OECD Reviews of Innovation Policy: Korea 2023

OECD,2023-07-31 The Miracle on the River Han catapulted Korea from developing country to a prosperous economy, driven in part by advancements in science, technology, and innovation. Being the second-highest R&D spender among OECD economies, Korea excels in key technologies, including semiconductors, 6G, and ICT infrastructure.

The North Korean Army Fyodor Tertitskiy,2022-09-27 This book focuses on the Korean People's Army (KPA) - the armed forces of North Korea - covering its history, structural organisation and lives of the soldiers and officers within its ranks. Utilising extensive Korean, English, Russian and Chinese language sources, as well as multiple interviews with people who have served in the KPA, this book provides an illuminating insight into the experience of KPA personnel. It presents fascinating and detailed examples of everyday life in the KPA, such as the systems of discipline and reprimands, the experience of women in the army, typical salaries and daily food allowances. The book also succinctly traces the history of the KPA from its foundation under the guidance of the Soviet Union and the experiences of the Korean War, through to the current iteration under Kim Jong-un. This pioneering work will be of huge interest to students and scholars of North Korea, the Cold War, Military Studies and Communism.

Competitiveness Of Nations 2, The: Government Policies And Business Strategies For Environmental, Social, And Governance (Esg) Dong-sung Cho,Hwy-chang Moon,2023-05-25 As countries around the world seek to enhance their economies while facing the challenges of climate change and income inequality, national competitiveness is an important marker of the related strengths and weaknesses that policymakers will need to address. Among the existing reports on national competitiveness and rankings, such as IMD World Competitiveness Yearbook and

WEF Global Competitiveness Report, there are sizable discrepancies in the ranking order for the same countries. As a result, confusion arises as such an outcome creates difficulties for government officials when translating these findings into real-world policies. The reality is that these discrepancies are due to the differences in logic and analytical models used by IMD and WEF. Therefore, in recognizing such problems and limitations, The Competitiveness of Nations 2 presents the IPS model as a new approach. Building on from Michael Porter's diamond model, it demonstrates a robust set of methodologies as well as offers several key policy implications for economies around the world that wish to enhance their competitiveness. The analytical tools used in this book can be further utilized for other units of analysis such as industries and individual firms. As this book provides a series of sophisticated methodologies and specific guidelines for enhancing national competitiveness, both academics and practitioners can derive useful implications. This annual book series was launched in 2021 and has included timely topics and in-depth discussion on national competitiveness. The first edition dealt with the COVID-19 global pandemic and the US-China trade war as its key focus. For this second edition, the Environmental, Social, and Governance (ESG) issue has been selected given its growing impact on strategic decision-making at both firm and country levels for sustainable competitiveness. This edition explores the development of ESG in various regions including Asia (Japan, Korea, India), Europe (Russia), Latin America (Peru), and Africa (Sub-Saharan Africa). It addresses how firms can contribute to ESG, and what governments should do to incentivize or regulate firms' engagement in its practices.

Higher Education - Reflections From the Field - Volume 3
,2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery

systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'Changing Education', 'Education in the Pandemic', 'Sustaining University Education', and 'Embracing the Future in a Global World'. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

OECD Regional Development Studies A Territorial Approach to Climate Action and Resilience OECD, 2023-12-06 Building on broader OECD work on climate, this report proposes a new OECD territorial climate indicator framework and demonstrates that the potential to mitigate greenhouse gas emissions, adapt to climate impacts and address vulnerabilities vary across different territories, by using a new OECD territorial climate indicator framework.

New Ways of Solidarity with Korean Comfort Women

Ñusta Carranza Ko, 2023-06-03 This book provides a space for victims' testimonies and memories, engages with their

experiences, reflects upon the redress movement, and evaluates policies related to Korean comfort women as victims and survivors from the international, domestic, and bilateral realms. Collectively, this edited volume aims to further diversify the scholarship on comfort women, contribute to the existing literature on social movements related to comfort women and other related studies, and, in doing so, challenge the politicization of comfort women. With this objective, the book presents scholarship from interdisciplinary fields that revisit the meaning of victims' testimonies, memories, and remembrance, social movement efforts on comfort women, and the related role of government, governance, and society by reflecting on the truths about the historical past. In so doing, it initiates new conversations among political scientists, sociologists, historians, and cultural and literary scholars. What do victims' testimonies reveal about new ways of imagining historical memory of Korean comfort women? How are memories of comfort women and their experiences remembered in social movements, literature, and cultural practices? Where is the place of comfort women's experiences in politics, diplomacy, and global affairs? These are some of the questions that guide the contributions to this edited volume, which seek to establish new ways of solidarity with comfort women.

The Oxford Handbook of Christianity and Law John Witte, Jr., Rafael Domingo, 2023 This volume tells the story of the interaction between Christianity and law-historically and today, in the traditional heartlands of Christianity and around the globe. Sixty new chapters by leading scholars provide authoritative and accessible accounts of foundational Christian teachings on law and legal thought over the past two millennia; the current interaction and contestation of law and Christianity on all continents; how Christianity shaped and was shaped by core public, private, penal, and procedural laws; various old and new forms of Christian canon law, natural law theory, and religious

freedom norms; Christian teachings on fundamental principles of law and legal order; and Christian contributions to controversial legal issues. Together, the chapters make clear that Christianity and law have had a perennial and permanent influence on each other over time and across cultures, albeit with varying levels of intensity and effectiveness. This volume defines Christianity broadly to include Catholic, Protestant, and Orthodox traditions and various denominations and schools of thought within them. It draws on Christian ideas and institutions, norms and practices, texts and titans to tell the story of Christianity's engagement with the world of law over the past two millennia. The volume also defines law broadly as the normative order of justice, power, and freedom. The chapters address natural laws of conscience, reason, and the Bible and positive laws enacted by states, churches, and voluntary associations. Several chapters focus on Christian engagement with specific types of law: canon law, family law, education law, constitutional law, criminal law, procedural law, and laws governing labor, tax, contracts, torts, property, and beyond. Other chapters take up cutting edge legal issues of racial justice, environmental care, migration, euthanasia, and (bio)technology as well as fundamental legal principles of liberty, dignity, equality, justice, equity, judgment, and solidarity.

Public Space in Transition Dahae Lee, 2022-05-31 Teheran-ro in Seoul and Mediaspree area in Berlin are pristine examples for public spaces with a history of rapid change in the context of broader political and economic transitions. Dahae Lee shows that in such a transitional context, the public sector alone is incapable to provide and manage public space. Hence, it engages private sector entities in the form of privately owned public space/s (POPS). By analysing the planning instruments used for POPS in both cases, their uniqueness as well as strengths and weaknesses are revealed. Based on the results this study offers a number of policy recommendations for cities that encounter similar

problems.

Historical Development of English Learning Motivation Research Tae-Young Kim, 2021-09-07 This book clarifies the fundamental difference between North America-based instrumental motivation and Korea (and East Asia)-specific competitive motivation by which the EFL learners' excessive competition to be admitted to famous universities and to be hired at a large-scale conglomerate is the main source of L2 motivation. It enables readers to understand that EFL-learning motivation reflects unique sociohistorical contexts grounded in a specific region or country. This book in turn necessitates the need to develop EFL motivation theory and research tradition which are firmly based on East Asian values and culture.

Survivors of War Sang-mi Lee ,2022-11-15 BOOK SUMMARY There are many ways we can look at the history of war: history books, poetry, fiction novels, paintings, photographs, and movies, to name a few. The possible approaches to the history of war are endless, but did you know that architecture is also a lens through which we can glimpse into the wars of years past? War destroys buildings but also builds new ones. Those who began the wars disappear, but the architecture that lived through it remains to tell stories we must not forget. Famous buildings and sites that we may not initially associate with war, such as The Louvre in France, the Neue Wache in Germany, Windsor Castle in England, the Colosseum in Italy, the Grand Kremlin Palace in Russia are memory trunks that hold captivating and profound stories on war waiting to be told. Architecture—a witness, product, victim, and survivor of war—provides a window into the history of war.

PREFACE The idea for this book, the war histories of famous architectural buildings and sites, came to me during an ordinary visit to the Louvre Museum. As an art history graduate student and then after, an aspiring curator working in Paris, I was a frequent visitor of the Louvre. Regrettably, it was only after a dozen or so visits that I finally found my way to the less crowded

basement floor, where I came upon the preserved ruins of the museum's original architecture: a medieval fortress. This discovery of the Louvre's genesis struck me. Aside from the well-known fact that it had once been the palace that the Sun King abandoned in favor of his new Versailles residence, I had never given much thought to the Louvre's history due to my preoccupation with the many histories it exhibits. It was fascinating to think that this representative museum of Art with a capital 'A' was once a twelfth-century fortress that provided military defense for the city of Paris in times of war. A quick online search further uncovered the Louvre's history of war. As it turns out, war was responsible for both the Louvre's beginnings as a fortress as well as its modern-day identity as the home for art objects from all over the world. War was not a chapter in the Louvre's story, but a main thread woven into its identity. Interestingly, this not only holds true for the Louvre, but many landmarks and cultural sites throughout Europe. Years later, I had the opportunity to write about this connection between famous architecture and war. The Kookbang-ilbo, or the National Defense Daily approached me in early 2019 to propose I write for their Arts and Culture section. I suggested this topic and the first installment of the column "War as told by Architecture," The Louvre Museum, was published on July 15 later that year. 17 months, 76 installments, and 75 architectures later, these columns became the seed for this book. This passion project revisits the histories of war tucked away in the attics, or in the case of the Louvre, the basement of these buildings. Countless places usually seen through rose-colored glasses bear painful memories and permanent scars behind their façades. Their stories prompt a reconsideration of these sites beyond their attraction as tourist spots and reflection on the impact of war on people as well as the walls that surround, defend, shelter, represent, fail and at times, imprison. Survivors of War: Architecture before the 21st century is not an exhaustive history

of Europe's wars or architecture. The chosen sites are organized by countries, which have been narrowed down to some of the most famous locations in France, Italy, England, Germany, Russia, Spain, Poland, Austria, Czech Republic, Finland, the Netherlands, Turkey, Syria, Bosnia-Herzegovina, and Greece in no particular order. The first five chapters are each assigned to a country, while the last chapter groups architectural sites in multiple countries. The latter was organized in this way because these countries had less than three sites that I decided to include in this book. There are many palaces, bridges, fortresses, towers, and plazas with fascinating war stories that did not make it into this book, but that I hope to write about one day. To begin, here are the stories of those that are sure to capture any reader's interest.

 Contents The Louvre Museum's war history centers around the
 famous Napoleon Bonaparte (1769-1821). Napoleon entered the
 Paris Military Academy (École Militaire) in 1784 and within a
 year, he was commissioned as an artillery lieutenant. He took
 office as deputy commander of the Corsica National Army during
 the French Revolution in 1789. With the success of the November
 1799 coup d'état, Napoleon became a powerful figure of authority
 and eventually went on to become the emperor of France's first
 empire from 1804 to 1815. Although he suffered a crushing
 defeat at the hands of the British Royal Navy at the Battle of
 Trafalgar, Napoleon nevertheless conquered the Continent by
 bringing down the Prussian and Russian empires and defeating
 Austria, which effectively dissolved the Holy Roman Empire. -
 THE LOUVRE MUSEUM, 18p Edward IV of the victorious House
 of York was crowned king, and Henry VI was executed in the
 Tower of London. Later, when Edward IV died after more than a
 decade of rule, his 12-year old son Edward V was crowned king in
 1483, but just two months after he ascended the throne, the
 young king went missing along with his brother, Richard of
 Shrewsbury, the Duke of York. In 1674, workmen repairing the
 stairs of the White Tower of the Tower of London, found a box
 containing the remains of two children, presumed to be the
 remains of the two brothers. Eventually, the Wars of the Roses
 concluded with the death of Richard III in the Battle of Bosworth
 Field, thus opening up the era of the House of Tudors, who ruled
 the Kingdoms of England and Ireland under five monarchs, and
 the accession of Henry VII. - THE TOWER OF LONDON, 65p

Home to 127 factories and industries, Dresden was the seventh largest German city and the center of telecommunications and manufacturing by the 20th century. For this reason, this important industrial city became an obvious target for Allies during World War II. From February 13 to February 15 in 1945, 722 British Air Force bombers and 527 U.S. Army Air Force bombers flew over Dresden and dropped more than 3,900 tons of bombs upon the beautiful city. The heat generated by bombings and bombs created a firestorm throughout Dresden. This tragic bombing destroyed 90% of Dresden and killed about 25,000 innocent civilians. The Church of Our Lady endured two days of Allied bombing, but eventually succumbed at 10 a.m. on February 15 to the heat generated 650,000 incendiary bombs that fell on the city. This was mainly because the material of the church, sandstone, was particularly vulnerable to heat. - DRESDNER FRAUENKIRCHE, 121p With the outbreak of World War I in 1914, the last Tsar of the Romanov dynasty of Russia, Nicholas II (1868-1918), had 15 million soldiers jump into the battlefield in order to mollify the people's discontent. Sadly, due to the incapacity of the commanders, 800,000 Russians were defeated by the far fewer 160,000 Germans in the Battle of Tannenberg. Due to the void left by the mass of young men taken into war, the labor force in Russia rapidly deteriorated, which in turn resulted in greater suffering for the people. The prolonged period of such dire circumstances and hardships during World War I, the last dynasty of Russia collapsed after the February and October Revolutions of 1917, upon which, the Soviet regime was established. - HERMITAGE MUSEUM, 180p The name Colosseum comes from the Latin word Colossale, which means colossal. It is believed that the Colosseum's name came from its location near to a 30-meter-tall colossal statue of Emperor Nero that no longer exists. The enormous amphitheater is 188 meters in diameter, 156 meters in length, 527 meters in circumference and 48 meters in height. Made of four arcaded stories, this single structure

exhibits all three architectural styles of Greece and Rome. The ground level is made of columns in the simple and heavy Doric order, the second story is made in the soft and delicate Ionic order, and the third and fourth stories are made in the slender and decorative Corinthian order. Marble decorates the outer walls while wood and reddish sand covers the stadium's floor in order to disguise the blood that was spilt from the violent games that took place there. - THE COLOSSEUM, 192p The official symbol of UNESCO is modeled on the Parthenon. The reason for this is because the Parthenon is representative of UNESCO's efforts to protect cultural treasures. In order to prevent further damage due natural disasters, time, and wars, UNESCO designated the Parthenon as World Heritage Site No.I. There have been renovations amde throughout the temple, but different marble colors were used to differentiate between the original and repaired columns. To reach this temple, which sits atop the Acropolis, visitors need to pass by many other sites. Among them, Herodes Atticus Theater, is an outdoor theater located on the southwest part of the Acropolis. Parts of the Parthenon are displayed in the British Museum in London, England. When will they return to their original home? - THE PARTHENON, 258p

Korea Victor Cha,Ramon Pacheco Pardo,2023-06-27 A major new history of North and South Korea, from the late nineteenth century to the present day Korea has a long, riveting history—it is

also a divided nation. South Korea is a vibrant democracy, the tenth largest economy, and is home to a world-renowned culture. North Korea is ruled by the most authoritarian regime in the world, a poor country in a rich region, and is best known for the cult of personality surrounding the ruling Kim family. But both Koreas share a unique common history. Victor Cha and Ramon Pacheco Pardo draw on decades of research to explore the history of modern Korea, from the late nineteenth century, Japanese occupation, and Cold War division to the present day. A small country caught amongst the world's largest powers—including China, Japan, Russia, and the United States—Korea's fate has been closely connected to its geography and the strength of its leadership and society. This comprehensive history sheds light on the evolving identities of the two Koreas, explaining the sharp differences between North and South, and prospects for unification.

80x86 Assembly Programming Douglas Samuel Jones, 1991

Many personal computers are based on one of the 86 series of Intel microprocessors, namely the 8086, 80286, 80386, and the 80486, in order of increasing power. Programming the computer in the relevant assembly language allows the user to take full advantage of the speed and power of the microprocessor. This book is written for PC users who already have some familiarity with a high-level language such as Basic, C, or Pascal, and who want the extra facilities and efficiency of assembly language. The book starts at an elementary level with the basics of assembly programming and the properties of the microprocessor in its simplest mode of operation, the real address mode. Instructions for this mode of the 8086 and 80286 are progressively introduced through illustrative programs and subroutines. Further topics discussed are operating system calls and the 80286 protected mode. A separate chapter deals with the additional instructions of the 80386 and its modes of operation. Expanded and extended memory are also covered. The 80x87 coprocessors are treated for the benefit of readers who have one either as a part of the 80486 or as a complement to their 80x86. Numerous exercises are provided throughout the text. These enable readers to test their understanding and to gain experience in assembly programming.

THE THIRD STORY OF...Your Great-Grandfathers Minho J.

Byun, Keunho D. Byun, Woonjoo J. Byun, Jongho Byun, The author wrote this booklet hoping that genealogy, one of the legacies left behind by ancestors, could be used in the modern era. In other words, it can be said to be a 'modern genealogy', and this book is called your 'Keepsake Memory Record Book'. This booklet explains genealogy from a genetic perspective, considering both the maternal and paternal lines, rather than a traditional genealogy made up of paternal ancestors. Family information appropriate for the modern era was applied. The author hopes that reading this booklet will become a good guideline to increase

family intimacy and protect the family's health.

Wireless Communications Systems Architecture Khaled Salah Mohamed, 2022-10-31 This book discusses wireless communication systems from a transceiver and digital signal processing perspective. It is intended to be an advanced and thorough overview for key wireless communication technologies. A wide variety of wireless communication technologies, communication paradigms and architectures are addressed, along with state-of-the-art wireless communication standards. The author takes a practical, systems-level approach, breaking up the technical components of a wireless communication system, such as compression, encryption, channel coding, and modulation. It provides a comprehensive perspective on emerging 5G mobile networks, explaining its architecture and key enabling technologies, such as M-MIMO, Beamforming, mmWaves, machine learning, and network slicing. Finally, the author explores the evolution of wireless mobile networks over the next ten years towards 5G and beyond (6G), including use-cases, system requirements, challenges and opportunities.
