Whitley Strieber & Art Bell

**Divine Wind** Kerry Emanuel, 2005-09-01 Imagine standing at the center of a Roman coliseum that is 20 miles across, with walls that soar 10 miles into the sky, towering walls with cascades of ice crystals falling along its brilliantly white surface. That's what it's like to stand in the eye of a hurricane. In *Divine Wind*, Kerry Emanuel, one of the world's leading authorities on hurricanes, gives us an engaging account of these awe-inspiring meteorological events, revealing how hurricanes and typhoons have literally altered human history, thwarting military incursions and changing the course of explorations. Offering an account of the physics of the tropical atmosphere, the author explains how such benign climates give rise to the most powerful storms in the world and tells what modern science has learned about them. Interwoven with this scientific account are descriptions of some of the most important hurricanes in history and relevant works of art and literature. For instance, he describes the 17th-century hurricane that likely inspired Shakespeare's *The Tempest* and that led to the British colonization of Bermuda. We also read about the Galveston Hurricane of 1900, by far the worst natural calamity in U.S. history, with a death toll between 8,000 and 12,000 that exceeded the San Francisco earthquake, the Johnstown Flood, and the Okeechobee Hurricane. Boasting more than one hundred color illustrations, from ultra-modern Doppler imagery to classic paintings by Winslow Homer, *Divine Wind* captures the profound effects that hurricanes have had on humanity. Its fascinating blend of history, science, and art will appeal to weather junkies, science buffs, and everyone who read Isaac's *Storm*.

*The Progress of This Storm* Andreas Malm, 2020-02-04 An attack on the idea that nature and society are impossible to distinguish from each other In a world careening towards climate chaos, nature is dead. It can no longer be separated from society. Everything is a blur of hybrids, where humans possess no exceptional agency to set them apart from dead matter. But is it really so? In this blistering polemic and theoretical manifesto, Andreas Malm develops a counterargument: in a warming world, nature comes roaring back, and it is more important than ever to distinguish between the natural and the social. Only with a unique agency attributed to humans can resistance become conceivable.

**Storm Season** Joe Haldeman, John Brunner, Philip José Farmer, 2020-02-04 A whirlwind of fantasy action and adventure descends on Thieves' World®—as related by C. J. Cherryh, Diana L. Paxson, Andrew J. Offutt, and others. Welcome back to Sanctuary, “the city where anything could happen, where characters created by some of the best fantasy writers of the generation crossed paths and shared adventures” (Black Gate). The Thieves' World® series continues with a story line created by Robert Lynn Asprin, C. J. Cherryh, Diana L. Paxson, Lynn Abbey, Janet Morris, and Andrew J. Offutt. In Storm Season, immortal warrior Tempus Thales and his nemesis, the crime lord Jubal, go head to head in fast-paced exploits that bring the simmering tension between them to a boil. “Much of Storm Season pertains to the conflict between Asprin's gladiator/crime lord Jubal and Morris' Tempus, and the other stories work to move this plotline along, while telling their own tales. Offutt, as usual, steals the show with a Shadowspawn story . . .” —Fantasy-Faction

*Eye Of The Storm* Jeffery Rosenfeld, 2009-07-21 A fascinating look at extreme

weather and the men and women who are risking their lives to give us a better understanding of this meteorological phenomenon.

*Hurricane Watch* Jack Williams, Bob Sheets, 2002-02-05 The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

*Prayer Storm* James W. Goll, 2011-07-28 Without a concerted storm of prayer around the clock and around the globe we cannot expect to see revival in our time. Updating the model of the Moravians in Hernnhut, Germany two centuries

ago, James Goll lays out a plan for today: an Internet-based community of intercessors who commit to pray one hour per week for (1) revival in the church, (2) youth awakening, (3) Israel, and (4) major crises. God does nothing but in answer to prayer, said John Wesley. This first book in the Prayer Storm series helps to raise up a new worldwide band of fervent intercessors.

The Whirlwind World of Hurricanes with Max Axiom, Super Scientist Katherine Krohn, 2019-09 In graphic novel format, follows the adventures of Max Axiom as he explores the science and history behind hurricanes--Provided by publisher.

**Storm World** B. V. Larson, 2018 James McGill is sent to the Core Worlds! In an unprecedented first, Earth sends a message to Mogwa Prime. Unfortunately, the messenger is not met with enthusiasm. Misunderstandings soon threaten all of Humanity. Forced to prove Earth can serve the Empire better than any rival, McGill does his best. Eager to prove our worth to the Galactics, the frontier war between Rigel and Earth is expanded to Storm World. Circled by six moons, the planet is ravaged by wild storms and tides. Battles are fought in raging hurricanes, and death stalks the soldiers on both sides. McGill grimly fights and dies in the mud until the job gets done, but will it be enough to satisfy the angry Mogwa?--Cover, page 4.

Freaks of the Storm Randall S. Cerveney, 2006 A treasury of unusual weather tales reports such oddities as tornadoes that have plucked chickens of their feathers, lightning that has stripped victims of their clothing, and hailstorms that have ended or prevented wars. Original.

*Hurricanes* Patricia Lauber, 2001 Tells how hurricanes form, how scientists study them, and how they have affected the United States throughout this century.

*The Coming Global Superstorm* Whitley Strieber & Art Bell, 2012-12-11 Over several months a potent succession of cold fronts will sweep across the world. Ever increasing in intensity and duration, damaging storms will batter the West Coast and spawn flooding, mudslides and severe, deadly tornadoes across the USA. Similar powerful storms will pummel Europe, sending millions streaming south in panic. Then meteorologists will issue their most severe warning yet: a storm that appears to be larger and more terrible than modern man has seen before. It will form a virtually nonstop hurricane of snow and ice that will begin to bury the Northern Hemisphere under an impenetrable sheet of frost. As weeks go by, the skies will remain turbulent and dark, and mankind will be thrust into its greatest peril - the global superstorm.

A New World John O'Brien, 2014-09-05 A vengeful darkness... Gathers in the night... One threat has been destroyed - another grows stronger. Even though Jack and the teams have won a major confrontation, their lives still hang by a thread. There are decisions to be made, and ones that have never been more critical. Leonard continues to try to keep his crew together after being hit by another soul-shattering blow. They've only recently become aware of this new world, and it doesn't seem to be letting up anytime soon as they silently plunge through the Pacific, looking for answers Leonard knows they may never find. Michael knows he can no longer stand idle and wait as he feels thousands of his kind disappear from his mind night after night. The weight of the survival of his kind weighs heavily on his shoulders and he pushes forward to end the threats to their existence. The new world must find its balance... And the scales are about to tip...

**Storm Chaser** Clive Gifford, 2009-11-30 Dicing with the world's most powerful storms.

The Day of the World Storm Margaret J Carr, 2021-04-06 THE DAY OF THE WORLD STORM Climate changes, global warming, eco disasters and pollution accumulated in the catastrophic storm that rages across the planet. On the day the world is ripped apart everything changes forever. In this changed history timeline 'wood is king', with the world's forest and jungles policed by the international W.V.M Corp. Three young people know the truth and struggle to find a way to their old familiar world. When an ancient woodland is set on fire and lives are put in danger, it is then that the three finally accept there is no going back. However one last question needs to be answered. What year is it?

**The Storm Earth** David Hartkop, 2021-06-14 In the late 2080s, the world is beset by permacanes, persistent hurricanes like the great red spot on Jupiter. Much of the world's roads, power grids, and train systems have collapsed because of severe weather events and chaos caused by rising seas. Kate is a genetic scientist working to save the dying reefs of the northern Caribbean. She is forced to fight for her life and her research when the oil-giant Combined-National Petroleum takes over the lagoon. Marquez is a physicist working on a secret fusion energy project. When he realizes that his research has been discovered, he scrambles to hide for fear of being erased. Tomoko is an autistic mathematician tending a fleet of microsattelites that form the Earth's only free global internet. When a bought-off government tries to shut down her project, she takes its survival into her own hands. Their journeys pit them against nature, cunning enforcement agents, cyborgs, and a race against time. THE STORM EARTH (137,000 words) is a work of speculative science fiction that asks if humanity will ultimately achieve a thriving environment, clean energy, and

freedom of thought - or will it be crushed by the entrenched corporate-government agenda of a dying planet.

*A Wind to Shake the World* Everett S. Allen, 1976 The thrilling story of the hurricane of 1938, the worst New England storm of the 20th century, as told by a reporter whose first day on the New Bedford waterfront was the day the storm blew in.

**After the Storm** T. S. Arthur, 2005-01-12 Purchase one of 1st World Library's Classic Books and help support our free internet library of downloadable eBooks. Visit us online at [www.1stWorldLibrary.ORG](http://www.1stWorldLibrary.ORG) -- NO June day ever opened with a fairer promise. Not a single cloud flecked the sky, and the sun coursed onward through the azure sea until past meridian, without throwing to the earth a single shadow. Then, low in the west, appeared something obscure and hazy, blending the hill-tops with the horizon; an hour later, and three or four small fleecy islands were seen, clearly outlined in the airy ocean, and slowly ascending - avant-couriers of a coming storm. Following these were mountain peaks, snow-capped and craggy, with desolate valleys between. Then, over all this arctic panorama, fell a sudden shadow. The white tops of the cloudy hills lost their clear, gleaming outlines and their slumbrous stillness. The atmosphere was in motion, and a white scud began to drive across the heavy, dark masses of clouds that lay far back against the sky in mountain-like repose.

*Regenerative Leadership* Giles Hutchins, 2019-07-16 This book by leadership and sustainability experts Giles Hutchins and Laura Storm provides an exciting and comprehensive framework for building regenerative life-affirming businesses. It offers a multitude of business cases, fascinating examples

from nature's living systems, insights from the front-line pioneers and tools and techniques for leaders to succeed and thrive in the 21st century. Regenerative Leadership draws inspiration from pioneering thinking within biomimicry, circular economy, adult developmental psychology, anthropology, biophilia, sociology, complexity theory and next-stage leadership development. It connects the dots between these fields through a powerful framework that enables leadership to become regenerative: in harmony with life, building thriving, prosperous organizations amid transformational times. The book is a combination of theoretical frameworks, case studies, tools & practices: Everything the leader needs to be successful in the 21st century. Regenerative Leadership - what's it all about? While the future is uncertain, we clearly see an upward trend towards sustainable conscious business. And this is more than just a trend - we're witnessing a new kind of organization emerging. An organization which is able to rapidly sense and respond to the ever-changing business climate by innovating how and why it creates and delivers value, and the way it engages internally and externally with its ecosystem of employees, customers, suppliers, resources, investors, society and environment. This new kind of organization is the organization-as-living-system that is designed on the Logic of Life: life-affirming businesses that thrive from the inside out, by cultivating conditions conducive for life, internally and externally. These organizations nurture flourishing cultures while focusing on products and services that enhance society and the environment. Regenerative organizations will be tomorrow's success stories.
