China's High-tech Companies: Case Studies Of China And Hong Kong Special Administrative Region (Sar) Tai Wei Lim, 2023-10-12 China is now considered a tech superpower in many areas. This book illustrates certain aspects and case studies of China's technological developments and further analyzes them under various areas like coal energy, housing, connectivity, digital and space technologies. Furthermore, it examines technological developments in the periphery of China, focusing especially on Hong Kong Special Administrative Region (HKSAR). This book does not pretend to be comprehensive in its coverage albeit surveys a spectrum of sectors in China and Hong Kong to get an idea of their developments. By peering into China through the mainland continental perspective and also looking into China from its periphery (e.g., 'Greater China' perspectives from HKSAR), this book provides readers with the broad contours of technological development in China through a multidisciplinary area studies perspective.

**Catholics and Everyday Life in Macau** Chen Hon-Fai, 2017-03-16 Catholicism has had an important place in Macau since the earliest days of Portuguese colonization in the sixteenth century. This book, based on extensive original research including in-depth interviews, examines in detail the everyday life of Catholics in Macau at present. It outlines the tremendous societal pressures which Macau is currently undergoing – sovereignty handover and its consequences, the growth of casinos and tourism and the transformation of a serene and somewhat obscure colony into a vibrantly developing city. It shows how, although the formal structures of Catholicism no longer share in rule by the colonial power, and although formal religious observance is declining, nevertheless the personal piety and ethical religious outlook of individual Catholics

continue to be strong, and have a huge, and possibly increasing, impact on public life through the application of personal religious ethics to issues of human rights and social justice and in the fields of education and social services.

**Linking Language, Trade and Migration** Ruriko Otomo, 2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan's Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan's social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

**Facts and Analysis: Canvassing COVID-19 Responses** Linda Chelan Li, 2021-03-01 It is impossible to reflect on 2020 without discussing Covid-19. The term, literally meaning corona- (CO) virus (VI) disease (D) of 2019, has become synonymous with "the virus", "corona" and "the pandemic". The impact of the virus on our lives is unprecedented in modern human history, in terms of scale, depth and resilience. When

compared to other epidemics that have plagued the world in recent decades, Covid-19 is often referred to as being much more “deadly” and is associated with advances in technology which scientists have described as “revolutionary”. From politics to economics, spanning families and continents, Covid-19 has unsettled norms: cultural clashes are intensified, politics are even more polarized, and regional tensions and conflicts are on the rise. Global trade patterns and supply chains are increasingly being questioned and redrawn. The world is being atomized, and individuals are forced to accept the “new normal” in their routines. In an attempt to combat the virus and minimize its detrimental effects, countries have undertaken different preventive strategies and containment policies. Some have successfully curbed the spread of Covid-19, while many others remain in limbo, doing their best to respond to outbreaks in cases. To gain a better understanding of how to fight Covid-19, it is imperative to evaluate the success and failures of these approaches. Under what conditions is an approach successful? When should it be avoided? How can this information be used to avoid future pandemics? This volume offers informative comparative case studies that shed light on these key questions. Each country case is perceptively analyzed and includes a detailed timeline, allowing readers to view each response with hindsight and extrapolate the data to better understand what the future holds. Taken as a whole, this collection offers invaluable insight at this critical juncture in the Covid-19 pandemic. “In the ‘post-truth’ era, such careful documentation of the facts is especially welcome.” Dr Tania Burchardt Associate Professor, Department of Social Policy London School of Economics and Political Science “The end is not yet in sight for the pandemic but in these pages the key factors in its development and some possible solutions for the future are laid out in ways that make it

indispensable reading.” Prof David S. G. Goodman Professor of China Studies and former Vice President, Academic Xi’an Jiaotong-Liverpool University, Suzhou “This book is an important and groundbreaking effort by social scientists to understand on how states have been managing the crisis.” Kevin Hewison Weldon E. Thornton Distinguished Emeritus Professor University of North Carolina at Chapel Hill “This is exactly the kind of research that will contribute to our fight against Covid-19.” Tak-Wing Ngo University of Macau “A well-researched book on Covid-19 highlighting the value of the meticulous fact-based groundwork by an international team.” Carlson Tong, GBS, JP Former Chairman, Securities and Futures Commission, Hong Kong Chairman, University Grants Committee, Hong Kong

**The Evolving Landscape of Media and Communication in Hong Kong** Yu Huang ,Yunya Song ,2019

Over the last twenty years Hong Kong society has witnessed dramatic change, and nowhere is this better reflected than in the realm of media and communications. Across the fields of journalism, public relations and advertising, we can see the changing trends in terms of audience consumption and interaction. From technological developments to the shift in audience participation, the expectations and functions of these professions have been greatly altered. While many of these changes are occurring worldwide, within Hong Kong the processes of change have been further complicated by recent social and political events. Through a selection of essays by field experts, this volume explores the evolution of media itself as well as the complex causes underlying these developments. It identifies not only the difficulties and opportunities for media professionals today, but also the evolving role of the audience.

*The Design of Rijndael* Joan Daemen, Vincent Rijmen, 2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.

**Maritime Gray Zone Operations** Andrew S Erickson, 2022-10-21 This book addresses the issues raised by Chinese and North Korean maritime ‘gray zone’ activities in the Indo-Asia-Pacific region. For years, China has been harassing its neighbors in South China Sea and East China Sea, employing both coast guard and maritime militia forces, in the name of safeguarding Chinese sovereignty. This behavior is frequently characterized as constituting ‘gray zone’ activity. As the term suggests, this refers to a state of conflict that falls between peace and war. Interestingly, the Yellow Sea, which is geographically much closer to China than South China Sea or East China Sea, has been comparatively quiet. However, there is a danger that the PRC has the capability to replicate its gray zone activities in this area. Worse, North Korea has also been engaging in carefully-calibrated provocations there. This book addresses pressing questions about these activities and offers: (1) a conceptual framework to understand maritime gray zone operations and Beijing and Pyongyang’s approach, with an unprecedented focus on the Yellow Sea; (2) a comprehensive, fully

updated fleet force structure for the PRC's Coast Guard, together with projections regarding how the Coast Guard is likely to develop in the future; (3) an extensive organizational analysis of the PRC's Maritime Militia that surveys the many units relevant to Yellow Sea operations, some revealed publicly for the first time; and (4) a detailed assessment of North Korean maritime 'gray zone' activities. This book will be of great interest to students of naval strategy, maritime security, Asian politics, and international security.

**#MeToo and Cyber Activism in China** Li Ma, 2021-11-16 This book focusses on the #MeToo movement in China, critically examining how three competing ideologies have worked in co-opting #MeToo activism: China's official communism, Western neoliberalism, and an emerging Chinese cyber-feminism. In 2018, China's #MeToo cyber activism initially maintained its momentum despite strict censorship, presenting women's voices against gendered violence and revealing scripts of power in different sectors of society. Eventually though it lost impetus with sloganization and stigmatization under a trio forces of pressures: corporate corruption, over-politicization by Western media and continued state censorship. The book documents the social events and gendered norms in higher education, NGOs, business and religious circles that preceded and followed high-profile cases of alleged sexual abuses in mainland China, engaging with sociological scholarship relating to demoralization and power, media studies and gender studies. Through these entwined theories the author seeks to give both scholars and the general audience in gender studies a window into the ongoing tension in the power spheres of state, market and gendered hierarchy in contemporary Chinese society. This book will be of interest to students of gender studies, China studies, media studies, and cultural Studies

China's Socialist Rule of Law Reforms Under Xi Jinping John Garrick, Yan Chang Bennett, 2016-01-29

Under the direction of the Communist Party of China (CPC), key legal challenges have been identified which will shape the modernization of China's legal and administrative institutions. An increasingly complex set of legal actors now seek to influence this development, including securities regulators, bankers, accountants, lawyers, local-level mediators and some of China's newly rich. Whilst the rising middle class wants to voice its interests and concerns, the CPC strives to maintain its leading role. This book provides a critical appraisal of China's deepening socialist rule of law and looks ahead to the implications of the domestic reforms for the international legal domain. With contributions from leading Chinese law specialists, it draws on specific illustrations from judicial reform, constitutional law, procedural law, anti-corruption, property law and urban development, socio-economic dispute resolution and Chinese macro-economics. The book questions how China's domestic law reforms will impact international legal systems, and how international law can be used in managing key regional and bilateral relationships and in dispute resolution, such as in the South China Sea and international trade. Assessing the state and direction of domestic law reform and including debates around the legal implications of some of China's most pressing foreign policy challenges today, this volume will be of huge interest to students, scholars and practitioners with an interest in Asia law, Chinese law, international law, comparative law and law reform.

While the Chinese government has framed the plan as one promoting transnational connectivity, critics and security experts see it as part of a larger strategy to achieve global dominance. Rivers of Iron examines one aspect of President Xi Jinping's "New Era": China's effort to create an intercountry railway system connecting China and its seven Southeast Asian neighbors (Cambodia, Laos, Malaysia, Myanmar, Singapore, Thailand, and Vietnam). This book illuminates the political strengths and weaknesses of the plan, as well as the capacity of the impacted countries to resist, shape, and even take advantage of China's wide-reaching actions. **Rivers of Iron** David M. Lampton, Selina Ho, Cheng-Chwee Kuik, 2020-10-13 What China's infamous railway initiative can teach us about global dominance. In 2013, Chinese President Xi Jinping unveiled what would come to be known as the Belt and Road Initiative (BRI)—a global development strategy involving infrastructure projects and associated financing throughout the world, including Asia, Africa, the Middle East, Europe, and the Americas. While the Chinese government has framed the plan as one promoting transnational connectivity, critics and security experts see it as part of a larger strategy to achieve global dominance. Rivers of Iron examines one aspect of President Xi Jinping's "New Era": China's effort to create an intercountry railway system connecting China and its seven Southeast Asian neighbors (Cambodia, Laos, Malaysia, Myanmar, Singapore, Thailand, and Vietnam). This book illuminates the political strengths and weaknesses of the plan, as well as the capacity of the impacted countries to resist, shape, and even take advantage of China's wide-reaching actions. Using frameworks from the fields of international

relations and comparative politics, the authors of *Rivers of Iron* seek to explain how domestic politics in these eight Asian nations shaped their varying external responses and behaviors. How does China wield power using infrastructure? Do smaller states have agency? How should we understand the role of infrastructure in broader development? Does industrial policy work? And crucially, how should competing global powers respond?

Cryptology: Classical and Modern with Maplets  
 Richard E. Klima, Neil P. Sigmon  
 2012-06-20  
 Easily Accessible to Students with  
 Nontechnical Backgrounds  
 In a clear, nontechnical manner, Cryptology: Classical and Modern with Maplets  
 explains how fundamental mathematical concepts are the bases of cryptographic algorithms. Designed for  
 students with no background in college-level mathematics, the book assumes minimal mathematical  
 prerequisites and incorporates student-friendly Maplets throughout that provide practical examples of the  
 techniques used. Technology Resource By using the Maplets, students can complete complicated tasks with  
 relative ease. They can encrypt, decrypt, and cryptanalyze messages without the burden of understanding  
 programming or computer syntax. The authors explain topics in detail first before introducing one or more  
 Maplets. All Maplet material and exercises are given in separate, clearly labeled sections. Instructors can  
 omit the Maplet sections without any loss of continuity and non-Maplet examples and exercises can be  
 completed with, at most, a simple hand-held calculator. The Maplets are available for download at

[www.radford.edu/~npsigmon/cryptobook.html](http://www.radford.edu/~npsigmon/cryptobook.html). A Gentle, Hands-On Introduction to Cryptology After introducing elementary methods and techniques, the text fully develops the Enigma cipher machine and Navajo code used during World War II, both of which are rarely found in cryptology textbooks. The authors then demonstrate mathematics in cryptology through monoalphabetic, polyalphabetic, and block ciphers. With a focus on public-key cryptography, the book describes RSA ciphers, the Diffie–Hellman key exchange, and ElGamal ciphers. It also explores current U.S. federal cryptographic standards, such as the AES, and explains how to authenticate messages via digital signatures, hash functions, and certificates.
