**The Boy Who Harnessed the Wind** William Kamkwamba, Bryan Mealer, 2015-02-05 Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

**Windmill Tales** Wyman Meinzer, Coy F. Harris, 2004 In *Windmill Tales*, in ninety-nine beautiful full-color images, photographer Wyman Meinzer shows American windmills as they appear today. Many of them are still working, and others have fallen or are preserved at the American Wind Power Center, but all illustrate the way of life that was made possible by the windmill. Brief reminiscences and stories told by visitors to the American Wind Power Center give the reader a sense of the central importance of windmills in the lives of early pioneers in the West. Together with the photographs they give us a fascinating insight into our history.

**The Golden Windmill** Stacy Aumonier, 2012-08-01 Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Still Turning Christopher C. Gillis, 2015-09-16 The Aermotor Windmill Company, which commenced operations in Chicago in 1888, is the nation's sole remaining full-time manufacturer of water-pumping machines. The company's imprint on rural America, particularly across the West, is still visible today in

the tens of thousands of its windmills that bring water to the earth's surface. *Still Turning* is the first book to explore the rise of the American windmill through the experience of this important company. Aermotor founder La Verne Noyes and engineer Thomas Perry developed and perfected the all-metal wind pump in the 1880s. Within a decade, the "mathematical windmill" began to dominate the market. Aermotor continued to expand and innovate. The ruggedness and simplicity of the American mechanical windmill has allowed it to outlast many newer water-pumping technologies over the years with minimal maintenance and oversight. Christopher C. Gillis traces this story and more, from the early days of the company to Aermotor's present-day relevance as it continues to produce its iconic windmills. *Still Turning* is a significant contribution not only to the history of wind power but also to the history of American enterprise.

**Jan of the Windmill** Juliana Horatia Gatty Ewing,2014-07-11 So the windmiller might have said, if he had been in the habit of putting his thoughts into an epigrammatic form, as a groan from his wife and a growl of thunder broke simultaneously upon his ear, whilst the rain fell scarcely faster than her tears. It was far from mending matters that both storms were equally unexpected. For eight full years the miller's wife had been the meekest of women. If there was a firm (and yet, as he flattered himself, a just) husband in all the dreary straggling district, the miller was that man. And he always did justice to his wife's good qualities, - at least to her good quality of submission, - and would, till lately, have upheld her before any one as a model of domestic obedience. From the day when he brought home his bride, tall, pretty, and perpetually smiling, to the tall old mill and the ugly old mother who never smiled at all, there had been but one will in the household. At any rate, after the old woman's death. For during her life-time her stern son paid her such deference that it was a moot point, perhaps, which of them really ruled. Between them, however, the young wife was moulded to a nicety, and her voice gained no more weight in the counsels of the windmill when the harsh tones of the mother-in-law were silenced for ever.
