The Donbas Conflict in Ukraine Daria Platonova, 2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

**SOCIO-ECONOMIC DEVELOPMENT OF MODERN UKRAINIAN SOCIETY AGAINST THE BACKGROUND OF EUROPEAN TRANSFORMATIONS** Levchuk K., Bogatchuk S., Bogatchuk V., Belkin I., Makarov Z, 2023-10-25 The collective monograph is devoted to the study of trends in the development of modern Ukrainian society. The research uses an interdisciplinary approach, which allows analyzing various aspects of the development of social processes in Ukraine and obtaining socially significant scientific results. The subject of Kostyantyn Levchuk's scientific interests is the study of the activities of public organizations of Ukraine in the first half of the 90s of the 20th century. The economic crisis contributed to the strengthening of the social vector in the activities of public organizations. Legislated social guarantees were not fully implemented, which prompted public organizations to use various forms and methods aimed at protecting vulnerable social strata in the

context of the crisis. The practical and law-making activities of the most significant public organizations are analyzed: the Red Cross Society of Ukraine, organizations for the protection of the rights of veterans and victims of the accident at the Chernobyl nuclear power plant. Svitlana Bogatchuk's scientific research covers the period of Soviet collectivization of the Ukrainian countryside in 1932-1933, which became one of the most terrible pages of our history. Many scientific works are devoted to the study of this problem. It was analyzed that the greatest losses during the Holodomor period of 1932-1933 were observed among the peasants of Ukraine, although there were also deaths among the urban population. Huge child mortality is a direct consequence of Stalin's policy of collectivization. The Bolshevik authorities hushed up and denied the fact of famine in Ukraine. Ihor Belkin's scientific research is focused on the study of the process of marketing planning of entrepreneurial activity. The modern global practice of managing campaigns that have achieved significant economic success shows numerous examples of the application of planning one's own economic processes. On the other hand, as the analysis shows, when companies do not apply planning, they mostly face bankruptcy problems. With the development of market relations, the planning of economic processes at enterprises requires more and more attention. In our country, the first business plans appeared at the beginning of the 90s of the last century, however, with the development of the market economy and the spread of international cooperation, the need to develop a plan is becoming more urgent. Nowadays, planning is becoming a mandatory process, which is necessary to improve the methods of calculating the economic efficiency of management decisions and the feasibility of investment investments. In the work of Zorislav Makarov, the methodological legitimization of randomness in scientific knowledge is proposed by explicating the possibilities of the activity approach to its study. In particular, as a result of the analysis of the relationship between

rationality and randomness in the structure of general scientific methods, cognitive and sociological sources of randomness in the pragmatic scientific method, stochastic parameters in the post-nonclassical dynamics of scientific knowledge, as well as subjective and objective prerequisites for the post-nonclassical emancipation of rationality and determinism were revealed. At the end of the study, the status of humanities and natural sciences in the perspective of post-non-classical integration is outlined. The content of the collective monograph corresponds to the research direction of the Department of History of Ukraine and Philosophy of Vinnytsia National Agrarian University. The monograph is the result of the initiative topic Research of trends in socio-economic development and consolidation of Ukrainian society in the modern history of Ukraine. State registration number 0122U001425. Head of subject, Doctor of Science, Professor K. I. Levchuk). The monograph uses: socio-philosophical approach, historical-genetic method, statistical analysis, sociological and economic research methods.

*Rethinking Class in Russia* Suvi Salmenniemi, 2016-04-08 Social differentiation, poverty and the emergence of the newly rich occasioned by the collapse of the Soviet Union have seldom been analysed from a class perspective. Rethinking Class in Russia addresses this absence by exploring the manner in which class positions are constructed and negotiated in the new Russia. Bringing an

ethnographic and cultural studies approach to the topic, this book demonstrates that class is a central axis along which power and inequality are organized in Russia, revealing how symbolic, cultural and emotional dimensions are deeply intertwined with economic and material inequalities. Thematically arranged and presenting the latest empirical research, this interdisciplinary volume brings together work from both Western and Russian scholars on a range of spheres and practices, including popular culture, politics, social policy, consumption, education, work, family and everyday life. By engaging with discussions in new class analysis and by highlighting how the logic of global neoliberal capitalism is appropriated and negotiated vis-à-vis the Soviet hierarchies of value and worth, this book offers a multifaceted and carefully contextualized picture of class relations and identities in contemporary Russia and makes a contribution to the theorisation of class and inequality in a post-Cold War era. As such it will appeal to those with interests in sociology, anthropology, geography, political science, gender studies, Russian and Eastern European studies, and media and cultural studies.

*Microprocessor Technology* J S Anderson, 2012-08-21 'Microprocessor Technology' provides a complete introduction to the subject of microprocessor technology using the Z80 and 6502 processors. An emphasis on fault-finding and repair makes this an ideal text for servicing courses including City & Guilds 2240 in the UK, microelectronics units on BTEC National/Advanced GNVQ and City & Guilds 7261 Microprocessor Technology. It will also provide a refresher course for those on 'bridging' and micro appreciation courses where a measure of comparative studies is required. Clear and concise explanations are supported by worked examples, tutorials, long answer questions and assignments giving students the opportunity to test their knowledge as they progress through the course as well as providing an essential revision tool in the run-up to exams.

**European Research Reloaded: Cooperation and Integration among Europeanized States**

Ronald Holzhaacker, Markus Haverland, 2006-09-01 This book argues that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels. In particular, the book asks: how has Europeanization affected current modes of integration and cooperation in the EU? The authors argue that deeper integration in other areas requires a degree of input legitimacy that is currently lacking in the EU.

*Standard Integral Table Algebras Generated by a Non-real Element of Small Degree* Zvi

Arad,Mikhail Muzychuk,2003-07-01 This book is addressed to the researchers working in the theory of table algebras and association schemes. This area of algebraic combinatorics has been rapidly developed during the last decade. The volume contains further developments in the theory of table algebras. It collects several papers which deal with a classification problem for standard integral table algebras (SITA). More precisely, we consider SITA with a faithful non-real element of small degree. It turns out that such SITA with some extra conditions may be classified. This leads to new infinite series of SITA which has interesting properties. The last section of the book uses a part of obtained results in the classification of association schemes. This volume summarizes the research which was done at Bar-Ilan University in the academic year 1998/99.
