Diaspora Engagement in Times of Severe Economic Crisis Othon Anastasakis, Manolis

Pratsinakis, Foteini Kalantzi, Antonis

Kamaras, 2022-06-19 How does a severe economic crisis impact on diaspora-homeland relations? The present volume addresses this question by exploring diaspora engagement in Greece during the protracted post-2009 eurozone crisis. In so doing, it looks at the crisis as a critical juncture in Greece's relations with its nationals abroad. The contributors in this book explore aspects of diaspora engagement, including transnational mobilisation, homeland reform, the role of diasporic institutions, crisis driven migration, as well as, comparisons with other countries in Europe. This book provides a compelling and original interdisciplinary study of contemporary diaspora issues, through the lens of an advanced economy and democracy facing a prolonged crisis, and, as such, it is a significant addition to the literature on European diasporas.

Emigration and Diaspora Policies in the Age of Mobility Agnieszka Weinar, 2017-07-05 This volume examines the ways different countries around the world have responded to rising numbers of mobile citizens. Complete with detailed case studies, it provides a groundbreaking and global analysis of emigration and diaspora policies in the 21st century. First, an introduction considers factors that determines a state's policy choices. It draws on rich empirical material to present readers with information on the determinants of policy definition and implementation, reactions to

emigration, and converging and diverging trends. Next, the volume offers detailed case studies from 15 countries around the world, including Argentina, Vietnam, Senegal, the Russian Federation, Denmark, and Turkey. Coverage for each country critically analyzes its emigration or diaspora policies as well as how these policies affect its mobile citizens. The contributors also place the policies in context and explore the consequences of pertinent rules and provisions. In addition, a conclusion presents a comparative analysis of all case studies as well as details a set of best practices. Emigration and immigration are two sides of the same coin that every country experiences and, in one way or the other, must face. This book offers readers a new look on diaspora and emigration governance across the globe and explores the future paradigm of reactions to emigration.

Circassia and Ukraine Adel Bashqawi, 2023-08-23
In light of the war of extermination that waged against Ukraine, the aggression is a typical scorched-earth policy. Genocide, ethnic cleansing, and forced deportation committed in the nineteenth century in Circassia are similar to Russia's war in Ukraine since February 24, 2022. The book reminds of dozens of peoples and nations eager to restore their confiscated rights since the dissolution of the Soviet Union until now. It is divided into time periods (chapters). It touches on articles, studies, prominent occasions, developments, events, and commemorations that occurred during the mentioned period. What happened in the past and is developing nowadays

necessitated the documentation, showing and exposing facts and events, which will set the record straight. Where actions speak louder than words, this confirms an undeniable reality. With peoples deprived of their rights, the Russian state did not care so far for mending fences and reconciling for peace and fairness. That confirms an undeniable fact, which is that the Russian state has not cared so far to carry out the duty entrusted to it in order to correct what the successive Russian regimes have committed against the Circassian nation and other victims of wars, occupation, genocide, deportation, and forced annexation.

SARS-CoV-2 and Coronacrisis Fr archpriest Evgeny I. Legach, Konstantin S. Sharov, 2021-07-28 This book is useful for administrators of different levels involved in counteracting COVID-19, surveillance professionals, clinicians, researchers specializing in epidemiology, microbiology, and infectious diseases, and politicians / legislators engaged in public health sector. We use an innovative approach of combining both epidemiological and sociological analyses, as the very problem is mainly an issue of correct governance. A team of authors from Europe, Russia and China summarizes their experience and knowledge useful for containing SARS-CoV-2 and overcoming social and managerial consequences of the pandemic. The editors are sure that sharing our different experience would help to elaborate necessary strategies, protocols, and principles that may be effectively applied in the future to avoid dramatic consequences of not only COVID-19

but also any possible epidemiological hazards for people and medicine.

Tourism and Heritage in the Chernobyl Exclusion Zone Magdalena Banaszkiewicz, 2022-09-28 *Tourism and Heritage in the Chernobyl Exclusion Zone (CEZ)* uses an ethnographic lens to explore the dissonances associated with the commodification of Chernobyl's heritage. The book considers the role of the guides as experience brokers, focusing on the synergy between tourists and guides in the performance of heritage interpretation.

Banaszkiewicz proposes to perceive tour guides as important actors in the bottom-up construction of heritage discourse contributing to more inclusive and participatory approach to heritage management. Demonstrating that the CEZ has been going through a dynamic transformation into a mass tourism attraction, the book offers a critical reflection on heritagisation as a meaning-making process in which the resources of the past are interpreted, negotiated, and recognised as a valuable legacy. Applying the concepts of dissonant heritage to describe the heterogeneous character of the CEZ, the book broadens the interpretative scope of dark tourism which takes on a new dimension in the context of the war in Ukraine. *Tourism and Heritage in the Chernobyl Exclusion Zone* argues that post-disaster sites such as Chernobyl can teach us a great deal about the importance of preserving cultural and natural heritage for future generations. The book will be of interest to academics and students who are engaged in the study of heritage, tourism, memory, disasters and Eastern Europe.

Alternative Paths to Influence Giulio M.

Gallarotti, 2023-06-06 This book offers new and cutting-edge analyses of under-explored subjects and issues in the realm of soft power. It attempts to fill significant scholarly gaps in understanding the process by which soft power is created, as well as gaps in demonstrating its impact. Soft power is one of the most influential ideas in the study of international politics over the past thirty years. Can nations attain their most vital foreign policy objectives in agreeable ways? Advocates of the concept of soft power have vociferously answered in the affirmative. After many years of thinking in the field of international affairs that the only effective path to influence in international politics was military and economic power, the idea of soft power offers new and exciting possibilities of gaining such influence through a more benign path, one that elevates cooperation and esteem as preferred alternatives to violence, threat and military capacity. This book posits that the realization of the full potential of soft power as a foundation for international relations is a crucial goal for our present world, one beset by war and planetary crises. The book will be of special interest to researchers across political science, international relations, cultural studies and foreign policy. It was originally published as a special issue of the Journal of Political Power.

Strategic Planning in Local Communities Călin

Emilian Hînțea, Marius Constantin Profiroiu, Tudor Cristian Țiclău, 2019-01-29 This is a comparative international study of the patterns of planning in

local governments. While strategic planning has been a field of interest for public management and administrative science for over half a century there are very few cross-national studies of the specifics of planning in local governments. The book analyses the planning activities of local authorities in 7 diverse countries: France, Hungary, Romania, Russia, Spain, Turkey and USA. Although theoretical models of strategic planning are used, the book's findings point to a very diverse and interesting environment with cultural, political and legal factors playing a significant role in shaping how planning is done in each country.

THE CHANGING PERSPECTIVES AND 'NEW' GEOPOLITICS OF THE CAUCASUS IN THE 21ST CENTURY SERDAR YILMAZ, MURAT YORULMAZ, 2021-03-08 The change of the geopolitical realities and dynamics, the latest regional developments and the emergence of a new perception of security due to the new situation in Karabakh have changed current perspectives in the South Caucasus region. This book will provide a comprehensive introduction for students, academics, media representatives, business persons and those who are interested in the region. It will guide you through in a very readable and engaging style as it covers all the salient points and issues of the North Caucasus (the autonomous republics) succinctly and the South Caucasus (Azerbaijan, Georgia, Armenia) in detail. After the last development and Russian direct involvement in the Karabakh issue, the world's attention has focused increasingly on the Caucasus region. Thus, *THE CHANGING PERSPECTIVES AND 'NEW'*

GEOPOLITICS OF THE CAUCASUS IN THE 21ST CENTURY book will be an excellent introduction to the complexities of a little-known the Caucasus region and make a significant contribution to the understanding of fundamental issues of the region. As the editors, we would like to dedicate this book to the heroic Azerbaijani soldiers who were martyred during the struggle for the liberation of the Karabakh lands from the Armenian occupation.

SHAN HAI JING—A BOOK COVERED WITH BLOOD Kate Bazilevsky, 2014-08-22 In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words,

the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: bad guys from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular

people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay experts on the human soul for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this civilization—maybe instead of trying to find new recipes to destroy excess billions and trying to examine human potential using Neanderthal methods, it would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

COVID-19 and a World of Ad Hoc Geographies

Stanley D. Brunn, Donna Gilbreath, 2022-09-15 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments

from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

Youth in Putin's Russia Elena

Omelchenko, 2021-12-02 This edited volume sheds light on the lives of young people in various central and peripheral regions of Russia, including youth belonging to different ethnic and religious groups and who have differing views on contemporary politics. While the literature continues to grow regarding the inclusion of youth in global contexts, the specific cultural, political, and economic circumstances of being young in Russia make the Russian case unique. Chapter authors focus on four key aspects that characterize the youth experience in contemporary Russia: cultural practices and value affiliations, citizenship and patriotism, ethnic and religious diversity, and the labor market. This collection will appeal to readers interested in contemporary life in Russia and looking for the latest

empirical material on youth identities and cultures, as well as those looking to learn about the critical viewpoint of local academics regarding the ongoing processes in contemporary Russian society.

The Caucasus Emirate Mujahedin Gordon M. Hahn, 2014-09-29 Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the "jihadi method" and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

Abkhazia: 1992-2022 Metin Sonmez, 2022-10-12 The 14th of August 2022 is the 30th anniversary of the start of the war between the Georgians and the Abkhazians in the decades-long dispute over ownership of the small territory known to the autochthonous Abkhazians as Apsny, to the Georgians as apxazeti, and to most of the world as Abkhazia. For much of the world, the territory remains either a thoroughly unknown or, at best, poorly known country and, for many, a disputed region... This project is the continuation of the earlier "Reflections on Abkhazia: [14 August] 1992-2012", which was completed 10 years ago. Food Waste and Sustainable Food Waste Management in the Baltic Sea Region Walter Leal Filho, Marina Kovaleva, 2014-09-12 This work presents the findings of an extensive study on the state-of-the-art regarding the problem of food waste in Belarus, Estonia, Germany, Latvia, Lithuania, Poland and Sweden. The results show that the problem of food waste can be found at different levels in each country and that our knowledge of it is limited by the current lack of studies in

the area. The problem is primarily due to food waste generated by the manufacturing sector, mostly in the form of unused or inefficiently used by-products, as well as on a share of food thrown away by households that is still suitable for human consumption. The main reduction/prevention method, applied across the countries, is food donation; the remaining methods are the same ones used for biodegradable waste in the respective countries. The findings gathered in this study show a number of potential measures/methods for sustainable food waste management, which may be considered in future works in order to reduce the amounts of food waste generated in each of the aforementioned countries.

Different Shades of the Past Mateusz

Kamionka, Przemysław Łukasik, 2023-01-30 In his book 21 Lessons for the 21st Century the historian Yuval Noah Harari wrote that man had the possibility to conquer the world precisely because he could create fictional stories and believe in them. People created more and more complex stories about themselves that served and continue to serve, according to the professor of the University of Jerusalem, building unity, social harmony and gaining power. A narrative about past, in which memory fragmentation and victimisation play a large role, may be a temptation to instrumentalise the past. This is especially true in relation to the events of the twentieth century, when a series of bloody war conflicts occurred. As shown in the following post-conference volume, today the wars of the past (World War I and World War II, Indian-Pakistani

war) and current conflicts (Russo-Ukrainian war, war in Sudan or Nagorno-Karabakh) are also a catalyst for the process of instrumentalisation. This process can be analysed both at the level of the evolution of the language of conflict, including the erosion of the values of democratic dialogue, and the use of specific means of commemorating the past (monuments, museums, the Internet).
