

From Memory to Memorial J. William Thompson, 2017-02-08 On September 11, 2001, Shanksville, Pennsylvania, became a center of national attention when United Airlines Flight 93 crashed into a former strip mine in sleepy Somerset County, killing all forty passengers and crew aboard. This is the story of the memorialization that followed, from immediate, unofficial personal memorials to the ten-year effort to plan and build a permanent national monument to honor those who died. It is also the story of the unlikely community that developed through those efforts. As the country struggled to process the events of September 11, temporary memorials—from wreaths of flowers to personalized T-shirts and flags—appeared along the chain-link fences that lined the perimeter of the crash site. They served as evidence of the residents' need to pay tribute to the tragedy and of the demand for an official monument. Weaving oral accounts from Shanksville residents and family members of those who died with contemporaneous news reports and records, J. William Thompson traces the creation of the monument and explores the larger narrative of memorialization in America. He recounts the crash and its sobering immediate impact on area residents and the nation, discusses the history of and controversies surrounding efforts to permanently commemorate the event, and relates how locals and grief-stricken family members ultimately bonded with movers and shakers at the federal level to build the Flight 93 National Memorial. A heartfelt examination of memory, place, and the effects of tragedy on small-town America, this fact-driven account of how the Flight 93 National Memorial came to be is a captivating look at the many ways we strive as communities to forever remember the events that change us.

'93 Til, 2020 To be a skateboarder today is a much different experience than it was for much of the 1990s. The photographs, quotes, and anecdotal text in "93 til" captures a time in skateboarding when making a livable income as a professional skater was a luxury and public understanding of skateboarding was at an all-time low. It was a time when skateboarding was searching for an identity, a time before Instagram and big corporate influences. Street skating was coming of age, testing its limitations and aligning itself with a new and innovative style of hip-hop culture that was emerging. Looking back, many skaters today feel as though the '90s were the golden years of skateboarding. "93 til" is a captivating portal into a decade and a culture that is remembered with warmth and nostalgia. Much of the photography that Pete has unearthed for '93 til was buried in boxes for close to two decades and hasn't never been seen or published before. The 250-page book also contains several timeless images from his years shooting for SLAP and Transworld Skateboarding Magazine that will be familiar to the initiated. In addition to his stunning action shots are plenty of portraits and unguarded, candid moments that span from the late '80s up through 2004. The book reveals a raw, unapologetic perspective of a world that no longer exists.--Provided by publisher.

Flight 93 Tom McMillan, 2014-09-11 United Airlines Flight 93, which took off from Newark Airport the morning of September 11th, 2001, is perhaps the most famous flight in modern American history: We know of the passenger uprising, but there's so much more to the story besides its harrowing and oft-told climax. Amazingly, the definitive account of this seminal event has yet to be written. The book offers the most complete account of what actually took place aboard Flight 93 - from its delayed takeoff in Newark to the moment it plunged upside-down at 563 miles per hour into an open field in rural Somerset County, Pennsylvania. Flight 93 provides a riveting and complete narrative of the lead-up, event, and aftermath of the flight, based on interviews, oral histories, personal tours of the crash site and evidence recently made public. It examines the lead-up to that horrific morning; the stories of the victims who were launched into the center of history; the revolt that saved untold amounts of carnage on the ground and likely, the US Capitol; the eyewitnesses and first responders who rushed to the crash scene; the impact on family members; the effort to uncover evidence at the site; and the legacy the story leaves for future generations.

Operations Research '93 Achim Bachem, Ulrich Derigs, Michael Jünger, Rainer

Schrader,2012-12-06 This proceedings volume contains extended abstracts of talks presented at the 18th Symposium on Operations Research held at the University of Cologne, September 1-3, 1993. The Symposia on Operations Research are the annual meetings of the Gesellschaft für Mathematik, Ökonometrie und Operations Research (GMOOR), a scientific society providing a link between research and applications in the areas of applied mathematics, economics and operations research. The broad range of interests and scientific activities covered by GMOOR and its members was demonstrated by about 250 talks presented at the 18th Symposium. As in recent years, emphasis was placed on optimization and stochastics, this year with a special focus on combinatorial optimization and discrete mathematics. We appreciate that with sections on parallel and distributed computing and on scientific computing also new fields could be integrated into the scope of the GMOOR. This book contains extended abstracts of most of the papers presented at the conference. Long versions and full papers of the talks are expected to appear elsewhere in refereed periodicals. The contributions were divided into sixteen sections: (1) Theory of Optimization, (2) Computational Methods of Optimization, (3) Combinatorial Optimization and Discrete Mathematics, (4) Scientific Computing, (5) Decision Theory, (6) Mathematical Economics and Game Theory, (7) Banking, Finance and Insurance, (8) Econometrics, (9) Macroeconomics and Economic Theory, (10) Stochastics, (11) Production and Logistics, (12) System and Control Theory, (13) Routing and Scheduling, (14) Knowledge Based Systems, (15) Information Systems and (16) Parallel and Distributed Computing.

As part of a covenant, they participate in a sacred pact to hunt, kill, and eat each other.
