Catholics and Everyday Life in Macau Chen Hon-Fai,2017-03-16 Catholicism has had an important place in Macau since the earliest days of Portuguese colonization in the sixteenth century. This book, based on extensive original research including in-depth interviews, examines in detail the everyday life of Catholics in Macau at present. It outlines the tremendous societal pressures which Macau is currently undergoing – sovereignty handover and its consequences, the growth of casinos and tourism and the transformation of a serene and somewhat obscure colony into a vibrantly developing city. It shows how, although the formal structures of Catholicism no longer share in rule by the colonial power, and although formal religious observance is declining, nevertheless the personal piety and ethical religious outlook of individual Catholics continue to be strong, and have a huge, and possibly increasing, impact on public life through the application of personal religious ethics to issues of human rights and social justice and in the fields of education and social services.

Contemporary Queer Chinese Art Hongwei Bao,Diyi Mergenthaler,Jamie J. Zhao,2023-06-15 Contemporary Queer Chinese Art is the first English-language academic book that explores the intersections of queer culture and contemporary Chinese art from the mid-1980s to the present. This book brings together 15 internationally renowned artists, activists, curators and scholars to explore heterogeneous expressions of Chineseness and queerness in contemporary art from China and Chinese diasporas in Asia, Europe and North America. Examining contemporary visual art, performance and activism, this book offers a rich archive of queer Chinese artistic expressions. It provides valuable insights into the status quo and intersectional struggles of Chinese artists who identify themselves as queer and who have associated their work with queer positionalities and perspectives. By sharing personal experiences, art expressions and critical insights about what it means to be queer and Chinese in a transnational context, the book reveals multiple forms and potentialities of queer politics in the domains of art and activism.

Fundamentals of Cryptography Duncan Buell,2021-07-17 Cryptography, as done in this century, is heavily mathematical. But it also has roots in what is computationally feasible. This unique textbook text balances the theorems of mathematics against the feasibility of computation. Cryptography is something one actually “does”, not a mathematical game one proves theorems about. There is deep math; there are some theorems that must be proved; and there is a need to recognize the brilliant work done by those who focus on theory. But at the level of an undergraduate course, the emphasis should be first on knowing and understanding the algorithms and how to implement them, and also to be aware that the algorithms must be implemented carefully to avoid the “easy” ways to break the cryptography. This text covers the algorithmic foundations and is complemented by core mathematics and arithmetic.

Judaic Technologies of the Word Gabriel Levy,2014-10-14 Judaic Technologies of the Word argues that Judaism does not exist in an abstract space of reflection. Rather, it exists both in artifacts of the material world - such as texts - and in the bodies, brains, hearts, and minds of individual people. More than this, Judaic bodies and texts, both oral and written, connect and feed back on one another. Judaic Technologies of the Word examines how technologies of literacy interact with bodies and minds over time. The emergence of literacy is now understood to be a decisive factor in religious history, and is central to the transformations that took place in the ancient Near East in the first millennium BCE. This study employs insights from the cognitive sciences to pursue a deep history of Judaism, one in which the distinctions between biology and culture begin to disappear.
