The Foreign Policy of the Republic of Cyprus

Zenonas Tziarras, 2022-03-16 This book examines the foreign policy of the Republic of Cyprus, particularly since 2004—the year of its accession to the European Union and of the failed Annan Plan V of the United Nations which aimed to solve the decades-old Cyprus Problem. Scholarly work about the politics and foreign policy of the Republic of Cyprus (RoC) has been almost entirely analyzed through the prism of the Cyprus Problem. This is not without justification since the Cyprus Problem is indeed central to the social, political, and economic life of Cyprus. However, Cyprus is located in a highly neuralgic area of historical and geopolitical importance that is, more often than not, characterized by rapid developments, instability, and insecurity. Therefore, the RoC's politics and foreign policy go well beyond the confines of the Cyprus Problem, or so they should. Although the subject of the book is not international by definition, the book touches upon many regional and international dimensions that render it relevant for anyone who wants to better understand not just Cyprus but also the broader region and its importance for regional and international actors.

A Beauty-ful Boson Giulia Di Gregorio, 2023-01-01
The analysis described in this thesis is the

search for the Higgs boson, decaying into bb pair, in the associated production with a vector boson, in the extreme Higgs boson transverse momentum region where the Higgs boson is reconstructed using the large- R jet technique. The use of the large- R jets allows to add a part of the phase space unexplored so far, which is particularly sensitive to possible new physics. The analysed data have been collected at LHC by the ATLAS detector between 2015 and 2018 at a centre-of-mass energy of $\sqrt{s} = 13$ TeV. The same dataset has been used to perform the differential $pp \rightarrow ZH$ and $pp \rightarrow WH$ cross-section measurements used to extract the information on the Higgs couplings and to put limits on Beyond the Standard Model effects. Furthermore the analysis has been re-used to perform a cross-section measurement of the diboson ZZ and WZ processes because the diboson and the Higgs processes have a similar topology. For the first time the $ZZ(bb)$ and $WZ(bb)$ cross-sections are measured at $\sqrt{s} = 13$ TeV and the observed cross-section measurements are consistent with the Standard Model predictions.

There's a Place for Us Helen Smith, 2011 Helen Smith takes an in-depth look at all eight of Bernstein's musical theatre works and analyses them against a background of musical and social context, as well as looking at Bernstein's other orchestral, choral and chamber works. One important aspect examined is Bernstein's use of motifs in his theatre compositions. Smith provides an indispensable overview of the musical theatre works of an eclectic composer, and shows what it is that constitutes the Bernstein 'sound'.

Gateway to the West Mrs. Dale Bowers, 2001 This edition of Gateway to the West has been excerpted from the original numbers, consolidated, and reprinted in two volumes, with added Publisher's Note, Tables of Contents, and indexes, by Genealogical Publishing Co., SInc., Baltimore, MD.

Vaughan Williams's Ninth Symphony Alain Frogley, 2001 Ever since its premiere just before the composer's death, Vaughan Williams's Ninth Symphony has divided critical opinion and remained something of an enigma. Yet the composer thought highly of the work, and went against his usual practice by preserving all the sketches. This study, the first of its kind on a work of Vaughan Williams, analyses the symphony and traces its genesis through hundreds of pages of sketches and drafts; it also offers a general introduction to the composer's working methods. The manuscripts show how the composer worked meticulously to create the complex expressive ambivalence of the finished work, transforming in the process simpler conceptions redolent of his earlier music. Most crucially, however, the sketches reveal an underlying programme, centred on the theme of innocent sacrifice and drawing on Hardy's Tess of the D'Urbervilles, Stonehenge, and Salisbury Cathedral. Vaughan Williams's new musical path in the symphony, it emerges, was closely allied to the continuing evolution of his visionary agnosticism.
