**Measuring What Matters Most** Daniel L. Schwartz, Dylan Arena, 2013 An argument that choice-based, process-oriented educational assessments are more effective than static assessments of fact retrieval. If a fundamental goal of education is to prepare students to act independently in the world--in other words, to make good choices--an ideal educational assessment would measure how well we are preparing students to do so. Current assessments, however, focus almost exclusively on how much knowledge students have accrued and can retrieve. In *Measuring What Matters Most*, Daniel Schwartz and Dylan Arena argue that choice should be the interpretive framework within which learning assessments are organized. Digital technologies, they suggest, make this possible; interactive assessments can evaluate students in a context of choosing whether, what, how, and when to learn. Schwartz and Arena view choice not as an instructional ingredient to improve learning but as the outcome of learning. Because assessments shape public perception about what is useful and valued in education, choice-based assessments would provide a powerful lever in this reorientation in how people think about learning. Schwartz and Arena consider both theoretical and practical matters. They provide an anchoring example of a computerized, choice-based assessment, argue that knowledge-based assessments are a mismatch for our educational aims, offer concrete examples of choice-based assessments that reveal what knowledge-based assessments cannot, and analyze the practice of designing assessments. Because high variability leads to innovation, they suggest democratizing assessment design to generate as many instances as possible. Finally, they consider the most difficult aspect of assessment: fairness. Choice-based assessments, they argue, shed helpful light on fairness considerations.

There are over one hundred language families in this region alone. Contributors from around the world explore the history and structure of these languages, combining insights from archaeology and genetics with innovative linguistic analysis. The book aims to uncover regional patterns and potential deeper genealogical relations between the languages. Based on a large-scale database of features from sixty languages, the book analyses major language families such as Tupian and Arawakan, as well as the Quechua/Aymara complex in the Andes, the Isthmo-Colombian region and the Andean foothills. *The Race of Sound* Nina Sun Eidsheim, 2018-12-06 In *The Race of Sound* Nina Sun Eidsheim traces the ways in which sonic attributes that might seem natural, such as the voice and its qualities, are socially produced. Eidsheim illustrates how listeners measure race through sound and locate racial subjectivities in

vocal timbre—the color or tone of a voice. Eidsheim examines singers Marian Anderson, Billie Holiday, and Jimmy Scott as well as the vocal synthesis technology Vocaloid to show how listeners carry a series of assumptions about the nature of the voice and to whom it belongs. Outlining how the voice is linked to ideas of racial essentialism and authenticity, Eidsheim untangles the relationship between race, gender, vocal technique, and timbre while addressing an undertheorized space of racial and ethnic performance. In so doing, she advances our knowledge of the cultural-historical formation of the timbral politics of difference and the ways that comprehending voice remains central to understanding human experience, all the while advocating for a form of listening that would allow us to hear singers in a self-reflexive, denaturalized way.

**Turkish Cultural Policies in a Global World** Muriel Girard, Jean-François Polo, Clémence Scalbert-Yücel, 2018-01-16 This book provides a multidisciplinary analysis of the production of Turkish cultural policies in the context of globalization and of the circulation of knowledge and practices. Focusing on circulations, the book proposes an innovative approach to the transfer of cultural policies, considering them in terms of co-production and synchrony. This argument is developed through an examination of circulations at the international, national, and local levels; employing original empirical data and case study analyses. Divided into three parts the book first examines the Kemalist legacy, before turning to the cultural policies developed under the AKP's leadership, and concludes by investigating the production of cultural policies in the outlying regions of Turkey. The authors shed new light on the particular importance of culture to the understanding of the societal upheavals in contemporary Turkey. By considering exchanges as circulations rather than one-way impositions, this book also advances our understanding of how territories are (re)defined by culture and makes a significant contribution to the interrogation of the concept of "Westernization". This book brings into clear focus the reconfigurations currently taking place in Turkish cultural policy, demonstrating that while they are driven by the ruling party, they are also the work of civil society actors. It convincingly argues that an authoritarian turn need not necessarily spell the end of the cultural scene, and highlights the innovative adaptations and resistance

strategies used in this context. This book will appeal to students and scholars of public policy, sociology and cultural studies.

**Popular Music, Technology, and the Changing Media Ecosystem** Tamas Tofalvy, Emília Barna, 2020-05-02 This book explores the relationships between popular music, technology, and the changing media ecosystem. More precisely, it looks at infrastructures and practices of music making and consuming primarily in the post-Napster era of digitization – with some chapters looking back on the technological precursors to digital culture – marked by the emergence of digital tools and platforms such as YouTube or Spotify. The first section provides a critical overview of theories addressing popular music and digital technology, while the second section offers an analysis of the relationship between musical cultures, taste, constructions of authenticity, and technology. The third section offers case studies on the materialities of music consumption from outside the western core of popular music production.
