Beetle Love N. Kneissler, 2018 - A tribute to the Volkswagen Beetle, the most-loved car in the world - Glorious photographs throughout Beetle Love endures. It's global and conquers every generation. And this love is classless. Never mind if used as a taxi on a daily basis, as a company car owned by a craft brewery in Ecuador, as a show piece in Great Britain or as a family heirloom in Indonesia: Beetle Love introduces them all. Convertibles and limousines, from red to rusty, from purple to polished. And it's always the story that their owners lost their hearts to the Beetle. And rightly so! Hardly any other car arouses more emotions around the world. All covered in this book, more than 20 stories, 208 pages, a wonderful and unique picture and story book. Text in English and German.

How to Build a Patina Volkswagen Mark Walker, 2020-05-12 The explosion of Patina Volkswagens on social media has inspired those car fanatics who realise that you don't have to restore a car to end up with a good-looking ride. At last, you can stand out from the crowd, even on a tight budget. The look of the cars that result from patina builds is honest, unspoiled, and characterful; it has also inspired the media, movie stars and celebrities. Interest in patination has undoubtedly resulted in increased car values, and turned a brand of cars that had

always been a cheap, honest mode of transportation into something cool with a high price tag. The people the look initially inspired have grown with the hobby, finding ways to still be cool on a tight budget and producing a micro-industry that still manages to embrace the 'built not bought' ethos. How to Build a Patina Volkswagen book takes a look at the differing styles of patina VW build, and imparts tips on finding and buying a project car, carrying out a sympathetic patina style renovation and includes a chapter on re-creating a patina finish on repaired areas or missing parts.

The Trail Back Out Jadi Campbell, 2020-08-19 This collection is Jadi Campbell's fourth book and her first finished work in four years. She completed many of these stories during the coronavirus lockdown. From tales of Eddie, high on LSD and trapped by What Died in the Fridge, and a compulsive gambler hiding during a Category Five storm in Better Weather, to the luminous title story of two strangers meeting by chance in the backwoods during a pandemic, her stories describe the pain and humor of being alive. Included in this collection are Rules to Live By, a funny and deeply thoughtful story about what we choose to teach our children. The author examines our responsibility to others when a hunter is shot and left for dead in The Green Under the Snow. In Do Dreams Float? a wife considers a hit-man's offer of revenge. And the eternal search for happiness is carried out by a gloomy little girl nicknamed Princess Rain Clouds. In ten stories, Campbell paints vivid descriptions of everyday life in

strange times. Whether during the upheaval of the last century or the present COVID-19 crisis, The Trail Back Out guides the reader through a labyrinth of questions about how to live and love.

My Bug Michael J. Rosen,1999-01-10 Volkswagon owners get dewey-eyed with nostalgia just thinking about their old Beetles. This was a vehicle of a thousand stories, and My Bug presents some of the best of them in all their tie-dyed glory. More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back.

The Algorithmic Image Robert Rivlin, 1986

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution

of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
