What Story are You Living? Carol Pearson, Hugh K. Marr, 2006-10

*Story Genius* Lisa Cron, 2016-08-09 Following on the heels of Lisa Cron's breakout first book, *Wired for Story*, this writing guide reveals how to use cognitive storytelling strategies to build a scene-by-scene blueprint for a riveting story. It's every novelist's greatest fear: pouring their blood, sweat, and tears into writing hundreds of pages only to realize that their story has no sense of urgency, no internal logic, and so is a page one rewrite. The prevailing wisdom in the writing community is that there are just two ways around this problem: pantsing (winging it) and plotting (focusing on the external plot). Story coach Lisa Cron has spent her career discovering why these methods don't work and coming up with a powerful alternative, based on the science behind what our brains are wired to crave in every story we read (and it's not what you think). In *Story Genius* Cron

takes you, step-by-step, through the creation of a novel from the first glimmer of an idea, to a complete multilayered blueprint—including fully realized scenes—that evolves into a first draft with the authority, richness, and command of a riveting sixth or seventh draft.

With lyrical text and breathtaking art, *My Heart* empowers all readers to listen to the guide within in this ode to love and self-acceptance.

**What's the Story** Anne Bogart, 2014-04-16 Anne Bogart is an award-winning theatre maker, and a best-selling writer of books about theatre, art, and cultural politics. In this her latest collection of essays she explores the story-telling impulse, and asks how she, as a 'product of postmodernism', can reconnect to the primal act of making meaning and telling stories. She also asks how theatre practitioners can think of themselves not as staggers of plays but 'orchestrators of social interactions' and participants in an on-going dialogue about the future. We dream. And then occasionally we attempt to share our dreams with others. In recounting our dreams we try to construct a narrative... We also make stories out of our daytime existence. The human brain is a narrative creating machine that takes whatever happens and imposes chronology, meaning, cause and effect... We choose. We can choose to relate to our circumstances with bitterness or with openness. The stories that we tell determine nothing less than personal destiny. (From the introduction) This compelling new book is characteristically made up of chapters with one-word titles: Spaciousness, Narrative, Heat, Limits, Error, Politics, Arrest,

Empathy, Opposition, Collaboration and Sustenance. In addition to dipping into neuroscience, performance theory and sociology, Bogart also recounts vivid stories from her own life. But as neuroscience indicates, the event of remembering what happened is in fact the creation of something new.
