**Human Aspects of IT for the Aged Population. Supporting Everyday Life Activities** Qin Gao, Jia Zhou, 2021-07-03 This two-volume set constitutes the refereed proceedings of the 7th International Conference on Human Aspects of IT for the Aged Population, ITAP 2021, held as part of the 23rd International Conference, HCI International 2021, held as a virtual event, in July 2021. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. ITAP 2021 includes a total of 67 papers; they focus on topics related to designing for and with older users, technology acceptance and user experience of older users, use of social media and games by the aging population, as well as applications supporting health, wellbeing, communication, social participation and everyday activities.

**The Donbas Conflict in Ukraine** Daria Platonova, 2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donets'k region, whereas it did not in Kharkiv city, despite the city, like the Donets'k region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donets'k region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

**The Caucasus Emirate Mujahedin** Gordon M. Hahn, 2014-09-29 Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the "jihadi method" and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

**Сборник некоторых важных известий и официальных документов касательно Турции, России и Крыма** Смирнов В. Д., 2022-08-31  
В сборник, изданный почти полтора столетия назад в С.-Петербурге, вошли турецкие рукописи, внешне представляющие собой единое целое, но в действительности заключающие в себе самые разнообразные сведения. В числе 124-х отдельных статей есть исторические повествования и бытоописания, анекдоты и целые международные трактаты с дополнительными к ним документами, ноты европейских дипломатов Высокой Порте, статистические таблицы и прочее. При таком разнообразии содержания единство сборнику придает то, что большинство фактов, сообщений и официальных документов относятся, за немногими исключениями, к известной эпохе – ко времени первой из екатерининских войн России с Турцией; и так или иначе касаются взаимоотношений сторон по поводу Крымского ханства.

Вступительная статья подготовлена русским востоковедом-туркологом Василием Дмитриевичем Смирновым (1846–1922 гг.). В ней особо подчеркивается, что уже начало сборника показывает, что составитель его хотел, создать «нечто цельное, имеющее предметом своим Крымское ханство и его отношение к Высокой Порте».

**The Design of Rijndael** Joan Daemen, Vincent Rijmen, 2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.

**Topics in Cryptology - CT-RSA 2002** Bart Preneel, 2003-07-31 This volume continues the tradition established in 2001 of publishing the contributions presented at the Cryptographers' Track (CT-RSA) of the yearly RSA Security Conference in Springer-Verlag's Lecture Notes in Computer Science series. With 14 parallel tracks and many thousands of participants, the RSA - curity Conference is the largest e-security and cryptography conference. In this setting, the Cryptographers' Track presents the latest scienti?c developments. The program committee considered 49 papers and selected 20 for presentation. One paper was withdrawn by the authors. The program also included two invited talks by Ron Rivest ("Micropayments Revisited" – joint work with Silvio Micali) and by Victor Shoup ("The Bumpy Road from Cryptographic Theory to Practice"). Each paper was reviewed by at least three program committee members;

papers written by program committee members received six reviews. The authors of accepted papers made a substantial effort to take into account the comments in the versions submitted to these proceedings. In a limited number of cases, these revisions were checked by members of the program committee. I would like to thank the 20 members of the program committee who helped to maintain the rigorous scienti?c standards to which the Cryptographers' Track aims to adhere. They wrote thoughtful reviews and contributed to long discussions; more than 400 Kbyte of comments were accumulated. Many of them attended the program committee meeting, while they could have been enjoying the sunny beaches of Santa Barbara.

*Поправка 3:17. Как перестать портить жизнь себе и окружающим* Александр Димидов, 2019-07-12 Эссе «Поправка 3:17» представляет собой беспрецедентную, написанную простым «человеческим» языком, попытку анализа наших повседневных проблем сквозь парадигму христианских ценностей. Отношения между церковью и человеком. Конфликт биологии и нравственности. Роль личностных ориентиров. Почему все в мире происходит так, как происходит? Почему моя судьба складывается так, а не иначе? И наконец, что необходимо изменить, чтобы перестать портить жизнь себе и окружающим.

*MICROPROCESSOR TECHNOLOGY* J. S. Anderson, 1994 'Microprocessor Technology' provides a complete introduction to the subject of microprocessor technology using the Z80 and 6502 processors. An emphasis on fault-finding and repair makes this an ideal text for servicing courses including City & Guilds 2240 in the UK, microelectronics units on BTEC National/Advanced GNVQ and City & Guilds 7261 Microprocessor Technology. It will also provide a refresher course for those on 'bridging' and micro appreciation courses where a measure of comparative studies is required. Clear and concise explanations are supported by worked examples, tutorials, long answer questions and assignments giving students the opportunity to test their knowledge as they progress through the course as well as providing an essential revision tool in the run-up to exams.

*Я є Україна. Світоглядний всесвіт українців* Марія Чумарна, 2023-05-04 Книжка вводить читача у світоглядний всесвіт давньої України, знайомить із звичаєвою та матеріальною культурою нашого народу, що зароджувалась і відроджувалась з покоління в покоління під дахом «солом'яного храму», яким була українська хата. Автор розглядає скарби народної культури не як архаїчний спадок, а як генетичне джерело духовної пам'яті і сили для наступних поколінь. Україна – не зовні, вона – в кожному з нас. Для найширшого кола читачів.

*Internet Security* Man Young Rhee, 2003-07-25 Knowledge of number theory and abstract algebra are pre-requisites for any engineer designing a secure

internet-based system. However, most of the books currently available on the subject are aimed at practitioners who just want to know how the various tools available on the market work and what level of security they impart. These books traditionally deal with the science and mathematics only in so far as they are necessary to understand how the tools work. Internet Security differs by its assertion that cryptography is the single most important technology for securing the Internet. To quote one reviewer if every one of your communication partners were using a secure system based on encryption, viruses, worms and hackers would have a very hard time. This scenario does not reflect the reality of the Internet world as it currently stands. However, with security issues becoming more and more important internationally, engineers of the future will be required to design tougher, safer systems.

Internet Security:

- \* Offers an in-depth introduction to the relevant cryptographic principles, algorithms protocols - the nuts and bolts of creating a secure network
- \* Links cryptographic principles to the technologies in use on the Internet, eg. PGP, S/MIME, IPsec, SSL/TLS, Firewalls and SET (protecting credit card transactions)
- \* Provides state-of-the-art analysis of the latest IETF standards plus summaries and explanations of RFC documents
- \* Authored by a recognised expert in security Internet Security is the definitive text for graduate students on security and cryptography courses, and researchers in security and cryptography areas. It will prove to be invaluable to professionals engaged in the long-term development of secure systems.
