Ward Richard P. Klobuchar,2015-05-20 In 1940, the threat of war in the Pacific forced the United States to expand its fleet quickly. This effort included reconditioning and recommissioning “four stackers” from the navy’s reserve fleet. Built in 1918 to fight German submarines, the USS Ward earned at Pearl Harbor the distinction of firing the first shot in America’s war against Japan. In the three years that followed, it was bombed, shelled, strafed, and finally sunk (on December 7, 1944), yet none of her crew of 125 men ever lost a life in combat. Information is drawn from naval records as well as from interviews with surviving crewmen. Appendices provide Ward technical data, a chronology of major events, listings of citations earned in World War II and of amphibious landings, and a roster of personnel.

USS Dorado (SS-248) Douglas E. Campbell,2011-10 We knew we were going to have a rough time with this submarine from the beginning. Those words were written by Don Wheeler, a former DORADO crewmember who participated in the sea trials, in a letter to the author. DORADO was a U.S. Gato-class submarine, launched on May 23, 1943, set sail for Pearl Harbor via the Panama Canal on October 6, and was lost with all hands somewhere in the Caribbean Sea six days later. This book is quite possibly about one of the worst friendly fire incidents in U.S. military history. It is the story of a U.S. submarine attacked by a patrol-bomber aircraft attached to VP-210 out of Guantanamo Bay, Cuba. Within these pages you will read the formal Court of Inquiry that concluded, incorrectly, that the aircrew probably bombed a U-boat that was known to be in the area. Included in this book is the U-214 logbook which shows that they witnessed the bombing of DORADO. In this book is also the story of the author's search for the submarine over a 20+ year period.

USS Massachusetts Turner Publishing,1997 Includes biographies of sailors who served on the ship.

USS New York ,2002

The Uss Blessman and I Edward Hinz,2007-12-10 As a memoir of shipboard life during World War II, the story is an accurate depiction of life aboard a combat vessel during the invasions of Normandy, Lingayen Gulf in the Philippines, Iwo Jima, and landing in Wakayama, Japan. From escorting convoys crossing the Atlantic and working with Under Water Demolition Team UDT15 now called Seals, in the Pacific, the USS Blessman survived a 500 pound bomb blast at Iwo Jima. After limping to Mare Island for repairs, she sailed at full speed carrying UDT-17 team to join the forces landing on Japan soil.

Thunder Below! Eugene B. Fluckey,2013-04-01 The thunderous roar of exploding depth charges was a familiar and comforting sound to the crew members of the USS Barb, who frequently found themselves somewhere between enemy fire and Davy Jones's locker. Under the leadership of her fearless skipper, Captain Gene Fluckey, the Barb sank the greatest tonnage of any American sub in World War II. At the same time, the Barb did far more than merely sink ships-she changed forever the way submarines stalk and kill their prey. This is a gripping adventure chock-full of you-are-there moments. Fluckey has drawn on logs, reports, letters, interviews,

and a recently discovered illegal diary kept by one of his torpedomen. And in a fascinating twist, he uses archival documents from the Japanese Navy to give its version of events. The unique story of the Barb begins with its men, who had the confidence to become unbeatable. Each team helped develop innovative ideas, new tactics, and new strategies. All strove for personal excellence, and success became contagious. Instead of lying in wait under the waves, the USS Barb pursued enemy ships on the surface, attacking in the swift and precise style of torpedo boats. She was the first sub to use rocket missiles and to creep up on enemy convoys at night, joining the flank escort line from astern, darting in and out as she sank ships up the column. Surface-cruising, diving only to escape, Luckey Fluckey relentlessly patrolled the Pacific, driving his boat and crew to their limits. There can be no greater contrast to modern warfare's long-distance, videogame style of battle than the exploits of the captain and crew of the USS Barb, where they sub, out of ammunition, actually rammed an enemy ship until it sank. *Thunder Below!* is a first-rate, true-life, inspirational story of the courage and heroism of ordinary men under fire.

The Sinking of the USS Cairo John C. Wideman, 2009-09-28 In 1862, in one of the South's most amazing secret operations, a Confederate team, using newly invented explosive mines, blew up the USS Cairo, one of the Union's most feared ironclad gunboats. It sank within minutes. The USS Cairo is the only remaining vessel from the Union navy's river fleet. For 102 years, the ironclad rested deep in the mud of the Yazoo River. In 1964 it was rediscovered and salvaged. Now the USS Cairo is one of the premier exhibits at the Vicksburg National Military Park. This historic vessel, its entire cargo of weapons and personal effects, and its role in the war continue to spark the imagination of Civil War buffs and thousands of tourists. Here, for the first time, in a carefully documented study is the entire story of the Confederate Secret Service team that sank the USS Cairo. With family oral histories never before consulted and with newly examined documents from the National Archives, *The Sinking of the USS Cairo* disproves some previous theories and corrects factual errors found in earlier reports. It shows conclusively that the Cairo was not sunk by "an electrically detonated mine" but by a different method. Also, it identifies the members of the Confederate crew, whose names supposedly were "lost to history." For the first time in a book about this river war, there are illustrations of all five gunboats that were engaged in this action. Told from the Confederate perspective for the first time, this refocused story of the Cairo is a significant addition to the history of the Confederate Secret Service, to the history of the operations around Vicksburg, and to the history of the war on the western frontier.

Strike Able-Peter John A. Butler, 1995 In January 1950, shortly after leaving Norfolk, Virginia, the USS Missouri ran aground in the Chesapeake Bay. The mishap captured the curiosity of Americans from coast to coast, and as the nation looked on an embarrassed Navy frantically tried to refloat the warship - for two weeks. The eventual recovery set lasting records in the history of organized marine salvage. This book provides a minute-by-minute account of the grounding, the root cause of which has never before been made public.

USS Grand Rapids (PG-98) Bruce Holdt, 2014-12-20 THE BOOK I HAD TO WRITE I spent 30 years of my life as a US Navy Officer. All those years were great. But the one year, 1976, was the best year of my life. I was the Commanding Officer of the best ship in the US Navy. I had the finest crew anyone could hope for. I hope you enjoy reading this book as much as I enjoyed writing it.

The USS Puffer in World War II Craig R. McDonald, 2008-01-25 Submarines were responsible for about 55 percent of the tonnage of the Japanese fleets sunk during World War II. The 22 percent casualty rate of U.S. submariners was the highest of the military services. This volume traces the career of the submarine the USS Puffer from the laying of her keel and her commissioning on

April 27, 1943, until her departure for the scrap yard in late 1960. Compiled from interviews with former crew members, including the author's father, Donald B. McDonald, as well as other contemporary sources, it follows the crew of the Puffer through nine war patrols. Events recollected include the First War Patrol, which resulted in a record-setting 38 hour submergence because of enemy fire; the dangerous transfer of torpedoes while surfaced in enemy waters; and the wild bombardment of Japanese shore installations with the 5-inch deck gun. There are numerous wartime photographs and appendices providing a list of awards earned by the crew and a summary of claimed successful attacks. Brief biographies of the seven commissioned officers are also included.

The Battleship USS Iowa Stefan Draminski, 2020-01-23 USS Iowa (BB-61) was the lead ship in one of the most famous classes of battleships ever commissioned into the US Navy. Transferred to the Pacific Fleet in 1944, the Iowa first fired her guns in anger in the Marshall Islands campaign, and sunk her first enemy ship, the Katori. The Iowa went on to serve across a number of pivotal Pacific War campaigns, including at the battles of the Philippine Sea and Leyte Gulf. The ship ended the war spending several months bombarding the Japanese Home Islands before the surrender in August 1945. After taking part in the Korea War, the Iowa was decommissioned in 1958, before being briefly reactivated in the 1980s as part of President Reagan's 600-Ship Navy Plan. After being decommissioned a second and final time in 1990, the Iowa is now a museum ship in Los Angeles. This new addition to the Anatomy of the Ship series is illustrated with contemporary photographs, scaled plans of the ship and hundreds of superb 3D illustrations which bring every detail of this historic battleship to life.

Warship Earl Brannock, 2014-04-21 Americans have been a seafaring people, since before the first Jamestown and Plymouth settlements, as British ships plied the Atlantic conducting coastal trade. It is no wonder then that, even when a small nation, the U. S. Navy proved itself a force to be reckoned with. This tradition continues, as the United States deploys the strongest naval forces in the world. Over three centuries, thousands of American warships and their crews, manning both commissioned vessels and privateers, have helped defend liberty at home and fought for freedom abroad. This monograph describes three of those belligerents, all named CHESTER, all of which achieved sterling records of valiant service. The first CHESTER, an armed galley, fought during the American Revolution, as part of the Continental Navy. Fittingly, it was sponsored by the Maryland Colony, a shipping powerhouse, even during the eighteenth century, and named after its construction location, Chestertown, Maryland. Author Brannock also hails from Maryland and a seafaring heritage. Another CHESTER, a light cruiser, did not emerge until just prior to World War I. It was also named after its mid-Atlantic shipbuilding town, Chester, Pennsylvania. Its crews served in the Great War, mostly on convoy duty, during the submarine warfare engaged in with German U-boats. The third USS CHESTER (CA-27), also a light cruiser, was commissioned in 1930, and also named after Chester, Pennsylvania. Brannock's account of the duties it performed during the interwar years provides a unique portrayal of life as a U. S. Navy sailor at that time. Political upheavals in nations where American citizens and interests had to be protected were prevalent in Central America, and diplomatic and military missions were carried out, while an arms race engulfed Europe. Moreover, during the glamorous 1930s, millions traveled on ocean-going liners and so naval vessels were greeted in foreign ports by enthusiastic crowds and celebrations. CHESTER crews were feted on two continents. Yet as the decade went on, war clouds darkened, world-wide. By 1941, the United States was in a quasi-war with Germany on the Atlantic Ocean, and Americans in Asia were threatened by Japanese occupation. USS CHESTER steamed into Pearl Harbor naval base in the early afternoon of December 7, 1941, missing the brunt of the early morning Japanese bombings, due to delays caused by a storm at sea. From that day on, CHESTER was

active in nearly every major engagement in the Pacific Theater, during World War II. Legendary officers like William “Bull” Halsey commanded CHESTER’s units. Adm. Arleigh Burke served on CHESTER. By 1943, author Brannock had joined the crew as a young enlisted sailor, but one who had logged many hours underway, while serving in the Maryland State Fishery Force. Thus, as a quartermaster on CHESTER’s bridge, Brannock had a gull’s eye view of the battles. His perspective was enhanced by the fact that CHESTER often served as flagship for Cruiser Division 5 and various task forces to which it was temporarily assigned. For these obvious reasons, the account of USS CHESTER’s World War II service comprises the bulk of this book. Because Brannock personally collected the ship’s archives and memoirs, the work offers an unequaled, first-hand and official rendition of the war service of one ship, its officers, and crew. Although thousands of books have been written on World War II, most cover broader subject matter; so small technical and tactical details can be lost. But readers miss little with this tract. So sail along on a riveting ride across two centuries, two oceans, and four continents in this spirited tale of life, duty, and combat on board three American warships, all named CHESTER.
