Using a diverse range of approaches, including the analysis of TV shows, cartoons, social media groups and blogs, face-to-face verbal interaction, political rhetoric and mainstream news reports, the authors explain the ways in which discursive psychology can offer insight into the nature of contemporary political communications. The book offers timely and international reflections on the context of online political communication, Brexit rhetoric, prejudice discourse and political persuasion, showcasing the analytical acumen and empirical insight that can be gleaned from discursive psychology methods. **Political Communication: Discursive Perspectives** highlights the value of contributions from outside English speaking academia and is essential reading for academics, researchers and students interested in political communication or discursive psychology.

**Moon-face and Other Stories** Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. *The son of the Wolf* (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him

recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

**Object-oriented Programming Under Windows** Stephen Morris, 1994 Object-Oriented Programming under Windows presents object-oriented programming (OOP) techniques that can be used in Windows programming. The book is comprised of 15 chapters that tackle an area in OOP.

Strategic Management of Technology and Innovation Robert A. Burgelman, Modesto A. Maidique, Steven C. Wheelwright, 2001 This text has been written for a course in technology and innovation. It covers contemporary research by using a combination of text, readings, and cases. Based on reviewer response to a survey, the authors have updated many of the cases that instructors found outdated or lacking. Classic cases such as Claire McCloud have been kept, while newer cases such as Intel Corporation in 1999 have been added. There is also a strong set of readings from sources such as Harvard Business Review, California Management Review, and Sloan Management Review.

**A Screenful of Sugar?** Jon C. Schommer, Lewis Glinert, 2014 This book offers insight into the uncharted waters of prescription drug information and promotion on the internet and suggests how it might be transformed into an unprecedented agent for good. The focus throughout is on practical outcomes: How can information for consumer decision making be optimized and how can consumers use it responsibly?

**Strategic Rewriting** David Lee Rubin, 2002 A broad-based, innovative survey of rewriting in several modalities: translation, adaptation, recycling, appropriation, and re-mediation, along with the effect of each on form and meaning, kind and canon, historical and discursive continuity, as well as the conceptualizing of gender. Essays on Du Bellay, Montaigne, La Ceppède, Tbéophile de Viau, Corneille, d'Aubignac, La Fontaine, Diderot, and recent Anglo-American translations of La Princesse de Cleves.

**Syntactic Development** William O'Grady, 2007-12-01 Syntactic Development presents a broad critical survey of the research literature on child language development. Giving balanced coverage to both theoretical and empirical issues, William O'Grady constructs an up-to-date picture of how children acquire the syntax of English. Part 1 offers an overview of the developmental data pertaining to a range of syntactic phenomena, including word order, subject drop, embedded clauses, wh-questions, inversion, relative clauses, passives, and anaphora. Part 2 considers the various theories that have been advanced to explain the facts of development as well as the learnability problem, reporting on work in the mainstream formalist framework but also considering the results of alternative approaches. Covering a wide range of perspectives in the modern study of syntactic development, this book is an invaluable reference for specialists in the field of language acquisition and provides an excellent introduction to the acquisition of syntax for students and researchers in psychology, linguistics, and cognitive science.

**Vanishing Voices** Daniel Nettle, Suzanne Romaine, 2000-07-27 Few people know that nearly one hundred native languages once spoken in what is now California are near extinction, or that most of Australia's 250 aboriginal languages have vanished. In fact, at least half of the world's languages may die out in the next century. Daniel Nettle and Suzanne Romaine assert that this trend is far more than simply disturbing. Making explicit the link between language survival and environmental issues, they argue that the extinction of languages is part of the larger picture of near-total collapse of the worldwide ecosystem. Indeed, the authors contend that the struggle to preserve precious environmental resources-such as the rainforest-cannot be separated from the struggle to maintain diverse cultures, and that the causes of language death, like that of ecological destruction, lie at the intersection of ecology and politics. In addition to defending the world's endangered languages, the authors also pay homage to the last speakers of dying tongues, such as Red Thundercloud, a Native American in South Carolina; Ned Mandrell, with whom the Manx language passed away in 1974; and Arthur Bennett, an Australian who was the last person to know

more than a few words of Mbabaram. In our languages lies the accumulated knowledge of humanity. Indeed, each language is a unique window on experience. *Vanishing Voices* is a call to preserve this resource, before it is too late.

**Jing Jingle Bells**, 2015-09 Create an exhilarating, feel-good experience for singers and audiences alike with this bright arrangement of the seasonal classic paired with a clever original melody. The optional accompaniment puts the final tinsel on the tree and guarantees fun for all at your next holiday concert.

*Language and Species* Derek Bickerton, 1990 Drawing on living linguistic fossils such as ape talk, the two-word stage of small children, and pidgin languages, and on recent discoveries in paleoanthropology, Bickerton shows how a primitive protolanguage could have offered *Homo erectus* a novel ecological niche. He goes on to demonstrate how this protolanguage could have developed into the languages we speak today. --From publisher's description.
