Public Space in Transition Dahae Lee,2022-05-31 Teheran-ro in Seoul and Mediaspree area in Berlin are pristine examples for public spaces with a history of rapid change in the context of broader political and economic transitions. Dahae Lee shows that in such a transitional context, the public sector alone is incapable to provide and manage public space. Hence, it engages private sector entities in the form of privately owned public space/s (POPS). By analysing the planning instruments used for POPS in both cases, their uniqueness as well as strengths and weaknesses are revealed. Based on the results this study offers a number of policy recommendations for cities that encounter similar problems.

THE THIRD STORY OF...Your Great-Grandfathers Minho J. Byun,Keunho D. Byun,Woonjoo J. Byun,Jongho Byun, The author wrote this booklet hoping that genealogy, one of the legacies left behind by ancestors, could be used in the modern era. In other words, it can be said to be a 'modern genealogy', and this book is called your 'Keepsake Memory Record Book'. This booklet explains genealogy from a genetic perspective, considering both the maternal and paternal lines, rather than a traditional genealogy made up of paternal ancestors. Family information appropriate for the modern era was applied. The author hopes that reading this booklet will become a good guideline to increase family intimacy and protect the family's health.

Higher Education - Reflections From the Field - Volume 3 ,2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book

examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'Changing Education", 'Education in the Pandemic", 'Sustaining University Education", and 'Embracing the Future in a Global World". It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Cases on Inquiry through Instructional Technology in Math and Science Lennex, Lesia, 2012-01-31 There exists a wealth of information about inquiry and about science, technology, engineering, and mathematics (STEM), but current research lacks meaningfully written, thoughtful applications of both topics. Cases on Inquiry through Instructional Technology in Math and Science represents the work of many authors toward meaningful discourse of inquiry used in STEM teaching. This book presents insightful information to teachers and teacher education candidates about using inquiry in the real classroom, case studies from which research suggests appropriate uses, and tangible direction for creating their own inquiry based STEM activities. Sections take the reader logically through the meaning of inquiry in STEM teaching, how to use technology in modern classrooms, STEM projects which successfully integrate inquiry methodology, and inquiry problem solving within STEM classrooms with the aim of creating activities and models useful for real-world classrooms.

The Oxford Handbook of Christianity and Law John Witte, Jr., Rafael Domingo, 2023 This volume tells the story of the interaction between Christianity and law-historically and today, in the traditional heartlands of Christianity and around the globe. Sixty new chapters by leading scholars provide authoritative and accessible accounts of foundational Christian teachings on law and legal thought over the past two millennia; the current interaction and contestation of law and Christianity on all continents; how Christianity shaped and was shaped by core public, private, penal, and procedural laws; various old and new forms of Christian canon law, natural law theory, and religious freedom norms; Christian teachings on fundamental principles of law and legal order; and Christian contributions to controversial legal issues. Together, the chapters make clear that Christianity and law have had a perennial and permanent influence on each other over time and across cultures, albeit with varying levels of intensity and effectiveness. This volume defines Christianity broadly to include Catholic, Protestant, and Orthodox traditions and various denominations and schools of thought within them. It draws on Christian ideas and institutions, norms and practices, texts and titans to tell the story of Christianity's engagement with the world of law over the past two millennia. The volume also defines law broadly as the normative order of justice, power, and freedom. The chapters address natural laws of conscience, reason, and the Bible and positive laws enacted by states, churches, and voluntary associations. Several chapters focus on Christian engagement with specific types

of law: canon law, family law, education law, constitutional law, criminal law, procedural law, and laws governing labor, tax, contracts, torts, property, and beyond. Other chapters take up cutting edge legal issues of racial justice, environmental care, migration, euthanasia, and (bio)technology as well as fundamental legal principles of liberty, dignity, equality, justice, equity, judgment, and solidarity.

The Routledge Handbook of Korean Interpreting Riccardo Moratto, Hyang-Ok Lim, 2023-10-23 Professor Riccardo Moratto and Professor Hyang-Ok Lim bring together the most authoritative voices on Korean interpreting. The first graduate school of interpretation and translation was established in 1979 in South Korea. Since then, not only has the interpretation and translation market grown exponentially, but so too has research in translation studies. Though the major portion of research focuses on translation, interpretation has not only managed to hold its own, but interpretation studies in Korea have been a pioneer in this field in Asia. This handbook highlights the main interpretation research trends in South Korea today, including case studies of remote interpreting during the Covid-19 pandemic, Korean interpreting for conferences, events, and diplomacy, and research into educating interpreters effectively. An essential resource for researchers in Korean interpreting, this handbook will also be very valuable to those working with other East Asian languages.

The Second Story of... Your Great-Grandfathers Minho Joe Byun, Keunho Daniel Byun, Woonjoo Jeannie Byun, Jongho Byun, 2024-01-31 'The Second Edition of Your Great-grandfather's Story' has added information about the Duke Cheomji fraction descendants and provides an opportunity to find direct ancestors using the names (English, Hangul, Hanja) of the Cheomji fraction descendants currently in the genealogy of the Byun clan in Wonju. The second purpose was to provide descendants who need English names with an easy way to come up with English names using the theory of 'Coexistence and Opposite of the Five Elements,' which is the knowledge or legacy of your ancestors.

Wireless Communications Systems Architecture Khaled Salah Mohamed, 2022-10-31 This book discusses wireless communication systems from a transceiver and digital signal processing perspective. A wide variety of wireless communication technologies, communication paradigms and architectures are addressed, along with state-of-the-art

wireless communication standards. The author takes a practical, systems-level approach, breaking up the technical components of a wireless communication system, such as compression, encryption, channel coding, and modulation. This book combines hardware principles with practical communication system design. It provides a comprehensive perspective on emerging 5G mobile networks, explaining its architecture and key enabling technologies, such as M-MIMO, Beamforming, mmWaves, machine learning, and network slicing. Finally, the author explores the evolution of wireless mobile networks over the next ten years towards 5G and beyond (6G), including use-cases, system requirements, challenges and opportunities.

Routledge Handbook of Contemporary North Korea Adrian Buzo, 2020-11-22 The Routledge Handbook of Contemporary North Korea presents a comprehensive picture of contemporary North Korea, placed in historical context and set against the overlapping fields of politics, economy, culture, society and foreign relations. Spanning a period of significant transition for North Korea, this volume provides accurate analysis and applications of both historical and institutional perspectives. The volume's chapters are representative of the growth in North Korean studies that has occurred since the 1990s, in parallel with the growing maturity of the field in South Korea, as well as with far greater levels of access to North Korean sources. The volume is divided into five Parts, each reflecting an emergent area of debate and research: The political perspective The North Korean economy Foreign relations Society Culture This is the first anthology of North Korean studies to demonstrate a clear understanding of North Korea as North Korea, as opposed to a dimly perceived and threatening rogue state. It features both Korean and non-Korean contributors, many working from primary source material. As such, this handbook will prove a valuable resource to students and scholars of Northeast Asian studies, modern Korean history and politics, and comparative politics more broadly.

Mobile Health (mHealth) Kota Kodama, Shintaro Sengoku, 2022-10-18 This book examines the current status of mHealth development, regulations and the social background in Japan, South Korea and China, comparing it to the situation in the United States and the European Union and consider solutions to issues surrounding mHealth. The recent progress in mobile technology, represented by smartphones and smart watches, has been remarkable. A service called mobile health (mHealth), which uses such mobile technology to manage health, is also becoming a reality. Although the accuracy of medical devices is not as accurate as those used in medicine, the biometric information such as heart rate and SpO2 can already be monitored over a long period of time. Although the technology is maturing to the point where it can be implemented in society, it remains an unapproved service of medical care in most countries. The development and social implementation of mHealth is most active in the US, but social implementation is gradually progressing in other countries as well. In this book, we will first discuss what kind of global and harmonized regulations are desirable by comparing the regulatory reforms necessary for social implementation of mHealth. In addition, mHealth raises privacy concerns in the US because the usual behavior and biometric information of subjects is utilized by private companies. In addition, it is important to note that the behavior and biometric information of subjects collected by smart devices is automatically analyzed by AI

technology, mainly machine learning, which makes the analysis a black box.

Flowers of Fire Hawon Jung,2023-03-07 Invigorating debut . . . [a] full-throated rallying cry. –Publishers Weekly One of Ms. Magazine's most-anticipated feminist books of 2023 An eye-opening firsthand account of the ongoing and trailblazing feminist movement in South Korea—one that the world should be watching. Since the beginning of the #MeToo movement, tens of thousands of people in South Korea have taken to the street, and many more brave individuals took a stand, to end a decades-long abortion ban and bring down powerful men accused of sexual misconduct—including a popular presidential contender. South Korean feminists know that the revolution has been a long time coming, between battles against its own patriarchal society as well as challenging stereotypes of docile Asian women in the Western imagination. Now, author Hawon Jung will show the rest of the world that these women are no delicate flowers—they are trailblazing flames. *Flowers of Fire* takes the reader into the trenches of this fight for equality, following along as South Korean activists march on the streets, navigate public and private spaces where spycam porn crimes are rampant, and share tips and tricks with each other as they learn how to protect themselves from harassment and how to push authorities to act. Jung, the former Seoul correspondent for the AFP, draws on her on-the-ground reporting and interviews with many women who became activists and leaders, from the elite prosecutor who ignited the country's #MeToo movement to the young women who led the war against non-consensual photography. Their stories, though long overlooked in the West, mirror realities that women across the world are all too familiar with: threats of defamation lawsuits to silence victims of assault, tech-based sexual abuse, and criminal justice systems where victims' voices are often met with suspicion and abusers' downfalls are met with sympathy. These are the issues at the heart of their #MeToo movement, and South Korean women have fought against them vigorously—and with extraordinary success. In *Flowers of Fire*, Jung illuminates the strength and tenacity of these women, too often sidelined in global conversations about feminism and gender equality.

Survivors of War Sang-mi Lee ,2022-11-15 BOOK SUMMARY There are many ways we can look at the history of war: history books, poetry, fiction novels, paintings, photographs, and movies, to name a few. The possible approaches to the history of war are endless, but did you know that architecture is also a lens through which we can glimpse into the wars of years past? War destroys buildings but also builds new ones. Those who began the wars disappear, but the architecture that lived through it remains to tell stories we must not forget. Famous buildings and sites that we may not initially associate with war, such as The Louvre in France, the Neue Wache in Germany, Windsor Castle in England, the Colosseum in Italy, the Grand Kremlin Palace in Russia are memory trunks that hold captivating and profound stories on war waiting to be told. Architecture—a witness, product, victim, and survivor of war—provides a window into the history of war. PREFACE The idea for this book, the war histories of famous architectural buildings and sites, came to me during an ordinary visit to the Louvre Museum. As an art history graduate student and then after, an aspiring curator working in Paris, I was a frequent visitor of the Louvre. Regrettably, it was only after a dozen or so visits that I finally found my way to the less crowded basement floor, where I came upon the preserved ruins of the museum’s original architecture: a medieval fortress. This discovery of the Louvre’s genesis struck me. Aside from the well-known fact that it had once been the palace that the Sun King abandoned in favor of his new Versailles residence, I had never given much thought to the Louvre’s history due to my preoccupation with the many histories it exhibits. It was fascinating to think that this representative museum of Art with a capital ‘A’ was once a twelfth-century fortress that provided military defense for the city of Paris in times of war. A quick online search further uncovered the Louvre’s history of war. As it turns out, war was responsible for both the Louvre’s beginnings as a fortress as well as its modern-day identity as the home for art objects from all over the world. War was not a chapter in the Louvre’s story, but a main thread woven into its identity. Interestingly, this not only holds true for the Louvre, but many landmarks and cultural sites throughout Europe. Years later, I had the opportunity to write about this connection between famous architecture and war. The Kookbang-ilbo, or the National Defense Daily approached me in early 2019 to propose I write for their Arts and Culture section. I suggested this topic and the first installment of the column “War as told by Architecture,” The Louvre Museum, was published on July 15 later that year. 17 months, 76 installments, and 75 architectures later, these columns became the seed for this book. This passion project revisits the histories of war tucked away in the attics, or in the case of the Louvre, the basement of these buildings. Countless places usually seen through rose-colored glasses bear painful memories and permanent scars behind their façades. Their stories prompt a reconsideration of these sites beyond their attraction as tourist spots and reflection on the impact of war on people as well as the walls that surround, defend, shelter, represent, fail and at times, imprison. Survivors of War: Architecture before the 21st century is not an exhaustive history of

Europe's wars or architecture. The chosen sites are organized by countries, which have been narrowed down to some of the most famous locations in France, Italy, England, Germany, Russia, Spain, Poland, Austria, Czech Republic, Finland, the Netherlands, Turkey, Syria, Bosnia-Herzegovina, and Greece in no particular order. The first five chapters are each assigned to a country, while the last chapter groups architectural sites in multiple countries. The latter was organized in this way because these countries had less than three sites that I decided to include in this book. There are many palaces, bridges, fortresses, towers, and plazas with fascinating war stories that did not make it into this book, but that I hope to write about one day. To begin, here are the stories of those that are sure to capture any reader's interest.

The Louvre Museum's war history centers around the famous Napoleon Bonaparte (1769-1821). Napoleon entered the Paris Military Academy (École Militaire) in 1784 and within a year, he was commissioned as an artillery lieutenant. He took office as deputy commander of the Corsica National Army during the French Revolution in 1789. With the success of the November 1799 coup d'état, Napoleon became a powerful figure of authority and eventually went on to become the emperor of France's first empire from 1804 to 1815. Although he suffered a crushing defeat at the hands of the British Royal Navy at the Battle of Trafalgar, Napoleon nevertheless conquered the Continent by bringing down the Prussian and Russian empires and defeating Austria, which effectively dissolved the Holy Roman Empire.

- THE LOUVRE MUSEUM, 18p

Edward IV of the victorious House of York was crowned king, and Henry VI was executed in the Tower of London. Later, when Edward IV died after more than a decade of rule, his 12-year old son Edward V was crowned king in 1483, but just two months after he ascended the throne, the young king went missing along with his brother, Richard of Shrewsbury, the Duke of York. In 1674, workmen repairing the stairs of the White Tower of the Tower of London, found a box containing the remains of two children, presumed to be the remains of the two brothers. Eventually, the Wars of the Roses concluded with the death of Richard III in the Battle of Bosworth Field, thus opening up the era of the House of

Tudors, who ruled the Kingdoms of England and Ireland under five monarchs, and the accession of Henry VII. - THE TOWER OF LONDON, 65p Home to 127 factories and industries, Dresden was the seventh largest German city and the center of telecommunications and manufacturing by the 20th century. For this reason, this important industrial city became an obvious target for Allies during World War II. From February 13 to February 15 in 1945, 722 British Air Force bombers and 527 U.S. Army Air Force bombers flew over Dresden and dropped more than 3,900 tons of bombs upon the beautiful city. The heat generated by bombings and bombs created a firestorm throughout Dresden. This tragic bombing destroyed 90% of Dresden and killed about 25,000 innocent civilians. The Church of Our Lady endured two days of Allied bombing, but eventually succumbed at 10 a.m. on February 15 to the heat generated 650,000 incendiary bombs that fell on the city. This was mainly because the material of the church, sandstone, was particularly vulnerable to heat. - DRESDNER FRAUENKIRCHE, 121p With the outbreak of World War I in 1914, the last Tsar of the Romanov dynasty of Russia, Nicholas II (1868-1918), had 15 million soldiers jump into the battlefield in order to mollify the people's discontent. Sadly, due to the incapacity of the commanders, 800,000 Russians were defeated by the far fewer 160,000 Germans in the Battle of Tannenberg. Due to the void left by the mass of young men taken into war, the labor force in Russia rapidly deteriorated, which in turn resulted in greater suffering for the people. The prolonged period of such dire circumstances and hardships during World War I, the last dynasty of Russia collapsed after the February and October Revolutions of 1917, upon which, the Soviet regime was established. - HERMITAGE MUSEUM, 180p The name Colosseum comes from the Latin word Colossale, which means colossal. It is believed that the Colosseum's name came from its location near to a 30-meter-tall colossal statue of Emperor Nero that no longer exists. The enormous amphitheater is 188 meters in diameter, 156 meters in length, 527 meters in circumference and 48 meters in height. Made of four arcaded stories, this single structure exhibits all three architectural styles of Greece and Rome. The ground level is made of columns in the simple and heavy Doric order, the second story is made in the soft and delicate Ionic order, and the third and fourth stories are made in the slender and decorative Corinthian order. Marble decorates the outer walls while wood and reddish sand covers the stadium's floor in order to disguise the blood that was spilt from the violent games that took place there. - THE COLOSSEUM, 192p The official symbol of UNESCO is modeled on the Parthenon. The reason for this is because the Parthenon is representative of UNESCO's efforts to protect cultural treasures. In order to prevent further damage due natural disasters, time, and wars, UNESCO designated the Parthenon as World Heritage Site No.I. There have been renovations made throughout the temple, but different marble colors were used to differentiate between the original and repaired columns. To reach this temple, which sits atop the Acropolis, visitors need to pass by many other sites. Among them, Herodes Atticus Theater, is an outdoor theater located on the southwest part of the Acropolis. Parts of the Parthenon are displayed in the British Museum in London, England. When will they return to their original home? - THE PARTHENON, 258p
