War Machine Daniel Pick, 1996-01-01 This intriguing study examines Western perceptions of war in and beyond the nineteenth century, surveying the writings of novelists, anthropologists, psychiatrists, psychoanalysts, philosophers, poets, natural scientists, and journalists to trace the terms of modern thought on the nature of military conflict. Daniel Pick brings together philosophical and historical models of war with fictions of invasion, propaganda from the Great War, interpretations of shellshock and speculations about the biological value of conquest. He discusses the work of such familiar commentators as Clausewitz, Engels, and Treitschke, and examines little-known writings by Proudhon, De Quincey, Ruskin, Valery, and many others, culminating in the extraordinary dialogue between Freud and Einstein, *Why War?* He analyses Victorian fears of French contamination through the Channel Tunnel as well as the widespread continuing dread of German domination. And he charts the history of the pervasive European belief that war is beneficial or at least functionally necessary. A central theme of the book is the disturbing relationship between machinery and destruction. Visions of relentless technological 'progress' and the inexorable advance of the military-industrial complex often seem to distort our understanding of war, even to reduce it to a sophisticated game played out by high-precision automata. Pick explores both the reassuring and troubling aspects of such representations. Shorn of human agency or responsibility, war apparently threatens to become technologically unstoppable, the remorseless 'perfect abattoir' of the industrial age. *War Machine* explores the enduring historical fascination with - and recoil from - brutal mechanical slaughter, and the modern acquiescence in, and enthusiasm for (in Rilke's phrase), 'these days of monstrously accelerated dying'.

The Hollywood War Machine Carl Boggs,2017-07-05 The newly expanded and revised edition of *The Hollywood War Machine* includes wide-ranging exploration of numerous popular military-themed films that have appeared in the close to a decade since the first edition was published. Within the Hollywood movie community, there has not been even the slightest decline in well-financed pictures focusing on warfare and closely-related motifs. The second edition includes a new chapter on recent popular films and another that analyzes the relationship between these movies and the burgeoning gun culture in the United States, marked in recent years by a dramatic increase in episodes of mass killings.

At last, she has clues that will lead her to the shocking truth--

Palidda,2010-07-13 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book is an examination of the effect of contemporary wars (such as the 'War on Terror') on civil life at a global level. Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare, particular those in which terrorists or insurgents are involved (for example, the 'revolution in military affairs', 'small wars', and so on). On the other hand, today's research on security is focused, among other themes, on the effects of the war on terrorism, and on civil liberties and social control. This volume connects these two fields of research, showing how 'war' and 'security' tend to exchange targets and forms of action as well as personnel (for instance, the spreading use of private contractors in wars and of military experts in the 'struggle for security') in modern society. This shows how, contrary to Clausewitz's belief war should be conceived of as a continuation of politics by other means, the opposite statement is also true: that politics, insofar as it concerns security, can be defined as the 'continuation of war by other means'. This book will be of much interest to students of critical security studies, war and conflict studies, terrorism studies, sociology and IR in general. Salvatore Palidda is Professor of Sociology in the Faculty of Education at the University of Genoa. Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa.

The Political Machine Adam T. Smith,2020-08-04 *The Political Machine* investigates the essential role that material culture plays in the practices and maintenance of political sovereignty. Through an archaeological exploration of the Bronze Age Caucasus, Adam Smith demonstrates that beyond assemblies of people, polities are just as importantly assemblages of things—from ballots and bullets

to crowns, regalia, and licenses. Smith looks at the ways that these assemblages help to forge cohesive publics, separate sovereigns from a wider social mass, and formalize governance—and he considers how these developments continue to shape politics today. Smith shows that the formation of polities is as much about the process of manufacturing assemblages as it is about disciplining subjects, and that these material objects or machines sustain communities, orders, and institutions. The sensibilities, senses, and sentiments connecting people to things enabled political authority during the Bronze Age and fortify political power even in the contemporary world. Smith provides a detailed account of the transformation of communities in the Caucasus, from small-scale early Bronze Age villages committed to egalitarianism, to Late Bronze Age polities predicated on radical inequality, organized violence, and a centralized apparatus of rule. From Bronze Age traditions of mortuary ritual and divination to current controversies over flag pins and Predator drones, *The Political Machine* sheds new light on how material goods authorize and defend political order.

The Politics of Speed Simon Glezos, 2013-03 Everyone agrees that the world is accelerating. With advances in communication, transportation and information processing technologies, it is clear that the pace of events in global politics is speeding up at an alarming rate. The implications of this new speed however, continue to be a significant source of debate. Will acceleration lead to a more interconnected, productive, peaceful, and humane world; or a nightmarish descent into ecological devastation, economic exploitation and increasingly violent warfare? *The Politics of Speed* attempts to map the contours of the new global space of speed, and investigates key issue areas – including democratic governance, warfare, capitalism, globalization and transnational activism – to uncover the ways in which acceleration is shaping the world. The book uses contemporary political theory

(especially the works of Deleuze and Guattari) to develop an ontological account of speed, showing how its effects are frequently far more complex and surprising than we might expect. The result is an attempt to craft a way of engaging with global acceleration that might help avoid the dangers of speed, while embracing the possibilities it provides us with to produce a safer, more egalitarian, democratic and pluralistic world.

Routledge Handbook of Civil Wars Edward Newman, Karl DeRouen, Jr., 2014-02-18 This comprehensive new Handbook explores the significance and nature of armed intrastate conflict and civil war in the modern world. Civil wars and intrastate conflict represent the principal form of organised violence since the end of World War II, and certainly in the contemporary era. These conflicts have a huge impact and drive major political change within the societies in which they occur, as well as on an international scale. The global importance of recent intrastate and regional conflicts in Afghanistan, Pakistan, Iraq, Somalia, Nepal, Cote d'Ivoire, Syria and Libya - amongst others - has served to refocus academic and policy interest upon civil war. Drawing together contributions from key thinkers in the field who discuss the sources, causes, duration, nature and recurrence of civil wars, as well as their political meaning and international impact, the Handbook is organised into five key parts: Part I: Understanding and Explaining Civil Wars: Theoretical and Methodological Debates Part II: The Causes of Civil Wars Part III: The Nature and Impact of Civil Wars Part IV: International Dimensions Part V: Termination and Resolution of Civil Wars Covering a wide range of topics including micro-level issues as well as broader debates, Routledge Handbook of Civil Wars will set a benchmark for future research in the field. This volume will be of much interest to students of civil wars and intrastate conflict, ethnic conflict, political violence, peace and conflict studies, security studies and IR in general.

Warring Souls Roxanne Varzi, 2006-05-31 With the first Fulbright grant for research in Iran to be awarded since the Iranian revolution in 1979, Roxanne Varzi returned to the country her family left before the Iran-Iraq war. Drawing on ethnographic research she conducted in Tehran between 1991 and 2000, she provides an eloquent account of the beliefs and experiences of young, middle-class, urban Iranians. As the first generation to have come of age entirely in the period since the founding of the Islamic Republic of Iran, twenty-something Iranians comprise a vital index of the success of the nation's Islamic Revolution. Varzi describes how, since 1979, the Iranian state has attempted to produce and enforce an Islamic public sphere by governing behavior and by manipulating images—particularly images related to religious martyrdom and the bloody war with Iraq during the 1980s—through films, murals, and television shows. Yet many of the young Iranians Varzi studied quietly resist the government's conflation of religious faith and political identity. Highlighting trends that belie the government's claim that Islamic values have taken hold—including rising rates of suicide, drug use, and sex outside of marriage—Varzi argues that by concentrating on images and the performance of proper behavior, the government's campaign to produce model Islamic citizens has affected only the appearance of religious orthodoxy, and that the strictly religious public sphere is partly a mirage masking a profound crisis of faith among many Iranians. *Warring Souls* is a powerful account of contemporary Iran made more vivid by Varzi's inclusion of excerpts from the diaries she maintained during her research and from journal entries written by Iranian university students with whom she formed a study group.

Genghis Khan and the Mongol War Machine Chris Peers, 2015-03-31 As a soldier and general, statesman and empire-builder, Genghis Khan is an almost legendary figure. His remarkable achievements and his ruthless methods have given rise to a sinister reputation. As Chris Peers

shows, in this concise and authoritative study, he possessed exceptional gifts as a leader and manager of men - he ranks among the greatest military commanders - but he can only be properly understood in terms of the Mongol society and traditions he was born into. So the military and cultural background of the Mongols, and the nature of steppe societies and their armies, are major themes of his book. He looks in detail at the military skills, tactics and ethos of the Mongol soldiers, and at the advantages and disadvantages they had in combat with the soldiers of more settled societies. His book offers a fascinating fresh perspective on Genghis Khan the man and on the armies he led.

The Cyborg and the Sorcerers/The Wizard and the War Machine (Wildside Double #5) Lawrence Watt-Evans, 2010-09-01 In the tradition of the old Ace Doubles two-in-one books (flip one over to read the second title) -- here is the fifth Wildside Double: the two-volume War Surplus series by Lawrence Watt-Evans, *The Cyborg and the Sorcerers* and *The Wizard and the War Machine*. **THE CYBORG AND THE SORCERERS** The cyborg code-named Slant was sent out as an Independent Reconnaissance Unit during an interstellar war between Earth and its colonies. The fighting ended three hundred years ago, but Slant's computer does not admit this -- he is compelled to carry on as if the war were still raging. Then he comes across a planet where his sensors register "gravitational anomalies." The computer interprets these as enemy weapons research. The local inhabitants call the anomalies "magic." **THE WIZARD AND THE WAR MACHINE** At the end of *The Cyborg and the Sorcerers*, Sam Turner was making a life for himself on the planet Dest. He thought he had left the long-lost interstellar war between Earth and its rebellious colonies behind him forever. Forever turned out to be eleven years. That was how long it took for another Independent Reconnaissance Unit to respond to the distress call his ship had sent before it was destroyed. And this one made his

own berserk killer computer look sane.

Bachelors, Bastards, and Nomadic Masculinity Robert Fagley, 2014-11-19 Bachelors, Bastards, and Nomadic Masculinity is, firstly, a thematic exploration of bachelor figures and male bastards in literary works by Guy de Maupassant and André Gide. The coupling of Maupassant and Gide is appropriate for such an analysis, not only because of their mutual treatment of illegitimacy, but also because each writer represents varieties of bachelors and bastards from disparate social classes and subcultures, each writing during contiguous moments of socio-legal changes particularly related to divorce law and women's rights, which consequently have great influence on the legal destiny of illegitimate or "natural" children. Napoleon's Civil Code of 1804 provides the legal (patriarchal) framework for the period of this study of illegitimacy, from about 1870 to 1925. The Civil Code saw numerous changes during this period. The Naquet Law of 1884, which reestablished limited legal divorce, represents the central socio-legal event of the turn of the century in matters of legitimacy, whereas the Franco-Prussian War of 1870 and the First World War furnish chronological bookends for this book. Besides through history, law, and sociology, this book treats illegitimacy through the lens of various branches of gender and sexual theory, particularly the study of masculinities, and a handful of other important critical theories, most importantly those of Michel Foucault, Eve Sedgwick, Todd Reeser, Charles Stivale, and Gilles Deleuze and Félix Guattari. Bachelors and bastards are two principal players in the representation of illegitimacy in Maupassant and Gide, but this study considers the theme of illegitimacy as extended beyond simple questions of legitimate versus illegitimate children. The male bastard is only one of the Counterfeit characters examined in these authors' fictional texts. This book is divided into three parts which consider

specific thematic elements of their bastard narratives. Part One frames the representation in fiction of bachelor figures and how they contribute to, or the roles they play in, instances of illegitimacy. Part Two springs from and develops the metaphor of the counterfeit coin, whether represented by a bastard son, an affected schoolboy, a false priest, or a pretentious littérateur. Part Three explains the concept of nomadic masculine practices; such practices include nomadic styles of masculinity development as well as the bastard's nomadism.

Order and Disorder Keebet von Benda-Beckmann, Fernanda Pirie, 2008-02-01 Disorder and instability are matters of continuing public concern. Terrorism, as a threat to global order, has been added to preoccupations with political unrest, deviance and crime. Such considerations have prompted the return to the classic anthropological issues of order and disorder. Examining order within the political and legal spheres and in contrasting local settings, the papers in this volume highlight its complex and contested nature. Elaborate displays of order seem necessary to legitimate the institutionalization of violence by military and legal establishments, yet violent behaviour can be incorporated into the social order by the development of boundaries, rituals and established processes of conflict resolution. Order is said to depend upon justice, yet injustice legitimates disruptive protest. Case studies from Siberia, India, Indonesia, Tibet, West Africa, Morocco and the Ottoman Empire show that local responses are often inconsistent in their valorization, acceptance and condemnation of disorder.

The New World Order of Islam Mirza Bashir-ud-Din Mahmud Ahmad, 2017-01-01 In the backdrop of the then prevailing ideologies of communism and capitalist democracy, the second successor of the Ahmadiyya Movement, Hazrat Mirza Bashiruddin Mahmud Ahmad, addressed this

lecture to the Ahmadiyya Annual Gathering on December 28, 1942. The address answers the question, 'How does Ahmadiyyat, the True Islam, propose to deal with the grave problem of socio-economic inequality in the world?' The Ahmadiyya solution is the solution of Islam shaped under divine guidance for present needs by the Holy Founder (a.s.) of the Ahmadiyya movement. The speaker examines and analyses the role played by different movements to alleviate poverty and sufferings, such as, Socialism, International Socialism, Marxism, Bolshevism, Nazism and Fascism and so on. The speaker also, explores the major religions of the world regarding the basic question social inequality a serious problem. Hazrat Mirza Ghulam Ahmad, the Promised Messiah and Mahdi, the founder of the Ahmadiyya Muslim Jama'at, laid down the foundations of the New World Order, by initiating the scheme of Wasiyyat based on Islamic teachings and under the Divine guidance in his book 'Al-Wassiyat' written in 1905. Later in 1934 Hazrat Mirza Bashiruddin Mahmud Ahmad (r.a.) inaugurated Tahrik-e-Jadid to prepare the ground for the full implementation of the New World Order of the institution of Wasiyyat. In the present lecture he elaborates the aims and objectives of Tahrik-e-Jadid and claims that the New World Order in all its aspects, economic, social and religious, as introduced by Nizam-e-Wassiyat, will at the end prevail and a new and genuine revolution will take place.
