Finding Paradise Jane Ver Mulm,2020-09-17 To what lengths must they go in order to discover a paradise of their own? Ellen Schmidt finds herself out of step with the world around her. Considered a spinster in her community, her closest friends are the slaves that her family owns. After her father arranges her marriage, she must face a cruel set of circumstances and the beginning of the Civil War, setting her on a path that seems to be out of her control. Strong and independent, Ellen continues in her own unique way to forge a future that can include a paradise of her own. "Finding Paradise was a beautiful story of fierce loyalty and love during one of the hardest times in American history. I've found myself missing the characters that I fell in love with long after I read the last page." —Kathy Godfredsen, The Rock Valley Bee "A compelling novel of the Civil War era, the author has created strong characters who stand up to unexpected challenges, families torn apart, and forbidden love. Finding Paradise will appeal to readers of both romance and American history." —Flora Beach Burlingame, author of Charcoal and Chalk: John Ogilvie and the Beginnings of Black Education in Texas

German Ver-verbs Matthias Klaus Schirmeier,2007 One of the central questions in psycholinguistics is how complex words are processed in the human mind. German ver-Verbs: Internal Word Structure and Lexical Processing explores the visual word recognition of German ver-verbs. Superficially, ver-verbs are uniform: they all begin with the sequence ver-. However, their internal structure is heterogeneous. Based on the results of various experimental designs, this book shows that the internal structure of ver-verbs is of paramount importance to their processing. Thus, the human mind employs different strategies for the processing of different types of complex words. This book is a useful companion for German, morphology, and psycholinguistics courses.

Phenomenology and Lacan on Schizophrenia Alphonse de Waelhens,Wilfried Ver Eecke,2001 In Phenomenology and Lacan on Schizophrenia, Alphonse De Waelhens provides a clear summary of Lacan's theory of schizophrenia, as Lacan derived it from his commentary of Freud's study of the Memoirs of Schreber. De Waelhens also shows how Lacan's understanding of the schizophrenic as having a defective relation to language can also explain four other characteristics of schizophrenic behavior: the fragmented body image; lack of realistic evaluation of the world; so-called bisexuality; and confusion of birth and death. Third, De Waelhens gives a Hegelian interpretation of the pre-Oedipal experience of the child. He makes use of Freud's study on his grand-child using a bobbin and later the words fort-da (away-here), to demonstrate that a transitional object allows the child to take distance from its attachment to the mother so that it can start to separate itself from the mother. Taking distance is, according to De Waelhens, introducing the Hegelian negative, which is the birth of the subject. Fourth, De Waelhens gives a dialectic reading of the history of German and French psychiatry. He shows the epistemological contradictions in the work of some of the great nineteenth century psychiatrists relying too exclusively on a biological model of schizophrenia. In his contribution to this volume, Wilfried Ver Eecke draws several lessons from evaluating the literature on schizophrenia. He argues that epistemologically neither a biological nor a psychological method of reasoning can capture all the factors that can play a role in the creation of schizophrenia. He relies heavily, but not exclusively, on the Finnish studies of Tienari, Myrman, and Wahlberg and their colleagues to provide statistical evidence that non-biological factors also play an important role in causing schizophrenia. He relies heavily, but again not exclusively, on the study by Karon and VandenBos to demonstrate statistically the efficiency of psychodynamically inspired therapy of schizophrenics. Ver Eecke also addresses an apparent inconsistency in De Waelhens' presentation of Lacan's theory of schizophrenia. Where De Waelhens seemed to argue at one time that the mother figure was the crucial figure to explain schizophrenia (leading to a defective relation to the body) and at another time that it was the role of the father which was crucial (leading to a defective relation to language and the symbolic), there Ver Eecke argues that the defective function of each influences the function of the other. He then draws a conclusion for the therapy of schizophrenics: to be helpful a therapist will have to address both deficiencies. The problem for treating schizophrenics is that correcting an unconscious deficiency to the body—a deficiency in the imaginary—requires a totally different kind of intervention than an attempt to correct a symbolic deficiency—a deficiency in the paternal function. A correction of the imaginary requires a kind of maternal mirroring; a correction of the symbolic requires making a distinction or a prohibition stick. One further difficulty arises. Psychotherapy uses language in its treatment. However, language in schizophrenics is deficient. We can therefore expect that language will be inefficient. This is so unless the therapist uses language, first, to make a repair at the imaginary level and only thereafter makes an attempt to make a correction in the symbolic. In analyzing successful therapeutic techniques reported by several therapists Ver Eecke discovers that all of them first try to repair the imaginary before they attempt to make corrections to the symbolic.

God Said What? Dan Ver Woert,2015-04-23 Do you know someone that says, I believe in God, but I don't believe the whole Bible? What about Facebook postings that say, How does a loving God endorse slavery, infanticide, murder, genocide, rape, and human sacrifices? He doesn't. Those are all misreads of the text. Pastor Dan deals with the common objections that people always cite when they are misinformed about obscure teachings in the Bible. This book was written for skeptics and believers. You will find out why God had a man stoned for gathering firewood on the Sabbath. You'll gain a Biblical understanding of the word slavery. Does God allow women to speak in church? Is suicide the unpardonable sin? Why did God say, When you take the city, kill every man, woman, and child? Dan also gives you a fresh, new understanding of why God judges sin so severely at times.

Human Wholeness Mark G. Boyer,Matthew S. Ver Miller,2015-03-04 Imagine a rope braided out of seven strands of twine, forming a circle so that even the ends of the rope are woven together. That is an image of human wholeness. This book proposes seven aspects to human wholeness: intellectual, psychological, emotional, physical, sexual, spiritual, and aesthetic. After examining each of these aspects, this work presents a spirituality of relationship. It also explores how human wholeness is a basis for relationship. Two people relating to each other out of each person's wholeness provide the occasion for an experience of the divine. All relationships begin with some connectivity to an aspect of human wholeness. As both parties enter more deeply into their relationship, more connectivity is achieved. By reflecting on the experiences of one's life in dialogue with a trusted friend, a person discovers the freedom to be who he or she is in the presence of the other and receives back the gift he or she offers to the other in total freedom. This transcendent aspect of a relationship can enable friends to discover God in each other, as each other. Jesus serves as a model for human relating; in him all aspects are woven together into a whole human being.

Ver sacrum seu flores musici (Salzburg, 1677), Part 1 Andreas Hofer,2021-05-01 Andreas Hofer's *Ver sacrum seu flores musici* is the first printed collection of paraliturgical music for the archiepiscopal court of Salzburg published in a modern edition, an important reparative to the overemphasis

on the court's instrumental virtuosos, Heinrich Biber and Georg Muffat. The eighteen pieces of the collection are ordered liturgically, with each composition assigned to a specific feast day. Hofer's texts are a unique collection of centonized scripture, poetry, and prose, which, through creative manipulation of instrumentation, texture, and style, the composer musically dramatizes for the celebration of each feast. Referred to in the note to the reader as works "for the offertory" (despite the absence of any prescribed liturgical texts), these pieces demonstrate the malleable nature of the musical genre in the early modern period.
