Macedonia's Long Transition Robert Hudson, Ivan Dodovski, 2023-02-24 This book provides a broad, interdisciplinary analysis of events impacting on North Macedonia since its independence, particularly during the last decade. In the past thirty years, the country has gone through deep political, social and economic transition, along with a name change from ‘Macedonia’ to the ‘Republic of North Macedonia’ following the Prespa Agreement signed with Greece. The contributors consider Macedonia’s challenges, its multi-ethnic make-up and its ambition to enter the European mainstream through the auspices of the European Union and NATO. The volume includes chapters on international politics and North Macedonia’s place in the region’s security architecture as well as the difficulties of the privatisation of socially owned enterprises, political corruption, state capture and backsliding. The book also covers the controversial ‘Skopje 2014’ project in addition to the impact of migration along the ‘Balkan Route’ and the current wranglings with Bulgaria over identity politics.

Alternative Paths to Influence Giulio M. Gallarotti, 2023-06-06 This book offers new and cutting-edge analyses of under-explored subjects and issues in the realm of soft power. It attempts to fill significant scholarly gaps in understanding the process by which soft power is created, as well as gaps in demonstrating its impact. Soft power is one of the most influential ideas in the study of international politics over the past thirty years. Can nations attain their most vital foreign policy objectives in agreeable ways? Advocates of the concept of soft power have vociferously answered in the affirmative. After many years of thinking in the field of international affairs that the only effective path to influence in international politics was military and economic power, the idea of soft power offers new and exciting possibilities of gaining such influence through a more benign path, one that elevates cooperation and esteem as preferred alternatives to violence, threat and military capacity. This book posits that the realization of the full potential of soft power as a foundation for international relations is a crucial goal for our present world, one beset by war and planetary crises. The book will be of special interest to researchers across political science, international relations, cultural studies and foreign policy. It was originally

published as a special issue of the Journal of Political Power.

Diaspora Engagement in Times of Severe Economic Crisis Othon Anastasakis, Manolis Pratsinakis, Foteini Kalantzi, Antonis Kamaras, 2022-06-19 How does a severe economic crisis impact on diaspora-homeland relations? The present volume addresses this question by exploring diaspora engagement in Greece during the protracted post-2009 eurozone crisis. In so doing, it looks at the crisis as a critical juncture in Greece's relations with its nationals abroad. The contributors in this book explore aspects of diaspora engagement, including transnational mobilisation, homeland reform, the role of diasporic institutions, crisis driven migration, as well as, comparisons with other countries in Europe. This book provides a compelling and original interdisciplinary study of contemporary diaspora issues, through the lens of an advanced economy and democracy facing a prolonged crisis, and, as such, it is a significant addition to the literature on European diasporas.

Commercial Contract Law and Arbitration Mads Andenas, Maren Heidemann, 2024-04-30 This book tackles one of the most challenging fields of research and practice in the current global trade environment: integrating doctrines of private and public law for the purpose of international commerce and trade. Traditional concepts of obligatory and proprietary claims and rights reach their limits when placed within an international context of litigation funding, liability and securitisation. Across disciplines, scholars and practitioners are seeking new ways of expanding and reconnecting novel products and services such as data; and the use of international dispute settlement with indispensable constitutional values and democratic processes is also growing. This book combines contributions on current issues in commercial contract and contract law, making an important contribution to the areas of substantive contract law and arbitration procedure that connect issues across disciplines. Exploring both substantive and procedural laws, the book explores unfair terms in non-consumer contracts, which is complemented by a broader contextual discussion of the regulation of platform operators in the European Union; while a discussion of the procedural role of public reporting of investment arbitration awards by the International Centre for the Settlement of Investment Disputes (ICSID) expands on the procedural aspects of arbitration within the wider context of the rule of law debate. Debating policy issues in general private law reform, and including a juxtaposition of a traditionalist continuation-oriented approach and a call for radical reform of entrenched and outmoded private law concepts to suit global commerce,

this book will be of interest to students, academics and practitioners working in the area of commercial contract law and arbitration.

Strategic Planning in Local Communities Călin Emilian Hînțea, Marius Constantin Profiroiu, Tudor Cristian Țiclău, 2019-01-29 This is a comparative international study of the patterns of planning in local governments. While strategic planning has been a field of interest for public management and administrative science for over half a century there are very few cross-national studies of the specifics of planning in local governments. The book analyses the planning activities of local authorities in 7 diverse countries: France, Hungary, Romania, Russia, Spain, Turkey and USA. Although theoretical models of strategic planning are used, the book's findings point to a very diverse and interesting environment with cultural, political and legal factors playing a significant role in shaping how planning is done in each country.

Turkey and the Balkans Başak Z. Alpan, Ahmet Erdi Öztürk, 2022-12-26 This book delves into Turkey's increasing ethno-religious, pragmatic, and complicated involvement and activism in the Balkans since 2002, under the Justice and Development Party (Adalet ve Kalkınma Partisi - AKP). It primarily focusses on the intersectionality between domestic and foreign policy that has played an important role in Turkey's recent relations with the Balkan countries as well as exploring how the Europeanisation process influences this relationality. Broadly, the chapters in this volume posit that religion, ethnicity and kin politics are indispensable components of identity politics and have the capacity to transform Turkey's foreign policy attitudes as well as the orientations of the Balkan countries. The book also asserts that the impact of the processes of Europeanisation and de-Europeanisation on the relationship between Turkey and the Balkans needs to be included into the analysis. This book will be useful to students, researchers and academics interested in Politics, International Relations and Southeast European Studies. The chapters in this book were originally published as a special issue of Southeast European and Black Sea Studies.

Circassia and Ukraine Adel Bashqawi, 2023-08-23 In light of the war of extermination that waged against Ukraine, the aggression is a typical scorched-earth policy. Genocide, ethnic cleansing, and forced deportation committed in the nineteenth century in Circassia are similar to Russia’s war in Ukraine since February 24, 2022. The book reminds of dozens of peoples and nations eager to restore their confiscated rights since the dissolution of the Soviet Union until now. It is divided into time periods (chapters). It touches on articles, studies, prominent occasions, developments, events, and commemorations that occurred during the mentioned period. What happened in the past and is developing nowadays necessitated the documentation, showing and exposing facts and events, which will set the record straight. Where actions speak louder than words, this confirms an undeniable reality. With peoples deprived of their rights, the Russian state did not care so far for mending fences and reconciling for peace and fairness. That confirms an undeniable fact, which is that the Russian state has not cared so far to carry out the duty entrusted to it in order to correct what the successive Russian regimes have committed against the Circassian nation and other victims of wars, occupation, genocide, deportation, and forced annexation.

The Collective Dimensions of Employment Relations Tindara Addabbo, Edoardo Ales, Ylenia Curzi, Tommaso Fabbri, Olga Rymkevich, Iacopo Senatori, 2021-08-09 This edited volume explores the old and new “collective dimensions” of employment relations. It examines specific challenges stemming from new forms of work of the digital and sharing economy, such as measurement, monitoring, assessment, and remuneration of work, the protection of work-life balance, the impact of new technologies on health and safety, the adaptation of occupational skills to new work processes, and the responses to the digital restructuring of undertakings. It addresses a series of questions such as how the representational action of unions and works councils can adapt to the challenges posed by new production systems and whether the legislative framework needs to be reformed to ensure that digital workers enjoy the right to collective representation. This important collection offers readers a renewed theoretical perspective and justification of the role that the dialogue between workers (representatives) and companies could play in an increasingly complex world of work.

Internet Security Man Young Rhee, 2003-07-25 Knowledge of number theory and abstract algebra are pre-requisites for any engineer designing a secure internet-based system. However, most of the books currently available on the subject are aimed at practitioners who just want to know how the various tools available on the market work and what level of security they impart. These books traditionally deal with the science and mathematics only in so far as they are necessary to understand how the tools work. Internet Security differs by its assertion that cryptography is the single most important technology for securing the Internet. To quote one reviewer if every one of your communication partners were using a secure system based on encryption, viruses, worms and hackers would have a very hard time. This scenario does not reflect the reality of the Internet world as it currently stands. However, with security issues becoming more and more important internationally, engineers of the future will be required to design tougher, safer systems. Internet Security: * Offers an in-depth introduction to the relevant cryptographic principles, algorithms protocols - the nuts and bolts of creating a secure network * Links cryptographic principles to the technologies in use on the Internet, eg. PGP, S/MIME, IPsec, SSL TLS, Firewalls and SET (protecting credit card transactions) * Provides state-of-the-art analysis of the latest IETF standards plus summaries and explanations of RFC documents * Authored by a recognised expert in security Internet Security is the definitive text for graduate students on security and cryptography courses, and researchers in security and cryptography areas. It will prove to be invaluable to professionals engaged in the long-term development of

secure systems.

The Caucasus Emirate Mujahedin Gordon M. Hahn, 2014-10-09 Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the jihadi method and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.
