Southern and Postcolonial Perspectives on Policing, Security and Social Order Roxana Pessoa Cavalcanti,Peter Squires,Zoha Waseem,2023-05-18 Postcolonial legacies continue to impact upon the Global South and this edited collection examines their influence on systems of policing, security management and social ordering. Expanding the Southern Criminology agenda, the book critically examines social harms, violence and war crimes, human rights abuses, environmental degradation and the criminalization of protest. The book asks how current states of policing came about, their consequences and whose interests they continue to serve through vivid international case studies, including prison struggles in Latin America and the misuse of military force. Challenging current criminological thinking on the Global South, the book considers how police and state overreach can undermine security and perpetuate racism and social conflict.

Decolonizing the Criminal Question Ana Aliverti,Henrique Carvalho,Anastasia Chamberlen,Professor of Sociology of Law and Criminology Máximo Sozzo,2023-06-08 Within the discipline of criminology and criminal justice, relatively little attention has been paid to the relationship between criminal law, punishment, and imperialism, or the contours and exercise of penal power in the Global South. Decolonizing the Criminal Question is the first work of its kind to comprehensively place colonialism and its legacies at the heart of criminological enquiry. By examining the reverberations of colonial history and logics in the operation of penal power, this volume explores the uneasy relationship between criminal justice and colonialism, bringing relevance of these legacies in criminological enquiries to the forefront of the discussion. It invites and pursues a better understanding of the links between imperialism and colonialism on the one hand, and nationalism and globalisation on the other, by exposing the imprints of these links on processes of marginalisation, racialisation, and exclusion that are central to contemporary criminal justice practices. Covering a range of jurisdictions and themes, Decolonizing the Criminal Question details how colonial and imperial domination relied on the internalization of hierarchies and identities -- for example, racial, geographical, and geopolitical -- of both the colonized and the colonizer, and shaped their subjectivity through imageries, discourses, and technologies. Offering innovative, conceptual, and methodological approaches to the study of the criminal question, this work is an essential read for scholars not only focused on criminology and criminal justice, but also for scholars in law, anthropology, sociology, politics, history, and a range of other disciplines in the humanities and social sciences. Decolonizing the Criminal Question is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to download from OUP and selected open access locations.

International Perspectives and Strategies for Managing an Aging Workforce Ince, Fatma,2022-03-11 Older employees are often seen as an obstacle and not as an opportunity for companies, especially regarding the transfer of knowledge and experience. Effective development and utilization of older professional and managerial employees is an important issue as most organizations are not prepared to tailor their training methods to the needs and preferences of these employees due to negative stereotypes. Managing a rapidly aging workforce and sustaining economic dynamism calls for systematic research to prevent age discrimination due to an incomplete knowledge of older workers and politically challenging policy choices that require strong political commitments, robust management leadership, and social consensus. International Perspectives and Strategies for Managing an Aging Workforce examines the differences in stereotypes of older employees compared to younger employees in companies; analyzes the impact of the aging workforce on retention, productivity, and well-being; and investigates organizational systems, processes, and practices for managing older workers. Covering a range of topics such as retention and retirement, this reference work is ideal for researchers, academicians, practitioners, business owners, managers, human resource workers, instructors, and students.

Descolonizar o imaginário Editora Elefante,Autonomia Literária,2020-05-06 A promessa de desenvolvimento sempre exerceu uma espécie de fascínio à esquerda e à direita do espectro político. Ao mesmo tempo que anuncia bem-estar e qualidade de vida, reduzia todos os aspectos da existência humana – e a diversidade cultural dos povos – aos parâmetros estabelecidos pelo mercado e pelo consumo. Descolonizar o imaginário propõe um debate sobre o desenvolvimento em uma perspectiva ampla e diversa. Seus treze ensaios apresentam uma reflexão crítica ao modelo de integração subordinada da América Latina no mercado global neoliberal – que não foi abandonado após a ascensão dos governos progressistas. Mais do que isso, os textos fomentam, assim, um diálogo urgente sobre a necessidade de construir um horizonte renovado para superar as contingências típicas do Estado patriarcal, colonial e classista.

Representación de la(s) violencia(s) en la posmodernidad mexicana Elena Ritondale,2021-09-22 ¿Cómo representar, desde la frontera entre México y Estados Unidos, las múltiples formas de violencia interseccional? La autora analiza un corpus de obras de escritores de Tijuana y estudia cómo la violencia estructural, económica y política se solapa en ellas con la dimensión privada y de género. A través de un diálogo con la crítica feminista, las teorías poscoloniales y los estudios culturales, halla núcleos temáticos y estrategias formales situadas en el entorno fronterizo, pero capaces de abrir debates con perspectivas e investigaciones que se han impuesto a nivel internacional.

Construcción social de una cultura digital educativa Enrique Ruiz-Velasco Sánchez & Josefina Bárcenas López,José Antonio Domínguez Hernández,2018-05-28 El material contenido en este libro, pretende contribuir a la construcción social de una cultura digital educativa. En efecto, profesores, investigadores, estudiantes, directivos, tomadores de decisiones y estudiosos de la educación a través de sus aportaciones, tratan de allanar el camino, para elucidar la forma en que se construye socialmente una cultura digital educativa. Esto es, aquilatan la importancia de la construcción colectiva y el valor que tiene la tecnología digital, integrada de manera inteligente y racional a la educación.

Entendemos por cultura digital educativa, al acopio de conocimientos e ideas que se generan y despliegan en el ejercicio de las habilidades intelectuales en el ámbito educativo, mediante el uso de las tecnologías de la información y la comunicación. La gran mayoría de los trabajos expuestos en este libro, se refieren al ejercicio de imaginación y libertad para la generación de escenarios pedagógicos que orquestan y privilegian la utilización de modalidades educativas permeadas por las tecnologías en boga. Esto quiere decir, que se ofrecen soluciones innovadoras y procedimientos eficaces desde el punto de vista cognitivo, para impulsar y potenciar los procesos tecnopedagógicos y volver atractivo, lúdico y transformador el acto educativo, trascendiendo la infraestructura, contenidos, modelos de uso, la gestión, las políticas y la evaluación. Para volver ágil y flexible la lectura de este libro, los trabajos se despliegan en dos partes. En la primera parte se incluye todo lo relativo a los modelos de uso. Estos modelos de uso circunscriben evidentemente, la parte correspondiente a la formación docente y al diseño, concepción y puesta en marcha de contenidos digitales, así como a la infraestructura utilizada. La segunda parte, está dedicada a los trabajos que hacen referencia a la gestión. Incluimos en la gestión, todos los aportes relacionados con la gestión del conocimiento, la gestión académico-administrativa, así como las políticas referentes a la inclusión de TIC en los distintos niveles y modelos educativos y evidentemente, a la evaluación educativa en su más amplia acepción. Con relación a la primera parte, se ponen a disposición, modelos de uso para la educación regular y en línea, alfabetización digital, lenguas, tecnologías móviles, ingeniería y de algunas disciplinas tales como la química, la biología y una vasta proporción de ellos, relativos a las matemáticas. Integrar tecnologías de punta para la concepción, diseño y puesta en marcha de contenidos digitales, es un reto que cubren algunos de los materiales en la primera parte que conforma este libro. Estas contribuciones se enfocan principalmente en la generación y desarrollo de objetos de aprendizaje, repositorios, formatos, metodologías, normas, estándares, celdas y herramientas para su producción y distribución. Este libro, significa por sí mismo, la producción de contenidos digitales listos para ser utilizados, distribuidos y mejorados en función de su conocimiento. Las múltiples formas de relación y correlación entre individuos, independientemente de sus posiciones geográficas para la comunicación y el trabajo educativo, también son abordadas en este espacio. Se muestran experiencias, trayectorias y múltiples efectos educativos que determinan comunidades educativas de aprendizaje que aprenden y colaboran en comunidad. La importancia y relevancia de la formación docente se manifiesta también en la primera parte. Se exploran los temas relativos a cómo los docentes se apropián de la cultura digital; cómo apoyan la enseñanza combinada; cómo se gestionan los procesos de formación tecnopedagógica, y sobre todo, cómo mejorar el aprendizaje y la adquisición de competencias antes, durante y después de su formación docente. Ciertos trabajos de este libro significan experiencias de organización y gestión educativas. Éstas, están implicadas en un sentido de evolución y creación de retos tanto personales como institucionales. Se generan trayectorias para proyectos e iniciativas que coproduzcan conocimiento a través de gestiones colaborativas y asociadas. La creación y/o uso de entornos educativos regulares y virtuales, supone la formación de recursos humanos que conforman el capital intelectual y las políticas públicas, producidas por las instituciones educativas para beneficio de la sociedad. En este capital intelectual se incluyen profesionistas, dirigentes, autores, desarrolladores y autoridades educativas. Los trabajos muestran la participación del público educativo en las políticas públicas. Es de vital importancia, puesto que de ahí surgen las acciones para alcanzar los objetivos educativos. Las políticas públicas deben considerar todas las dimensiones que atañen los procesos de enseñanza aprendizaje.

También se vuelve importante el contraste de las políticas públicas con las acciones y tratados internacionales. También se da cuenta de este fenómeno de producción de capital intelectual y políticas públicas. El material desarrollado en la parte 2 de este libro, nos alecciona sobre cómo poder gestionar, usar, experimentar, investigar y explorar con programas en general y de fuente abierta, asegurando la sustentabilidad, independencia y masificación de muchas tecnologías educativas. De hecho, existe un gran movimiento de acceso y uso de recursos de fuente abierta. No obstante, para expandirla y generalizarla se necesita de una participación activa y decidida en el uso y generación de nuevos recursos. También, en este libro, específicamente en la segunda parte, se muestran algunos trabajos que aluden a la gestión del conocimiento. Operar conectado a diferentes redes de acceso y cambiar de punto de conexión, sin detener o reiniciar las conexiones de red activas es una tarea común de la portabilidad y movilidad. Los dispositivos que tienen capacidad para realizar esas operaciones son portables y móviles. Algunos trabajos, dan cuenta de este fenómeno tecnológico aplicado al área educativa. Ciertos autores entienden la educación como un sistema orgánico en red, en donde no existe un único centro, sino que este sistema está formado por distintos nodos que se relacionan de formas múltiples al perseguir objetivos, compartir entornos y sobre todo, compartir recursos de toda índole. A estos trabajos se le llaman proyectos ecosistémicos. Cuando diversos autores nos plantean que las habilidades prioritarias en la Sociedad del Aprendizaje son las cognitivas, nos muestran sus posturas sobre la correlación cognición versus tecnología y sobre todo, el pensamiento crítico y la conceptualización del pensamiento heurístico. Estas posturas las encontraremos en este libro. Es gracias a las innovaciones tecnológicas que se producen cada vez más las convergencias tecnológicas de medios. Ello, porque surgen nuevas combinaciones y formas de integración en el campo educativo. Este material muestra tanto la convergencia tecnológica de medios como la convergencia de inteligencias para la tecnología educativa. Por otro lado, la evaluación es un proceso social continuo que se puede volver más integral y representativo de los avances cognitivos, si se incluyen de manera adecuada las tecnologías a lo largo del proceso de enseñanza-aprendizaje. Dada la importancia, de la actividad de evaluación, se presentan varias experiencias en este libro. También, aquí se dan cita trabajos relativos a las múltiples perspectivas, miradas nuevas y enfoques novedosos con los que se relacionan todas las dimensiones que convergen en la evaluación de los procesos de enseñanza-aprendizaje utilizando tecnologías de la información y la comunicación. Así pues, valga este cúmulo de prácticas para apoyar los procesos de enseñanza-aprendizaje en todos los sistemas y niveles educativos de todos los actores intervenientes para entre todos, coconstruir socialmente una cultura digital educativa que nos caracterice como sociedad educativa innovadora y emprendedora. ¡Que disfruten su lectura! El comité editorial

Modelando el Transnacionalismo Jeffrey H. Cohen,Paulette K. Schuster,2019-04-16 El término transnacionalismo se desarrolló en la década de los 1990 cuando los investigadores académicos respondieron al crecimiento migratorio nivel global y definieron las formas en que los migrantes organizaban sus vidas en sus lugares de origen y destino. Basándose en el trabajo pionero de Nina Glick-Schiller, Linda Basch y Christina Blanc-Szanton, Michael Kearney y otros, los investigadores académicos indagaron más allá de la geografía y la economía de la migración para considerar una variedad de flujos migratorios, así como cuestiones de género, pertenencia, clase y raza. Continuando con esta tradición, los autores incluidos en este volumen revisan y reinterpretan el transnacionalismo para una nueva generación de investigadores y los retos que las migraciones contemporáneas llevan.

Zambullirse una y otra vez Celia Corchuelo Fernández,2018-05-01 La problemática del fracaso escolar ha estado presente a lo largo de los años en las aulas de los centros educativos, pero se ve acrecentada en los últimos tiempos, según se refleja en la no finalización en España de la etapa de Educación Secundaria de un 30% del alumnado. Este estudio pretende analizar las causas del fracaso escolar y sus posibles soluciones en contextos de exclusión social presentando una alternativa: las llamadas Escuelas de Segunda Oportunidad (E2O). Estas se caracterizan por ser inclusivas y prestar especial atención a la diversidad del alumnado. Su población está configurada por adolescentes desmotivados, con baja autoestima, con dificultades de aprendizaje y en riesgo de exclusión social. Esta situación los frustra y desalienta; como consecuencia, desisten de la consecución de los objetivos. Las E2O han marcado un antes y un después en la personalización de la educación, por sus resultados comprobados, la satisfacción de los individuos formados en ellas y el impacto positivo y esperanzador que tienen en su entorno. En esta obra se dan respuestas y aportan

formas de actuación a los profesionales de la educación que desarrollan su labor con colectivos que se hallen o desean abandonar el sistema educativo establecido. Al potenciar el talento profesional del individuo conforme intereses, orientando y dotando al alumnado de competencias básicas e imprescindibles para la vida laboral y social, les brindamos esa segunda oportunidad que necesitan para volver a sentirse parte del sistema social y educativo.

Desafíos del desarrollo urbano sostenible en el transporte y la movilidad Anísio Brasileiro, 2022-05-16 Los autores destacan que los enfoques sobre el transporte urbano han sufrido grandes e importantes evoluciones en los últimos años. Desde las aproximaciones originales, orientadas técnicamente al estudio de la demanda y de sus formas de satisfacerla hasta los complementos que les han otorgado un carácter diferente, como los aspectos energéticos y medioambientales. Reconocen que se hacen evidentes cuestiones como el potencial agotamiento de los hidrocarburos, el aporte del transporte a la contaminación atmosférica, pero particularmente, el efecto invernadero. Revisan casos de metrópolis y modos de transporte que transitan desde modelos regionales (BRT) a procesos en desarrollo (bicicletas), o que afrontan según la integridad física de corredores de desarrollo urbano hasta las políticas para su regulación y gestión económica, sin ignorar los temas sociales, de la inclusión, accesibilidad y equidad en el marco de la sustentabilidad como una preocupación permanente. Su objetivo es generar instrumentos estratégicos y metodológicos que contribuyan a la integración espacial entre transporte y desarrollo urbano, desde una perspectiva urbana comparada, con un énfasis predominante en América Latina, con algunas aportaciones desde España y Portugal. El libro, que el lector tiene en sus manos, reúne a 32 autores de Argentina, Brasil, Colombia, Chile, Ecuador, España, México, Portugal y los Estados Unidos para abordar el reto de la sostenibilidad del transporte urbano en términos de equidad y eficiencia ambiental.

Hacia el fomento de las TIC en el sector educativo en Colombia Elías Said Hung, 2015 El actual contexto tecnológico y la apertura de nuevos escenarios digitales de comunicación y acceso al conocimiento ha generado cambios sustanciales en el sector educativo a nivel global. Los maestros y las instituciones educativas no pueden limitarse solo a proporcionar las clásicas estrategias de seguimiento y apoyo al aprendizaje del alumno; por el contrario, deben basarse en el fomento y promoción de mecanismos más sistemáticos y continuados al momento de llevar a cabo dicha labor, con el fin de promover mayor autonomía en los procesos de enseñanza-aprendizaje que lideran.

La Unión Europea y la pandemia mundial Francisco Aldecoa, 2020-12-02 Este libro resalta la relevancia de la Unión Europea en la lucha contra la COVID-19, especialmente en el ámbito internacional. La UE es la potencia indispensable para el control de la pandemia y, con ello, está adquiriendo un nuevo liderazgo mundial. Este liderazgo europeo colectivo, encabezado por las diez personalidades que aparecen en las fotografías de la portada, está transformado la Unión Europea y, por ello, reforzando de forma clara su influencia global. Se trata de un liderazgo distinto a los unipersonales (Donald Trump, Xi Jinping, Vladímir Putin, Narendra Modi y otros), pues este es colectivo, diferente, fundamentado en los valores de libertad, igualdad y solidaridad y respeto del Estado de derecho, y en la capacidad de promover nuevas iniciativas, consensuar decisiones y gestionar políticas innovadoras, motivando a los ciudadanos al dar, la Unión Europea, respuestas unitarias a sus demandas sociales efectivas. La Unión se halla ante una gran oportunidad y, por ello, tiene una gran responsabilidad para liderar la lucha contra la epidemia, ya que es una potencia normativa, la primera potencia en el ámbito de la salud, como primer actor económico y comercial, así como en la cooperación para el desarrollo y ayuda humanitaria. Este nuevo protagonismo no se daría de tratarse, por ejemplo, de un conflicto armado de dimensión internacional.

Território, capital, sociedades e desigualdades na América Latina Fernando Negret Fernandez, 2022-12-07 Este livro é uma pesquisa sobre a realidade histórica e atual da América Latina com base nos seis países analisados, os quais são as economias mais desenvolvidas. Ocupam 79,17% do território latino-americano, representam 74,85% do total dos habitantes da região e contêm 82,24% do PIB regional. A história da conquista e da estruturação das colônias nesses países mostra realidades de exploração humana violenta e ambientalmente depredadora. A formação dos seis estados nacionais foi caótica e desorganizada pela inexperiência para fazer a gestão desses imensos territórios, mantendo e ampliando as classes dominantes a propriedade da terra após a independência. A situação atual mostra uma condição da saúde ainda precária. Na educação, tem avanços importantes na luta pela democratização e inclusão ao Ensino Superior das minorias étnicas indígenas e afro-americanas. O emprego dos jovens e mulheres ainda é um desafio, mais dramático no período recente, como consequência da covid-19, sendo empregos informais, na sua maioria, com baixos salários, sem segurança social e em deficientes condições para realizar as atividades próprias do trabalho. Os salários nas empresas são altamente desiguais, o que mostra que o capital privado impõe as desigualdades pelos altos valores individuais de seus capitais e pelas desigualdades salariais de seus trabalhadores. Os principais grupos econômicos da América Latina são, predominantemente, comerciantes e vendedores de serviços, muitos de capital estrangeiro, o que demonstra que são pouco produtivos e, portanto, pouco contribuem para a geração de valor e riqueza latino-americanos.
