Panhard Armoured Car Simon Dunstan,2019-03-05 In the history of armoured fighting vehicles, there have been few that have been so successful or so extensively employed as the Panhard AML armoured car. Based on the British Ferret armoured car, the French-built Panhard AML was first used in combat during the war in Algeria in the early 1960s. Thereafter the AML has fought in numerous wars, notably in Africa, up until the present day with ongoing operations against Boko Haram in Nigeria and Chad. It also fought on the side of the Argentinians during the Falklands War in 1982, and the war on ISIS in 2016. Now with an experienced military author, who was given full and exclusive access to an AML armoured car, this is the latest modern armoured fighting vehicle to receive the Haynes treatment. The Panhard Armoured Car Enthusiasts' Manual is fully illustrated with archive photos, technical drawings and detailed photography.

Panzer III Michael Hayton,Dick Taylor,2017-02-15 When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschütz III (StuG III) assault gun, one of the most successful of the war, until the end of the war. Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK. The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

VW Kubelwagen/Schwimmwagen (VW Type 82 Kubelwagen (1940-45) / VW Type 128/166 Schwimmwagen (1941-44) Chris McNab,2015-06-15 Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.

Tank Spotter's Guide The Tank Museum,2011-05-24 Invented during World War I to break the grim deadlock of the Western Front trenches, tanks went on to revolutionize warfare. From the lightning Blitzkrieg assaults of World War II, to the great battles in the Middle Eastern desert, tanks have become one of the key components of the 'combined arms' philosophy of the modern battlefield. This pocket guide makes accessible to 'rivetheads' everywhere essential information to identify 40 of history's most fearsome tanks, including Germany's Tiger, Russia's T-34, America's Sherman and Panther, and France's FT-17. Each tank is presented with a detailed drawing to aid recognition.

Tigers in Combat Wolfgang Schneider,2020-09-01 • Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

T-34-85 Medium Tank 1944-94 Steven J. Zaloga,2013-08-20 The T-34-85 tank is one of those rare weapons that have remained in service for more than half a century. First introduced in 1944, it has seen combat in nearly every corner of the globe. Steven Zaloga and Jim Kinnear look at this long-serving tank at length. Although long obsolete in Europe, it has proven a reliable and potent weapon in many Third World conflicts, and is still in service with more than a dozen armies around the world.

Leopard 1 Main Battle Tank Owners' Workshop Manual Michael Shackleton,Michael K. Cecil,2020 The Leopard 1 family became the first fully-German developed series of armoured combat vehicles to be built since the end of the Second World War. Using the German-built version of the British L7 105mm gun the Leopard focused on firepower and with its impressive cross-country performance it was unmatched by most other tank designs of the era--

Tanks David Willey,2018-08 A century of the weapon that changed modern warfare. In 1916, for the very first time, the tank entered the military arsenals at a small engagement on the Somme. And despite its shortcomings, it altered the course of World War I. Tanks charts the weapon's first century, from its early stumbling attempts to the lethal killing machines of today: the technical developments, the various types and models, the tacticians who used them best, and the famous battles where they played a role--from Flers-Courcellette in 1916 and Kursk in 1943 to the First Gulf War and the Russo-Georgian War of 2008. The book contains images of memorabilia from the archives of The Tank Museum, including blueprints and instruction manuals. New format.

Centurion Main Battle Tank Simon Dunston,2017-04-01 First trialled in Europe in the spring of 1945, but formally introduced into British Army service in December 1946, not only is the Centurion one of the most important tanks in the history of the British armoured fighting vehicle (AFV), but it is also one of the most significant post-war Western tanks. Between 1946 and 1962, 4,423 Centurions were built in 13 basic marks and numerous variants, with the chassis also adapted for several other AFV roles. A small number of the Beach Armoured Recovery Version (BARV) served with the British forces during the Iraq War of 2003, some 58 years after the Centurion first entered service! The Centurion has seen extensive combat in the Korean War (Britain), Vietnam (Australia), the Middle East (Israel) in the 1967 Six Day War, 1973 Yom Kippur War, and during the 1978 and 1982 invasions of Lebanon, and in the Indo-Pakistan War (India) in 1965 where it fought against US-supplied M47 and M48 Patton tanks.

Tribals, Battles & Darings Alexander Clarke,2020-10-30 The conception and evolution—through inter-war tensions, global war, and years of Cold War hostility—of the Royal Navy's large fleet destroyers. The Tribal class destroyers are heroes of the Altmark incident, of the battle of Narvik, and countless actions across all theatres of operation. Yet there has been surprisingly little written about these critical ships, still less about their wartime successors, the Battle class, or their postwar incarnations, the Daring class. This book seeks to rectify this by describing the three classes, each designed under different circumstances along destroyer lines but to general-purpose light cruiser form, from the interwar period through to the 1950s, and the author explains the procurement process for each class in the context of the needs and technology of the times. Taken together these classes represent the genesis of the modern general-purpose destroyer, breaking from the torpedo boat destroyer form into a self-reliant, multi-purpose combatant capable of stepping up to the cruiser's traditional peacetime patrol missions whilst also fulfilling the picket and fighting duties of the wartime light cruiser or heavy destroyer. This is the first work to analyze these three classes side by side, to examine their conception, their creation and their operational stories, many heroic, and provide an insight into ship design, operation and culture. In doing so, the book aims to contribute a better understanding of one of the most significant periods in the Royal Navy's history. In its clear description of the genesis of the modern destroyer, this book will give the reader a clearer picture of its future as well. Historians, professionals and enthusiasts will all enjoy this wide-ranging and detailed study.

Mercenaries in Asymmetric Conflicts Scott Fitzsimmons,2013 Fitzsimmons argues that small mercenary groups must maintain a superior culture to successfully engage and defeat larger and better-equipped opponents.

The Kaiser's Cruisers, 1871-1918 Aidan Dodson,2021-11-30 While bookshelves groan with works on the capital ships of the German Third Reich, there is little in English devoted to their predecessors of the Second Reich, so this new book will fill a clear gap in its study of German cruisers of the period, from wooden-hulled corvettes, through the fusion of 'overseas' and 'home' vessels into the modern small cruisers that evolved and fought in the First World War. The book covers the full range of cruising vessels operated or ordered by the Imperial German Navy between 1871 and 1918, excluding the large cruisers, previously covered by the author's companion volume The Kaiser's Battlefleet. These include corvettes, avisos, sloops, torpedo cruisers, III- and IV-class cruisers and small cruisers, and are described and arranged in a chronological narrative. This includes both design and operational histories, the latter continuing down to the end of ships' service after the fall of Imperial Germany, and it is accompanied by an extensive selection of many rare photographs. The ships' technical details are tabulated in the second half of the book which also includes sketches of ships' internal layouts and armour and changes in appearance over time. The authors have made extensive use of archival material, particularly relating to the political and technical background to design and procurement, and present a developmental history of this ship class which is unique in the English language. It will have huge appeal to all those with an interest in the German navy and to those who have been waiting avidly for the sequel to The Kaiser's Battlefleet.
