Linking Language, Trade and Migration Ruriko Otomo,2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan’s Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan’s social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

Sounds, Ecologies, Musics Aaron S. Allen,Associate Professor of Musicology Aaron S Allen,Jeff Todd Titon,2023-08-23 Sounds, Ecologies, Musics poses exciting challenges and provides fresh opportunities for scholars, scientists, environmental activists, musicians, and listeners to consider music and sound from ecological standpoints. Authors in Part I examine the natural and built environment and how music and sound are woven into it, how the environment enables music and sound, and how the natural and cultural production of music and sound in turn impact the environment. In Part II, contributors consider music and sound in relation to ecological knowledges that appear to conflict with, yet may be viewed as complementary to, Western science: traditional and Indigenous ecological and environmental knowledges. Part III features multidisciplinary and interdisciplinary approaches by scholars, scientists, and practitioners who probe the ecological imaginary regarding the complex ideas and contested keywords that characterize ecomusicology: sound, music, culture, society, environment, and nature. A common theme across the book is the idea of diverse ecologies. Once confined to the natural sciences, the word ecology is common today in the social sciences, humanities, and arts – yet its diverse uses have become imprecise and confusing. Engaging the conflicting and complementary meanings of ecology requires embracing a both/and approach. Diverse ecologies are illustrated in the methodological, terminological, and topical variety of the chapters as well as the contributors' choice of sources and their disciplinary backgrounds. In times of mounting human and planetary crises, Sounds, Ecologies, Musics challenges disciplinarity and broadens the interdisciplinary field of ecomusicologies. These theoretical and practical studies expand sonic, scholarly, and political activism from the diversity-equity-inclusion agenda of social justice to embrace the more diverse and inclusive agenda of ecocentric ecojustice.

The Sociopolitics of English Language Testing Seyyed-Abdolhamid Mirhosseini,Peter De Costa,2020-02-20 Highlighting marginalized but significant perspectives about the sociopolitical essence of English language tests and testing processes worldwide, this book explores the social considerations of testing theories and practices from a critical perspective. Investigating concerns surrounding power inequalities, The Sociopolitics of English Language Testing takes a socially-situated view of language assessment, bringing sociopolitical understandings of language teaching, learning, and assessment to the forefront in the field. Within the broader discussion of the politics of test use, an international team of language and education experts address the issues of ideology, diversity, power, and dominance in English language testing. Through socially-sensitive theoretical as well as empirical discussion and investigation of English language testing, this book offers valuable insights, not only to applied linguists and the language education community who have focused on positivistic and cognitively-oriented conceptions of language testing, but to anyone who wishes to venture beyond the traditional bounds of the field.
