Ready Player Two Ernest Cline, 2020-11-24 #1 NEW YORK TIMES BESTSELLER • The thrilling sequel to the beloved worldwide bestseller *Ready Player One*, the near-future adventure that inspired the blockbuster Steven Spielberg film. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST • “The game is on again. . . . A great mix of exciting fantasy and threatening fact.”—The Wall Street Journal AN UNEXPECTED QUEST. TWO WORLDS AT STAKE. ARE YOU READY? Days after winning OASIS founder James Halliday’s contest, Wade Watts makes a discovery that changes everything. Hidden within Halliday’s vaults, waiting for his heir to find, lies a technological advancement that will once again change the world and make the OASIS a thousand times more wondrous—and addictive—than even Wade dreamed possible. With it comes a new riddle, and a new quest—a last Easter egg from Halliday, hinting at a mysterious prize. And an unexpected, impossibly powerful, and dangerous new rival awaits, one who’ll kill millions to get what he wants. Wade’s life and the future of the OASIS are again at stake, but this time the fate of humanity also hangs in the balance. Lovingly nostalgic and wildly original as only Ernest Cline could conceive it, *Ready Player Two* takes us on another imaginative, fun, action-packed adventure through his beloved virtual universe, and jolts us thrillingly into the future once again.

Singing the Body Electric: The Human Voice and Sound Technology Miriama Young, 2016-03-03 *Singing the Body Electric* explores the relationship between the human voice and technology, offering

startling insights into the ways in which technological mediation affects our understanding of the voice, and more generally, the human body. From the phonograph to magnetic tape and now to digital sampling, Miriama Young visits particular musical and literary works that define a century-and-a-half of recorded sound. She discusses the way in which the human voice is captured, transformed or synthesised through technology. This includes the sampled voice, the mechanical voice, the technologically modified voice, the pliable voice of the digital era, and the phenomenon by which humans mimic the sounding traits of the machine. The book draws from key electro-vocal works spanning a range of genres - from Luciano Berio's *Thema: Omaggio a Joyce* to Radiohead, from Alvin Lucier's *I Am Sitting in a Room*, to Björk, and from Pierre Henry's *Variations on a Door and a Sigh* to Christian Marclay's *Maria Callas*. In essence, this book transcends time and musical style to reflect on the way in which the machine transforms our experience of the voice. The chapters are interpolated by conversations with five composers who work creatively with the voice and technology: Trevor Wishart, Katharine Norman, Paul Lansky, Eduardo Miranda and Bora Yoon. This book is an interdisciplinary enterprise that combines music aesthetics and musical analysis with literature and philosophy.

Culture Management Lukasz Wroblewski, 2017-01-30
Dr Lukasz Wroblewski's book *Culture Management: Strategy and Marketing Aspects* clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based

on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future. Dr Kim Lehman Tasmanian School of Business and Economics, University of Tasmania Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product. Dr Bonita M. Kolb Professor Emeritus of Lycoming College in Pennsylvania A thoughtful and penetrating analysis of culture management addressing marketing strategies and cultural institutions. An important 'must read' book for those involved in this exciting sector. Prof Adrian Payne University of UNSW Business School, University of New South Wales

Idols and Celebrity in Japanese Media Culture P. W. Galbraith, J. G. Karlin, 2012-08-30 This is the most complete and compelling account of idols and celebrity in Japanese media culture to date.

Engaging with the study of media, gender and celebrity, and sensitive to history and the contemporary scene, these interdisciplinary essays cover male and female idols, production and consumption, industrial structures and fan movements.

The Cambridge Companion to Music in Digital Culture Nicholas Cook, Monique M. Ingalls, David Trippett, 2019-09-19 Digital technology has profoundly transformed almost all aspects of musical culture. This book explains how and why.

The Race of Sound Nina Sun Eidsheim, 2018-12-06 In *The Race of Sound* Nina Sun Eidsheim traces the ways in which sonic attributes that might seem natural, such as the voice and its qualities, are socially produced. Eidsheim illustrates how listeners measure race through sound and locate racial subjectivities in vocal timbre—the color or tone of a voice. Eidsheim examines singers Marian Anderson, Billie Holiday, and Jimmy Scott as well as the vocal synthesis technology Vocaloid to show how listeners carry a series of assumptions about the nature of the voice and to whom it belongs. Outlining how the voice is linked to ideas of racial essentialism and authenticity, Eidsheim untangles the relationship between race, gender, vocal technique, and timbre while addressing an undertheorized space of racial and ethnic performance. In so doing, she advances our knowledge of the cultural-historical formation of the timbral politics of difference and the ways that comprehending voice remains central to understanding human experience, all the while advocating for a form of listening that would

allow us to hear singers in a self-reflexive, denaturalized way.

Machine Landscapes Liam Young, 2019-02-11 The

most significant architectural spaces in the world are now entirely empty of people. The data centres, telecommunications networks, distribution warehouses, unmanned ports and industrialised agriculture that define the very nature of who we are today are at the same time places we can never visit. Instead they are occupied by server stacks and hard drives, logistics bots and mobile shelving units, autonomous cranes and container ships, robot vacuum cleaners and internet-connected toasters, driverless tractors and taxis. This issue is an atlas of sites, architectures and infrastructures that are not built for us, but whose form, materiality and purpose is configured to anticipate the patterns of machine vision and habitation rather than our own. We are said to be living in a new geological epoch, the Anthropocene, in which humans are the dominant force shaping the planet. This collection of spaces, however, more accurately constitutes an era of the Post-Anthropocene, a period where it is technology and artificial intelligence that now computes, conditions and constructs our world. Marking the end of human-centred design, the issue turns its attention to the new typologies of the post-human, architecture without people and our endless expanse of Machine Landscapes. Contributors: Rem Koolhaas, Merve Bedir and Jason Hilgefort, Benjamin H Bratton, Ingrid Burrington, Ian Cheng, Cathryn Dwyre, Chris Perry, David Salomon and Kathy Velikov, John Gerrard, Alice Gorman, Adam Harvey, Jesse LeCavalier, Xingzhe Liu, Clare Lyster, Geoff Manaugh, Tim Maughan, Simone C Niquille, Jenny Odell, Trevor Paglen, Ben

Roberts. Featured interviews: Deborah Harrison, designer of Microsoft's Cortana; and Paul Inglis, designer of the urban landscapes of Blade Runner 2049.

Augmented Reality Art Vladimir

Geroimenko, 2014-06-17 Written by a team of world-renowned artists, researchers and practitioners - all pioneers in using augmented reality based creative works and installations as a new form of art - this is the first book to explore the exciting new field of augmented reality art and its enabling technologies. As well as investigating augmented reality as a novel artistic medium the book covers cultural, social, spatial and cognitive facets of augmented reality art. Intended as a starting point for exploring this new fascinating area of research and creative practice it will be essential reading not only for artists, researchers and technology developers, but also for students (graduates and undergraduates) and all those interested in emerging augmented reality technology and its current and future applications in art.

Media Convergence in Japan Various, 2016-05-20

The Japanese media system is in a state of flux as a result of shifts in the digital economy, new audience metrics and declining print and broadcast revenues. This volume examines issues of media consolidation, participatory culture and franchising in contemporary Japan, and explores how the Japanese media system is adapting to change in light of its tendency toward prioritizing domestic markets, restricting access and co-opting fan movements. The chapters consider

conflict and negotiations within the Japanese media system, structural transformations, emerging modes of producer and audience relations and potential sites of innovation.

The Anime Machine Thomas Lamarre, 2013-11-30
Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi,

and CLAMP's manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the "animetic machine" encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

Popular Music, Technology, and the Changing Media Ecosystem Tamas Tofalvy, Emília Barna, 2020-05-02 This book explores the relationships between popular music, technology, and the changing media ecosystem. More precisely, it looks at infrastructures and practices of music making and consuming primarily in the post-Napster era of digitization – with some chapters looking back on the technological precursors to digital culture – marked by the emergence of digital tools and platforms such as YouTube or Spotify. The first section provides a critical overview of theories addressing popular music and digital technology, while the second section offers an analysis of the relationship between musical cultures, taste, constructions of authenticity, and technology. The third section offers case studies on the materialities of music consumption from outside the western core of popular music production. The final section reflects on music scenes and the uses and discourses of social media.

Reload Mary Flanagan, Austin Booth, 2002-05-03 An

anthology of feminist cyberfiction and theoretical and critical writings on gender and technoculture. Most writing on cyberculture is dominated by two almost mutually exclusive visions: the heroic image of the male outlaw hacker and the utopian myth of a gender-free cyberworld. Reload offers an alternative picture of cyberspace as a complex and contradictory place where there is oppression as well as liberation. It shows how cyberpunk's revolutionary claims conceal its ultimate conservatism on matters of class, gender, and race. The cyberfeminists writing here view cyberculture as a social experiment with an as-yet-unfulfilled potential to create new identities, relationships, and cultures. The book brings together women's cyberfiction—fiction that explores the relationship between people and virtual technologies—and feminist theoretical and critical investigations of gender and technoculture. From a variety of viewpoints, the writers consider the effects of rapid and profound technological change on culture, in particular both the revolutionary and reactionary effects of cyberculture on women's lives. They also explore the feminist implications of the cyborg, a human-machine hybrid. The writers challenge the conceptual and institutional rifts between high and low culture, which are embedded in the texts and artifacts of cyberculture.

Comedy for Animators Jonathan Lyons, 2015-11-19
While comedy writers are responsible for creating clever scripts, comedic animators have a much more complicated problem to solve: What makes a physical character funny? Comedy for Animators

breaks down the answer by exploring the techniques of those who have used their bodies to make others laugh. Drawing from traditions such as commedia dell'arte, pantomime, Vaudeville, the circus, and silent and modern film, animators will learn not only to create funny characters, but also how to execute gags, create a comic climate, and use environment as a character. Whether you're creating a comic villain or a bumbling sidekick, this is the one and only guide you need to get your audience laughing! Explanation of comedic archetypes and devices will both inspire and inform your creative choices Exploration of various modes of storytelling allows you to give the right context for your story and characters Tips for creating worlds, scenarios, and casts for your characters to flourish in Companion website includes example videos and further resources to expand your skillset--check it out at www.comedyforanimators.com! Jonathan Lyons delivers simple, fun, illustrated lessons that teach readers to apply the principles of history's greatest physical comedians to their animated characters.
