*China's High-tech Companies: Case Studies Of China And Hong Kong Special Administrative Region (Sar)* Tai Wei Lim,2023-10-12 China is now considered a tech superpower in many areas. This book illustrates certain aspects and case studies of China's technological developments and further analyzes them under various areas like coal energy, housing, connectivity, digital and space technologies. Furthermore, it examines technological developments in the periphery of China, focusing especially on Hong Kong Special Administrative Region (HKSAR). This book does not pretend to be comprehensive in its coverage albeit surveys a spectrum of sectors in China and Hong Kong to get an idea of their developments. By peering into China through the mainland continental perspective and also looking into China from its periphery (e.g., 'Greater China' perspectives from HKSAR), this book provides readers with the broad contours of technological development in China through a multidisciplinary area studies perspective.

*The Art of Anti-Exclusion* Felicia Low, 2018-06-28 The Art of Anti-Exclusion: A collection of writings by Asian artists working with communities, brings together the writings of 8 artists and one researcher who document various arts forms carried out with communities in Asia. Written in collaboration with June Goh, Syed Ibrahim, Alecia Neo, Akemi Minamida, Makoto Nomura, Ming Poon, Ashwini Raghupathy, Vincent Rumahloine and Bellini Yu, these projects span the fields of drama, dance, music and art. They also span across various types of communities who reside under specific contexts in their particular countries. These include transgendered persons in India, those with special needs in Hong Kong, rural communities in Japan, squatter communities in Indonesia, HIV positive persons and the elderly in Singapore.

*China in the Era of Xi Jinping* Robert S. Ross, Jo Inge Bekkevold, 2016 Since becoming president of China and general secretary of the Chinese Communist Party, Xi Jinping has emerged as China's most powerful and popular leader since Deng Xiaoping. The breathtaking economic expansion and military modernization that Xi inherited has convinced him that China can transform into a twenty-first-century superpower. In this collection, leading scholars from the United States, Asia, and Europe examine both the prospects for China's continuing rise and the emergent and unintended consequences posed by China's internal instability and international assertiveness. Contributors examine domestic challenges surrounding slowed economic growth, Xi's anti-corruption campaign, and government efforts to maintain social stability. Essays on foreign policy range from the impact of nationalist pressures on international relations to China's heavy-handed actions in the South China Sea that challenge regional stability and US-China cooperation. The result is a comprehensive analysis of current policy trends in Xi's China and the implications of these developments for his nation, the United States, and Asia-Pacific.

*Xi Jinping* Willy Lam, 2023-08-11 This book examines the policy, ideology and politics of Xi Jinping, State President and General Secretary of the Chinese Communist Party (CCP) and China's "ruler for life." Through comparisons with former CCP leaders, including Deng Xiaoping, it assesses whether, having abandoned many of the key precepts of the Era of Reform and the Open Door, the conservative supreme leader's restitution of Maoist standards might enable China to sustain economic growth and project hard and soft power worldwide. The book also examines whether the Communist Party will succeed in retaining the support of 1.4 billion Chinese in the face of unprecedented challenges in the economic and geopolitical arenas. It also provides a comprehensive picture of Xi's rise to power; his AI-assisted and "legalistic" surveillance and control mechanisms; China's evolving economic system; Xi's foreign and national-security policies and the implications of the 20th Party Congress of October 2022 from both domestic and foreign perspectives. Being among the first books in English on the ambitious and multi-faceted agendas that Xi has laid out taking China up to the early 2040s, this will be an invaluable resource for students and scholars of Chinese studies, China-US relations, East Asian politics and Contemporary Asian history.

*Records of the Transmission of the Lamp* Daoyuan, 2015-11-30 This compilation of Buddhist biographies, teaching and transmission stories of Indian and Chinese Chan (Japanese 'Zen') masters from antiquity up to about the year 1008 CE is the first mature fruit of an already thousand year-long spiritual marriage between two great world cultures with quite different ways of viewing the world. The fertilisation of Chinese spirituality by Indian Buddhism fructified the whole of Asian culture. The message of this work, that Chan practice can enable a free participation in life's open-ended play, seems as necessary to our own time as it was to the restless times of 11th century Song China. This is the second volume of a full translation of this work in thirty books.

**Land and Housing Controversies in Hong Kong** Betty Yung, Kam-Por Yu, 2020-07-16 This book discusses land and housing controversies in Hong Kong, which offer a point of reference for the

comparison and analysis of similar or contrasting cases overseas from the perspective of social values. It enhances readers' understanding of the social values, philosophical and theoretical issues that underpin land and housing controversies, as well as their policy implications. The discussion in each chapter goes beyond mere substantive and contextual analysis, and is explicitly positioned and theorized within the broader context of social values, with a theoretical and philosophical framework for assessing the issue concerned. The book is interdisciplinary in nature, with each chapter integrating two or more disciplines to examine various controversial land and housing issues.

Facts and Analysis: Canvassing COVID-19 Responses Linda Chelan Li, 2021-03-01 It is impossible to reflect on 2020 without discussing Covid-19. The term, literally meaning corona- (CO) virus (VI) disease (D) of 2019, has become synonymous with "the virus", "corona" and "the pandemic". The impact of the virus on our lives is unprecedented in modern human history, in terms of scale, depth and resilience. When compared to other epidemics that have plagued the world in recent decades, Covid-19 is often referred to as being much more "deadly" and is associated with advances in technology which scientists have described as "revolutionary". From politics to economics, spanning families and continents, Covid-19 has unsettled norms: cultural clashes are intensified, politics are even more polarized, and regional tensions and conflicts are on the rise. Global trade patterns and supply chains are increasingly being questioned and redrawn. The world is being atomized, and individuals are forced to accept the "new normal" in their routines. In an attempt to combat the virus and minimize its detrimental effects, countries have undertaken different preventive strategies and containment policies. Some have successfully curbed the spread of Covid-19, while many others remain in limbo, doing their best to respond to outbreaks in cases. To gain a better understanding of how to fight Covid-19, it is imperative to evaluate the success and failures of these approaches. Under what conditions is an approach successful? When should it be avoided? How can this information be used to avoid future pandemics? This volume offers informative comparative case studies that shed light on these key questions. Each country case is perceptively analyzed and includes a detailed timeline, allowing readers to view each response with hindsight and extrapolate the data to better understand what the future holds. Taken as a whole, this collection offers invaluable insight at this critical juncture in the Covid-19 pandemic. "In the 'post-truth' era, such careful documentation of the facts is especially welcome." Dr Tania Burchardt Associate Professor, Department of Social Policy London School of Economics and Political Science "The end is not yet in sight for the pandemic but in these pages the key factors in its development and some possible solutions for the future are laid out in ways that make it indispensable reading." Prof David S. G. Goodman Professor of China Studies and former Vice President, Academic Xi'an Jiaotong-Liverpool University, Suzhou "This book is an important and groundbreaking effort by social scientists to understand on how states have been managing the crisis." Kevin Hewison Weldon E. Thornton Distinguished Emeritus Professor University of North Carolina at Chapel Hill "This is exactly the kind of research that will contribute to our fight against Covid-19." Tak-Wing Ngo University of Macau "A well-researched book on Covid-19 highlighting the value of the meticulous fact-based groundwork by an international team." **Business, Economic and Financial Issues in Emerging Markets and Advanced Economies after the COVID-19 Crisis** Giray Gozgor, Chi Lau, 2023-11-22 This Research Topic is Volume 2 in the Research Topic series 'Economic and Financial Issues in the Post-COVID-19 World: Implications and Role of Public Health'. Both developed and developing economies have experienced significant risks and uncertainties due to the COVID-19 pandemic. There are still risks and uncertainty shocks of the COVID-19 in every aspect of the global economic and financial system, including investors' decisions and the financial sector's development. In this Research Topic, we aim to understand the dynamics of business, economic, and financial issues - including potential structural changes after the COVID-19 in emerging markets and advanced economies. This Research Topic's main goal is to provide different aspects and consequences of economic and financial issues in

emerging markets and advanced economies after the COVID-19 pandemic. In particular, we welcome interdisciplinary, empirical, and theoretical papers (panel data studies, survey studies, and time-series analyses) focusing on the business, economic, and financial issues after the COVID-19 crisis. We also welcome policy briefs of people working at central banks, governments, and other public institutions, focusing on these issues.

**Linking Language, Trade and Migration** Ruriko Otomo, 2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan's Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan's social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

Covering the 2019 Hong Kong Protests Luwei Rose Luqiu, 2021-09-11 This book explores the impact of governmental, institutional, and individual factors on journalists covering protests, using the 2019 Hong Kong Anti-Extradition Bill Movement as a case study. The discussion surveys the challenges frontline journalists have faced while covering protests that unfolded in complex and rapidly evolving geopolitical contexts and media ecologies. Complementing this is an analysis of the Chinese government's efforts to suppress social movements by curtailing press freedom to silence criticism of the government and keep information about the protest efforts from the public. Separate chapters explore these issues from the perspectives of the citizen journalists, student journalists, and independent journalists who have played key roles in the most recent social movements in Hong Kong. It concludes with a look at the future of press freedom in the city after the passage of the National Security Law.

*#MeToo and Cyber Activism in China* Li Ma, 2021-11-16 This book focusses on the #MeToo movement in China, critically examining how three competing ideologies have worked in co-opting #MeToo activism: China's official communism, Western neoliberalism, and an emerging Chinese cyber-feminism. In 2018, China's #MeToo cyber activism initially maintained its momentum despite strict censorship, presenting women's voices against gendered violence and revealing scripts of power in different sectors of society. Eventually though it lost impetus with sloganization and stigmatization under a trio forces of pressures: corporate corruption, over-politicization by Western media and continued state censorship. The book documents the social events and gendered norms in higher education, NGOs, business and religious circles that preceded and followed high-profile cases of alleged sexual abuses in mainland China, engaging with sociological scholarship relating to demoralization and power, media studies and gender studies. Through these entwined theories the author seeks to give both scholars and the general audience in gender studies a window into the ongoing tension in the power spheres of state, market and gendered hierarchy in contemporary Chinese society. This book will be of interest to students of gender studies, China studies, media studies, and cultural Studies

*Innovation Ecosystems* António Abreu, 2021-09-01 To be competitive, companies must develop capabilities that allow them to react rapidly to market demands. The innovation methods of the past are not adapted to the turbulence of the modern world. In the last decade, increasing globalization of markets and Industry 4.0 have caused profound changes in the best way to manage the innovation process. This book includes a collection of thirteen papers that discuss theoretical approaches, case

studies, and surveys focused on issues related to open innovation and its mechanisms.

**Legitimacy of China's Counter-Terrorism Approach** Chi Zhang, 2022-09-12 This book examines how the Chinese Communist Party (CCP) has sought to legitimise its counter-terrorism strategy in the eyes of its domestic and international audiences. An important element of CCP policy in Xinjiang has been the deployment of ordinary Chinese citizens, or the 'mass line,' to create new realities on the ground. This book explores how the history of ideological struggle in the PRC has taken on new characteristics, as well as offering insight into how the CCP has maintained legitimacy in the eyes of its population, even as it pursues policies which are internationally controversial, shedding light on the past and future of the behaviour of the Chinese state, a subject of interest to China scholars, scholars of the Belt and Road, and counter-terrorism experts.
