Higher Education - Reflections From the Field - Volume 3,2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'Changing Education", 'Education in the Pandemic", 'Sustaining University Education", and 'Embracing the Future in a Global World". It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Sustainable Development Goals in the Republic of Korea Tae Yong Jung,2018-05-15 This book explores the attempts of South Korea in its to achieve the UN's Sustainable Development Goals (SDGs) by 2030. It addresses 6 of the 17 goals — clean water, affordable and clean energy, decent work and economic growth, sustainable cities and communities, climate action, and partnership — and defines specific national strategies. For each strategy, the contributors define the research indicators they selected, then analyze and examine the extent to which South Korea has met the SDG concerned. They draw these conclusions from national and international reports, government documents and policy papers on SDGs. South Korea's experience in sustainable development and green programs will contribute to the planning of long-term development strategies for developing countries.

**Survivors of War** Sang-mi Lee ,2022-11-15 BOOK SUMMARY There are many ways we can look at the history of war: history books, poetry, fiction novels, paintings, photographs, and movies, to name a few. The possible approaches to the history of war are endless, but did you know that architecture is also a lens through which we can glimpse into the wars of years past? War destroys buildings but also builds new ones. Those who began the wars disappear, but the architecture that lived through it remains to tell stories we must not forget. Famous buildings and sites that we may not initially associate with

war, such as The Louvre in France, the Neue Wache in Germany, Windsor Castle in England, the Colosseum in Italy, the Grand Kremlin Palace in Russia are memory trunks that hold captivating and profound stories on war waiting to be told. Architecture—a witness, product, victim, and survivor of war—provides a window into the history of war. PREFACE The idea for this book, the war histories of famous architectural buildings and sites, came to me during an ordinary visit to the Louvre Museum. As an art history graduate student and then after, an aspiring curator working in Paris, I was a frequent visitor of the Louvre. Regrettably, it was only after a dozen or so visits that I finally found my way to the less crowded basement floor, where I came upon the preserved ruins of the museum's original architecture: a medieval fortress. This discovery of the Louvre's genesis struck me. Aside from the well-known fact that it had once been the palace that the Sun King abandoned in favor of his new Versailles residence, I had never given much thought to the Louvre's history due to my preoccupation with the many histories it exhibits. It was fascinating to think that this representative museum of Art with a capital 'A' was once a twelfth-century fortress that provided military defense for the city of Paris in times of war. A quick online search further uncovered the Louvre's history of war. As it turns out, war was responsible for both the Louvre's beginnings as a fortress as well as its modern-day identity as the home for art objects from all over the world. War was not a chapter in the Louvre's story, but a main thread woven into its identity. Interestingly, this not only holds true for the Louvre, but many landmarks and cultural sites throughout Europe. Years later, I had the opportunity to write about this connection between famous architecture and war. The Kookbang-ilbo, or the National Defense Daily approached me in early 2019 to propose I write for their Arts and Culture section. I suggested this topic and the first installment of the column "War as told by Architecture," The Louvre Museum, was published on July 15 later that year. 17 months, 76 installments, and 75 architectures later, these columns became the seed for this book. This passion project revisits the histories of war tucked away in the attics, or in the case of the Louvre, the basement of these buildings. Countless places usually seen through rose-colored glasses bear painful memories and permanent scars behind their façades. Their stories prompt a reconsideration of these sites beyond their attraction as tourist spots and reflection on the impact of war on people as well as the walls that surround, defend, shelter, represent, fail and at times, imprison. Survivors of War: Architecture before the 21st century is not an exhaustive history of Europe's wars or architecture. The chosen sites are organized by countries, which have been narrowed down to some of the most famous locations in France, Italy, England, Germany, Russia, Spain, Poland, Austria, Czech Republic, Finland, the Netherlands, Turkey, Syria, Bosnia-Herzegovina, and Greece in no particular order. The first five chapters are each assigned to a country, while the last chapter groups architectural sites in multiple countries. The latter was organized in this way because these countries had less than three sites that I decided to include in this book. There are many palaces, bridges, fortresses, towers, and plazas with fascinating war stories that did not make it into this book, but that I hope to write about one day. To begin, here are the stories of those that are sure to capture any reader's interest. TABLE OF CONTENTS I. CONTACT INFORMATION 3 II. BOOK DESCRIPTION 7 III. AUTHOR BIO 8 IV. FULL MANUSCRIT 10 1. COPYRIGHT 305 Major Contents The Louvre Museum's war history centers around the famous Napoleon Bonaparte (1769-1821). Napoleon entered the Paris Military Academy (École Militaire) in 1784 and within a year, he was commissioned as an artillery lieutenant. He took office as deputy commander of the Corsica National Army during the French Revolution in 1789. With the success of the November 1799 coup d'état, Napoleon became a powerful figure of authority and eventually went on to become the emperor of France's first empire from 1804 to 1815. Although he suffered a crushing defeat at the hands of the British Royal Navy at the Battle of Trafalgar, Napoleon nevertheless conquered the Continent by bringing down the Prussian and Russian empires and defeating Austria, which effectively dissolved the Holy Roman Empire. - THE LOUVRE MUSEUM, 18p Edward IV of the victorious House of York was crowned king, and Henry VI was executed in the Tower of London. Later, when Edward IV died after more than a decade of rule, his 12-year old son Edward V was crowned king in 1483, but just two months after he ascended the throne, the young king went missing along with his brother, Richard of Shrewsbury, the Duke of York. In 1674, workmen repairing the stairs of the White Tower of the Tower of London, found a box containing the remains of two children, presumed to be the remains of the two brothers. Eventually, the Wars of the Roses concluded with the death of Richard III in the Battle of Bosworth Field, thus opening up the era of the House of Tudors, who ruled the Kingdoms of England and Ireland under five monarchs, and the accession of Henry VII. - THE TOWER OF LONDON, 65p Home to 127 factories and industries, Dresden was the seventh largest German city and the center of telecommunications and manufacturing by the 20th century. For this reason, this important industrial city became an obvious target for Allies during World War II. From February 13 to February 15 in 1945, 722 British Air Force bombers and 527 U.S. Army Air Force bombers flew over Dresden and dropped more than 3,900 tons of bombs upon the beautiful city. The heat generated by bombings and bombs created a firestorm throughout Dresden. This tragic bombing destroyed 90% of Dresden and killed about 25,000 innocent civilians. The Church of Our Lady endured two days of Allied bombing, but eventually succumbed at 10 a.m. on February 15 to the heat generated 650,000 incendiary bombs that fell on the city. This was mainly because the material of the church, sandstone, was particularly

vulnerable to heat. - DRESDNER FRAUENKIRCHE, 121p With the outbreak of World War I in 1914, the last Tsar of the Romanov dynasty of Russia, Nicholas II (1868-1918), had 15 million soldiers jump into the battlefield in order to mollify the people's discontent. Sadly, due to the incapacity of the commanders, 800,000 Russians were defeated by the far fewer 160,000 Germans in the Battle of Tannenberg. Due to the void left by the mass of young men taken into war, the labor force in Russia rapidly deteriorated, which in turn resulted in greater suffering for the people. The prolonged period of such dire circumstances and hardships during World War I, the last dynasty of Russia collapsed after the February and October Revolutions of 1917, upon which, the Soviet regime was established. - HERMITAGE MUSEUM, 180p The name Colosseum comes from the Latin word Colossale, which means colossal. It is believed that the Colosseum's name came from its location near to a 30-metertall colossal statue of Emperor Nero that no longer exists. The enormous amphitheater is 188 meters in diameter, 156 meters in length, 527 meters in circumference and 48 meters in height. Made of four arcaded stories, this single structure exhibits all three architectural styles of Greece and Rome. The ground level is made of columns in the simple and heavy Doric order, the second story is made in the soft and delicate Ionic order, and the third and fourth stories are made in the slender and decorative Corinthian order. Marble decorates the outer walls while wood and reddish sand covers the stadium's floor in order to disguise the blood that was spilt from the violent games that took place there. - THE COLOSSEUM, 192p The official symbol of UNESCO is modeled on the Parthenon. The reason for this is because the Parthenon is representative of UNESCO's efforts to protect cultural treasures. In order to prevent further damage due natural disasters, time, and wars, UNESCO designated the Parthenon as World Heritage Site No.I. There have been renovations amde throughout the temple, but different marble colors were used to differentiate between the original and repaired columns. To reach this temple, which sits atop the Acropolis, visitors need to pass by many other sites. Among them, Herodes Atticus Theater, is an outdoor theater located on the southwest part of the Acropolis. Parts of the Parthenon are displayed in the British Museum in London, England. When will they return to their original home? - THE PARTHENON, 258p

Computer and Information Science 2021 - Fall Roger Lee, 2021-11-23 This edited book presents scientific results of the 21th IEEE/ACIS International Fall Virtual Conference on Computer and Information Science (ICIS 2021-Fall) held on October 13-15, 2021, in Xi'an China. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects (theory, applications, and tools) of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the conference. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second

round of review, 13 of the conference's most promising papers are then published in this Springer (SCI) book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.

Competitiveness Of Nations 2, The: Government Policies And Business Strategies For Environmental, Social, And Governance (Esg) Dong-sung Cho, Hwychang Moon, 2023-05-25 As countries around the world seek to enhance their economies while facing the challenges of climate change and income inequality, national competitiveness is an important marker of the related strengths and weaknesses that policymakers will need to address. Among the existing reports on national competitiveness and rankings, such as IMD World Competitiveness Yearbook and WEF Global Competitiveness Report, there are sizable discrepancies in the ranking order for the same countries. As a result, confusion arises as such an outcome creates difficulties for government officials when translating these findings into real-world policies. The reality is that these discrepancies are due to the differences in logic and analytical models used by IMD and WEF. Therefore, in recognizing such problems and limitations, The Competitiveness of Nations 2 presents the IPS model as a new approach. Building on from Michael Porter's diamond model, it demonstrates a robust set of methodologies as well as offers several key policy implications for economies around the world that wish to enhance their competitiveness. The analytical tools used in this book can be further utilized for other units of analysis such as industries and individual firms. As this book provides a series of sophisticated methodologies and specific guidelines for enhancing national competitiveness, both academics and practitioners can derive useful implications. This annual book series was launched in 2021 and has included timely topics and in-depth discussion on national competitiveness. The first edition dealt with the COVID-19 global pandemic and the US-China trade war as its key focus. For this second edition, the Environmental, Social, and Governance (ESG) issue has been selected given its growing impact on strategic decision-making at both firm and country levels for sustainable competitiveness. This edition explores the development of ESG in various regions including Asia (Japan, Korea, India), Europe (Russia), Latin America (Peru), and Africa (Sub-Saharan Africa). It addresses how firms can contribute to ESG, and what governments should do to incentivize or regulate firms' engagement in its practices.

Utilising extensive Korean, English, Russian and Chinese language sources, as well as multiple interviews with people who have served in the KPA, this book provides an illuminating insight into the experience of KPA personnel. It presents fascinating and detailed examples of everyday life in the KPA, such as the systems of discipline and reprimands, the experience of women in the army, typical salaries and daily food allowances. The book also succinctly traces the history of the KPA from its foundation under the guidance of the Soviet Union and the experiences of the Korean War, through to the current iteration under Kim Jong-un. This pioneering work will be of huge interest to students and scholars of North Korea, the Cold War, Military Studies and Communism.

Public Space in Transition Dahae Lee, 2022-05-31 Teheran-ro in Seoul and

Mediaspree area in Berlin are pristine examples for public spaces with a history of rapid change in the context of broader political and economic transitions. Dahae Lee shows that in such a transitional context, the public sector alone is incapable to provide and manage public space. Hence, it engages private sector entities in the form of privately owned public space/s (POPS). By analysing the planning instruments used for POPS in both cases, their uniqueness as well as strengths and weaknesses are revealed. Based on the results this study offers a number of policy recommendations for cities that encounter similar problems.

Rejuvenating Korea: Policies for a Changing Society OECD,2019-10-28 Korean families are changing fast. While birth rates remain low, Koreans are marrying and starting a family later than ever before, if at all. Couple-with-children households, the dominant household type in Korea until recently, will soon make up fewer than one quarter of all households. These changes will have a profound effect on Korea's future. Among other things, the Korean labour force is set to decline by about 2.5 million workers by 2040, with potential major implications for economic performance and the sustainability of public finances.

Sport in Korea Dae Hee Kwak, Yong Jae Ko, Inkyu Kang, Mark Rosentraub, 2017-07-28 Korea has become a powerful force in global sport, with South Korea finishing fifth in the medals table at London 2012 and hosting the Winter Olympics in 2018. This book brings together scholars from disciplines including sport history, sociology, journalism, economics, sport development, and sport management to explore the significance of sport in contemporary Korea. Presenting a variety of international perspectives, it plots the dynamic evolution of sport in Korea and envisions the possibilities for its future. Each chapter focuses on a key topic of current relevance, such as sport in the context of shifting relations between North and South Korea, or the role of sport in the expression of Korean nationalism. Arguing that individuals, institutions, businesses, and governments have actively leveraged or exploited sport to influence developments in various social, economic, cultural, and political arenas, this book sheds new light on the importance of sport as a catalyst for change in Korea. This is indispensable reading for any student or scholar with an interest in sport, history, and culture in Korea.

Quality Of Life In American Neighborhoods Jay M Gould, Alice Tepper Marlin, 2019-09-05 Information, never before available, on levels of affluence and the quality of life in every Zip code area in which Americans reside is contained in this book. The Council On Economic Priorities (CEP), a non-profit research agency committed to the exploration of issues of corporate social responsibility, has been engaged in a study of the relationship

between the generation and disposal of toxic waste and the regional variation in cancer mortality rates for some time. A CEP study, Toxic Waste and Cancer: The Link ls Getting Stronger (published in September, 1984), established a small but statistically significant association between cancer and toxic waste at the county level. For small counties with petrochemical concentrations, the association appeared to be particularly high. CEP chose therefore to continue its studies at the 5 digit Zip code level, because the average 5 digit Zip code area is one-tenth the size of the typical county.
