**Amber Waves** Catherine Zabinski,2020-09-01 A biography of a staple grain we often take for granted, exploring how wheat went from wild grass to a world-shaping crop. At breakfast tables and bakeries, we take for granted a grain that has made human civilization possible, a cereal whose humble origins belie its world-shaping power: wheat. Amber Waves tells the story of a group of grass species that first grew in scattered stands in the foothills of the Middle East until our ancestors discovered their value as a source of food. Over thousands of years, we moved their seeds to all but the polar regions of Earth, slowly cultivating what we now know as wheat, and in the process creating a world of cuisines that uses wheat seeds as a staple food. Wheat spread across the globe, but as ecologist Catherine Zabinski shows us, a biography of wheat is not only the story of how plants ensure their own success: from the earliest bread to the most mouthwatering pasta, it is also a story of human ingenuity in producing enough food for ourselves and our communities. Since the first harvest of the ancient grain, we have perfected our farming systems to grow massive quantities of food, producing one of our species' global mega crops—but at a great cost to ecological systems. And despite our vast capacity to grow food, we face problems with undernourishment both close to home and around the world. Weaving together history, evolution, and ecology, Zabinski's tale explores much more than the wild roots and rise of a now-ubiquitous grain: it illuminates our complex relationship with our crops, both how we have transformed the plant species we use as food, and how our society—our culture—has changed in response to the need to secure food sources. From the origins of agriculture to gluten sensitivities, from our first selection of the largest seeds from wheat's wild progenitors to the sequencing of the wheat genome and genetic engineering, Amber Waves sheds new light on how we grow the food that sustains so much human life.

Wheat Belly William Davis,2014-06-03 Includes a sneak peek of Undoctored—the new book from Dr. Davis! In this #1 New York Times bestseller, a renowned cardiologist explains how eliminating wheat from our diets can prevent fat storage, shrink unsightly bulges, and reverse myriad health problems. Every day, over 200 million Americans consume food products made of wheat. As a result, over 100 million of them experience some form of adverse health effect, ranging from minor rashes and high blood sugar to the unattractive stomach bulges that preventive cardiologist William Davis calls wheat bellies. According to Davis, that excess fat has nothing to do with gluttony, sloth, or too much butter: It's due to the whole grain wraps we eat for lunch. After witnessing over 2,000 patients regain their health after giving up wheat, Davis reached the disturbing conclusion that wheat is the single largest contributor to the nationwide obesity epidemic—and its elimination is key to dramatic weight loss and optimal health. In *Wheat Belly*, Davis exposes the harmful effects of what is actually a product of genetic tinkering and agribusiness being sold to the American public as wheat—and provides readers with a user-friendly, step-by-step plan to navigate a new, wheat-free lifestyle. Informed by cutting-edge science and nutrition, along with case studies from men and women who have experienced life-changing transformations in their health after waving goodbye to wheat, *Wheat Belly* is an illuminating look at what is truly making Americans sick and an action plan to clear our plates of this seemingly benign ingredient.

*Dust in the Wind* Tom Morrow,2012-05 Dave White, a young man growing up in Oklahoma in the early 1960s, feels hopelessly trapped by his life. He knows that if he doesn't leave, his heart will break. Dave knows he can't deny his dreams of a better life for a minute longer, so when a vague shadow of opportunity arises, he grabs it. Finally, he gets his chance to spread his wings and fly away with the wind. Dave follows his heart to the wheat harvest, but what he finds isn't exactly the stuff of dreams. Each year, thousands of men, women, and children from every crossroads, whistle-stop, town, and city go to the wheat harvest. Like these others, Dave finds twenty-four-hour days, working in the never-changing, sun-blistered fields. He finds a world of prejudice, pain, and sudden death. In this world, once a person is ten miles from home, no one cares if that person lives or dies. In seeking their dreams, Dave and the other workers find themselves challenged by a harsh reality. But in spite of these hardships, Dave also discovers true friendship and even love in these fields.

**A Deal in Wheat and Other Stories** Frank Norris,2017-08-08 A Deal in Wheat and Other Stories of the New and Old West is a collection of short stories written by the American author Frank Norris. It was published posthumously in 1903 and composed primarily of recently published works. I. The first of the five sections of the story, entitled The Bear- Wheat at Sixty-Two, takes place in rural Kansas. Sam Lewiston leaves his wife, Emma, home on the ranch while he goes into town one last time to try to sell his wheat to Bridges & Co., Grain Dealers before being forced out of the market. At sixty-two cents a bushel, Lewiston can no longer afford to raise wheat and must take a job with his wife's brother in Chicago. II. The next section, The Bull- Wheat at a Dollar-Ten, introduces the two main players of the Chicago-run wheat business, the bear and the bull: Treslow and Hornung. When Treslow had let the price fall to sixty-two cents, Hornung had almost run him out of business...

**The World in a Grain** Vince Beiser,2019-08-06 A finalist for the PEN/E. O. Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world--sand--and the crucial role it plays in our lives. After water and air, sand is the natural resource that we consume more than any other--even more than oil. Every concrete building and paved road on Earth, every computer screen and silicon chip, is made from sand. From Egypt's pyramids to the Hubble telescope, from the world's tallest skyscraper to the sidewalk below it, from Chartres' stained-glass windows to your iPhone, sand shelters us, empowers us, engages us, and inspires us. It's the ingredient that makes possible our cities, our science, our lives--and our future. And, incredibly, we're running out of it. The World in a Grain is the compelling true story of the hugely important and diminishing natural resource that grows more essential every day, and of the people who mine it, sell it, build with it--and sometimes, even kill for it. It's also a provocative examination of the serious human and environmental costs incurred by our dependence on sand, which has received little public attention. Not all sand is created equal: Some of the easiest sand to get to is the least useful. Award-winning journalist Vince Beiser delves deep into this world, taking readers on a journey across the globe, from the United States to remote corners of India, China, and Dubai to explain why sand is so crucial to modern life. Along the way, readers encounter world-changing innovators, island-building entrepreneurs, desert fighters, and murderous sand pirates. The result is an entertaining and eye-opening work, one that is both unexpected and involving, rippling with fascinating detail and filled with surprising characters.

*The Story of Bread* Edwin Lincoln Barker,1911

**Bread Comes to Life** George Levenson,2008-10-01 From a patch of wheatgrass in his backyard, award-winning filmmaker George Levenson takes readers on a tour of bread made from scratch. A thresher, a grinder, and finally a doughy combination of flour, water, yeast, and oil combine to make a freshly baked loaf of whole wheat bread. With energetic, poetic text and vivid photographs, the creative team behind PUMPKIN CIRCLE: THE STORY OF A GARDEN shows children that there's a lot more to this kitchen staple than they might expect.

*Wheat That Springeth Green* J.F. Powers,2012-11-21 Wheat That Springeth Green, J. F. Powers's beautifully realized final work, is a comic foray into the commercialized wilderness of modern American life. Its hero, Joe Hackett, is a high school track star who sets out to be a saint. But seminary life and priestly apprenticeship soon damp his ardor, and by the time he has been given a parish of his own he has traded in his hair shirt for the consolations of baseball and beer. Meanwhile Joe's higher-ups are pressing for an increase in profits from the collection plate, suburban Inglenook's biggest business wants to launch its new line of missiles with a blessing, and not all that far away, in Vietnam, a war is going on. Joe wants to duck and cover, but in the end, almost in spite of himself, he is condemned to do something right. J. F. Powers was a virtuoso of the American language with a perfect ear for the telling cliché and an unfailing eye for the kitsch that clutters up our lives. This funny and very moving novel about the making and remaking of a priest is one of his finest achievements.
