Shrinking Japan and Regional Variations: Along the Tokaido

Fumie Kumagai, 2023-02-01 Taking the Goki-Shichido (Five Home Provinces and Seven Circuits of Ancient Japan) as a theoretical framework, this book examines shrinking Japan from a regional variation perspective by municipality along the ancient Tokaido, which comprises 15 provinces, and seven prefectures today. The study identifies the principal explanatory factors based on the small area data of e-Stat through GPS statistical software tools such as G-census and EvaCva, within a historical perspective. This historical knowledge helps in understanding the significance of the regional cultural heritage that remains in each municipality today. The book pays special attention to municipal variations within the same prefecture, presenting a completely unique approach from what other researchers have pursued. This volume studies two present-day prefectures along the ancient Tokaido for detailed analyses of the impacts of regional variations of population decline in Japan. They are Shizuoka Prefecture, made up of the former Tootoumi, Suruga, and Izu provinces, and Mie Prefecture, formed by the ancient provinces of Iga, Ise, Shima, and the eastern part of Kii as examples to show the impacts of municipal power on

regional variations of shrinking Japan. The reasons for selecting these two prefectures of the ancient Tokaido are twofold. First, they are made up of a multiple number of the ancient provinces. Second, other prefectures that fall under the Tokaido have been studied in the previous works of the present author by adopting the same methods of analyses. Thus, by presenting unique analyses of regional variations on small municipal levels, with demographic variables, social indicators, and historical identities of municipalities in Shizuoka and Mie prefectures along the Tokaido, this book offers suggestions for effective regional policy to revitalize shrinking Japan to a sustainable one.

Yoshitaki Kunikazu Nansuitei Yoshiyuki 100 Views of Osaka

Cristina Berna, Eric Thomsen, 2023-09-04 Viewing Osaka through the series 100 Views of Naniwa (Osaka) is an amazing experience. It is a well executed repetition over a format by Hiroshige. Some add a Famous to the title. This series is by three artists, Utagawa Yoshitaki, Utagawa Kunikazu and Nansuitei Yoshiyuki. All 104 prints are included here. Hiroshige I created his revolutionary series 100 Famous Views of Edo over three years, 1856-1859. This led to the publishing of copy series 100 Views of Naniwa (Osaka) by other artists. The book here is based mainly on prints

in the Museum of Fine Arts in Boston and Osaka Municipal Museum collections.

Poor Quality Pharmaceuticals in Global Public Health Satoru Kimura, Yasuhide Nakamura, 2020-01-16 This book aims to clarify the global aspects of poor quality pharmaceuticals, generic products in particular, becoming complicated through the process of IMPACT (International Medical Products Anti-Counterfeiting Taskforce) organized by the initiative of the World Health Organization (WHO) in 2006. The findings from this book provide a long-term perspective to policymakers. This book discusses from the following points: industrial standardization, healthcare market accessibility, motivation on supply side, WHO medicines policy and intellectual property rights. Standardization regulates the quality and enabled the generic medicines spreading to developing/emerging countries through technology transfer. However, quality is a part of cost and reflected to price. When a healthcare service market is divided according to wealth gap, compliance to standardization for quality on supply side is divided accordingly. Thus, poor quality pharmaceuticals are prevalent worldwide. Generic pharmaceuticals are essential resources in public health. The WHO has been involved in the dispute around

the intellectual property rights under its intention to promote the new drug development for neglected diseases. Global pandemic of AIDs is a critical factor to accelerate the confusion. This created feelings of distrust among developing/emerging countries against developed countries if the WHO was in favour of developed countries. In addition to that, an easy and optimistic start of IMPACT stirred up conflicts of interests in the international community. The problem of poor quality pharmaceuticals became more complicated through the conflicts on intellectual property rights; patented drugs to generic drugs. A key for quality generic products is the formation of a single healthcare service market where good motivation on supply side together with fair competitiveness with patented pharmaceuticals and equitable access to services (both for the rich and the poor) are ensured. Political commitment to investment and regulatory infrastructure for the market is crucial.

The 8th International Conference on Knowledge Management in Organizations Lorna Uden, Leon S.L. Wang, Juan Manuel Corchado Rodríguez, Hsin-Chang Yang, I-Hsien Ting, 2013-09-06
The proceedings from the eighth KMO conference represent the findings of this international meeting which brought together

researchers and developers from industry and the academic world to report on the latest scientific and technical advances on knowledge management in organizations. This conference provided an international forum for authors to present and discuss research focused on the role of knowledge management for innovative services in industries, to shed light on recent advances in social and big data computing for KM as well as to identify future directions for researching the role of knowledge management in service innovation and how cloud computing can be used to address many of the issues currently facing KM in academia and industrial sectors.

Cultural Heritage in Japan and Italy Nobuko Kawashima,

Ethical Innovation for Global Health Chieko Kurihara,Dirceu

Greco,Ames Dhai,2023-12-16 This volume captures the recent changes and evolution in ethics in research involving humans and provides future directions to achieve alternative drug development strategies for equitable global health. It presents ethical considerations in current day clinical trials and new trends of ethics in research. It also describes the historical context, illustrates the process in alternative paradigms to achieve democracy after World War II, how the framework of ethics in research was established in

different regions, and policies implemented to protect research participants from the exploitation of new drug development. The book is organized into three themed parts: relevant constructions from Brazil, South Africa, Taiwan, South Korea, and Japan; historical and international perspectives of principles of ethics in research; and alternative frameworks of clinical development and innovation. *Ethical Innovation for Global Health: Pandemic, Democracy and Ethics in Research* is an informative resource for academic researchers, the global pharmaceutical industry, regulators, civil society and other role players involved in global health. It is contributed to by leaders in global policy development in research ethics, and experts in drug development activities with its trajectory being global health. The COVID-19 pandemic, as a global disaster, necessitated not only socio-economic but also cultural transformation. While effective vaccines were developed under a successful new methodology, there remains inequity of distribution of these vaccines globally. The book re-engages with the notion of the primacy of distributing results of scientific innovation to those who most require the benefits.

Sustainability Management in Heritage and Tourism Takamitsu

Jimura, 2023-11-07 Increasingly, the tourism industry is looking

towards sustainability, responding to public demand and local environmental policy. This monograph explores the concept of sustainability in the context of heritage and tourism studies, as well as examining the practices adopted to realize or enhance the sustainability of these industries. Beginning with a broad overview, outlining the theory and scholarly landscape, this book then focuses on cases of sustainable tourism in Japan, exploring the concept of 'mottainai'. Mottainai is a traditional Japanese term and means an ethical attitude towards the use of a range of resources needed for human life. This Japanese word can be understood as 'what a waste', and can promote the environmentally-friendly way of life, encouraging reduce, reuse and recycle. This book will be of interest to scholars and students of heritage, tourism, and sustainability management; both those interested in Japan specifically, and those who are interested in new approaches for sustainability in tourism management.

The Sociopolitics of English Language Testing Seyyed-Abdolhamid Mirhosseini, Peter De Costa, 2020-02-20 Highlighting marginalized but significant perspectives about the sociopolitical essence of English language tests and testing processes worldwide, this book explores the social considerations of testing

theories and practices from a critical perspective. Investigating concerns surrounding power inequalities, *The Sociopolitics of English Language Testing* takes a socially-situated view of language assessment, bringing sociopolitical understandings of language teaching, learning, and assessment to the forefront in the field. Within the broader discussion of the politics of test use, an international team of language and education experts address the issues of ideology, diversity, power, and dominance in English language testing. Through socially-sensitive theoretical as well as empirical discussion and investigation of English language testing, this book offers valuable insights, not only to applied linguists and the language education community who have focused on positivistic and cognitively-oriented conceptions of language testing, but to anyone who wishes to venture beyond the traditional bounds of the field.

The Post-pandemic Landscape of Education and Beyond:

Innovation and Transformation Anna Wing Bo TSO, Steven Kwan

Keung NG, Locky Law, Tiffany Shurui BAI, 2023-02-01

With the purpose of exploring the critical possibilities offered by the global crisis of coronavirus pandemic, this volume presents the collected works of scholars, educators and practitioners worldwide, bringing

to the readers a broad array of perspectives on how COVID-19 inspires us to rethink, redefine, and make sense of the theoretical and pedagogical approaches that can be applied in various educational contexts. Part One of the book provides an insightful exploration of the technology-mediated innovations used in English language learning and teaching. Part Two reflects on the online learning experiences of students, as well as the teachers' strategies to cope with changes as the COVID-19 pandemic unleashed unprecedented disruptions in class. Part Three looks into a range of case studies regarding the digital divide, cross-border schooling, cyberbullying, and cross-disciplinary skill training in the post-pandemic workplace, highlighting the importance of creating a positive learning environment. Part Four draws on the observations and experiences of frontline teachers, to examine ways to optimize the digital learning experiences of students in and outside the classroom. This volume will be a useful reference for scholars in Education, Communication, Applied Linguistics, Social Work, and Positive Psychology.

Judaic Technologies of the Word Gabriel Levy, 2014-10-14

Judaic Technologies of the Word argues that Judaism does not exist in an abstract space of reflection. Rather, it exists both in artifacts of the material world - such as texts - and in the bodies, brains, hearts, and minds of individual people. More than this, Judaic bodies and texts, both oral and written, connect and feed back on one another. *Judaic Technologies of the Word* examines how technologies of literacy interact with bodies and minds over time. The emergence of literacy is now understood to be a decisive factor in religious history, and is central to the transformations that took place in the ancient Near East in the first millennium BCE. This study employs insights from the cognitive sciences to pursue

a deep history of Judaism, one in which the distinctions between biology and culture begin to disappear.
