Storm Surge Adam Sobel, 2014-10-14 Was Sandy a freak of nature, or the new normal? On October 29, 2012, Hurricane Sandy reached the shores of the northeastern United States to become one of the most destructive storms in history. But was Sandy a freak event, or should we have been better prepared for it? Was it a harbinger of things to come as the climate warms? In this fascinating and accessible work of popular science, atmospheric scientist and Columbia University professor Adam Sobel addresses these questions, combining his deep knowledge of the climate with his firsthand experience of the event itself. Sobel explains the remarkable atmospheric conditions that gave birth to Sandy and determined its path. He gives us insight into the science that led to the accurate forecasts of the storm from genesis to landfall, as well as an understanding of why our meteorological vocabulary failed our leaders in warning us about this unprecedented weather system—part hurricane, part winter-type nor'easter, fully deserving of the title Superstorm. *Storm Surge* brings together the melting glaciers, the warming oceans, and a broad historical perspective to explain how our changing climate and developing coastlines are making New York and other cities more vulnerable. Engaging, informative, and timely, Sobel's book provokes us to think differently about how we can better prepare for the storms in our future.

Regenerative Leadership Giles Hutchins, 2019-07-16 This book by leadership and sustainability experts Giles Hutchins and Laura Storm provides an exciting and comprehensive framework for building regenerative life-affirming businesses. It offers a multitude of business cases, fascinating examples from nature's living systems, insights from the front-line pioneers and tools and techniques for leaders to succeed and thrive in the 21st century.

Regenerative Leadership draws inspiration from pioneering thinking within biomimicry, circular economy, adult developmental psychology, anthropology, biophilia, sociology, complexity theory and next-stage leadership development. It connects the dots between these fields through a powerful framework that enables leadership to become regenerative: in harmony with life, building thriving, prosperous organizations amid transformational times. The book is a combination of theoretical frameworks, case studies, tools & practices: Everything the leader needs to be successful in the 21st century. Regenerative Leadership - what's it all about? While the future is uncertain, we clearly see an upward trend towards sustainable conscious business. And this is more than just a trend - we're witnessing a new kind of organization emerging. An organization which is able to rapidly sense and respond to the ever-changing business climate by innovating how and why it creates and delivers value, and the way it engages internally and externally with its ecosystem of employees, customers, suppliers, resources, investors, society and environment. This new kind of organization is the organization-as-living-system that is designed on the Logic of Life: life-affirming businesses that thrive from the inside out, by cultivating conditions conducive for life, internally and externally. These organizations nurture flourishing cultures while focusing on products and services that enhance society and the environment. Regenerative organizations will be tomorrow's success stories.

Working Water Bill Wenk, 2021-10-12 Water is far too valuable of a resource to be disposed as a waste. Working Water presents the work of Denver landscape architecture firm Wenk Associates, highlighting their projects that treat stormwater, and the infrastructure that controls it, as a resource that

supports functioning natural systems and enhanced urban open space. Built projects illustrate how stormwater runoff can be directed to support an intimate private garden, to the large-scale redevelopment of derelict industrial lands in Milwaukee organised around a stormwater park and open space system. Planning projects range from a plan for a surface stormwater system developed incrementally for a redeveloping urban district in central Denver, to a multi-generational plan for restoration of the Los Angeles River that will require profound changes in stormwater management policies and practice for full implementation. The final chapter describes the challenges, strategies, and lessons learned over the firm's 37-year history as part of implementing new approaches to infrastructure design that can withstand the test of time.

Weathering the Storm Wally Seccombe, 1995-12-17 In this challenging sequel to *A Millennium of Family Change* Wally Seccombe examines in detail the ways in which large-scale economic changes shape the microcosm of personal life.

Weathering the Storm Wally Seccombe, 1995-12-17 The industrial revolution which so transformed nineteenth-century labour brought about fundamental changes in the lives of working-class families. In this challenging sequel to *A Millennium of Family Change* Wally Seccombe examines in detail the ways in which large-scale economic changes shape the microcosm of personal life. Seccombe argues that what we think of as the modern nuclear family only took shape relatively recently: whereas at the beginning of the nineteenth century families tended to contain several earners, it was not until the time of the First World War that the male breadwinner had become the norm. He traces the effects on the family of increasingly centralized manufacture, the separation

of workplaces from the home neighbourhood, and the changes in domestic labour brought about by urban housing. And he documents how the introduction of compulsory schooling and the rise of birth control contributed to changes in the dynamic of the working-class family, as children are differentiated from adults and conjugal rights and duties renegotiated. Combining empirical scope with conceptual clarity, *Weathering the Storm* makes a decisive contribution to the study of family history.

Storm Breaking Mercedes Lackey, 1997-10-01 As Storm Breaking opens, the western allies, led by Karal, Karsite Sunpriest and delegate to the Valdemaran Court, and the Adepts Firesong and An'desha, have traveled deep into the Dorisha Plains to locate the ancient ruins of the Tower of Urtho, Mage of Silence, creator of the gryphons. Legend has it that below the Tower, deeply buried beneath the plains, is Urtho's Vault, hidden stronghold of some of the most powerful magical weapons ever devised - weapons that Urtho himself felt were too dangerous to use. With the help of the Shin'a'in plainsmen, they have successfully excavated this ancient arsenal, and risked their lives triggering one of these antique but potent tools of death to unleash a monstrous burst of mage-energy. With this explosion of magical power, Karal, Firesong, and their companions have temporarily counteracted

the ever-increasing waves of the mage storms. But they know that this desperate action will not save them - they have bought themselves precious time, but are still far from a permanent solution. They know now that the mage storms are an echo through time of the prehistoric Cataclysm which destroyed Urtho's Tower, created the vast and barren Dorisha Plains, and permanently warped their world more than two thousand years ago. And they also know that if they don't find a way to banish these magical vibrations they will culminate in another Cataclysm - this time destroying their world for good. But the Vault is not the only thing buried for centuries below the Dorisha Plains, and camped in the ruins of what once was the workplace of the most ingenious mage their world has ever known, the desperate allies soon come to realize that their solution may lie beneath the dust at their feet. The saving of their world just might be accomplished by the work of a man who has been dead for millennia!

Authors of the Storm Gary Alan Fine, 2009-10-15 Whether it is used as an icebreaker in conversation or as the subject of serious inquiry, "the weather" is one of the few subjects that everyone talks about. And though we recognize the faces that bring us the weather on television, how government meteorologists and forecasters go about their jobs is rarely scrutinized. Given recent weather-related disasters, it's time we find out more. In *Authors of the Storm*, Gary Alan Fine offers an inside look at how meteorologists and forecasters predict the weather. Based on field observation and interviews at the Storm Prediction Center in Oklahoma, the National Weather Service in Washington, D.C., and a handful of midwestern outlets, Fine finds a supremely hard-working, insular clique of professionals who often refer to themselves as a "band of brothers." In Fine's skilled

hands, we learn their lingo, how they “read” weather conditions, how forecasts are written, and, of course, how those messages are conveyed to the public. Weather forecasts, he shows, are often shaped as much by social and cultural factors inside local offices as they are by approaching cumulus clouds. By opening up this unique world to us, Authors of the Storm offers a valuable and fascinating glimpse of a crucial profession.

Desert Storm Diaries Carlin Comm, 2009-04-10 From mind numbing boredom one moment to being absolutely scared to death the next Life at sea is always interesting! The men and women of the Navy's HC-5 Providers, Detachment 4, while deployed on the T-AE-26 Kilauea, set records, got awards, and had some fun too! Start with helicopters hovering with explosive cargo, mix in some truly lunatic fork lift drivers, maybe grab a couple hours of sleep, if you're lucky, have some great food and terrible coffee, grab your Walkman and your gas mask, we'll enjoy surreal sunsets, and oh yeah, don't forget we're in a War Zone! Its an Adventure, just like the Navy promised! Told from the perspective of an aircraft mechanic who was just doing his best to hold things together, you'll feel the salt spray on your face as the rotor wash threatens to blow you over the edge. This book is dedicated to all the people back home, who wrote the letters and let us know they hadn't forgotten us. Thanks for the mail!
