Digital Transformation of the Economy: Challenges, Trends and New Opportunities Svetlana

Ashmarina, Anabela Mesquita, Marek Vochozka, 2019-02-05 This book gathers the best contributions from the conference “Digital Transformation of the Economy: Challenges, Trends and New Opportunities”, which took place in Samara, Russian Federation, on May 29–31, 2018. Organized by Samara State University of Economics (Samara), Russia, the conference was devoted to issues of the digital economy. Presenting international research on the impact of digitalization on economic development, it includes topics such as the transformation of the institutional environment under the influence of informatization, the comparative analysis of the digitalization development in different countries, and modeling the dependence of the rate of change in the economy on the level of the digitalization penetration into various spheres of human activity. It also covers business-process transformation in the context of digitalization and changes in the structure of employment and personnel training for the digital economy. Lastly, it addresses the issue of ensuring information

security and dealing with information risks for both individual enterprises and national economies as a whole. The book appeals to both students and researchers whose interests include the development of the digital economy, as well as to managers and professionals who integrate digital solutions into real-world business practice.

The Donbas Conflict in Ukraine Daria Platonova, 2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-

region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

Educational, Linguistic, and Media Discourses Roma Kriauņiņienė, 2020-08-27 This book

presents a collection of research papers from both experienced and emerging scholars, some of whom presented their work at the international conference ‘Language Teaching and Learning in the 21st Century: Linguistic, Educational and Intercultural Aspects’ held in June 2018 and organised by the Institute of Foreign Languages of the Faculty of Philology of Vilnius University, the FIPLV Nordic-Baltic Region, and the Language Teachers’ Association of Lithuania. The book consists of three parts, the first being devoted to language teaching and teacher education. The second section explores literary and cultural issues, while the third part encompasses linguistic and media discourse studies.

Different Shades of the Past Mateusz Kamionka, Przemysław Łukasik, 2023-01-30 In his book *21 Lessons for the 21st Century* the historian Yuval Noah Harari wrote that man had the possibility to conquer the world precisely because he could create fictional stories and believe in them. People created more and more complex stories about themselves that served and continue to serve, according to the professor of the University of Jerusalem, building unity, social harmony and gaining power. A narrative about past, in which memory fragmentation and victimisation play a large role, may

be a temptation to instrumentalise the past. This is especially true in relation to the events of the twentieth century, when a series of bloody war conflicts occurred. As shown in the following post-conference volume, today the wars of the past (World War I and World War II, Indian-Pakistani war) and current conflicts (Russo-Ukrainian war, war in Sudan or Nagorno-Karabakh) are also a catalyst for the process of instrumentalisation. This process can be analysed both at the level of the evolution of the language of conflict, including the erosion of the values of democratic dialogue, and the use of specific means of commemorating the past (monuments, museums, the Internet).

PISA Education in Eastern Europe and Central Asia Findings from PISA OECD, United Nations Children's Fund, 2021-07-30 Countries in Eastern Europe and Central Asia have clear aspirations to strengthen civic participation and increase prosperity for all. A highly skilled and knowledgeable population is critical to achieving these goals, which makes creating and maintaining high quality and equitable education systems a vital part of regional development efforts. Results from the Programme for International Student Assessment (PISA) show that learning outcomes in the region have generally

improved, but that the improvement has not been equitable. While countries in the region are producing some of the top performing students in the world, many other students are being left behind.

SARS-CoV-2 and Coronacrisis Fr archpriest Evgeny I. Legach, Konstantin S. Sharov, 2021-07-28

This book is useful for administrators of different levels involved in counteracting COVID-19, surveillance professionals, clinicians, researchers specializing in epidemiology, microbiology, and infectious diseases, and politicians / legislators engaged in public health sector. We use an innovative approach of combining both epidemiological and sociological analyses, as the very problem is mainly an issue of correct governance. A team of authors from Europe, Russia and China summarizes their experience and knowledge useful for containing SARS-CoV-2 and overcoming social and managerial consequences of the pandemic. The editors are sure that sharing our different experience would help to elaborate necessary strategies, protocols, and principles that may be effectively applied in the future to avoid dramatic consequences of not only COVID-19 but also any possible epidemiological hazards for people and medicine.

We God's People Jocelyne Cesari, 2021-12-16 Cesari argues that both religious and national communities are defined by the three Bs: belief, behaviour and belonging. By focusing on the ways in which these three Bs intersect, overlap or clash, she identifies the patterns of the politicization of religion, and vice versa, in any given context. Her approach has four advantages: firstly, it combines an exploration of institutional and ideational changes across time, which are usually separated by disciplinary boundaries. Secondly, it illustrates the heuristic value of combining qualitative and quantitative methods by statistically testing the validity of the patterns identified in the qualitative historical phase of the research. Thirdly, it avoids reducing religion to beliefs by investigating the significance of the institution-ideas connections, and fourthly, it broadens the political approach beyond state-religion relations to take into account actions and ideas conveyed in other arenas such as education, welfare, and culture.

Rural Youth at the Crossroads Kai. A Schafft, Sanja Stanić, Renata Horvatek, Annie Maselli,2020-12-30 Featuring chapters by an international group of scholars and academics, *Rural Youth at the Crossroads* discusses the challenges and contexts facing youth from rural communities in countries with legacies of socialism undergoing social, political, and economic transition. The chapters employ a variety of sources and approaches to examine rural youth outcomes, and the well-being and sustainability of rural areas. The book focuses particularly on career and educational goals, the often contradictory relations between rural schools and communities, majority-minoritized group relations, community engagement, and political attitudes. Individual chapters examine these questions and dynamics within Croatia, Czechia, Hungary, Romania, Russia, Serbia, and Vietnam. In total the volume

represents a unique and timely comparative discussion of the relationship between youth and rural development within transitional societies, and the challenges and opportunities for enhancing the well-being and sustainability of rural communities. Aimed at informing strategies to revitalize rural social space, this book is targeted towards social scientists with interest in sociology and rural sociology, demography, education, youth development, community/regional development, rurality, public policy, and identity formation in transitional contexts. As such, this book will have international appeal to researchers, educators, and policymakers in transitional countries, and to those interested in these topics, regions, and communities.

Soviet War Songs in the Context of Russian Culture Elena Polyudova, 2016-02-29 This volume presents a unique study of war songs created during and after World War II, known in Russia as the “Great Patriotic War”. The most popular war songs, such as “Katyusha”, “The Sacred War”, “Dark Night”, “My Moscow”, “In the Dugout”, “Victory Day”, provide illuminating insights into the musical culture of the former Soviet Union and modern Russia. In the year of the 70th anniversary of victory in

the war, the book studies the cultural heritage of famous war songs from a new perspective, exploring the historical background of their creation and analysing their lyrics as part of Russian cultural heritage. The book also discusses the modifications required when translating the songs from Russian to English. It concludes with a description an educational project studying war songs at Moscow schools run under the auspices of UNESCO.

Russian Information Warfare Bilyana Lilly, 2022-09-15 Russian Information Warfare: Assault on Democracies in the Cyber Wild West examines how Moscow tries to trample the very principles on which democracies are founded and what we can do to stop it. In particular, the book analyzes how the Russian government uses cyber operations, disinformation, protests, assassinations, coup d'états, and perhaps even explosions to destroy democracies from within, and what the United States and other NATO countries can do to defend themselves from Russia's onslaught. The Kremlin has been using cyber operations as a tool of foreign policy against the political infrastructure of NATO member states for over a decade. Alongside these cyber operations, the Russian government has launched a

diverse and devious set of activities which at first glance may appear chaotic. Russian military scholars and doctrine elegantly categorizes these activities as components of a single strategic playbook –information warfare. This concept breaks down the binary boundaries of war and peace and views war as a continuous sliding scale of conflict, vacillating between the two extremes of peace and war but never quite reaching either. The Russian government has applied information warfare activities across NATO members to achieve various objectives. What are these objectives? What are the factors that most likely influence Russia's decision to launch certain types of cyber operations against political infrastructure and how are they integrated with the Kremlin's other information warfare activities? To what extent are these cyber operations and information warfare campaigns effective in achieving Moscow's purported goals? Dr. Bilyana Lilly addresses these questions and uses her findings to recommend improvements in the design of U.S. policy to counter Russian adversarial behavior in cyberspace by understanding under what conditions, against what election components, and for what purposes within broader information warfare campaigns Russia uses specific types of cyber operations

against political infrastructure.

1917 and the Consequences Gerhard Besier, Katarzyna Stokłosa, 2019-09-30 The Russian Revolution of 1917 has been one of the most important events of modern history. It changed the course of the events not only in Russia but, on a wider scale, across the world while it influenced the flow of history throughout the twentieth century until the fall of the Soviet Union and, to some extent, well beyond this time. Radical change in Russia triggered social revolutions and reformations across Europe, while authoritarian systems shaped their societies according to the Russian model. This book analyses these forces, particularly at the European periphery which has been underexplored until this volume.

China and the Belt and Road Initiative Young-Chan Kim, 2022-01-01 This book offers critical insights into the China-led Belt and Road Initiative (BRI) from an EU perspective. It analyzes the political, cultural, and diplomatic effectiveness of Xi's efforts to expand socio-cultural ties and build new trade corridors between Europe and the Far East, and sheds light on the lasting success and influence

of China-led economic programs. The book is divided into three parts. The first part provides an overview of the various dimensions of the BRI initiative, including the challenges and opportunities of the EU-China trade relationship, China's geopolitical interests, and foreign policy approaches. The second part analyzes BRI cooperation from the perspective of the business sector, while the third part presents case studies that examine the impacts and responses of various European countries to the BRI.

The Return of Eurasia Glenn Diesen, Alexander Lukin, 2021-07-23 This book defines Eurasianism, a political idea with a long tradition, for a new century. Historically, Eurasia was depicted as a “third continent” with a geographical and historical space distinctively different from both Europe and Asia. Today, the concept is mobilized by the Russian foreign policy elite to imagine a close relationship with China and indirectly inspires the Chinese Belt and Road Initiative. A Russian-Chinese partnership forms the core of a new Eurasian region, yet Turkey, India, Hungary, Central Asia and the other parts of the supercontinent are also embracing Eurasian concepts. This book is of interest to scholars of

Russian and Chinese foreign policy, to economists, and to scholars of political thought.

Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security

Erokhin, Vasilii, Gao, Tianming, 2019-10-25 Free trade promotes economic growth through international competition and the efficient allocation of resources while also helping to stabilize food supplies between countries that have an overabundance of product and countries that have a shortage. However, sudden price surges can threaten the social cohesion of developing countries and may lead to malnutrition and stunted growth. Balancing trade liberalization and protectionism is imperative for the

provision of food security for all. The Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security is an essential publication that seeks to improve food security, food independence, and food sovereignty in the conditions of globalized agricultural trade and addresses the contemporary issues of agricultural trade including major commodities and food products traded between major countries, directions of trade, and trends. The book also examines the effects of tariff escalations, administrative restrictions, other forms of trade protectionism on food security, and the emerging trade tensions between major actors such as the US, China, the EU, and Russia. Featuring research on topics including plant fertility, dietary diversity, and protectionism, this book is ideally designed for government officials, policymakers, agribusiness managers, stakeholders, international tradesmen, researchers, industry professionals, academicians, and students.
