Words in Space and Time Tomasz Kamusella, 2021-11-30 With forty-two extensively annotated maps, this atlas offers novel insights into the history and mechanics of how Central Europe's languages have been made, unmade, and deployed for political action. The innovative combination of linguistics, history, and cartography makes a wealth of hard-to-reach knowledge readily available to both specialist and general readers. It combines information on languages, dialects, alphabets, religions, mass violence, or migrations over an extended period of time. The story first focuses on Central Europe's dialect continua, the emergence of states, and the spread of writing technology from the tenth century onward. Most maps concentrate on the last two centuries. The main storyline opens with the emergence of the Western European concept of the nation, in accord with which the ethnolinguistic nation-states of Italy and Germany were founded. In the Central European view, a "proper" nation is none other than the speech community of a single language. The Atlas aspires to help users make the intellectual leap of perceiving languages as products of human history and part of culture. Like states, nations, universities, towns, associations, art, beauty, religions, injustice, or atheism—languages are artefacts invented and shaped by individuals and their groups.

Alternative Paths to Influence Giulio M. Gallarotti, 2023-06-06 This book offers new and cutting-edge analyses of under-explored subjects and issues in the realm of soft power. It attempts to fill significant scholarly gaps in understanding the process by which soft power is created, as well as gaps in demonstrating its impact. Soft power is one of the most influential ideas in the study of international politics over the past thirty years. Can nations attain their most vital foreign policy objectives in agreeable ways? Advocates of the concept of soft power have vociferously answered in the affirmative. After many years of thinking in the field of international affairs that the only effective path to influence in international politics was military and economic power, the idea of soft power offers new and exciting possibilities of gaining such influence through a more benign path, one that elevates cooperation and esteem as preferred alternatives to violence, threat and military capacity. This book posits that the realization of the full potential of soft power as a foundation for international relations is a crucial goal for our present world, one beset by war and planetary crises. The book will be of special interest to researchers across political science, international relations, cultural studies and foreign policy. It was originally published as a special issue of the *Journal of Political Power*.

Turkey and the Balkans Başak Z. Alpan, Ahmet Erdi Öztürk, 2022-12-26 This book delves into Turkey's increasing ethno-religious, pragmatic, and complicated involvement and activism in the Balkans since 2002, under the Justice and Development Party (Adalet ve Kalkınma Partisi - AKP). It

primarily focusses on the intersectionality between domestic and foreign policy that has played an important role in Turkey's recent relations with the Balkan countries as well as exploring how the Europeanisation process influences this relationality. Broadly, the chapters in this volume posit that religion, ethnicity and kin politics are indispensable components of identity politics and have the capacity to transform Turkey's foreign policy attitudes as well as the orientations of the Balkan countries. The book also asserts that the impact of the processes of Europeanisation and de-Europeanisation on the relationship between Turkey and the Balkans needs to be included into the analysis. This book will be useful to students, researchers and academics interested in Politics, International Relations and Southeast European Studies. The chapters in this book were originally published as a special issue of Southeast European and Black Sea Studies.

Families and friends cannot get together, visiting the sick, nor attending funerals. This pestilence is clearly a cultural, economic and political disease. 40 leaders in medical and sociological research, in politics, religion, and consulting from 24 countries offer diverse, sometimes controversial answers, collected by Martin Woesler and Hans-Martin Sass .

Commercial Contract Law and Arbitration Mads Andenas,Maren Heidemann,2024-04-30 This book tackles one of the most challenging fields of research and practice in the current global trade environment: integrating doctrines of private and public law for the purpose of international commerce and trade. Traditional concepts of obligatory and proprietary claims and rights reach their limits when placed within an international context of litigation funding, liability and securitisation. Across disciplines, scholars and practitioners are seeking new ways of expanding and reconnecting novel products and services such as data; and the use of international dispute settlement with indispensable constitutional values and democratic processes is also growing. This book combines contributions on current issues in commercial contract and contract law, making an important contribution to the areas of substantive contract law and arbitration procedure that connect issues across disciplines. Exploring both substantive and procedural laws, the book explores unfair terms in non-consumer contracts, which is complemented by a broader contextual discussion of the regulation of platform operators in the European Union; while a discussion of the procedural role of public reporting of investment arbitration awards by the International Centre for the Settlement of Investment Disputes (ICSID) expands on the procedural aspects of arbitration within the wider context of the rule of law debate. Debating policy issues in general private law reform, and including a juxtaposition of a traditionalist continuation-oriented approach and a call for radical reform of entrenched and outmoded private law concepts to suit global commerce, this book will be of interest to students, academics and practitioners working in the area of commercial contract law and arbitration.

Approaching Consumer Culture Evgenia Krasteva-Blagoeva,2018-10-25 This fascinating collection analyzes the impact of Western consumer culture on local cultures and consumption in Southeast Europe and East Asia. Cultural, historical, economic and sociopolitical contexts are examined regarding buying behaviors, usage and customization practices and consumer activism, specifically in Bulgaria, Serbia, and Romania as cultures continue to evolve in the post-socialist era, and in China and Japan as a continuation of movements toward modernity and progress. Surprising and thought-provoking contrasts stand out as consumers balance the global with the local in terms of clothing, technology, luxury items, and food. All chapters feature a wealth of empirical and cross-cultural data, and the presentation is framed by Professor Mike Featherstone's theoretical essay on the origins of consumer culture and the consequences of two hundred years of increasing consumption for the human condition and the future of the planet. Included in the coverage: "You are a socialist child like me": Goods and Identity in Bulgaria Consumer Culture from Socialist Yugoslavia to Post-Socialist Serbia: Movements and Moments Preserves Exiting Socialism: Authenticity, Anti-Standardization, and Middle-Class Consumption in Post-
