Case Studies in Public Health Preparedness and Response to Disasters Linda Y Landesman, Isaac B. Weisfuse, 2013-08-02 From extreme weather events such as Superstorm Sandy, man-made tragedies like the Madrid train bombings, the threat of bioterrorism, and emerging infections such as the H1N1 pandemic flu, disasters are creating increasingly profound threats to health of populations around the globe. Through a presentation of 16 case studies of events from natural disasters to pandemic infection, the authors examine the broad range of public health scenarios through the lens of emergency preparedness and planning. This text demonstrates the application of public health preparedness competencies established by the Association of Schools of Public Health (ASPH). It is designed for students across a wide spectrum of health and safety disciplines, and makes an ideal complement to any text on disaster preparedness or public health leadership, or can be used as a standalone text. --

Information Literacy Skills and the Role of Social Media in Disseminating Scholarly Information in the 21st Century Baskaran, C., Dhanavandan, S., 2023-06-29 The storage of information lies within the basic components called binary devices, and at present, storage media falls into two categories—random and serial (or sequential) access—which require different amounts of time to access a given piece of data. The typical serial-access medium is magnetic tape, which has a storage density that has increased considerably over the years. Vast quantities of source data are collected, digitized, and compressed automatically by means of unique instruments in fields such as astronomy, environmental monitoring, scientific experimentation and modelling, and national security. Information capture that is generated by an individual, in the form of packages of symbols called documents, is accomplished by manual and, increasingly, automatic techniques. Data that is entered into instruments manually, such as keyboard strikes, is a process that is comparatively slow and error-prone and often requires the use of computer programs with supporting editing software for formatting, grammar, spelling, and more. With the evolution of technology and its impact on human society, the social sciences have begun to describe this new version of society as a post-industrial or the information/knowledge society. Such terms attempt to capture the unprecedented development and use of information and communication technologies and the fact that information generation, processing, and transmission have become the fundamental sources of productivity and power. An exploration into the impacts of the modern knowledge society on the ways in which academic researchers utilize, distribute, and record data from their fields of study is necessary for further comprehension, protection, and maintenance of this ever-expanding body of information. *Information Literacy Skills and the Role of Social Media in Disseminating Scholarly Information in the 21st Century* analyzes the various factors of information literacy skill for disseminating scholarly information in the 21st century and increases the awareness level of social media use by researchers for sharing information. Covering topics such as information literate pedagogy, information literacy instruction, and ICT and learning in the knowledge society, this book is ideal for librarians, teachers, research scholars, students of library and information science, knowledge managers, and information scientists.

Coastal Flood Risk Reduction Samuel Brody, Yoonjeong Lee, Baukje Kothuis, 2022-04-27 Coastal Flood Risk Reduction: The Netherlands and the U.S. Upper Texas Coast represents the culmination of a 5-year international research and education partnership funded by the US National Science Foundation (NSF) and more than 10 years of collaboration between Dutch and U.S. flood experts on the basic issue of how to protect society from growing flood risks. Multiple case studies integrating the fields of engineering, hydrology, landscape architecture, economics, and planning address the underlying characteristics of physical flood risks and their prediction; human communities and the associated built environment; physical, social, and built-environment variables; and mitigation techniques. In recognition of the lack of

systematic research and the growing societal need to better understand flood impacts, this edited book provides an in-depth, comparative evaluation of flood problems and solutions in two key places: the Netherlands and the U.S. Upper Texas Coast. Both regions are extremely flood-prone and have experienced continual adverse impacts throughout their histories. For researchers in flood management, geographers, hydrologists, environmental studies, and social science as well as policymakers and decision-makers in flood management authorities and related industries, this book provides an essential resource. Introduces integrated comparative work on flood risk reduction and management across disciplines and international boundaries Presents chapters written by dozens of experts across six U.S. and Dutch universities that have formally participated in the international research and education program funded by the U.S. National Science Foundation (NSF) Provides a basis for understanding and mitigating flood risk over a range of necessary perspectives, from modeling inputs to design solutions Integrates cutting-edge scientific methods and state-of-the-art knowledge with examples of specific solutions and how they are being implemented in each national case study

The Storm Ivor van Heerden, Mike Bryan, 2006-05-18 The ultimate inside story of the Katrina tragedy—from the cofounder of the LSU Hurricane Center After warning for years about the looming threat of catastrophic flooding in New Orleans, Ivor van Heerden was one of the highest-profile media experts during the Katrina disaster. Over the following eighteen months, he was even more prominent as he challenged the official version of those events and campaigned for an engineering plan that would protect all of southeastern Louisiana, once and for all. In *The Storm*, van Heerden lays out in full detail the stunning incompetence among the bureaucrats, the politicians, and the Army Corps of Engineers that culminated in the catastrophe that crippled, perhaps forever, a great American city.

The Storm Christopher Zyda, 2020-11-10 Christopher Zyda confronts the long-buried and painful memories of his harrowing fifteen-year journey in *The Storm: One Voice* from the AIDS Generation, a heart-wrenching love story and coming-of-age tale during the early years of the AIDS crisis in Los Angeles. It all begins in the spring of 1983, when Chris, a twenty-one-year-old UCLA English Literature major and aspiring writer, risks ostracism when he comes out of the closet to his fraternity brothers just as the AIDS pandemic is beginning to explode in gay communities across the United States. Soon afterward, Chris meets and falls in love with Stephen, a graduate of Yale University and Law School, and the two of them build a life together as their friends start to fall sick and die from the spreading storm of AIDS. Stephen begins showing symptoms of AIDS in early 1986, and Chris faces a difficult choice as he is certain that he, too, eventually will be stricken by the disease. He abandons his writing career and attends the UCLA business school so that he can earn enough money to pay for healthcare during Stephen's illness. *The Storm* is filled with heart, optimism, and love, interspersed with Los Angeles history, gay and lesbian history, AIDS history, and the backdrop of the 1980s and 1990s. It is an unflinching and, at times, raw memoir of perseverance, integrity, forgiveness, the power of love, spiritual growth, *Carpe Diem*, dreams, and, most of all: survival and ultimate triumph.

Mi María: Surviving the Storm Ricia Anne Chansky, Marci Denesiuk, 2021-09-04 When Hurricane María made landfall in Puerto Rico in September 2017, it left no part of the archipelago unscathed. The hurricane triggered floods and mudslides, washed out roads, destroyed tens of thousands of homes, farms, and businesses, caused the largest blackout in US history, knocked out communications, led to widespread food, drinking water, and gasoline shortages, and caused thousands of deaths. The seventeen oral histories collected in *Mi María: Surviving the Storm* share stories of surviving the storm and its long aftermath as people waited for relief and aid that rarely arrived. Zaira and her husband floated on a patched air mattress for sixteen hours while floodwaters rose around them. The road washed out in front of Emmanuel as he desperately tried to drive his pregnant wife who had begun labor to the hospital. Luis and his father anxiously counted the days that the dialysis clinic remained closed and lifesaving treatment was unavailable, while Miliana's mother was sent home from the hospital —undiagnosed— only to fall critically ill in her own home. Weaving together long-form oral histories and shorter testimonios, the book offers a multivocal peoples' history of disaster that fosters a greater understanding of the failures of governmental disaster response and the correlating perseverance of the people impacted by these failures, highlighting the colonial relationship between Puerto Rico and the United States. Ultimately, the ways in which these oral histories demonstrate the strength of community response to disaster in Puerto Rico are pertinent to other parts of the world that are being impacted by our current climate emergency.

Voices from the Storm Lola Vollen, Chris Ying, 2023-06-15 Hurricane Katrina inflicted damage on a scale unprecedented in American history, nearly destroying a major city and killing thousands of its citizens. With far too little help from indifferent, incompetent government agencies, the poor bore the brunt of the disaster. The residents of traditionally impoverished and minority communities suffered incalculable losses and endured unimaginable conditions. And the few facilities that did exist to help victims quickly became miserable, dangerous places. Now, the victims of Hurricane Katrina find themselves spread across the United States, far from the homes they left and faced with the prospect of starting anew. Families are struggling to secure jobs, homes, schools, and a sense of place in unfamiliar surroundings. Meanwhile, the rebuilding of their former home remains frustrating out of their hands. This bracing read brings readers to the heart of the disaster and its aftermath as those who survived it speak with candor and eloquence of their lives then and now.

Into the Storm Reed Timmer, Andrew Tilin, 2010-10-14 An eye-of-the-hurricane view of storm chasing from the star of the Discovery Channel hit series *Storm Chasers*. Only one in ten chases actually intercept a tornado—unless you're Reed Timmer. The thrill-seeking meteorologist and star of *Storm Chasers* has followed and faced down more violent tornadoes than anyone. *Into the Storm* brings readers into the mind of this man and his mission—collecting data on tornadoes and hurricanes that could save lives—in the terrifying, awe-inspiring world of big weather. *Into the Storm* is also a fascinating look at the science of weather—what causes extreme conditions, its connection to climate change, and how a tornado gets its stovepipe structure.

What Stands in a Storm Kim Cross, Kimberly Hisako Cross, 2015-03-10 Immersive reporting and dramatic storytelling from the middle of the horrific superstorm of April 2011, a weather event that killed 348 people--Provided by publisher.

What Stands in a Storm Kim Cross, 2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America’s biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

The philosophy of storms James Pollard Espy, 1841

Tornado Hunter Stefan Bechtel, Tim Samaras, 2009 METEOROLOGY. With climate change and global warming creating more frequent and more violent storms, there is a huge readership for weather disasters such as hurricanes and tornadoes. This book will appeal to the audience for the bestseller Perfect Storm. This page-turning story of tornado chaser and National Geographic grantee Tim Samaras opens with a chilling, play-by-play description of the F5 tornado that wiped off the map the town of Manchester, North Dakota, on June 24, 2003. Stefan Bechtel, author of the acclaimed Roar of the Heavens teams with Samaras to reveal the heart and people of the town, the terror of the descending funnel, Samaras' fearless chase to the tornado's core, and the ingenious equipment he masterminded to record the inner workings of a tornado - to aid in future detection, avoidance, and destruction.
