Linking Language, Trade and Migration Ruriko Otomo, 2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan's Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan's social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

Contemporary Queer Chinese Art Hongwei Bao, Diyi Mergenthaler, Jamie J. Zhao, 2023-06-15 Contemporary Queer Chinese Art is the first English-language academic book that explores the intersections of queer culture and contemporary Chinese art from the mid-1980s to the present. This book brings together 15 internationally renowned artists, activists, curators and scholars to explore heterogeneous expressions of Chineseness and queerness in contemporary art from China and Chinese diasporas in Asia, Europe and North America. Examining contemporary visual art, performance and activism, this book offers a rich archive of queer Chinese artistic expressions. It provides valuable insights into the status quo and intersectional struggles of Chinese artists who identify themselves as queer and who have associated their work with queer positionalities and perspectives. By sharing personal experiences, art expressions and critical insights about what it means to be queer and Chinese in a transnational context, the book reveals multiple forms and potentialities of queer politics in the domains of art and activism.

Facts and Analysis: Canvassing COVID-19 Responses Linda Chelan Li, 2021-03-01 It is impossible to reflect on 2020 without discussing Covid-19. The term, literally meaning corona- (CO) virus (VI) disease (D) of 2019, has become synonymous with "the virus", "corona" and "the pandemic". The impact of the virus on our lives is unprecedented in modern human history, in terms of scale, depth and resilience. When compared to other epidemics that have plagued the world in recent decades, Covid-19 is often referred to as being much more "deadly" and is associated with advances in technology which scientists have described as "revolutionary". From politics to economics, spanning families and continents, Covid-19 has unsettled norms: cultural clashes are intensified, politics are even more polarized, and regional tensions and conflicts are on the rise. Global trade patterns and supply chains are increasingly being questioned and redrawn. The world is being atomized, and individuals are forced to accept the "new normal" in their routines. In an attempt to combat the virus and minimize its detrimental effects, countries have undertaken different preventive strategies and containment policies. Some have successfully curbed the spread of Covid-19, while many others remain in limbo, doing their best to respond to outbreaks in cases. To gain a better understanding of how to fight Covid-19, it is imperative to evaluate the success and failures of these approaches. Under what conditions is an approach successful? When should it be avoided? How can this information be used to avoid future pandemics? This volume offers informative comparative case studies that shed light on these key questions. Each country case is perceptively analyzed and includes a detailed timeline, allowing readers to view each response with hindsight and extrapolate the data to better understand what the future holds. Taken as a whole, this collection offers invaluable insight at this critical juncture in the Covid-19 pandemic. "In the 'post-truth' era, such careful documentation of the facts is especially welcome." Dr Tania Burchardt Associate Professor, Department of Social Policy London School of Economics and Political Science "The end is not yet in sight for the pandemic but in these pages the key factors in its development and some possible solutions for the future are laid out in ways that make it indispensable reading." Prof David S. G. Goodman Professor of China Studies and former Vice President, Academic Xi'an Jiaotong-Liverpool University, Suzhou "This book is an important and groundbreaking effort by social scientists to understand on how states have been managing the crisis." Kevin Hewison Weldon E. Thornton Distinguished Emeritus Professor University of North Carolina at Chapel Hill "This is exactly the kind of research that will contribute to our fight against Covid-19." Tak-Wing Ngo University of Macau "A well-researched book on Covid-19 highlighting the value of the meticulous fact-based groundwork by an international team." #MeToo and Cyber Activism in China Li Ma, 2021-11-16 This book focusses on the #MeToo movement in China, critically examining how three competing ideologies have worked in co-opting #MeToo activism: China's official communism, Western neoliberalism, and an emerging Chinese cyber-feminism. In 2018, China's #MeToo cyber activism initially maintained its momentum despite strict censorship, presenting women's voices against gendered violence and revealing scripts of power in different sectors of society. Eventually though it lost impetus with sloganization and stigmatization under a trio forces of pressures: corporate corruption, over-politicization by Western media and continued state censorship. The book documents the social events and gendered norms in higher education, NGOs, business and religious circles that preceded and followed high-profile cases of alleged sexual abuses in mainland China, engaging with sociological scholarship relating to demoralization and power, media studies and gender studies. Through these entwined theories the author seeks to give both scholars and the general audience in gender studies a window into the ongoing tension in the power spheres of state, market and gendered hierarchy in contemporary Chinese society. This book will be of interest to students of gender studies, China studies, media studies, and cultural Studies

Catholics and Everyday Life in Macau Chen Hon-Fai, 2017-03-16 Catholicism has had an important place in Macau since the earliest days of Portuguese colonization in the sixteenth century. This book, based on extensive original research including in-depth interviews, examines in detail the everyday life of Catholics in Macau at present. It outlines the tremendous societal pressures which Macau is currently undergoing – sovereignty handover and its consequences, the growth of casinos and tourism and the transformation of a serene and somewhat obscure colony into a vibrantly developing city. It shows how, although the formal structures of Catholicism no longer share in rule by the colonial power, and although formal religious observance is declining, nevertheless the personal piety and ethical religious outlook of individual Catholics continue to be strong, and have a huge, and possibly increasing, impact on public life through the application of personal religious ethics to issues of human rights and social justice and in the fields of education and social services.

Xi Jinping Willy Lam, 2023-08-11 This book examines the policy, ideology and politics of Xi Jinping, State President and General Secretary of the Chinese Communist Party (CCP) and China's "ruler for life." Through comparisons with former CCP leaders, including Deng Xiaoping, it assesses whether, having abandoned many of the key precepts of the Era of Reform and the Open Door, the conservative supreme leader's restitution of Maoist standards might enable China to sustain economic growth and project hard and soft power worldwide. The book also examines whether the Communist Party will succeed in retaining the support of 1.4 billion Chinese in the face of unprecedented challenges in the economic and geopolitical arenas. It also provides a comprehensive picture of Xi's rise to power; his AI-assisted and "legalistic" surveillance and control mechanisms; China's evolving economic system; Xi's foreign and national-security policies and the implications of the 20th Party Congress of October 2022 from both domestic and foreign perspectives. Being among the first books in English on the ambitious and multi-faceted agendas that Xi has laid out taking China up to the early 2040s, this will be an invaluable resource for students and scholars of Chinese studies, China-US relations, East Asian politics and Contemporary Asian history.

The National Security Law of Hong Kong Hualing Fu, Michael Hor, 2022-07-12 The Law of the People's Republic of China on Safeguarding National Security in the Hong Kong SAR (the 'NSL') promises to be the most important legal development in Hong Kong since the advent of the Basic Law. Many wondered in the aftermath of the NSL how the foundations of Hong Kong's system might be changed and in what way the freedoms valued by Hong Kong may be affected. Supporters view the law as essential for the preservation of public order and the national security of China and to support the fundamental well-being of "One Country, Two Systems", an arrangement that has been in place since the return of Hong Kong to China. Critics fear an adverse impact on the spirit of "One Country, Two Systems". From a discussion initiated by the University of Hong Kong's Faculty of Law, this collection of essays brings together leading experts on Hong Kong and Chinese law to offer an exploratory study of the NSL and its impact on the

legal system and the principle of the rule of law in Hong Kong. The book examines the ramifications of the law in relation to constitutional matters, protecting national security and sustaining “One Country, Two Systems”, policing, judicial independence, and extraterritoriality, as well as its wider implications in areas such as academic freedom and the business environment. It explores the interaction between Hong Kong and Chinese law occasioned by the NSL. Finally, the book offers a comparative perspective of the experience of other jurisdictions that have engaged with similar security legislation. “This collection addresses an important and timely issue, and provides an invaluable resource for all lawyers interested in Hong Kong as they grapple with the momentous changes in its legal landscape. The collection will surely serve as a reference point for further discussion and debate.” —Victor V. Ramraj, University of Victoria, Canada “This book covers the most important aspects of national security issues, including freedom and security that we have always been concerned about. This timely publication not only offers the latest research results for the academic community, but also provides important reference materials for the Hong Kong society to understand the important topics of national security.” —Zhu Guobin, City University of Hong Kong

Dreadful Desires Charlie Yi Zhang,2022-02-07 In *Dreadful Desires* Charlie Yi Zhang examines how the Chinese state deploys affective notions of love to regulate the population and secure China’s place in the global economy. Zhang shows how the state frames love as a set of desires that encompass heteronormative intimacy, familial and communal attachment, upward mobility, and private property ownership. These desires—as circulated in performance in the nationalistic ceremony, same-sex romantic fan fiction, the wildly popular reality television dating show *If You Are the One*, and the cult of patriarchal personality around Xi Jinping—are explicitly based in oppressive systems of gender, class, and sexuality. Zhang contends that such desires connect love to economic survival and gender normativity in ways that underwrite Chinese neoliberalism at the expense of individual flourishing. By outlining how state-framed forms of love create desires that cannot be fulfilled, Zhang places China at the forefront of using affective attachments to nation, leader, and family in the global shifts toward exploitation and authoritarianism.

The Design of Rijndael Joan Daemen,Vincent Rijmen,2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.

Cryptographic Hardware and Embedded Systems -- CHES 2012 Emmanuel Prouff,Patrick R. Schaumont,2012-09-05 This book constitutes the proceedings of the 14th International Workshop on Cryptographic Hardware and Embedded Systems, CHES 2012, held in Leuven, Belgium, in September 2012. The 32 papers presented together with 1 invited talk were carefully reviewed and selected from 120 submissions. The papers are organized in the following topical sections: intrusive attacks and countermeasures; masking; improved fault attacks and side channel analysis; leakage resiliency and security analysis; physically unclonable functions; efficient implementations; lightweight cryptography; we still love RSA; and hardware implementations.

Judaic Technologies of the Word Gabriel Levy,2014-10-14 *Judaic Technologies of the Word* argues that Judaism does not exist in an abstract space of reflection. Rather, it exists both in artifacts of the material world - such as texts - and in the bodies, brains, hearts, and minds of individual people. More than this, Judaic bodies and texts, both oral and written, connect and feed back on one another. *Judaic Technologies of the Word* examines how technologies of literacy interact with bodies and minds over time. The emergence of literacy is now understood to be a decisive factor in religious history, and is central to the transformations that took place in the ancient Near East in the first millennium BCE. This study employs insights from the cognitive sciences to pursue a deep history of Judaism, one in which the distinctions between biology and culture begin to disappear.

Cryptology Richard E. Klima,Neil P. Sigmon,2012-06-20 Easily Accessible to Students with Nontechnical Backgrounds In a clear, nontechnical manner, *Cryptology: Classical and Modern with Maplets* explains how fundamental mathematical concepts are the bases of cryptographic algorithms. Designed for students with no background in college-level mathematics, the book assumes minimal mathematical prerequisites and incorporates student-friendly Maplets throughout that provide practical examples of the techniques used. Technology Resource By using the Maplets, students can complete complicated tasks with relative ease. They can encrypt, decrypt, and cryptanalyze messages without the burden of understanding programming or computer syntax. The authors explain topics in detail first before introducing one or more Maplets. All Maplet material and exercises are given in separate, clearly labeled sections. Instructors can omit the Maplet sections without any loss of continuity and non-Maplet examples and exercises can be completed with, at most, a simple hand-held calculator. The Maplets are available for download at www.radford.edu/~npsigmon/cryptobook.html. A Gentle, Hands-On Introduction to Cryptology After introducing elementary methods and techniques, the text fully develops the Enigma cipher machine and Navajo code used during World War II, both of which are rarely found in cryptology textbooks. The authors then demonstrate mathematics in cryptology through monoalphabetic, polyalphabetic, and block ciphers. With a focus on public-key cryptography, the book describes RSA ciphers, the Diffie–Hellman key exchange, and ElGamal ciphers. It also explores current U.S. federal cryptographic standards, such as the AES, and explains how to authenticate messages via digital signatures, hash functions, and certificates.

Comparative Studies on Pandemic Control Policies and the Resilience of Society Simon X. B. Zhao,Kam Tong Chan,Selçuk Çolakoğlu,Qiaoyun Zhang,Bo Yan,2023-03-29 This book documents and analyses the differentiated control policies, the determinant factors behind, social resilience, and international relations during the pandemic from a comparative perspective in a facts-based, data-supporting manner. The intermittent outbreak of cases, public sentiments after long anxiety, questions over the efficacy of vaccines, have forced governments as well as the public to rethink differing approaches and policies in the combat against not just COVID, but the delta variant. In this context, this book establishes itself as a timely product, perhaps the first of its kind, to provide a widely covered individual country-based observation of policies, with an emphasis on multidimensional

determinant factors behind the policies. A comparative study of social resilience during the pandemic constitutes another highlight of the book. The different policies tested social resilience differently in parameters such as mortality rates, vaccination coverage, social mobility, travel arrangements, trust in government, and general human development. Above and beyond observations and analyses at local and national levels, this book expands its scope to incorporate international relations, contemplating over the impacts of the pandemic on international relations, power shifts, and new world/global orders, crystallized in the indisputable rise of China.

Fundamentals of Cryptography Duncan Buell,2021-07-17 Cryptography, as done in this century, is heavily mathematical. But it also has roots in what is computationally feasible. This unique textbook text balances the theorems of mathematics against the feasibility of computation. Cryptography is something one actually “does”, not a mathematical game one proves theorems about. There is deep math; there are some theorems that must be proved; and there is a need to recognize the brilliant work done by those who focus on theory. But at the level of an undergraduate course, the emphasis should be first on knowing and understanding the algorithms and how to implement them, and also to be aware that the algorithms must be implemented carefully to avoid the “easy” ways to break the cryptography. This text covers the algorithmic foundations and is complemented by core mathematics and arithmetic.
