Crochet Coral Reef Margaret Wertheim,Christine Wertheim,2015 Now perhaps the world's largest participatory art and science project, the Crochet Coral Reef combines mathematics, marine biology, environmental consciousness-raising and community art practice. Almost 8,000 people around the world have contributed to making an ever-evolving archipelago of giant woolen seascapes, which have been exhibited at the Hayward Gallery, the Smithsonian and many other venues. This fully illustrated book, written by the project's creators--Margaret and Christine Wertheim of the Institute For Figuring--brings together the scientific and mathematical content behind the project, along with essays about the artistic and cultural resonances of this unique experiment in radical craft practice. With a wealth of color illustrations, the book serves as a record of the 30-plus Crochet Reefs worldwide and names all 7,000-plus contributors in a specially designed section.

Narrative Absorption Frank Hakemulder,Moniek M. Kuijpers,Ed S. Tan,Katalin Bálint,Miruna M. Doicaru,2017-11-15 Narrative Absorption brings together research from the social sciences and Humanities to solve a number of mysteries: Most of us will have had those moments, of being totally absorbed in a book, a movie, or computer game. Typically we do not have any idea about how we ended up in such a state. Nor do we fully realize how we might have changed as we return for the fictional worlds we have visited. The feeling of being absorbed is one of the most illusive and transient feelings, but also one that motivates audiences to spend considerable amounts of time in narrative worlds, and one that is central to our understanding of the effects of narratives on beliefs and behavior. Key specialists inform the reader of this book about the nature of the peculiar state of consciousness during episodes of absorption, the perception of absorption in history, the role of absorption in meaningful experiences with narratives, the relation with related phenomena such as suspense and identification, issues of measurement, and the practical implications, for instance in education-entertainment. Various fields have worked separately on topics of absorption, albeit using different terminology and methods, but having reached a high level of development and complexity in understanding absorption. Now is the time to bring them together. This volume will be a point of reference for years to come.

Wake Rebecca Hall,2021-06-01 A Best Book of 2021 by NPR and The Washington Post Part graphic novel, part memoir, Wake is an imaginative tour de force that tells the "powerful" (The New York Times Book Review) story of women-led slave revolts and chronicles scholar Rebecca Hall's efforts to uncover the truth about these women warriors who, until now, have been left out of the historical record. Women warriors planned and led revolts on slave ships during the Middle Passage. They fought their enslavers throughout the Americas. And then they were erased from history. Wake tells the "riveting" (Angela Y. Davis) story of Dr. Rebecca Hall, a historian, granddaughter of slaves, and a woman haunted by the legacy of slavery. The accepted history of slave revolts has always told her that enslaved women took a back seat. But Rebecca decides to look deeper, and her journey takes her through old court records, slave ship captain's logs, crumbling correspondence, and even the forensic evidence from the bones of enslaved women from the "negro burying ground" uncovered in Manhattan. She finds women warriors everywhere. Using a "remarkable blend of passion and fact, action and reflection" (NPR), Rebecca constructs the likely pasts of Adono and Alele, women rebels who fought for freedom during the Middle Passage, as well as the stories of women who led slave revolts in Colonial New York. We also follow Rebecca's own story as the legacy of slavery shapes her life, both during her time as a successful attorney and later as a

historian seeking the past that haunts her. Illustrated beautifully in black and white, Wake will take its place alongside classics of the graphic novel genre, like Marjane Satrapi’s Persepolis and Art Spiegelman’s Maus. This story of a personal and national legacy is a powerful reminder that while the past is gone, we still live in its wake.
