ASIA&EUROPE IN SOCIAL SCIENCES: CONNECTIONS, REPRESENTATIONS, INTERPRETATIONS ALEXANDRA GABRIELA CONSTANTINESCU, ANGELICA HELENA MARINESCU, 2020-01-01 Această lucrare pune față-în-față Europa și Asia, în studii realizate de antropologi, coreografi, filologi, istorici, lingviști, muzicologi și sociologi. Granițele sociale și culturale dintre cele două lumi atât de depărtate fizic sunt relevate de lucrare a fi extrem de subțiri. Lucrarea abordează atât aspecte teoretice, cât și practice: discută despre legătura dintre postcolonialism și postcomunism despre semnificația culturală a mișcărilor, despre modernitatea în artele vizuale, despre diseminarea culturii populare sud-coreene în România, despre lumea orientală ca sursă de inspirație pentru compozitorii europeni, despre apariția mișcărilor feministe în vestul Europei cu cele similare din Asia. Articolul despre rolul cultural și stereotipal al monumentelor coloniale este foarte instructiv în contextul mișcărilor sociale recente din SUA și Europa de Vest. Lucrarea se încheie cu o cercetare ce aduce în discuție imaginarul unei călătorii în India, așa cum este ea proiectată de europeni.

European Research Reloaded: Cooperation and Integration among Europeanized States Ronald Holzhaecker, Markus Haverland, 2006-09-01 This book argues that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels. In particular, the book asks: how has Europeanization affected current modes of integration and cooperation in the EU? The authors argue that deeper integration in other areas requires a degree of input legitimacy that is currently lacking in the EU.

Imagine Alex Sangha, 2010 Imagine places ideas in society and gets readers thinking critically about their most cherished beliefs and values. The topics are vast and varied. Abortion, immigration, gay rights, love, mentorship, and sustainable development. There is no right answer. We must come to our own conclusions. If we can listen and learn from each other, we can accept our differences. Everyone has ideas on how to make the world a better place and fill humankind with hope. Imagine espouses humanitarian and egalitarian ideals such as every citizen deserves to reach their potential and contribute to society. Imagine is written from the perspective of protecting the people and the planet for current and future generations. You will learn of thought-provoking issues. The book proposes that we are all one and connected by spiritual energy. This will help us look for what we have in common and bring about social peace, social progress, and social change that lights our soul and lifts humanity in one colossal embrace.

The Design of Rijndael Joan Daemen, Vincent Rijmen, 2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.

Hands-On MQTT Programming with Python Gaston C. Hillar,2018-05-22 Explore the features included in the latest versions of MQTT for IoT and M2M communications and use them with modern Python 3. Key Features Make your connected devices less prone to attackers by understanding security mechanisms Take advantage of MQTT features for IoT and Machine-to-Machine communications The only book that covers MQTT with a single language, Python Book Description MQTT is a lightweight messaging protocol for small sensors and mobile devices. This book explores the features of the latest versions of MQTT for IoT and M2M communications, how to use them with Python 3, and allow you to interact with sensors and actuators using Python. The book begins with the specific vocabulary of MQTT and its working modes, followed by installing a Mosquitto MQTT broker. You will use different utilities and diagrams to understand the most important concepts related to MQTT. You will learn to make all the necessary configuration to work with digital certificates for encrypting all data sent between the MQTT clients and the server. You will also work with the different Quality of Service levels and later analyze and compare their overheads. You will write Python 3.x code to control a vehicle with MQTT messages delivered through encrypted connections (TLS 1.2), and learn how leverage your knowledge of the MQTT protocol to build a solution based on requirements. Towards the end, you will write Python code to use the PubNub cloud-based real-time MQTT provider to monitor a surfing competition. In the end, you will have a solution that was built from scratch by analyzing the requirements and then write Python code that will run on water-proof IoT boards connected to multiple sensors in surfboards. What you will learn Learn how MQTT and its lightweight messaging system work Understand the MQTT puzzle: clients, servers (formerly known as brokers), and connections Explore the features included in the latest versions of MQTT for IoT and M2M communications Publish and receive MQTT messages with Python Learn the difference between blocking and threaded network loops Take advantage of the last will and testament feature Work with cloud-based MQTT interfaces in Python Who this book is for This book is for developers who want to learn about the MQTT protocol for their IoT projects. Prior knowledge of working with IoT and Python will be helpful.
