China's Belt and Road Initiative Alfred Gerstl,Ute Wallenböck,2020-11-30 This edited volume presents a trans-disciplinary and multifaceted assessment of the strategic and economic impacts of China's Belt and Road Initiative (BRI) on three regions, namely Central Asia, Southeast Asia, and Central Eastern Europe. The contributions to this book demonstrate the requirement of a more realistic view concerning the anticipated economic benefits of the New Silk Road. The contributors critique the strategic effects of China's opaque long-term grand strategy on the regional and global political order. Specific countries that are covered are Finland, Hungary, Kazakhstan, Malaysia, Poland, and Thailand. Additionally, case studies from South Asia and Africa, notably India and Ethiopia, enable insightful comparisons. Encouraging readers to critically challenge mainstream interpretations of the aims and impacts of the BRI, this book should interest academics and students from various disciplines including Political Science, International Relations, Political Geography, Sociology, Economics, International Development, and Chinese Studies.

Words in Space and Time Tomasz Kamusella,2021-11-30 With forty-two extensively annotated maps, this atlas offers novel insights into the history and mechanics of how Central Europe's languages have been made, unmade, and deployed for political action. The innovative combination of linguistics, history, and cartography makes a wealth of hard-to-reach knowledge readily available to both specialist and general readers. It combines information on languages, dialects, alphabets, religions, mass violence, or migrations over an extended period of time. The story first focuses on Central Europe's dialect continua, the emergence of states, and the spread of writing technology from the tenth century onward. Most maps concentrate on the last two centuries. The main storyline opens with the emergence of the Western European concept of the nation, in accord with which the ethnolinguistic nation-states of Italy and Germany were founded. In the Central European view, a "proper" nation is none other than the speech community of a single language. The Atlas aspires to help users make the intellectual leap of perceiving languages as products of human history and part of culture. Like states, nations, universities, towns, associations, art, beauty, religions, injustice, or atheism—languages are artefacts invented and shaped by individuals and their groups.

Macedonia's Long Transition Robert Hudson,Ivan Dodovski,2023-02-24 This book provides a broad, interdisciplinary analysis of events impacting on North Macedonia since its independence, particularly during the last decade. The contributors consider Macedonia's challenges, its multi-ethnic make-up and its ambition to enter the European mainstream through the auspices of the European Union and NATO. The volume includes chapters on international politics and North Macedonia's place in the region's security architecture as well as the difficulties of the privatisation of socially owned enterprises, political corruption, state capture and backsliding. The book also covers the controversial 'Skopje 2014' project in addition to the impact of migration along the 'Balkan Route' and the current wranglings with Bulgaria over identity politics.

The Donbas Conflict in Ukraine Daria Platonova,2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

Tourism and Heritage in the Chernobyl Exclusion Zone Magdalena Banaszkiwicz,2022-09-28 Tourism and Heritage in the Chernobyl Exclusion Zone (CEZ) uses an ethnographic lens to explore the dissonances associated with the commodification of Chernobyl's heritage. The book considers the role of the guides as experience brokers, focusing on the synergy between tourists and guides in the performance of heritage interpretation. Banaszkiwicz proposes to perceive tour guides as important actors in the bottom-up construction of heritage discourse contributing to more inclusive and participatory approach to heritage management. Demonstrating that the CEZ has been going through a dynamic transformation into a mass tourism attraction, the book offers a critical reflection on heritagisation as a meaning-making process in which the resources of the past are interpreted, negotiated, and recognised as a valuable legacy. Applying the concepts of dissonant heritage to describe the heterogeneous character of the CEZ, the book broadens the interpretative scope of dark tourism which takes on a new dimension in the context of the war in Ukraine. Tourism and Heritage in the Chernobyl Exclusion Zone argues that post-disaster sites such as Chernobyl can teach us a great deal about the importance of preserving cultural and natural heritage for future generations. The book will be of interest to academics and students who are engaged in the study of heritage, tourism, memory, disasters and Eastern Europe.

Turkey and the Balkans Başak Z. Alpan, Ahmet Erdi Öztürk, 2022-12-26 This book delves into Turkey's increasing ethno-religious, pragmatic, and complicated involvement and activism in the Balkans since 2002, under the Justice and Development Party (Adalet ve Kalkınma Partisi - AKP). It primarily focusses on the intersectionality between domestic and foreign policy that has played an important role in Turkey's recent relations with the Balkan countries as well as exploring how the Europeanisation process influences this relationality. Broadly, the chapters in this volume posit that religion, ethnicity and kin politics are indispensable components of identity politics and have the capacity to transform Turkey's foreign policy attitudes as well as the orientations of the Balkan countries. The book also asserts that the impact of the processes of Europeanisation and de-Europeanisation on the relationship between Turkey and the Balkans needs to be included into the analysis. This book will be useful to students, researchers and academics interested in Politics, International Relations and Southeast European Studies. The chapters in this book were originally published as a special issue of Southeast European and Black Sea Studies.

Inventing Majorities Mykhailo Minakov, 2022-03-22 The recent history of post-Soviet societies is heavily shaped by the successor nations' efforts to geopolitically re-identify themselves and to reify certain majorities in them. As a result of these fascinating processes, various new ideologies have appeared. Some are specific to the post-Soviet space while others are comparable to ideational processes in other parts of the world. In this collected volume, an international group of contributors delves deeper into recent theoretical constructions of various post-Soviet majorities, the ideologies that justify them, and some respectively formulated policy prescriptions. The first part analyzes post-Soviet state-builders' fixation on certain constructed majorities as well as on these imagined communities' symbolic self-identifications, in- or outward othering, and national languages. The second part deals specifically with post-Soviet ideas of sovereigntism and the way they define majorities as well as imply changes in internal and external policies and legal systems. These processes are analyzed in comparison to similar phenomena in Western societies. The book's contributors include (in the order of their appearance): Natalia Kudriavtseva, Petra Colmorgen, Nadiia Koval, Ivan Gomza, Augusto Dala Costa, Roman Horbyk, Yana Prymachenko, Yuliya Yurchuk, Oleksandr Fisun, Nataliya Vinnykova, Ruslan Zaporozhchenko, Mikhail Minakov, Gulnara Shaikhutdinova, and Yurii Mielkov.

They also discuss social mobility as inheriting different life worlds, while crossing borders. The research on the socialization of children, raised in different societies provides a better understanding of the new generations in Europe from the beginning of the XXI c. The variety of methods presented in this book is also a contribution to link Western and Eastern European perspectives as well as sociology and anthropology in order to capture a wider spectrum of social reality.

Russian Information Warfare Bilyana Lilly, 2022-09-15 Russian Information Warfare: Assault on Democracies in the Cyber Wild West examines how Moscow tries to trample the very principles on which democracies are founded and what we can do to stop it. In particular, the book analyzes how the Russian government uses cyber operations, disinformation, protests, assassinations, coup d'états, and perhaps even explosions to destroy democracies from within, and what the United States and other NATO countries can do to defend themselves from Russia's onslaught. The Kremlin has been using cyber operations as a tool of foreign policy against the political infrastructure of NATO member states for over a decade. Alongside these cyber operations, the Russian government has launched a diverse and devious set of activities which at first glance may appear chaotic. Russian military scholars and doctrine elegantly categorizes these activities as components of a single strategic playbook —information warfare. This concept breaks down the binary boundaries of war and peace and views war as a continuous sliding scale of conflict, vacillating between the two extremes of peace and war but never quite reaching either. The Russian government has applied information warfare activities across NATO members to achieve various objectives. What are these objectives? What are the factors that most likely influence Russia's decision to launch certain types of cyber operations against political infrastructure and how are they integrated with the Kremlin's other information warfare activities? To what extent are these cyber operations and information warfare campaigns effective in achieving Moscow's purported goals? Dr. Bilyana Lilly addresses these questions and uses her findings to recommend improvements in the design of U.S. policy to counter Russian adversarial behavior in cyberspace by understanding under what conditions, against what election components, and for what purposes within broader information warfare campaigns Russia uses specific types of cyber operations against political infrastructure.
