COVID-19 and a World of Ad Hoc Geographies Stanley D. Brunn, Donna Gilbreath, 2022-09-15 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

The Soviet Union's Invisible Weapons of Mass Destruction Anthony Rimmington, 2021-10-12 This book focuses on Biopreparat, the Soviet agency created in 1974, which spearheaded the largest and most sophisticated biological warfare programme the world has ever seen. At its height, Biopreparat employed more than 30,000 personnel and incorporated an enormous network embracing military-focused research institutes, design centres, biowarfare pilot facilities and dual-use production plants. The secret network pursued major offensive R&D programmes, which sought to use genetic engineering techniques to create microbial strains resistant to antibiotics and with wholly new and unexpected pathogenic properties. During the mid-1980s, Biopreparat increased in size and political importance and also emerged as a major civil biopharmaceutical player in the USSR. In the wake of the collapse of the Soviet Union in 1991, an acute struggle for control of Biopreparat's most valuable assets took place and the network was eventually broken-up and control of its facilities transferred to a myriad of state agencies and private companies.

Bringing Global Governance Home Laura A. Henry, Lisa McIntosh Sundstrom, 2021-10-07 The world's problems--climate change, epidemics, and the actions of multinational corporations--are increasingly global in scale and beyond the ability of any single state to manage. Since the end of the Cold War, states and civil society actors have worked together through global governance initiatives to address these challenges collectively. While global governance, by definition, is initiated at the international level, the effects of global governance occur at the domestic level and implementation depends upon the actions of domestic actors. NGOs act as mediators between global and domestic political arenas, translating and adapting global norms for audiences at home. Yet the role of domestic NGOs in global governance has been neglected relatively in previous research. Bringing Global Governance Home examines how NGO engagement at the global level shapes domestic governance around climate change, corporate social responsibility, HIV/AIDS, and sustainable forestry. It does so by comparing domestic reception of global standards and practices in the BRICS states (Brazil, Russia, India, China, and South Africa). These newly emerging global powers, representing a range of regime types, aspire to become global policy makers rather than mere policy takers and have banded together through periodic summits to devise alternative approaches to economic development and global challenges. Nevertheless, these countries still engage the world primarily through existing global governance institutions that they did not create themselves. Ultimately, this book explores the interplay of international and domestic factors that allow domestically-rooted NGOs to participate globally, and the extent to which that participation shapes their ability to mediate and promote global governance perspectives within the borders of their own countries with varying regimes and state-society relations.

SHAN HAI JING—A BOOK COVERED WITH BLOOD Kate Bazilevsky, 2014-08-22 In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: bad guys from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay experts on the human soul for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this civilization—maybe instead of trying to find new recipes to destroy excess billions and trying to examine human potential using Neanderthal methods, it would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

Time, Tense and Aspect in Early Vedic Grammar Eystein Dahl, 2010-06-14 Drawing on insights from formal semantics and linguistic typology, this book presents a comprehensive account of the tense/aspect/mood system in Early Vedic, the language of the Rigveda. Benefit Sharing in the Arctic Maria Tysiachniouk, Andrey N Petrov, Violetta Gassiy, 2020-12-29 This book provides a first-of-its-kind review and analysis of benefit sharing frameworks between extractive industries and Indigenous and local communities in different parts of the Arctic. The authors describe a wealth of case studies in order to examine predominant practices, policies, arrangements, mechanisms and impact assessment methodologies. They also discuss possible ways to improve and advance existing benefit sharing regimes, in order to attain fair and equitable benefit sharing and support sustainable development. Among the topics covered in the book are corporate social responsibility and social license to operate, principles and methodologies of determining compensation, legal and informal frameworks of benefit sharing, community response to extractive activities, and global-to-local linkages that shape benefit sharing processes. The book will be of interest to academics, industry experts, legal specialists, policymakers, community members concerned with industrial activities, and anyone interested in sustainable development in the Arctic.

Ukrainian Nationalists and the Holocaust John-Paul Himka, 2021-09-21 One quarter of all Holocaust victims lived on the territory that now forms Ukraine, yet the Holocaust there has not received due attention. This book delineates the participation of the Organization of Ukrainian Nationalists (OUN) and its armed force, the Ukrainian Insurgent Army (Ukrainska povstanska armiya—UPA), in the destruction of the Jewish population of Ukraine under German occupation in 1941–44. The extent of OUN and UPA's culpability in the Holocaust has been a controversial issue in Ukraine and within the Ukrainian diaspora as well as in Jewish communities and

Israel. Occasionally, the controversy has broken into the press of North America, the EU, and Israel. Triangulating sources from Jewish survivors, Soviet investigations, German documentation, documents produced by OUN itself, and memoirs of OUN activists, it has been possible to establish that: OUN militias were key actors in the anti-Jewish violence of summer 1941; OUN recruited for and infiltrated police formations that provided indispensable manpower for the Germans' mobile killing units; and in 1943, thousands of these policemen deserted from German service to join the OUN-led nationalist insurgency, during which UPA killed Jews who had managed to survive the major liquidations of 1942.

Tales of the Strange and Wonderful David Kerr, 2010-06 Outside the box. Out of the mainstream. *Tales of the Strange and Wonderful* uncovers some of the strangest and most wonderful stories of the Bible and brings them to you as only an old turkey hunter can spin them. You will enjoy the stories you are about to read in this book. David Kerr has a wholesome, mischievous sense of humor with a creative insight reminiscent of those early homemade philosophers who have endeared themselves to American readers for over one-hundred-fifty years; although the earliest are seldom read much anymore. In these stories, you will find some long-familiar Biblical themes viewed from a different perspective, which sometimes embellishes, sometimes disturbs, but will bring a smile, if not a laugh. You will find that they come back to you in your thoughts. They are stories that can be read again and again. You will relate to the events, people, and activities included in this wonderfully witty collection of stories. From *The Witch of Endor* to *The Maniac of Gardara*, they will enrich your life in surprising ways.

Extraterrestrial Contacts: the Roswell foil, UFOs, and how they alter our understanding of the modern world Jerry Kroth, 2017-07-22

Я є Україна. Світоглядний всесвіт українців Марія Чумарна, 2023-05-04 Книжка вводить читача у світоглядний всесвіт давньої України, знайомить із звичаєвою та матеріальною культурою нашого народу, що зароджувалась і відроджувалась з покоління в покоління під дахом «солом'яного храму», яким була українська хата. Автор розглядає скарби народної культури не як архаїчний спадок, а як генетичне джерело духовної пам'яті і сили для наступних поколінь. Україна — не зовні, вона — в кожному з нас. Handbook Of Financial Econometrics, Mathematics, Statistics, And Machine Learning (In 4 Volumes) Cheng Few Lee, John C Lee, 2020-07-30 This four-volume handbook covers important concepts and tools used in the fields of financial econometrics, mathematics, statistics, and machine learning. Econometric methods have been applied in asset pricing, corporate finance, international finance, options and futures, risk management, and in stress testing for financial institutions. This handbook discusses a variety of econometric methods, including single equation multiple regression, simultaneous equation regression, and panel data analysis, among others. It also covers statistical distributions, such as the binomial and log normal distributions, in light of their applications to portfolio theory and asset management in addition to their use in research regarding options and futures contracts. In both theory and methodology, we need to rely upon mathematics, which includes linear algebra, geometry, differential equations, Stochastic differential equation (Ito calculus), optimization, constrained optimization, and others. These forms of mathematics have been used to derive capital market line, security market line (capital asset pricing model), option pricing model, portfolio analysis, and others. In recent times, an increased importance has been given to computer technology in financial research. Different computer languages and programming techniques are important tools for empirical research in finance. Hence, simulation, machine learning, big data, and financial payments are explored in this handbook. Led by Distinguished Professor Cheng Few Lee from Rutgers University, this multi-volume work integrates theoretical, methodological, and practical issues based on his years of academic and industry experience.

Поправка 3:17. Как перестать портить жизнь себе и окружающим Александр Димидов, 2019-07-12 Эссе «Поправка 3:17» представляет собой беспрецедентную, написанную простым «человеческим» языком, попытку анализа наших повседневных проблем сквозь парадигму христианских ценностей. Отношения между церковью и человеком. Конфликт биологии и нравственности. Роль личностных ориентиров. Почему все в мире происходит так, как происходит? Почему моя судьба складывается так, а не иначе? И наконец, что необходимо изменить, чтобы перестать портить жизнь себе и окружающим.

Internet Security Man Young Rhee, 2003-07-25 Knowledge of number theory and abstract algebra are pre-requisites for any engineer designing a secure internet-based system. However, most of the books currently available on the subject are aimed at practitioners who just want to know how the various tools available on the market work and what level of security they impart. These books traditionally deal with the science and mathematics only in so far as they are necessary to understand how the tools work. Internet Security differs by its assertion that cryptography is the single most important technology for securing the Internet. To quote one reviewer if every one of your communication partners were using a secure system based on encryption, viruses, worms and hackers would have a very hard time. This scenario does not reflect the reality of the Internet world as it currently stands. However, with security issues becoming more and more important internationally, engineers of the future will be required to design tougher, safer systems. Internet Security: * Offers an in-depth introduction to the relevant cryptographic principles, algorithms protocols - the nuts and bolts of creating a secure network * Links cryptographic principles to the technologies in use on the Internet, eg. PGP, S/MIME, IPsec, SSL TLS, Firewalls and SET (protecting credit card transactions) * Provides state-of-the-art analysis of the latest IETF standards plus summaries and explanations of RFC documents * Authored by a recognised expert in security Internet Security is the definitive text for graduate students on security and cryptography courses, and researchers in security and cryptography areas. It will prove to be invaluable to professionals engaged in the long-term development of secure systems.
