The Internal World and Attachment Geoff Goodman, 2013-06-17 How, asks Geoff Goodman in *The Internal World and Attachment*, can we progress further in integrating the fruits of attachment research with the accumulated clinical wisdom of psychoanalytic theorizing about the internal world of object representations? The key, he answers, is to look more closely at the basic assumptions of each body of theory, especially those assumptions, whether embedded or explicit, that bear on the formation of psychic structure. Drawing on Kernberg's insights into the affective and instinctual substrata of psychic organizations, Goodman proposes that insecure attachment categories can be correlated with particular constellations of self and object representations. Such convergences provide a springboard to further theoretical explanations, most especially to the relations between attachment and adult sexual behavior. Indeed, one outstanding feature of Goodman's proposals is the light they cast on various forms and meanings of sexual psychopathology, as he delineates how both promiscuity and retreats from sexual intimacy can be differentially interpreted depending on the patient's pattern of attachment. Destined to provoke lively debate, *The Internal World and Attachment* is a powerfully informative attempt to go beyond the researcher's view of attachment as a motivational system. For Goodman, attachment is informed by an internal logic that reflects fantasies and defense, and an appreciation of the interaction of attachment pattern with various constellations of self and object representations can deepen our understanding of the internal world in clinically consequential ways. Keeping his eye resolutely on the clinical texture of attachment observations and the clinical phenomenology expressive of internal object relations, Goodman provides the reader with an experience-near basis for viewing two influential bodies of knowledge as complementary avenues for apprehending the internal meaning of externally observable behavior.

Working Time and Employment (Routledge Revivals) Bob Hart, 2010-07-02 First published in 1987, this Routledge Revival reissues the first systematic and integrated analysis of working time and employment, reaching to the core elements of a vital area of labour economics. It offers both a comprehensive analysis of the impact of workweek reductions on employment and hours as well as a thorough coverage of part-time employment, temporary lay-offs, short-time working, labour subsidies, social security funding, mandatory and early retirement and collective bargaining. This book provides the first comprehensive attempt to examine carefully the key economic issues involved in the general policy debate on working time and employment. This reissue will be of serious interest to advanced undergraduates, post-graduates and researchers in labour economics, and will also be relevant to those interested in labour microeconomics, macroeconomics, business economics and management studies.

Putting Feminism to Work Suzanne Egan, 2020-11-23 This book explores the place of feminism and uptake of trauma in contemporary work against sexual violence. Egan presents a refreshing alternative position on arguments about the co-optation or erasure of feminism within institutionalized, professionalized services for sexual assault victims. Using original research on Australian sexual assault services, *Putting Feminism to Work* effectively illustrates how feminist concepts and ideas have become routinized in contemporary services and enacted in daily practices with survivors and communities. The book engages with, yet resists, the notion that feminist engagement with knowledge (trauma) based in psychiatry and clinical psychology is incompatible with feminism or inevitably reduces sexual violence to a problem of individual healing. Indeed Egan argues that the productive ways practitioners integrate neurobiological understandings of trauma into their work suggests rich possibilities for reintroducing a non-essentialist biology of the body into feminist theories of sexual violence. Scholars, students and practitioners working in the fields of violence against women, sociology, women's and gender studies, health, social work and policy studies, as well as the emerging field of sociologically informed trauma studies, will find this book of interest.

Event Cognition Gabriel A. Radvansky,Jeffrey M. Zacks,2014-06-09 Much of our behavior is guided by our understanding of events. We perceive events when we observe the world unfolding around us, participate in events when we act on the world, simulate events that we hear or read about, and use our knowledge of events to solve problems. In this book, Gabriel A. Radvansky and Jeffrey M. Zacks provide the first integrated framework for event cognition and attempt to synthesize the available psychological and neuroscience data surrounding it. This synthesis leads to new proposals about several traditional areas in psychology and neuroscience including perception, attention, language understanding, memory, and problem solving. Radvansky and Zacks have written this book with a diverse readership in mind. It is intended for a range of researchers working within cognitive science including psychology, neuroscience, computer science, philosophy, anthropology, and education. Readers curious about events more generally such as those working in literature, film theory, and history will also find it of interest.

Critical Social Theory Tim Dant,2003 Critical theory has left an indelible mark on postwar social thought. But what are the relations between critical theory and 'the cultural turn' ? How did critical theory inform later French critical theorists, such as Lefebvre, Barthes and Baudrillard? This accomplished and accessible book: - Demonstrates the origins of critical theory in the Marxian analysis of the capitalist mode of production and Freudian psychoanalysis - Clearly explains the main achievements of critical theory - Elucidates how critical theory defines culture as a system that constrains and alienates the individual - Explores the potential for social change and personal emancipation in the critical heritage. The author locates the importance of myth and reason, the significance of sexuality, the place of work, the difference between art and entertainment, the nature of everyday life and the relationship between knowledge and action. The result is a lucid and informative text which will appeal to all students interested in the critical traditions of social thought.

You've long been told to Do what you love. Sounds simple, but the real challenge is how to do this in a world not set up to help you. Most of us actually don't know the real truth of what we love—what engages us and makes us thrive—and our workplaces, jobs, schools, even our parents, are focused instead on making us conform. In this eye-opening, uplifting book, Buckingham shows you how to break free from this conformity—how to decode your own loves, turn them into their most powerful expression, and do the same for those you lead and those you love. Mold your existing role so that it calls upon the very best of you. Position yourself as a leader in such a way that your followers quickly come to trust in you.
