Editing Across Media Ross F. Collins, 2013-02-18 Requirements for professional media editing have undergone enormous technological change. Editors still edit copy. But today they do much more. Mass media editors must demonstrate skills from computerized pagination to social media monitoring, from image manipulation to Search Engine Optimization. The need for editing skills is reaching far beyond traditional journalism and into all areas of mass media, from newspapers to strategic communication. Public relations practitioners are expected to edit. Even advertising creative professionals must edit. And journalists taking on new roles as social media editors need to understand editing at the speed of digital media. This textbook aims to prepare university-level students for these expanded editing roles in an age of convergence. Thirteen authors representing many years of collective media experience examine both traditional editing roles and new editing needs. While many mass media students will not become professional editors, this textbook assumes nearly all will need competent editing knowledge to produce products of professional quality. Editing, the authors believe, remains a bedrock skill for all students who hope to be successful in the mass media. Remediating Sound Holly Rogers, Joana Freitas, João Francisco Porfírio, 2023-09-07

Remediating Sound studies the phenomena of remixing, mashup and recomposition: forms of reuse and sampling that have come to characterise much of YouTube's audiovisual content. Through collaborative composition, collage and cover songs to reaction videos and political activism, users from diverse backgrounds have embraced the democratised space of YouTube to open up new and innovative forms of sonic creativity and push the boundaries of audiovisual possibilities. Observing the reciprocal flow of influence that runs between various online platforms, 12 chapters position YouTube as a central hub for the exploration of digital sound, music and the moving image. With special focus on aspects of networked creativity that remain overlooked in contemporary scholarship, including library music, memetic media, artificial intelligence, the sonic arts and music fandom, this volume offers interdisciplinary insight into contemporary audiovisual culture.

Effective Risk Communication Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often asked of risk communication: what has been learned from past work, and what is needed to push the field forward? Drawing on the experience of leading risk researchers and practitioners, Effective Risk Communication focuses on answering these questions. The book draws together new examples of research and practice from contexts as diverse as energy generation, human health, nuclear waste, climate change, food choice, and social media. This book treats risk communication as much more than the interchange of risk information between experts and non-experts; rather, it aims to emphasise the diversity in viewpoints and practices. In each specially commissioned chapter, the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others. Building upon each other, the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice, nor living up to its potential in research. Through a more careful examination of the work already done in risk communication, the book will help develop better, more reflective practice for the future.

Disability, the Media and the Paralympic Games Carolyn Jackson-Brown, 2020-06-04 This book focuses on the ground-breaking coverage of the London 2012 Paralympic Games by the UK's publicly owned but commercially funded Channel 4 network, coverage which seemed to deliver a transformational shift in attitudes towards people with disabilities. It sheds important new light on our understanding of media production and its complex interactions with sport and wider society. Drawing on political economy and cultural studies, the book explores why and how a marginalised group was brought into the mainstream by the media, and the key influencing factors and decision-making processes. Featuring interviews with key people involved in the television and digital production structures, as well as organisational archives, it helps us to understand the interplay between creativity and commerce, between editorial and marketing workflows, and about the making of meaning. The book also looks at coverage of the Rio Paralympics, and ahead to the Tokyo Games, and at changing global perceptions of disability through sport. This is fascinating reading for any advanced students, researchers, or sport management or media professionals looking to better understand the media production process or the significance of sport and disability in wider society.

Oral Tradition and Book Culture Pertti Anttonen,Cecilia af Forselles,Kirsti Salmi-Niklander,2018-10-17 Traditionally, oral traditions were considered to diffuse only orally, outside the influence of literature and other printed media. Eventually, more attention was given to interaction between literacy and orality, but it is only recently that oral tradition has come to be seen as a modern construct both conceptually and in terms of accessibility. Oral traditions cannot be studied independently from the culture of writing and reading. Lately, a new interdisciplinary interest has risen to study interconnections between oral tradition and book culture. In addition to the use and dissemination of printed books, newspapers etc., book culture denotes manuscript media and the circulation of written documents of oral tradition in and through the archive, into published collections. Book culture also intertwines the process of framing and defining oral genres with literary interests and ideologies. In addition to writing and reading, the study of oral traditions must also take into consideration the culture of publishing. The present volume highlights varied and selected aspects of the expanding field of research into oral tradition and book culture. The questions discussed include the following: How have printing and book publishing set terms for oral tradition scholarship? How have the practices of reading affected the circulation of oral traditions? Which books and publishing projects have played a key role in this and how? How have the written representations of oral traditions, as well as the roles of editors and publishers, introduced authorship to materials customarily regarded as anonymous and collective? The editors represent some of the key institutions in the study of oral traditions in Finland: the University of Helsinki, the Finnish Literature Society, and the University of Eastern Finland. The authors are folklorists, anthropologists, historians and literary historians, and scholars in information studies from Finland, Sweden, Norway, Ireland, and the United States.
