Scientific Basis for Ayurvedic Therapies Lakshmi C. Mishra,2003-09-29 Arguably the oldest form of health care, Ayurveda is often referred to as the Mother of All Healing. Although there has been considerable scientific research done in this area during the last 50 years, the results of that research have not been adequately disseminated. Meeting the need for an authoritative, evidence-based reference, Scientific Basis for Ayurvedic Therapies is the first book to analyze and synthesize current research supporting Ayurvedic medicine. This book reviews the latest scientific information, evaluates the research data, and presents it in an easy to use format. The editor has carefully selected topics based on the availability of scientific studies and the prevalence of a disease. With contributions from experts in their respective fields, topics include Ayurvedic disease management, panchkarma, Ayurvedic bhasmas, the current status of Ayurveda in India, clinical research design, and evaluation of typical clinical trials of certain diseases, to name just a few. While there are many books devoted to Ayurveda, very few have any in-depth basis in scientific studies. This book provides a critical evaluation of literature, clinical trials, and biochemical and pharmacological studies on major Ayurvedic therapies that demonstrates how they are supported by scientific data. Providing a natural bridge from Ayurveda to Western medicine, Scientific Basis for Ayurvedic Therapies facilitates the integration of these therapies by health care providers.

Proceedings of the International Conference on Recent Cognizance in Wireless Communication & Image Processing Nitin Afzalpulkar,Vishnu Srivastava,Ghanshyam Singh,Deepak Bhatnagar,2016-04-28 This volume comprises the proceedings of the International Conference on Recent Cognizance in Wireless Communication & Image Processing. It brings together content from academicians, researchers, and industry experts in areas of Wireless Communication and Image Processing. The volume provides a snapshot of current progress in computational creativity and a glimpse of future possibilities. The proceedings include two kinds of paper submissions: (i) regular papers addressing foundation issues, describing original research on creative systems development and modeling; and (ii) position papers describing work-in-progress or research directions for computational creativity. This work will be useful to professionals and researchers working in the core areas of wireless communications and image processing.

Graph Representation Learning William L. Hamilton,2022-06-01 Graph-structured data is ubiquitous throughout the natural and social sciences, from telecommunication networks to quantum chemistry. Building relational inductive biases into deep learning architectures is crucial for creating systems that can learn, reason, and generalize from this kind of data. Recent years have seen a surge in research on graph representation learning, including techniques for deep graph embeddings, generalizations of convolutional neural networks to graph-structured data, and neural message-passing approaches inspired by belief propagation. These advances in graph representation learning have led to new state-of-the-art results in numerous domains, including chemical synthesis, 3D vision, recommender systems, question answering, and social network analysis. This book provides a synthesis and overview of graph representation learning. It begins with a discussion of the goals of graph representation learning as well as key methodological foundations in graph theory and network analysis. Following this, the book introduces and reviews methods for learning node embeddings, including random-walk-based methods and applications to knowledge graphs. It then provides a technical synthesis and introduction to the highly

successful graph neural network (GNN) formalism, which has become a dominant and fast-growing paradigm for deep learning with graph data. The book concludes with a synthesis of recent advancements in deep generative models for graphs—a nascent but quickly growing subset of graph representation learning.

Proceeding of the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017) Vijay Nath,Jyotsna Kumar Mandal,2018-07-30 The volume presents high quality papers presented at the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017). The book discusses recent trends in technology and advancement in MEMS and nanoelectronics, wireless communications, optical communication, instrumentation, signal processing, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems, and sensor network applications. It includes original papers based on original theoretical, practical, experimental, simulations, development, application, measurement, and testing. The applications and solutions discussed in the book will serve as a good reference material for future works.

Federated Learning Qiang Qiang Yang,Yang Yang Liu,Yong Yong Cheng,Yan Yan Kang,Tianjian Tianjian Chen,Han Han Yu,2022-06-01 How is it possible to allow multiple data owners to collaboratively train and use a shared prediction model while keeping all the local training data private? Traditional machine learning approaches need to combine all data at one location, typically a data center, which may very well violate the laws on user privacy and data confidentiality. Today, many parts of the world demand that technology companies treat user data carefully according to user-privacy laws. The European Union's General Data Protection Regulation (GDPR) is a prime example. In this book, we describe how federated machine learning addresses this problem with novel solutions combining distributed machine learning, cryptography and security, and incentive mechanism design based on economic principles and game theory. We explain different types of privacy-preserving machine learning solutions and their technological backgrounds, and highlight some representative practical use cases. We show how federated learning can become the foundation of next-generation machine learning that caters to technological and societal needs for responsible AI development and application.

Scaling New Heights Sabyasachi Mitra,Rana Hasan,Manoj Sharma,Hoe Yun Jeong,Manish Sharma,Arindam Guha,2016-05-01 Spanning more than 800 kilometers of India's eastern coastline, the Vizag-Chennai Industrial Corridor (VCIC) is part of the country's East Coast Economic Corridor. This initiative can help unify the large domestic market as well as integrate the Indian economy with the dynamic global value chains of Asia and drive India's Act East policy. VCIC will also be an important component of the government's Make in India campaign to attract foreign investors and encourage the creation of manufacturing hubs in the country. The new industrial corridor is expected to spur growth by augmenting existing investment in world-class transport networks, infrastructure, and industrial and urban clusters that are supported by a robust institutional framework and a competitive business environment. By linking areas that are lagging in development with dynamic industrial and urban clusters, VCIC will create employment opportunities that alleviate poverty and reduce inequality. As a coastal corridor, VCIC can provide multiple access points to international gateways. Greater connectivity and economic integration between South Asia and the rest of Asia is likely to contribute significantly to development and foster regional cooperation as well.

Representation Learning for Natural Language Processing Zhiyuan Liu,Yankai Lin,Maosong Sun,2020-07-03 This open access book provides an overview of the recent advances in representation learning theory, algorithms and applications for natural language processing (NLP). It is divided into three parts. Part I presents the

representation learning techniques for multiple language entries, including words, phrases, sentences and documents. Part II then introduces the representation techniques for those objects that are closely related to NLP, including entity-based world knowledge, sememe-based linguistic knowledge, networks, and cross-modal entries. Lastly, Part III provides open resource tools for representation learning techniques, and discusses the remaining challenges and future research directions. The theories and algorithms of representation learning presented can also benefit other related domains such as machine learning, social network analysis, semantic Web, information retrieval, data mining and computational biology. This book is intended for advanced undergraduate and graduate students, post-doctoral fellows, researchers, lecturers, and industrial engineers, as well as anyone interested in representation learning and natural language processing.

Nollywood Jonathan Haynes, 2016-10-04 The English-language branch of the Nigerian film industry, Nollywood, has become the third largest in the world. Nollywood films saturate Nigeria and have spread across the African continent, achieving an astonishing extent and depth of cultural influence. They are the most important modern cultural form to come out of Africa. In this book, Jonathan Haynes aims to map out the cultural terrain of Nollywood films much more comprehensively and ambitiously than has been to date. He in effect establishes a canon for Nollywood films. The book is organized around the historical development of Nollywood film culture, which is explored with close attention to the recent history of Nigeria. Throughout the book, genre (defined with reference to common usage in Nigerian film markets) is the principal framework. Thus after establishing a sense of the material and social circumstances out of which Nollywood was born and exploring a few landmark films, Haynes analyzes the durable set of themes and plot types that dominate the industry and reveal deeply embedded tensions in contemporary Nigerian life. These genres include family films and romances, village films, cultural epics, political films, films made in or about the Nigerian diaspora, and campus films. Haynes concludes by offering some remarks on the future of Nollywood, exploring the buzz around a New Nollywood of films with higher budgets fit for international film festivals and widespread screening in cinemas in Nigeria and abroad.

How to Cook Indian Sanjeev Kapoor, 2011-05-27 The renowned Indian chef shares a collection of classic recipes with easy-to-find ingredients—including biryanis, samosas, chutneys and more! Sanjeev Kapoor burst onto India's culinary scene with an easy, no-fuss cooking approach. Now he introduces American audiences to his simple-yet-satisfying style with the only Indian cookbook you'll ever need. *How to Cook Indian* covers the depth and diversity of Indian recipes, including such favorites as butter chicken, palak paneer, and samosas, along with less-familiar dishes that are sure to become new favorites, including soups and shorbas; kebabs, snacks, and starters; main dishes; pickles and chutneys; breads; and more. The ingredients are easy to find, and suggested substitutions make these simple recipes even easier.

College Admissions Stuart White, 2017-11-29 Packed with resources to help parents make sense of the college application process, conduct a college search, and help guide their child's completion of their college application. The author has included a variety of tools to compare one school to another, keep track of important application deadlines, and track possible scholarship aid. Readers from around the world have praised its value to parents who want to make sense of the college gauntlet without hovering and taking control away from their children. One reviewer has written: Stuart White's new book takes a unique focus on the role of the parent of one of the hundreds of thousands of overachieving high schoolers. Whereas most books are written for parents that micro manage and compel their children into the high achiever stereotype, Prof. White's book centers on a rather beautiful love story between him and his daughter as she went through the college admission process. Another reader

has written: Thank you for sharing your helpful guide to the college application process. I have read many articles and listened to many podcasts regarding the process, yet still learned more from your book; I appreciated your openness and candidness regarding helicopter parenting. I think it's important to include that advice in this book, as most people reading a book like this will lean toward the helicopter side of parenting. The author's side by side journey with his daughter ended with her admission to Yale University.

Microbes in Sustainable Agriculture Mohammad Saghir Khan, Almas Zaidi, Javed Musarrat, 2008 The major aim of microbes in sustainable agriculture is to provide unique collection of data and a holistic view of the subject while presenting more current ideas in the field where significant advances have been made. Collectively, this book provides recent coverage of the role of microbes in sustainability of agronomic practices and thus is likely to be of tremendous value to the students, scientists, teachers of microbiology, biotechnology, environmental biology, agronomy, plant physiology and plant protection, who are interested in this area. Each chapter in this book has been contributed by a qualified team of teachers/scientists. In this context, the current state of knowledge in a specialised field is reviewed without compromising the basic conceptual frame work presented in this book. A concerted effort has been made by editors/authors to bring in quality presentation. This book thus addresses a lot of common queries and of course some odd ones that bring an interesting approach to problems solving in agricultural practices with optimum application of diverse microbes. This book presents readers with stimulation to forge thought in a non-conventional way to understand complex issues as it addresses many problems previously ignored. This book serves as an important source because of its unique compilation of data and text on the application and importance of microbes in crop productivity to achieve global food security.

Capitalism and Modern Social Theory Anthony Giddens, 1973-02-08 Giddens's analysis of the writings of Marx, Durkheim and Weber has become the classic text for any student seeking to understand the three thinkers who established the basic framework of contemporary sociology. The first three sections of the book, based on close textual examination of the original sources, contain separate treatments of each writer. The author demonstrates the internal coherence of their respective contributions to social theory. The concluding section discusses the principal ways in which Marx can be compared with the other two authors, and discusses misconceptions of some conventional views on the subject.

Disability Studies in India Nilika Mehrotra, 2020-04-02 This book examines the state of art in disability studies, focusing on the Indian context, as well as the broader South Asian situation. It presents interdisciplinary perspectives on the basic idea, evolution, practices and challenges of researching and teaching disability studies at various higher education institutions and in other civil society spaces. The chapters address a range of related themes, including activism, development policies, research, pedagogy, spatial and social access, caste and gender representations and rights-based discourses. Given the scope of its coverage, the book is of interest to scholars and students in area of humanities, education, law, sociology and social work, political science development and disability studies.

PEDAGOGY OF SOCIAL SCIENCES MANGAL, S. K., MANGAL, UMA, 2018-01-01 Written in an easy-to-understand style, the text has been thoroughly revised in tune with the spirit and need of the new nomenclature Pedagogy of Social Sciences in place of the old designation Teaching of Social Studies. It reflects on the theoretical knowledge and

practical skills required to teach Social Sciences in an effective manner. Introducing new chapters, the second edition of the book mainly focuses on improving the methodological concepts of the Social Sciences teachers. In doing so, it covers various strategies and devices of teaching Social Sciences, e-learning in Social Sciences, e-learning resources in Social Sciences, and professional growth of the Social Sciences teacher. Besides, the chapters of the previous edition have been updated, with the required information given in various new sections. This book is suitable for a course on 'Pedagogy of Social Sciences' for the students of B.Ed. and M.A. (Education). It can also be used for the in-service teacher education programmes organized by the Central and State education boards. NEW TO THE SECOND EDITION □ In addition to the four new chapters, the book now incorporates several new sections: • Concept and meaning of the term Social Sciences; distinguishing the subject Social Sciences from Natural Sciences and the subject Social Studies; justification for using the term teaching/pedagogy of Social Sciences in place of teaching/pedagogy of Social Studies (Chapter 1) • Bloom's revised taxonomy, 2001 (Chapter 4) • Views of NCF and Focus Group (NCERT) about curriculum at the various stages of school education (Chapter 5) • Survey method and cooperative learning method for the teaching of Social Sciences (Chapter 7) • Reference books in Social Sciences (Chapter 9) • Atlases, newspapers, digital audio recorders and players and documentaries as instructional material or teaching aids (Chapter 11) • Question banks, grading system, open book examinations and use of rubrics as the means and ways for improving the evaluation programmes in Social Sciences (Chapter 23) □ Also, the chapter on 'Relationship of Social Studies with other Subjects' has been replaced with a more comprehensive and detailed chapter on 'Correlation in Social Sciences' (Chapter 6). KEY FEATURES □ Chapter-end summary and study questions to help readers review the important topics and drill the concept discussed, respectively. □ Numerous figures and tables to facilitate easy understanding of the concepts. □ References and Suggested Readings to provide scope for further reading.

Intelligent Manufacturing and Energy Sustainability A.N.R. Reddy, Deepak Marla, Milan Simic, Margarita N. Favorskaya, Suresh Chandra Satapathy, 2020-02-14 This book includes selected, high-quality papers presented at the International Conference on Intelligent Manufacturing and Energy Sustainability (ICIMES 2019) held at the Department of Mechanical Engineering, Malla Reddy College of Engineering & Technology (MRCET), Maisammaguda, Hyderabad, India, from 21 to 22 June 2019. It covers topics in the areas of automation, manufacturing technology and energy sustainability.

World Development Report 2018 World Bank Group, 2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to

make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.
