Russian Trade Policy Sergei Sutyryn, Olga Y. Trofimenko, Alexandra Koval, 2019-05-28 This book reveals the key

trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development; and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path.

Russian-European Relations in the Balkans and Black Sea Region Vsevolod Samokhvalov, 2017-06-19 This book provides a detailed analysis of Russia's 'great power identity' and the role of Europe in forming this identity. 'Great power identity' implies an expansionist foreign policy, and yet this does not explain all the complexities of the Russian state. For instance, it cannot explain why Russia decided to take over Crimea, but provided only limited support to break-away regions in Eastern Ukraine. Moreover, if Russia is in geo-economic competition with Europe, why has no serious conflict erupted between Moscow and other post-Soviet states which developed closer ties with the EU? Finally, why does Putin maintain relationships with the European countries that imposed tough economic sanctions on Russia? Vsevolod Samokhvalov provides a more nuanced understanding of Russia's great power identity by drawing on his experience in regional diplomacy and research and applying a constructivist methodology. The book will appeal to students and scholars of international relations, in particular Russian-European relations, Russian foreign policy and Russian studies.

PISA Education in Eastern Europe and Central Asia Findings from PISA OECD, United Nations Children's Fund, 2021-07-30 Countries in Eastern Europe and Central Asia have clear aspirations to strengthen civic participation and increase prosperity for all. A highly skilled and knowledgeable population is critical to achieving these goals, which makes creating and maintaining high quality and equitable education systems a vital part of regional development efforts. Results from the Programme for International Student Assessment (PISA) show that learning outcomes in the region have generally improved, but that the improvement has not been equitable. While countries in the region are producing some of the top performing students in the world, many other students are being left behind.

COVID-19 and a World of Ad Hoc Geographies Stanley D. Brunn, Donna Gilbreath, 2022-09-15 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K., from June 11th - 13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected, important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include: sustainable alternatives to natural sand, stone, and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice-husk ash, silica fume, gypsum plasterboard (drywall), and lime in construction; sustainable mortar, concrete, bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes, and organic materials (straw bale, hemp, etc.) in construction; sustainable use of soil, timber, and wood products; and related sustainable construction and rehabilitation technologies.

Сборник некоторых важных известий и официальных документов касательно Турции, России и Крыма Смирнов В. Д., 2022-08-31 В сборник, изданный почти полтора столетия назад в С.-Петербурге, вошли турецкие рукописи, внешне представляющие собой единое целое, но в действительности заключающие в себе самые разнообразные сведения. В числе 124-х отдельных статей есть исторические повествования и бытоописания, анекдоты и целые международные трактаты с дополнительными к ним документами, ноты европейских дипломатов Высокой Порте, статистические таблицы и прочее. При таком разнообразии содержания единство сборнику придает то, что большинство фактов, сообщений и официальных документов относятся, за немногими исключениями, к известной эпохе – ко времени первой из екатерининских войн России с Турцией; и так или иначе касаются взаимоотношений сторон по поводу Крымского ханства. Вступительная статья подготовлена русским востоковедом-тюркологом Василием Дмитриевичем Смирновым (1846–1922 гг.). В ней особо подчеркивается, что уже начало сборника показывает, что составитель его хотел, создать «нечто цельное, имеющее предметом своим Крымское ханство и его отношение к Высокой Порте».

Сахароза Максим Березин, 2020-08-01 Сахароза занимает главенствующее положение среди простых углеводов, то есть, это самая распространенная пищевая добавка в те продукты, где это требуется. Моя основная научная деятельность направлена на изучение влияния простых углеводов на организм человека, особенно сахарозы. Имеются множество исследований, которые подтверждают 100% вред сахарозы в избытке, а где-то даже в нормальных количествах. Моя цель, это просветить вас в этой теме, чтобы вы могли выбрать правильное решение.

The Design of Rijndael Joan Daemen,Vincent Rijmen,2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.
