Fastnet Force 10 John Rousmaniere,2000-04-17 The deadliest storm in the history of modern sailing--Cover.

Seize the Storm Michael Cadnum,2012-06-05 Sailing from California to Hawaii, Susannah, her family, and a crewman are driven by a vicious storm into the path of a drifting powerboat. The ghostly boat carries the bodies of two drug runners and a huge stash of money. For the sailors, stealing the sordid treasure changes everything, causing dissent and division, compromising each of them, and putting their futures at risk. Because now they are being pursued by the worst enemies imaginable, including a drug lord's son eager to prove himself and a cold-blooded teenage hit man with murder on his mind.

Left for Dead Nick Ward,Sinead O'Brien,2008-12-10 In August of 1979, Nick Ward began the six-hundred-mile course of the UK's Fastnet Race with perfect weather. Within forty-eight hours, the deadliest storm in the history of modern sailing had blasted through the Irish Sea, throwing one of the world's most prestigious races into bedlam and taking the lives of fifteen sailors. Ward's boat, Grimalkin, was capsized again and again, and the skipper lost overboard; after hours of struggle, three of the crew fled the boat for the liferaft, and Nick was left alone to face down a storm that has become legendary among sailors and racing fans alike. Left for Dead is Nick Ward's harrowing and inspirational memoir of how he survived that dreadful night-the untold true story of an accident that has intrigued lovers of the sea for almost thirty years.

Fatal Storm Rob Mundle,2010-04-01 the Sydney to Hobart yacht race is one of the world's major sporting events. In 1998, it became one of the world's major sporting disasters. Six sailors tragically perished and numerous yachts sank or were badly damaged. the subsequent search and rescue operation was one of the most phenomenally accomplished peacetime effortsthe world has ever seen. In this fully updated edition to mark the 10th anniversary of the tumultuous race, Rob Mundle, one of Australia's leading journalists and yachtsmen, tells this story of challenge and survival with compassion, vigour and understanding. Drawing from extensive interviews with officials, crews, survivors and rescue service personnel, he relates like no other the calamity and triumph of the 1998 blue water classic. 'Mundle's portrayals of courageous sailors and heroic rescuers fighting for their lives are as vivid as any I have read.'- John Rousmaniere, author Fastnet, Force 10

Storm Prophet Hector Macdonald,2008-06-30 The Sydney Hobart yacht race is world famous: the crowds at the Boxing Day start; the Harbour full of colour; giant super-maxis competing for line honours and glory. But in the wrong weather, it can be deadly. No one will ever forget the carnage of 1998. This year, Kirsten McKenzie must win. The bank she's inherited is in trouble, and desperately needs the PR boost of a race victory. Everyone thinks she'll do it - she's got the fastest boat and the best record. Everyone, that is, except a boy called Moses who claims to be able to see the future. He doesn't foresee victory. He sees a storm, mountains of water. He sees a disaster. Petra Woods is Director of the Sydney New Coastguard. She doesn't want to believe Moses's warning, but as the race draws closer and his other predictions start coming true, she might not have a choice. The only option may be to plunge in between the perfect race and the perfect storm. The Storm Prophet is a truly gripping thriller about a vision, a race and the merciless power of the sea.

The Rover Boys in Southern Waters: or, The Deserted Steam Yacht Edward Stratemeyer,2017-09-05

Beyond Endurance Adam Mayers,2008 The August 1979 Fastnet race, from Cowes on the Isle of Wight in the English Channel to the Fastnet lighthouse off the south coast of Ireland, started calmly enough for the 303 boats taking part. The previous two races had been uneventful and none of the sailors, among them former British prime minister Ted Heath and American cable TV millionaire Ted Turner, anticipated anything out of the ordinary this time. They expected a challenge, an exhilarating ride, and three days of top-flight competition. But once the yachts left the shelter of the Cornish coast, they were hit by a storm that gained ferocity minute by minute until it was blowing Force 10 and raising mountainous waves. At Force 10, the wind speed at sea is fifty-five knots, just shy of a hurricane. Winds that strength on land uproot trees and demolish poorly constructed buildings. Beyond Endurance is the story of that race, which culminated in a night of terror, courage, and split-second reactions, of ferocious seas that forced each sailor either to give up and face almost certain death or to find within himself the extraordinary strength and skill that might, just might, keep him alive. Not all of them made it. Among the survivors were twenty-six men from Canada, Britain, and the United States, whom Mayers has interviewed about what they still call “that night.” Beyond Endurance is Mayers’s dramatic story of the Fastnet race: its hopeful start, the camaraderie of its crews, the challenges of the earlier cross-Channel races — and the deadly storm that caused the worst tragedy ever to befall an ocean-sailing race. From the Hardcover edition.

Fatal Storm Rob Mundle,1999 One of the world's three great ocean sailing competitions, the annual 630-mile race from Sydney, Australia, to Hobart, Tasmania, pits sailboats against the notoriously rough waters of Bass Strait and the Tasman Sea. The 115 boats leaving Sydney Harbor on Boxing Day (December 26) 1998 expected rough weather, but the gale that caught the boats well at sea in the predawn hours of December 27 was anything but routine. A freak, unseasonal storm, it brought hurricane-strength winds, waves six stories high, and the worst sailing disaster in recent history. Seven boats were abandoned at sea and five sank. Fifty-seven sailors were rescued, plucked from the decks of broken boats or from the sea itself under impossible conditions. Six sailors died. An Australian journalist and sailor who has covered the Sydney-Hobart thirty times and participated three times, Mundle knew many of the participants. He knew the rescuers. Good friends of his were among the dead. He even reported the unfolding drama to the Australian television audience. Later, in search of the deeper story, he interviewed 124 survivors, family members, rescuers, race officials, and crew members.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Rescue in the Pacific: A True Story of Disaster and Survival in a Force 12 Storm Tony Farrington,1998-03-22 In June of 1994 a dangerous bomb storm caught dozens of cruising sailors by surprise as they voyaged north from New Zealand. This is the true story of how nine yachts struggled to survive the hurricane-like conditions. Boats were battered by fierce winds and capsized by seas towering well over 50 feet high. Equipment was ripped loose, and water penetrated every weak point. Masts collapsed, rudders broke, and sailors lost steering control when they needed it most. The crews coped as best they could with injury, fear, exhaustion, and illness. Their electronic calls for help were picked up by satellites and radio operators, who initiated a massive air and sea search. This is the story of heroic rescues, human endurance, and tragic loss.

Sailing a Serious Ocean: Sailboats, Storms, Stories and Lessons Learned from 30 Years at Sea John Kretschmer,2013-10-18 I know you'll want to read more after you finish Sailing a Serious Ocean. And be warned, you'll very likely want to sail with John, perhaps across an ocean. -- DALLAS MURPHY, AUTHOR OF ROUNDING THE HORN After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages. Now you can take a seat next to John--at a lesser cost--and get the knowledge you need to fulfill your own dream of blue-water adventure. In Sailing a Serious Ocean, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route, navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and enjoying them. Before you set off across the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you.

HANDLING STORMS AT SEA Hal Roth,2008-07-01 The definitive guide to a critical, hotly debated topic How should a sailor cope with storms at sea? Some advocate heaving-to, others running off. Some say trail a sea anchor over the bow, others a drogue astern. The stakes in the discussion couldn't be higher, or the consensus lower. Finally, preeminent sailor/author Hal Roth offers a practical strategy that can evolve and respond

as storms grow stronger.

Thinking up a Hurricane Martinique Stilwell,2012-09-28 In the spring of 1977 Frank Stilwell launched Vingila, 17 tons of welded together 11-millimetre steel plates, in Durban harbour. An electrician by trade, Frank's experience of sailing amounted to not very much - an unpleasant spell on a Scottish fishing trawler as a young man and a brief holiday on someone else's yacht off the coast of Mozambique a couple of years before. Never one to be daunted by a challenge or to be resisted in any way, he took his nine year old twins, Robert and Nicky, out of school, persuaded his wife Maureen that they would all learn how to sail and cope with life on the open seas as they went, and prepared to follow his dream of circumnavigating the world. Facing real danger from the elements and at first having to live more by their wits than their skills, the Stilwell family set off boldly, determined to become part of a community of sailors and adventurers who spend more time on the ocean than they do on dry land. In this unique coming of age memoir Martinique Stilwell's recounting of her true life gypsy childhood is poignant and funny and heartbreaking all at the same time. With the wisdom and innocence of a child's point of view, it is a powerful yet tender story of physical and emotional adversity, of family dysfunction and the ties that bind, and of the shackles and exhilarating freedom of growing up different.

Storm Proofing Your Boat, Gear, and Crew Cap'n Fatty Goodlander,2016-05-29 Heavy weather management is simple-there are only two basic rules. The prudent mariner must control his vessel's speed and angle to the wind and seas. That's it. There's nothing complicated about these concepts. However, the offshore execution of these concepts at sea in 50+ knots of breeze and 30+ foot seas-what we traditionalists call offshore seamanship-can vary greatly depending on the boat type, number of hulls, sea state, wind force, the proximity and direction of land, the presence of ocean currents, underwater topography, and a hundred other evolving factors. Storm management can-and does-get complicated fast. This book covers everything the offshore sailor needs to know about vessel preparation, reducing sail, reefing, towing slowing drogues, deploying a parachute-type sea anchor and, ultimately, hanging to a Jordan Series Drogue. (340 pages, 42 photos, 36 illustrations.) Its core premise is simple: a used \$3,000 sailboat can be safer offshore than a new \$3,000,000 yacht if it is storm-proofed, has the proper gear, and has a crew who knows how to deploy both. Are you considering taking people you love offshore with limited funds to spend on marine safety gear? If so, read this book. It will both save you money and provide peace of mind. Storm survival isn't rocket science. It's all basic, do-able stuff. The emphasis is on practical what-actually-works at sea-with awareness that safety gear costs money and takes up valuable space. This book is aimed at frugal, safety-conscious cruising couples with few pennies and large dreams aboard small vessels on big oceans. Can't afford a fancy parachute sea anchor? Then consider the lowly, widely available automobile tire-even a discarded retread will do. Or deploy a fender. Or toss over a torn sail... How long should you stay in a storm? Why? Should you minimize or maximize your time within? Why? What are some of the critical decisions you'll need to make? Is there a lee shore or do you have plenty of sea room? When is a favorable current the worst news possible? What is the one thing you must avoid? Under what circumstance should you, if you want to make more miles downwind, toss your dock fenders overboard? Which is best during an extended blow-bow-on or stern-to? Why? What does the center of lateral resistance have to do with anything? How can ten cents worth of kite string save your life? Why are transoceanic sailors obsessed with hording air? Why, for gosh sake, would anyone immediately take a drink if they thought they were sinking? When is the best, most logical time to heave-to, set a parachute sea anchor off your bow, or deploy a Jordan Series Drogue from your stern? What tools should you carry? Where is every boat's lumberyard located? This book, unlike many, makes definite statements-with no hemming and hawing. It says you should never lay-to or scud. It says parachute retrieval is extremely dangerous. It cautions against any running set in mature seas. What about a tennis ball? What do drag queens have to do with it? Do what with burst fenders? When should you happily and gratefully discard the \$2,000 worth of storm gear you just purchased? What are the two basic choices as a hurricane approaches? From where do you step into a life raft? Storm Proofing shows you, step-by-step, how to survive a large storm aboard a small vessel on a big ocean-and at the cost of mini-bucks.

Heavy Weather Sailing 7th edition Peter Bruce,2016-06-16 For 50 years Heavy Weather Sailing has been regarded as the ultimate international authority on surviving storms at sea aboard sailing and motor vessels. The first edition was compiled by Kaines Adlard Coles himself in 1967. Since then technology may have improved, but the weather certainly hasn't. This is the seventh updated edition, edited by racing yachtsman Peter Bruce, ensuring that in its 50th year the book remains as relevant and as essential as it has been for the previous five decades. The book brings together a wealth of expert advice from many of the great sailors of the present, including fresh accounts of yachts overtaken by extreme weather, from Ewan Southby-Tailyour, Alex Whitworth and Peter Cook to Larry and Lin Pardey. It also includes a new Foreword by Sir Robin Knox-Johnston, Britain's most high profile yachtsman of the past 50 years. The expert advice section has been updated in line with current thinking, and there has been a major update to the chapter focusing on the use of storm sails as well as to the use of drag devices. The technique of taking refuge has been reviewed and updated, and the chapters dealing with preparations for heavy weather and its effect on yacht design have been overhauled. These revisions ensure that Heavy Weather Sailing is as relevant, useful and instructive for today's sailor venturing offshore as it ever was - perhaps more so in the light of tragic disasters like the loss of the Cheeky Raffiki mid-Atlantic on a delivery trip after her season racing in the Caribbean. This is the definitive book for crews of any size contemplating voyages out of sight of land anywhere in the world, whether racing or cruising. It gives a clear message regarding the preparations required, and the tactics to consider when it comes on to blow.

The Gathering Wind Gregory A. Freeman,2013-10-29 October 2012. A replica of the famous HMS Bounty, an eighteenth-century tall sailing ship, set a collision course with a storm that became the largest hurricane ever recorded in the Atlantic—a clash that proved to be one of the most unforgettable stories of Superstorm Sandy. The Bounty, crewed by an eclectic team of seafarers and led by highly respected captain Robin Walbridge, departed from Connecticut as Sandy raced north. Walbridge, whose decisions decided the fate of his ship and crew, attempted to outmaneuver the storm by heading southeast. As violent gusts tossed the wooden vessel, the crew fought to save their ship—and themselves. When the storm finally overtook the ship, the crew was tossed into the churning sea. The men and women of a Coast Guard station in North Carolina courageously flew into hundred-mile-per-hour winds to rescue the survivors of the Bounty. After hours of white-knuckle flying, they accomplished one of their most memorable rescues ever. Based on interviews with Bounty survivors and unfettered access to Coast Guard rescue team members, *The Gathering Wind* is the most complete account of this heartbreaking, thrilling, and inspirational story. Fatal Storm Rob Mundle,2000 The Sydney to Hobart yacht race has become established as one of the world's major sporting events. The race in 1998 became one of the world's major sporting disasters with the tragic loss of six sailors, injuries to many others and damage to many boats. The search and rescue operation was more like the D Day landing exercise. Its story leaves Saving Private Ryan in the shade. Had it not been for the superior skills in organisation and operation many more would have been lost. 'As I was being lifted from the water I just remember looking up and seeing this brilliant white light above me. I genuinely didn't know if I was alive or dead. That was the defining moment. I knew that if I were alive then I would never do another Sydney-Hobart. My wife, my children, family and friends meant too much to me - nothing else.' Steve Kulmar

Storm Tactics Lin Pardey,Larry Pardey,2002-08 Lin and Larry Pardey demonstrate methods to help you bring your boat and crew safely through storms. Join them near South Africa's Cape of Storms to watch a live demonstration of setting and retrieving a para-anchor, then sail on board Taleisin during Lin & Larry's rounding of Cape Horn with storm sails in action in 70-knot winds. They demonstrate technical details of storm tactics for both modern and classic boats. Learn how to prepare your crew and boat to eliminate fear and face heavy weather with a plan. Learn how and when to use the sailor's safety valve, heaving-to, with or without a para-anchor. They also discuss gear and equipment, plus special sails for heavy weather.

Soul of the Hurricane Nelson Simon,2021-10-26 Soul of the Hurricane is a remarkable debut from a singular storyteller. —David Isay, Peabody Award-winning creator of StoryCorps Nelson Simon didn't want to sign up as a last-minute crew member to transport a Norwegian schooner from Brooklyn to Bermuda. But one thing led to another, and there he was. He told himself that it would be a sort of pleasure cruise: a week in the Gulf Stream with a gourmet chef on board, some down time on a tropical island, then a quick flight home. What did it matter that he had practically no sailing experience? The eight other crew members had plenty—they just

needed an extra pair of hands. What could possibly go wrong? It was October 1991, and the ship was Anne Kristine, the oldest continuously sailing vessel in the world. What awaited them was Hurricane Grace, the southern end of what came to be known as the Perfect Storm. Soul of the Hurricane tells an unlikely tale that begins with an unexpected invitation and ends in the dead of night somewhere far from home, with a Coast Guard helicopter above and a dark, angry sea below.
