A Wind-Storm in the Forests John Muir,2014-10-28 The nature writings of pioneering environmentalist and Sierra Club founder John Muir are like no other. In this essay from 1894, Muir describes the grandeur of the winds at play in the forests, with stunning and musical detail about the trees of the Sierra and their individual reaction to the wind. Muir's story of climbing a 100-foot Douglas Spruce to experience the sway and swirl of a storm for himself is unforgettable. This short work is part of Applewood's American Roots, series, tactile mementos of American passions by some of America's most famous writers.

Storms, Violent Winds, and Earth's Atmosphere John P. Rafferty Associate Editor, Earth Sciences,2010-08-15 Presents an introduction to storms, discussing the role of the Earth's atmosphere in the formation of storms and describing the different types of storms, including windstorms, thunderstorms, tornadoes, and tropical cyclones.

Divine Wind Kerry Emanuel,2005-09-01 Imagine standing at the center of a Roman coliseum that is 20 miles across, with walls that soar 10 miles into the sky, towering walls with cascades of ice crystals falling along its brilliantly white surface. That's what it's like to stand in the eye of a hurricane. In *Divine Wind*, Kerry Emanuel, one of the world's leading authorities on hurricanes, gives us an engaging account of these awe-inspiring meteorological events, revealing how hurricanes and typhoons have literally altered human history, thwarting military incursions and changing the course of explorations. Offering an account of the physics of the tropical atmosphere, the author explains how such benign climates give rise to the most powerful storms in the world and tells what modern science has learned about them. Interwoven with this scientific account are descriptions of some of the most important hurricanes in history and relevant works of art and literature. For instance, he describes the 17th-century hurricane that likely inspired Shakespeare's *The Tempest* and that led to the British colonization of Bermuda. We also read about the Galveston Hurricane of 1900, by far the worst natural calamity in U.S. history, with a death toll between 8,000 and 12,000 that exceeded the San Francisco earthquake, the Johnstown Flood, and the Okeechobee Hurricane. Co Boasting more than one hundred color illustrations, from combined. Boasting more than one hundred color illustrations, from ultra-modern Doppler imagery to classic paintings by Winslow Homer, *Divine Wind* captures the profound effects that hurricanes have had on humanity. Its fascinating blend of history, science, and art will appeal to weather junkies, science buffs, and everyone

who read Isaac's Storm.

Superstorm 1950 David A. Call, 2023-01-15 In November 1950, the greatest storm of the twentieth century crippled the eastern United States, affecting more than 100 million people. Sometimes referred to as the Great Appalachian or Thanksgiving storm, this was no ordinary weather event. Its giant size and multiple record-setting hazards—including snow, ice, flooding, wind, and cold temperatures—were cataclysmic. This superstorm was the most costly weather-related disaster when it occurred. Only two other storms that affected the US mainland since then, both hurricanes, have exceeded its death toll. The weather records it established remain benchmarks of extreme weather to this day. Superstorm 1950 examines the immediate impact of the storm, covering not just meteorology, but also its wide-ranging social impacts, which varied by race, class, and gender. The repercussions continue to affect us today, in obvious areas like weather forecasting, and in surprising areas like Ohio State football and government tax policy. Because superstorms are not as familiar as hurricanes or tornadoes, they can be overlooked in terms of weather-related disasters. This is a mistake. Vulnerability to weather disasters is increasing, and a similar storm today would likely be the most expensive weather disaster ever in the United States. Superstorm 1950 serves not only as a riveting account of one of the greatest disasters in US history, but also provides a premonition of what may come if global climate change is not confronted.

The Wind in the Reeds Wendell Pierce, Rod Dreher, 2015-09-08 2016 Christopher Award Winner From acclaimed actor and producer Wendell Pierce, an insightful and poignant portrait of family, New Orleans and the transforming power of art. On the morning of August 29, 2005, Hurricane Katrina barreled into New Orleans, devastating many of the city's neighborhoods, including Pontchartrain Park, the home of Wendell Pierce's family and the first African American middle-class subdivision in New Orleans. The hurricane breached many of the city's levees, and the resulting flooding submerged Pontchartrain Park under as much as 20 feet of water. Katrina left New Orleans later that day, but for the next three days the water kept relentlessly gushing into the city, plunging eighty percent of New Orleans under water. Nearly 1,500 people were killed. Half the houses in the city had four feet of water in them—or more. There was no electricity or clean water in the city; looting and the breakdown of civil order soon followed. Tens of thousands of New Orleanians were stranded in the city, with no way out; many more evacuees were displaced, with no way back in. Pierce and his family were some of the lucky ones: They survived and were able to ride out the storm at a relative's house 70 miles away. When they were finally allowed to return, they found their family home in tatters, their neighborhood decimated. Heartbroken but resilient, Pierce vowed to help rebuild, and not just his family's home, but all of Pontchartrain Park. In this powerful and redemptive narrative, Pierce brings together the stories of his family, his city, and his history, why they are all worth saving and the critical importance art played in reuniting and revitalizing this unique American city.

Storm Struck Robert Campbell, 2023-12 **STORM STRUCK: When Supercharged Winds Slammed Northwest Michigan** It was a hundred-year storm, said some. Thin trees snapped like matchsticks; thick ones toppled, one atop another, like felled soldiers. The storm's straight-wind blast left houses with gaping holes, thousands of residents with no power for days, a Sleeping Bear Dunes National Lakeshore that is, said one official, unrecognizable, and a cleanup that could take years. **A UNIQUE, CROWD-SOURCED BOOK FROM THE COMMUNITY** Following a social media blast by Mission Point Press, over 70 local or visiting photographers submitted their visions of the storm, resulting in well over 300 photos from Leelanau County, Traverse City, Old Mission Peninsula, Acme, Williamsburg, Alden, Frankfort, Mackinaw, Kalkaska and Antrim County. Mission Point Press, a Traverse City publisher, will release a book on Sept. 27, 2015, chronicling the historic, tragic event. Titled *Storm Struck: When Supercharged Winds Slammed Northwest Michigan*, it will include: The storm's anatomy ... what caused it, and why it was so devastating. A foreword by Bob Sutherland, founder of Cherry Republic. Mapped details of the path it followed. Extensive photographs showing the storm and the impact on Leelanau, Grand

Traverse and Antrim counties - and more - from more than 70 different photographers. Stories of the people affected - their heroics and the swift response to repair the damage.

Thunder in the Heartland Thomas W. Schmidlin, Jeanne Appelhans Schmidlin, 1996 Ohio can be a land of weather extremes. Bringing together data from government records, scientific studies, memoirs, diaries and newspapers, this study highlights 200 weather events from 1790 to the present which demonstrate extremes of rain, snow, storms and temperature.

Lunatic Wind William Price Fox, 1992 A report on the night Hurricane Hugo slammed into the South Carolina coast includes commentary from the people caught in the storm and narrative accounts of the history, lore, and local color of Charleston.

A Wind to Shake the World Everett S. Allen, 1976 The thrilling story of the hurricane of 1938, the worst New England storm of the 20th century, as told by a reporter whose first day on the New Bedford waterfront was the day the storm blew in.
