- 🔍 **CATASTROPHE CONTAINMENT AND RELIEF TRUST—APPROVAL OF GRANT ASSISTANCE FOR DEBT SERVICE RELIEF** INTERNATIONAL MONETARY FUND,2020-04-15 This paper proposes that the Executive Board determine that the global COVID-19 pandemic constitutes a Qualifying Public Health Disaster (QPHD) under the Catastrophe Containment (CC) Window of the Catastrophe Containment and Relief Trust (CCRT), in line with the new QPHD test approved by the Board on March 26. The CCRT has sufficient financial resources for an initial tranche of grant assistance for debt service relief covering eligible debt falling due from all CCRT-eligible members through October 13, 2020. Fundraising efforts continue to secure the financial resources needed to commit future such tranches for CCRT debt service relief, up to a cap of two years. Staff considers that the 25 members requesting CCRT assistance qualify for immediate CCRT relief.
- 🔍 **VITAMIN AND MINERAL REQUIREMENTS IN HUMAN NUTRITION** WORLD HEALTH ORGANIZATION,FAO,2004 In the past 20 years micronutrients have assumed great public health importance and a considerable amount of research has lead to increasing knowledge of their physiological role. Because it is a rapidly developing field, the WHO and FAO convened an Expert Consultation to evaluate the current state of knowledge. It had three main tasks: to review the full scope of vitamin and minerals requirements; to draft and adopt a report which would provide recommended nutrient intakes for vitamins A, C, D, E, and K; the B vitamins; calcium; iron; magnesium; zinc; selenium; and iodine; to identify key issues for future research and make preliminary recommendations for the handbook. This report contains the outcome of the Consultation, combined with up-to-date evidence that has since become available.
- 🔍 **MICROPLASTIC IN THE ENVIRONMENT: PATTERN AND PROCESS** MICHAEL S. BANK,2021-10-09 This open access book examines global plastic pollution, an issue that has become a critical societal challenge with implications for environmental and public health. This volume provides a comprehensive, holistic analysis on the plastic cycle and its subsequent effects on biota, food security, and human exposure. Importantly, global environmental change and its associated, systems-level processes, including atmospheric deposition, ecosystem complexity, UV exposure, wind patterns, water stratification, ocean circulation, etc., are all important direct and indirect factors governing the fate, transport and biotic and abiotic processing of plastic particles across ecosystem types. Furthermore, the distribution of plastic in the ocean is not independent of terrestrial ecosystem dynamics, since much of the plastic in marine ecosystems originates from land and should therefore be evaluated in the context of the larger plastic cycle. Changes in species size, distribution, habitat, and food web complexity, due to global environmental change, will likely alter trophic transfer dynamics and the ecological effects of nano- and microplastics. The fate and transport dynamics of plastic particles are influenced by their size, form, shape, polymer type, additives, and overall ecosystem conditions. In addition to the risks that plastics pose to the total environment, the potential impacts on human health and exposure routes, including seafood consumption, and air and drinking water need to be assessed in a comprehensive and quantitative manner. Here I present a holistic and interdisciplinary book volume designed to advance the understanding of plastic cycling in the environment with an emphasis on sources, fate and transport, ecotoxicology, climate change effects, food security, microbiology, sustainability, human exposure and public policy.
- 🔍 **THE ETHICS OF VACCINATION** ALBERTO GIUBILINI,2018-12-28 This open access book discusses individual, collective, and institutional responsibilities with regard to vaccination from the perspective of philosophy and public health ethics. It addresses the issue of what it means for a collective to be morally responsible for the realisation of herd immunity and what the implications of collective responsibility are for individual and institutional responsibilities. The first chapter introduces some key concepts in the vaccination debate, such as ‘herd immunity’, ‘public goods’, and ‘vaccine refusal’; and explains why failure to vaccinate raises certain ethical issues. The second chapter analyses, from a philosophical perspective, the relationship between individual, collective, and institutional responsibilities with regard to the realisation of herd immunity. The third chapter is about the principle of least restrictive alternative in public health ethics and its implications for vaccination policies. Finally, the fourth chapter presents an ethical argument for unqualified compulsory vaccination, i.e. for compulsory vaccination that does not allow for any conscientious objection. The book will appeal to philosophers interested in public health ethics and the general public interested in the philosophical underpinning of different arguments about our moral obligations with regard to vaccination.
- 🔍 **SUPPLY CHAIN MANAGEMENT AND REVERSE LOGISTICS** HARALD DYCKHOFF,RICHARD LACKES,JOACHIM REESE,2013-06-05 The world of logistics has considerably changed due to globalization, modern information technology, and especially increasing ecological awareness. Large Supply Chain Management (SCM) systems are developing to global logistic networks. This book reflects major trends of the recent decade in SCM and, additionally, presents ideas and visions for logistic networks of the 21st century. Among the various aspects of SCM, emphasis is placed on reverse logistics: closing the loop of a supply chain by integrating waste materials into logistic management decisions.
- 🔍 **BLINDSPOT** JANYCE VAN ES,MICHAEL JOE HAYES,2005-04 Do we really know and understand our pets? Are we totally aware of their personalities and their habits, good and bad, even when we aren’t around to observe them? Of course not! How could we? The neighbors tell us that our sweet little dog just trashed their yard with the garbage bag, or their cat is afraid to go outside. Well, what if a pet’s main caretaker dies, and he/she is left to fend for him/herself? Blindspot is a blind Australian shepherd who loves his owner unconditionally, as expected. Unintentionally, she fails to realize all his needs when it comes to health and well-being, causing the dog to find his own meals, and he does, in animal and human flesh. Creating an overall panic and disruption in a small town in Texas, a Native American widow, Nelda Cannon, is totally unaware of her dog’s eating habits. When she learns that he is suspected of murder, and it is her responsibility to be aware of what he does, she literally goes underground to protect him and herself. This story is not only focused on a misunderstood, hungry dog. It also raises some issues about the plight of the Native Americans, and their entitlements to land and privacy, the questions concerning the capture and elimination of endangered species if they are dangerous to mankind, and focuses on the loyalty of one family through hard and difficult times. A chain of strange circumstances follow for Nelda Cannon and the dog’s benefit, leaving the reader totally amazed or perplexed in the ending of this story.

- 🔍 **THE BIOPHYSICS OF CELL MEMBRANES** RICHARD M. EPAND,JEAN-MARIE RUYSSCHAERT,2017-09-25 This volume focuses on the modulation of biological membranes by specific biophysical properties. The readers are introduced to emerging biophysical approaches that mimick specific states (like membrane lipid asymmetry, membrane curvature, lipid flip-flop, lipid phase separation) that are relevant to the functioning of biological membranes. The first chapter describes innovative methods to mimic the prevailing asymmetry in biological membranes by forming asymmetrical membranes made of monolayers with different compositions. One of the chapters illustrates how physical parameters, like curvature and elasticity, can affect and modulate the interactions between lipids and proteins. This volume also describes the sensitivity of certain ion channels to mechanical forces and it presents an analysis of how cell shape is determined by both the cytoskeleton and the lipid domains in the membrane. The last chapter provides evidence that liposomes can be used as a minimal cellular model to reconstitute processes related to the origin of life. Each topic covered in this volume is presented by leading experts in the field who are able to present clear, authoritative and up-to-date reviews. The novelty of the methods proposed and their potential for a deeper molecular description of membrane functioning are particularly relevant experts in the areas of biochemistry, biophysics and cell biology, while also presenting clear and thorough introductions, making the material suitable for students in these fields as well.

- 🔍 **BATTLE FOR BUDAPEST** KRISZTIÁN UNGVÉRY,2011-08-30 This title is presented with a new foreword by Istvan Deak. The battle of Budapest in the bleak winter of 1944-45 was one of the longest and bloodiest city sieges of World War II. From the appearance of the first Soviet tanks on the outskirts of the capital to the capture of Buda Castle, 102 days elapsed. In terms of human trauma, it comes second only to Stalingrad, comparisons to which were even being made by soldiers, both German and Soviet, fighting at the time. This definitive history covers their experiences, and those of the 800,000 non-combatants around whom the battle raged.
- 🔍 **THE WORLD HEALTH REPORT 2006** WORLD HEALTH ORGANIZATION,2006-03-23 The 2006 World Health Report focuses on the chronic shortages of doctors, midwives, nurses and other health care support workers in the poorest countries of the world where they are most needed.
