Origami and Kirigami Paper Art Structures No 2: Fold and Cut Patterns and Templates Oscar Paredes, 2019-05-28 This book is a compilation of fold patterns and cutting patterns. As a reference, each of the titles includes a public access video, created by NeoSpica (Oscar Paredes) for the Neospica Paper Structures channel. The videos show the creation process in which the patterns presented in this compilation are used to create the paper structures. If you want to acquire this book as a recommendation, check the titles of your interest in the videos of the channel to evaluate the level of difficulty and the usefulness of these patterns to create the structures. The only requirement is the determination to create. /// I appreciate the art of cutting and folding paper and the art forms that can be created. In this document there are 17 patterns of cut and fold based on personal designs and interpretations of works of art from the world of origami and kirigami. The folding structures that are presented are based on tessellations, corrugations, collapsible cylinder, rigid foldable cylinder, miura fold and curved folding. The structures created with cutting methods are based on the combination of folds and paper cut out art. Each of these models has a video with a sequence of partial or total elaboration published by NeoSpica (Oscar Paredes) for the youtube channel Neospica Paper Structures. 101 Life Skills Games for Children Bernie Badegruber, 2011-01-01 How do you teach tolerance, self-awareness, and responsibility? How can you help children deal with fear, mistrust, or aggression? Play a game with them! Games are an ideal way to help children develop social and emotional skills; they are exciting, relaxing, and fun. 101 LIFE SKILLS GAMES FOR CHILDREN: LEARNING, GROWING, GETTING ALONG (Ages 6-12) is a resource that can help children understand and deal with problems that arise in daily interactions with other children and adults. These games help children develop social and emotional skills and enhance self-awareness. The games address the following issues: dependence, aggression, fear, resentment, disability, accusations, boasting, honesty, flexibility, patience, secrets, conscience, inhibitions, stereotypes, noise, lying, performance, closeness, weaknesses, self confidence, fun, reassurance, love, respect, integrating a new classmate, group conflict. Organized in three main chapters: (I-Games, You-Games and We-Games), the book is well structured and easily accessible. It specifies an objective for every game, gives step-by-step instructions, and offers questions for reflection. It provides possible variations for each game, examples, tips, and ideas for role plays. Each game contains references to appropriate follow-up games and is illustrated with charming drawings.

Structural Proteomics Bostjan Kobe, Mitchell Guss, Thomas Huber, 2010-12-10 The objective of this volume is to provide readers with a current view of all aspects of the 'pipeline' that takes protein targets to structures and how these have been optimised. This volume includes chapters describing, in-depth, the individual steps in the Structural Genomics pipeline, as well as less detailed overviews of individual Structural Genomics initiatives. It is the first book of protocols to cover techniques in a new and emerging field.

Digital Media Steganography Mahmoud Hassaballah, 2020-06-27 The common use of the Internet and cloud services in transmission of large amounts of data over open networks and insecure channels, exposes that private and secret data to serious situations. Ensuring the information transmission over the Internet is safe and secure has become crucial, consequently information security has become one of the most important issues of human communities because of increased data transmission over social networks. Digital Media Steganography: Principles, Algorithms, and Advances covers fundamental theories and algorithms for practical design, while providing a comprehensive overview of the most advanced methodologies and modern techniques in the field of steganography. The topics covered present a collection of high-

quality research works written in a simple manner by world-renowned leaders in the field dealing with specific research problems. It presents the state-of-the-art as well as the most recent trends in digital media steganography. Covers fundamental theories and algorithms for practical design which form the basis of modern digital media steganography Provides new theoretical breakthroughs and a number of modern techniques in steganography Presents the latest advances in digital media steganography such as using deep learning and artificial neural network as well as Quantum Steganography

Seychelles Since 1770 Deryck Scarr, 2018-05-24 A comprehensive history of the Seychelles, this volume traces its periods of colonisation by France and Britain, the immobile years of the twentieth century, the granting of independence in 1976, and the social changes precipitated by tourism in the late-1990s.

Mancala Board Games Alexander J. de Voogt, 1997 Mancala is a popular board game played across Africa, in Central and Southeast Asia and the Middle East. Its antiquity and origins are still disputed by scholars. Drawing on historical, literary and ethnographic evidence, this book aims to discuss the possible origins of mancala and its distribution.

Meta-heuristic Algorithms for Optimal Design of Real-Size Structures Ali Kaveh, Majid Ilchi Ghazaan, 2018-04-10 The contributions in this book discuss large-scale problems like the optimal design of domes, antennas, transmission line towers, barrel vaults and steel frames with different types of limitations such as strength, buckling, displacement and natural frequencies. The authors use a set of definite algorithms for the optimization of all types of structures. They also add a new enhanced version of VPS and information about configuration processes to all chapters. Domes are of special interest to engineers as they enclose a maximum amount of space with a minimum surface and have proven to be very economical in terms of consumption of constructional materials. Antennas and transmission line towers are the one of the most popular structure since these steel lattice towers are inexpensive, strong, light and wind resistant. Architects and engineers choose barrel vaults as viable and often highly suitable forms for covering not only low-cost industrial buildings, warehouses, large-span hangars, indoor sports stadiums, but also large cultural and leisure centers. Steel buildings are preferred in residential as well as commercial buildings due to their high strength and ductility particularly in regions which are prone to earthquakes.

Peaceful Parent, Happy Kids Laura Markham, 2012-11-27 A groundbreaking guide to raising responsible, capable, happy kids Based on the latest research on brain development and extensive clinical experience with parents, Dr. Laura Markham's approach is as simple as it is effective. Her message: Fostering emotional connection with your child creates real and lasting change. When you have that vital connection, you don't need to threaten, nag, plead, bribe—or even punish. This remarkable guide will help parents better understand their own emotions—and get them in check—so they can parent with healthy limits, empathy, and clear communication to raise a self-disciplined child. Step-by-step examples give solutions and kid-tested phrasing for parents of toddlers right through the elementary years. If you're tired of power struggles, tantrums, and searching for the right “consequence,” look no

further. You're about to discover the practical tools you need to transform your parenting in a positive, proven way.
