Catholics and Everyday Life in Macau Chen Hon-Fai,2017-03-16 Catholicism has had an important place in Macau since the earliest days of Portuguese colonization in the sixteenth century. This book, based on extensive original research including in-depth interviews, examines in detail the everyday life of Catholics in Macau at present. It outlines the tremendous societal pressures which Macau is currently undergoing – sovereignty handover and its consequences, the growth of casinos and tourism and the transformation of a serene and somewhat obscure colony into a vibrantly developing city. It shows how, although the formal structures of Catholicism no longer share in rule by the colonial power, and although formal religious observance is declining, nevertheless the personal piety and ethical religious outlook of individual Catholics continue to be strong, and have a huge, and possibly increasing, impact on public life through the application of personal religious ethics to issues of human rights and social justice and in the fields of education and social services.

Linking Language, Trade and Migration Ruriko Otomo,2023-06-21 This book examines the effect of trade policy on language which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan’s Economic Partnership Agreements (EPAs) have important consequences for national language (education) policies and for discourses about language and nation. Since 2008, Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by means of pre-employment language training and the Japanese-medium licensure examinations. Through the analysis of these language management devices, this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan’s social aging and demographic change. As the EPAs are intertwined with welfare, economy, social cohesion, and international political and economic relations and competitiveness, the book presents a far more complex picture of and a richer potential of language policy.

Judaic Technologies of the Word Gabriel Levy,2014-10-14 Judaic Technologies of the Word argues that Judaism does not exist in an abstract space of reflection. Rather, it exists both in artifacts of the material world - such as texts - and in the bodies, brains, hearts, and minds of individual people. More than this, Judaic bodies and texts, both oral and written, connect and feed back on one another. Judaic Technologies of the Word examines how technologies of literacy interact with bodies and minds over time. The emergence of literacy is now understood to be a decisive factor in religious history, and is central to the transformations that took place in the ancient Near East in the first millennium BCE. This study employs insights from the cognitive sciences to pursue a deep history of Judaism, one in which the distinctions between biology and culture begin to disappear.

Facts and Analysis: Canvassing COVID-19 Responses Linda Chelan Li,2021-03-01 It is impossible to reflect on 2020 without discussing Covid-19. The term, literally meaning corona- (CO) virus (VI) disease (D) of 2019, has become synonymous with “the virus”, “corona” and “the pandemic”. The impact of the virus on our lives is unprecedented in modern human history, in terms of scale, depth and resilience. When compared to other epidemics that have plagued the world in recent decades, Covid-19 is often referred to as being much more “deadly” and is associated with advances in technology which scientists have described as “revolutionary”. From politics to economics, spanning families and continents, Covid-19 has unsettled norms: cultural clashes are intensified, politics are even more polarized, and regional tensions and conflicts are on the rise. Global trade patterns and supply chains are increasingly being questioned and redrawn. The world is being atomized, and individuals are forced to accept the “new normal” in their routines. In an attempt to combat the virus and minimize its detrimental effects, countries have undertaken different preventive strategies and containment policies. Some have successfully curbed the spread of Covid-19, while many others remain in limbo, doing their best to respond to outbreaks in cases. To gain a better understanding of how to fight Covid-19, it is imperative to evaluate the success and failures of these approaches. Under what conditions is an approach successful? When should it be avoided? How can this information be used to avoid future pandemics? This volume offers informative comparative case studies that shed light on these key questions. Each country case is perceptively analyzed and includes a detailed timeline, allowing readers to view each response with hindsight and extrapolate the data to better understand what the future holds. Taken as a whole, this collection offers invaluable insight at this critical juncture in the Covid-19 pandemic. “In the ‘post-truth’ era, such careful documentation of the facts is especially welcome.” Dr Tania Burchardt Associate Professor, Department of Social Policy London School of Economics and Political Science “The end is not yet in sight for the pandemic but in these pages the key factors in its development and some possible solutions for the future are laid out in ways that make it indispensable reading.” Prof David S. G. Goodman Professor of China Studies and former Vice President, Academic Xi’an Jiaotong-Liverpool University, Suzhou “This book is an important and groundbreaking effort by social scientists to understand on how states have been managing the crisis.” Kevin Hewison Weldon E. Thornton Distinguished Emeritus Professor University of North Carolina at Chapel Hill “This is exactly the kind of research that will contribute to our fight against Covid-19.” Tak-Wing Ngo University of Macau “A well-researched book on Covid-19 highlighting the value of the meticulous fact-based groundwork by an international team.” Carlson Tong, GBS, JP Former Chairman, Securities and Futures Commission, Hong Kong Chairman, University Grants Committee, Hong Kong

Contemporary Queer Chinese Art Hongwei Bao,Diyi Mergenthaler,Jamie J. Zhao,2023-06-15 Contemporary Queer Chinese Art is the first English-language academic book that explores the intersections of queer culture and contemporary Chinese art from the mid-1980s to the present. This book brings together 15 internationally renowned artists, activists, curators and scholars to explore heterogeneous expressions of Chineseness and queerness in contemporary art from China and Chinese diasporas in Asia, Europe and North America. Examining contemporary visual art, performance and activism, this book offers a rich archive of queer Chinese artistic expressions. It provides valuable insights into the status quo and intersectional struggles of Chinese artists who identify themselves as queer and who have associated their work with queer positionalities and perspectives. By sharing personal experiences, art expressions and critical insights about what it means to be queer and Chinese in a transnational context, the book reveals multiple forms and potentialities of queer politics in the domains of art and activism.

The Design of Rijndael Joan Daemen,Vincent Rijmen,2020-05-23 An authoritative and comprehensive guide to the Rijndael algorithm and Advanced Encryption Standard (AES). AES is expected to gradually replace the present Data Encryption Standard (DES) as the most widely applied data encryption technology. This book, written by the designers of the block cipher, presents Rijndael from scratch. The underlying mathematics and the wide trail strategy as the basic design idea are explained in detail and the basics of differential and linear cryptanalysis are reworked. Subsequent chapters review all known attacks against the Rijndael structure and deal with implementation and optimization issues. Finally, other ciphers related to Rijndael are presented.

Cryptology Richard E. Klima,Neil P. Sigmon,2012-06-20 Easily Accessible to Students with Nontechnical Backgrounds In a clear, nontechnical manner, Cryptology: Classical and Modern with Maplets explains how fundamental mathematical concepts are the bases of cryptographic algorithms. Designed for students with no background in college-level mathematics, the book assumes minimal mathematical prerequisites and incorporates student-friendly Maplets throughout that provide practical examples of the techniques used. Technology Resource By using the Maplets, students can complete complicated tasks with relative ease. They can encrypt, decrypt, and cryptanalyze messages without the burden of understanding programming or computer syntax. The authors explain topics in detail first before introducing one or more Maplets. All Maplet material and exercises are given in separate, clearly labeled sections. Instructors can omit the Maplet sections without any loss of continuity and non-Maplet examples and exercises can be completed with, at most, a simple hand-held calculator. The Maplets are available for download at www.radford.edu/~npsigmon/cryptobook.html. A Gentle, Hands-On Introduction to Cryptology After introducing elementary methods and techniques, the text fully develops the Enigma cipher machine and Navajo code used during World War II, both of which are rarely found in cryptology textbooks. The authors then demonstrate mathematics in cryptology through monoalphabetic, polyalphabetic, and block ciphers. With a focus on public-key cryptography, the book describes RSA ciphers, the Diffie–Hellman key exchange, and ElGamal ciphers. It also explores current U.S. federal cryptographic standards, such as the AES, and explains how to authenticate messages via digital signatures, hash functions, and certificates.
