**Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110)** Boris Chertok, 2005-01-01 Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was deputy to the founding figure of the Soviet space program, the mysterious Chief Designer Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

**The First Soviet Cosmonaut Team** Colin Burgess, Rex Hall, 2009-03-27 The First Soviet Cosmonaut Team will relate who these men were and offer far more extensive background stories, in addition to those of the more familiar names of early Soviet space explorers from that group. Many previously-unpublished photographs of these "missing" candidates will also be included for the first time in this book. It will be a detailed, but highly readable and balanced account of the history, training and experiences of the first group of twenty cosmonauts of the USSR. A covert recruitment and selection process was set in motion throughout the Soviet military in August 1959, just prior to the naming of America's Mercury astronauts. Those selected were ordered to report for training at a special camp outside of Moscow in the spring of 1960. Just a year later, Senior Lieutenant Yuri Gagarin of the Soviet Air Force (promoted in flight to the rank of major) was launched aboard a Vostok spacecraft and became the first person ever to achieve space flight and orbit the Earth.

**Ilyushin IL-76** Yefim Gordon, Dmitriy Kommissarov, Sergey Komissarov, 2001 A familiar sight both in military and worldwide commercial use, the Ilyushin IL-76 was the Soviet's answer to the Lockheed Starlifter. Compiled by noted Russian aviation writers and historians from a wealth of first-hand Russian sources, this book is a comprehensive history of each variant and its service. Extensive tables detail each aircraft built with complete notes on every operator—both civil and military—and their fleets. For military enthusiasts and modelers.

**China and the Global Economy** Peter Nolan, 2001-05-10 This text tells the story of China's emergence as a major economic power and the impact this will have on world business. It is an executive summary of the opportunities for business in one of the largest markets in the world.

**Chernobyl Record** R.F Mould, 2000-05-01 The nuclear accident at Chernobyl on April 26, 1986 had a heavy impact on life, health, and the environment. It caused agony to people in the Ukraine, Belarus, and Russia and anxiety far away from these countries. The economic losses and social

dislocation were severe in a region already under strain. It is now possible to make more accurate assessments of these effects than it was in the first few years following the catastrophe. An internationally known author, speaker, and medical physicist, Dr. Mould visited the Chernobyl Nuclear Power Station in December 1987 and in June 1998. *Chernobyl Record: The Definitive History of the Chernobyl Catastrophe* begins with a brief description of why the accident occurred and of eye witness accounts. The book then examines the early medical response and follow up of patients with acute radiation syndrome, including power plant workers and liquidators, the evacuation and resettlement, the current and future status of the sarcophagus, dose measurement and estimation methods, population doses, the contamination of the environment, psychological illness in adults and thyroid cancer in children, and the predicted cancer incidence in the 21st century, including leukemia and solid cancers. Highly illustrated, the book includes color photographs of the early and late effects on the skin of firemen who fought the blaze, the control room where operators survived, the damage inside the sarcophagus, and the remaining radioactive fuel masses within the sarcophagus, such as the so-called Elephant's Foot mass for which samples were chipped off using Kalashnikov rifles. Authored by a member of the UK Government Delegation that attended the first post-accident conference in August 1986 at the IAEA in Vienna, the book also covers the accidents at Three Mile Island, Kyshtym, and Tokaimura; the effects of the Hiroshima and Nagasaki atomic bombs; and information concerning the semi-palatinsk nuclear weapons test site in the former USSR.

**Challenges to Security in Space** Defense Intelligence Agency,2019-03-18 Today, space has become a seamless part of many military and civilian activities. The advantages the United States holds in space capabilities will drive some nations to improve their abilities to access and operate in space. Moreover, some actors will seek counterspace capabilities that target the perceived United States and allied reliance on space, including the ability to use secure satellite communications, precision strike capabilities, and ISR assets. As the number of spacefaring nations grows and as some actors integrate space and counterspace capabilities into military operations, these trends will pose a challenge to U.S. space dominance and present new risks for assets on orbit.

*From World War to Cold War* David Reynolds,2006-02-23 The 1940s was probably the most dramatic and decisive decade of the 20th century. This volume explores the Second World War and the origins of the Cold War from the vantage point of two of the great powers of that era, Britain and the USA, and of their wartime leaders, Churchill and Roosevelt. It also looks at their chequered relations with Stalin and at how the Grand Alliance crumbled into an undesired Cold War. But this is not simply a story of top-level diplomacy. David Reynolds explores the social and cultural implications of the wartime Anglo-American alliance, particularly the impact of nearly three million GIs on British life, and reflects more generally on the importance of cultural issues in the study of international history. This book persistently challenges popular stereotypes - for instance on Churchill in 1940 or his Iron Curtain speech. It probes cliches such as 'the special relationship' and even 'the Second World War'. And it offers new views of the familiar, such as the Fall of France in 1940 or Franklin Roosevelt as 'the wheelchair president'. Incisive and readable, written by a leading international historian, these essays encourage us to rethink our understanding of this momentous period in world history.

**From Munich to Pearl Harbor** David Reynolds, 2002-08-05 A master historian's provocative new interpretation of FDR's role in the coming of World War II. Brilliant. —Arthur M. Schlesinger, Jr. American Ways Series.

In Command of History David Reynolds, 2012-09-19 Winston Churchill was one of the giants of the twentieth century. As Britain's prime minister from 1940 to 1945, he courageously led his nation and the world away from appeasement, into war, and on to triumph over the Axis dictators. His classic six-volume account of those years, *The Second World War*, has shaped our perceptions of the conflict and secured Churchill's place as its most important chronicler. Now, for the first time, a book explains how Churchill wrote this masterwork, and in the process enhances and often revises our understanding of one of history's most complex, vivid, and eloquent leaders. *In Command of History* sheds new light on Churchill in his multiple, often overlapping roles as warrior, statesman, politician, and historian. Citing excerpts from the drafts and correspondence for Churchill's magnum opus, David Reynolds opens our eyes to the myriad forces that shaped its final form. We see how Churchill's manuscripts were vetted by Whitehall to conceal secrets such as the breaking of the Enigma code by British spymasters at Bletchley Park, and how Churchill himself edited the volumes to avoid offending postwar statesmen such as Tito, Charles de Gaulle, and Dwight D. Eisenhower. We explore his confusions about the true story of the atomic bomb, learn of his second thoughts about Stalin, and watch him repackage himself as a consistent advocate of the D-Day landings. *In Command of History* is a major work that forces us to reconsider much received wisdom about World War II. It also peels back the covers from an unjustly neglected period of Churchill's life, his "second wilderness" years, 1945—1951. During this time Churchill, now over seventy, wrote himself into history, politicked himself back into 10 Downing Street, and delivered some of the most vital oratory of his career, including his pivotal "iron curtain" speech. Exhaustively researched and dazzlingly written, this is a revelatory portrait of one of the world's most profiled figures, a work by a historian in full command of his craft. "A fascinating account that accomplishes the impossible: [Reynolds] actually finds something new and interesting to say about one of the most chronicled characters of all time." —The New York Times Book Review A New York Times NOTABLE BOOK OF THE YEAR A BEST HISTORY OF THE YEAR SELECTION —The New York Sun NOTE: This edition does not include photographs.

One World Divisible David Reynolds, 2000 A new volume in the Global Century series, this masterful history of the world in our time captures the ground-level drama of events and the larger contours of change during a period of global transformation.
